The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL, Secretary.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock, noon, Monday, December 8, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work

required for the construction and erection of a Gymnasium Building at the State Normal School, San Jose, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a sum of the bond or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five (\$5.00) Dollars will be required on the part of the bidder, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposal for Gymnasium Building, State Normal School, San Jose, California."

(Signed)

W. F. McCLURE,
State Engineer. (S)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 2 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The dwelling, designed for an eight room house with bath and sleeping porch, will be erected on a portion of the property at the southwest corner of Larkin and Greenwich streets. Interior will be finished in pine with some hardwood veneer and white enamel. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the dwelling will be covered with rustic and shiplap. Plans are being prepared.

RESIDENCES — 3 2 story and base, frame, \$3,000 each. San Francisco. Architect, none. Owner, Fernando Nelson, 30 Presidio Terrace, S. F. These houses will be erected on property at the northeast corner of 16th avenue and California street. Each dwelling will contain six rooms and bath. Interiors will be finished in pine with some veneer hardwood. Oak floors will be used in the living and dining rooms and reception halls. There will be open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with rustic, shiplap and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, Oscar Heyman and Bro., 742 Market street, S. F. The dwelling will be erected on the west side of Sears street south of Sikes and will contain six rooms and bath. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. A large open fire place with brick man-

tel will be a feature of the living room. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with clapboards and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$2,500. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. McCarthy. The dwelling will contain six rooms and bath and will be erected in the Mission District. Interior finish will be largely of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are nearly complete and figures will be called for at once.

RESIDENCE — 2 story and base, frame, \$15,000. San Francisco. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner's name withheld. The dwelling will be erected in Pacific Heights and has been designed for a handsome city home containing 12 rooms, baths and sleeping porch. A garage will also be erected on the lot. Interior of the house will be finished in pine, oak and other hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heating and open fire places. Mantels will be of tile and brick. Composition floors and tile wainscot will be used in the bath rooms. Automatic water heater will be installed. Exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$8,500. San Francisco. Architects, Ward and Blomme, Alaska Commercial Bldg., S. F. Owner, Haig Patzian. The dwelling will be erected at the northeast corner of Hyde and Francisco streets and has been designed for an eight room dwelling with baths and sleeping porch. Interior finish will be of pine, white enamel and

redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the baths. An automatic water heater will be installed. Exterior of the dwelling will be covered with brick veneer and cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

APARTMENT HOUSE — 3 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on a portion of the property at the southwest corner of Larkin and Greenwich streets and has been designed for 12 apartments of two and three rooms. Interiors will be finished in pine with some elm panels and hardwood floors. All suites will have wall beds and private bath rooms. There will be steam heat and hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE — 3 story and base, frame, \$12,500. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner, R. A. Crothers. Bulletin office, S. F. The building will be erected on 20th avenue and has been designed to contain six suites of four rooms and bath each. Interior finish will be of pine with some elm panels in the dining rooms. All suites will have private baths and entrances. There will be steam heat and a hot water system. Bath rooms will have tile floors and wainscot. Tile and marble will also be used in the entrance. Exterior of the building will be covered with rustic and shiplap with a brick veneer base. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

APARTMENT HOUSE — 3 story and base, Class C construction, \$35,000. San Francisco. Architects, O'Brien and Werner, Foxcroft Bldg., S. F. Owners, Talbot Investment Co. This building will be erected on the south side of Mission street 375 feet west of Seventh street and will cover a large area. The first floor will be arranged for stores.

On upper floors for apartments of two and three rooms. Interior finish will be of pine throughout. All suites will have private baths and wall beds. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and sidewalk elevators. Exterior of the building will be faced with pressed brick. Plans are complete and ready for figures.

APARTMENT HOUSE — 3 story and base, brick and steel. Cost not stated. San Francisco. Architect, Mattanovich, David Hewes Bldg., S. F. Owners, Lachman Bros. The building has been designed for stores on the first floor and a number of two and three room suites on the upper floors. A lot with a frontage of 50 feet on Mission street and a depth of 195 feet is to be improved. Interior of the apartments will be finished in pine. Plans provide for steam heat and a hot water system. All suites will have wall beds and private baths. There will be patent store fronts and a marble base. Exterior of

the building will be faced with pressed brick. Plans are nearly complete and the work will be awarded to Contractors Beach and Heffernan, David Hewes Bldg., on a percentage basis.

HARBOR WORK, DOCKS, TRACK-AGE, ETC.—Engineer, Asst. State Engineer, Ferry Bldg., S. F. Owners, State of California. Work approved by the State Board of Harbor Commissioners, plans for which are complete, include the construction of pier No. 33 at the foot of Bay street, pier No. 37 at the foot of Kearny street, piers No. 25 and 27, both north of the Ferry building will be enlarged and provided with spur tracks and two new piers, Nos. 6 and 8, will be constructed at the foot of Howard street south of the Ferry building. Each of the new piers will be 200 feet wide and 350 feet in length, costing in the neighborhood of \$250,000. Piers south of the Ferry will each be 600 feet long and 140 feet wide and will have spur tracks. Construction will be of cross-tied timber piles in place of the reinforced concrete piles used on several of the recently constructed piers. Bids will be called for as soon as the \$4,500,000 worth of bonds can be sold. These bonds were placed on sale in Sacramento yesterday.

WAREHOUSE—3 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Henry Geilfuss, 16 Kearny st., S. F. Owner's name withheld. The building will be erected on property at the corner of Bryant and 16th streets. The building will cover an area of 75 by 100 feet. Construction will be of the heavy mill type with reinforced concrete walls and concrete floors. Interior finish will be of pine. There will be special elevator equipment and an automatic sprinkler system. Exterior of the building will be faced with cement plaster. Plans call for fire doors and metal window sash and frames. Plans are being prepared.

WAREHOUSE—2 story and base, brick and steel, \$20,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street. Owner's name withheld. The building will be erected on Harrison near 6th street covering an area of 80 by 100 feet. Construction will be of the mill type. Plans provide for fireproof doors, metal window sash and frames and elevator service and spiral chutes. A concrete floor will be used on the first floor. Interior will be finished in pine. Exterior of the building will be faced with stock tapestry brick and tile. Plans are being prepared and figures will be called for shortly.

FLATS—2 story and base, frame. Cost not stated. San Francisco. Architects, Rousseau and Rousseau, Mondak Bldg., S. F. Owner's name withheld. The building will be erected on a portion of the lot at the southwest corner of Larkin and Greenwich streets. There will be two modern flats of five and six rooms. Interiors will be finished in pine, redwood and some elm panels. Bath rooms will have tile wainscot and composition floors. Open fire places will be used in the living rooms. Mantels will be of tile and brick. Basement will be used for a garage. Exterior of the building will be covered with shiplap and rustic. Plans are being prepared and figures will be called for shortly.

FLATS—2 story and base, frame, \$6,000. San Francisco. Architect, O. R.

Thayer, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Second avenue near Fulton and has been designed to contain two large residential flats. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

FLATS—2 story and base, frame, \$5,000 each. San Francisco. Architect, none. Owner, C. A. Rushton, 714 9th avenue. These buildings, will be erected on the west side of 9th avenue south of Cabrillo and each house has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine and redwood. Hardwood veneer will be used in the living and dining rooms. Oak floors will be used in the principal rooms. There will be large open fire places and tile or brick mantels in the living rooms. Bath rooms will have tile wainscot and sanitary floors. Automatic water heaters will be specified. Interiors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FLATS—2 story and base, frame. Cost not stated. San Francisco. Architects, Henry Geilfuss and Son, 16 Kearny street, S. F. Owner's name withheld. The building will be erected on a portion of the property at the corner of Bryant and 16th streets and will have a frontage of 25 feet by a depth of 89 feet. The first floor will be arranged for stores and upper floors for flats and a rooming house. Interior finish will be of pine and redwood. There will be an automatic water heater and open fire place. Bath rooms will have tile wainscot. Exterior of the building will be covered with cement plaster and shiplap. Plans are being prepared.

FLAT ALTERATIONS—2 story and base, frame, \$5,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. This work will consist of raising the present building and constructing a story underneath. The first floor will be used for a saloon. Upper floors will contain modern four and five room flats. Interior finish will be of pine throughout. New interior finish, plumbing, electric work and plastering is specified. Tile wainscot will be used in the bath rooms. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures will be called for at once. The building is located at the southwest corner of Geary and Masonic avenue, opposite the new baseball park.

GARAGE—1 and 2 story and base, reinforced concrete, \$50,000. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, B. Davidson. This work has been mentioned here before when plans were first started. The owner has secured additional property and has had plans revised for a much larger building. The structure will be erected at the corner of Pacific and Van Ness avenues and will be practically fireproof. Interior will be finished in pine, hardwoods and tile. There will be a cement first floor, metal window sash and frames and

vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans provide for patent store fronts and plate glass windows. Plans are complete and figures are being taken.

STREET WORK AND SEWERS—Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. The Constructing Quartermaster's office at Fort Mason will shortly call for figures for extensive electric installation at Quartermaster Dock No. 2 and for sewer construction at Fort Mason. Advertisement will appear in the Daily Pacific Builder during the next week. Plans are being prepared for 23 buildings to replace the present frame buildings composing the Quartermaster Stables.

WAREHOUSES—2 3-story and base, reinforced concrete. Cost not stated. San Francisco. Architect, Constructing Quartermaster's Department, Fort Mason. Owners, United States Government. Bids opened for this work on November 22 show M. Fisher low on both buildings at \$133,553. Twenty-six figures were submitted. A complete list of all bids will be found under the heading of San Francisco in this issue.

HOTEL—1 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, William H. Crim, Jr., 425 Kearny street, S. F. Owner's name withheld. The building will be erected on a corner lot and will be arranged for stores on the first floor and in the neighborhood of 35 guest rooms on the upper floors. There will be steam heat and elevator service. Hot and cold running water will be supplied to all rooms. Interior finish will be of pine throughout. Exterior of the building will be faced with cement plaster. Metal store fronts and plate glass windows are specified. Plans are now being prepared.

HOTEL—6 story and base, reinforced concrete, \$45,000. San Francisco. Architect, Frank S. Holland, 100 Haight street, S. F. Owners, Estate of Reuben H. Lloyd. This work has been mentioned here several times before. Figures have been taken and contracts will be awarded this week. The building has been designed for a commercial and family hotel.

LIBRARY—1 story and base, Class A construction, \$45,000. San Francisco. Architects, Bliss & Faville, Balboa Bldg., S. F. Owners, City and County of San Francisco. Architects Bliss & Faville have completed working drawings for the Richmond Branch of the San Francisco Libraries. The building will be erected on the west line of Ninth Ave, north of Geary street, and has been designed for a one-story classic structure costing \$45,000. Construction will be of the reinforced concrete type and practically fireproof. Interiors of the reading rooms, lecture room and rest room will be finished in oak, while the balance of the interior finish will be of pine. Composition and maple floors will be used. Plans provide for steam heat, a vacuum cleaning system and other modern improvements. Exterior of the building will be faced with Mant stone, Raymond granite and terra cotta. Roof trusses will be of steel. Plans have received the approval of the Library Trustees and figures will shortly be called.

SCHOOL—2 story and base, reinforced concrete and frame. Cost not stated.

San Francisco. Architect, City and County of San Francisco. The building, to be erected at the south-west corner of 15th and Capp streets, will be known as the Marshall School. Construction will be of the slow burning type, the walls to the second floor line being of reinforced concrete with reinforced concrete stairs and corridors. Plans have been arranged for 16 class rooms, assembly hall and principal's office. Interior will be finished in pine and hardwood. Maple floors will be used in the class rooms. There will be steam heat, vacuum cleaning system and program clocks. Separate figures are now being taken for the general construction, heating and ventilating, plumbing, electrical work. Bids will be opened on December 2nd. Plans and specifications can be secured from the Department of Architecture. An official proposal appears in another column of this issue.

OFFICE BUILDING—14 story and base, Class A construction, \$900,000 to \$1,000,000. San Francisco. Architect, J. Martin Haenke, Central Bldg., Los Angeles. Owner, Charles E. Sweeney. Architect Martyn J. Haenke has spent several days in this city in completing arrangements for the construction of the fourteen-story Class A office building, which is to be erected at the north-east corner of Montgomery and Bush streets, the former site of the Old Occidental Hotel. The property has passed into the hands of Charles Sweeney, the Spokane mining magnate. Architect Haenke stated to a representative that working drawings for the big structure costing between \$900,000 and \$1,000,000, were nearing completion in his Los Angeles office, and that actual construction would be started early in the new year. The building will have a frontage on Montgomery street of 150 feet and 137½ feet on Bush. Since the announcement of the 26-story Hobart Building this is the largest undertaking announced by private capital in this city. Construction will be of the Class A type with a complete steel frame, exterior walls of brick and concrete faced with pressed brick and terra cotta. Floors will be of reinforced concrete and interior partitions of hollow tile. Halls and corridors will be finished in tile and marble with metal doors, moldings and casings. Plans will provide for vacuum cleaning, steam heat, modern elevator service and mail chutes. Segregated contracts will be let.

STORE ADDITION AND ALTERATION—Cost not stated. San Francisco. Architect, Henry Stiermund, Mills Bldg., S. F. Owner, Frank Weiner, 9 Ellis street. This work will include new interior finish, new store fixtures, plumbing, electric work and plastering. Mr. Weiner has secured additional store space at 9 Ellis street adjoining his present store. But stores will be opened in one and will complete the owner will have the most modern shoe store in the city. Plans for the work are being prepared.

Contracts Awarded.

CHURCH—2 story and base, Class A construction, \$160,000. San Francisco. Architects, Reid Bros., California-Pacific Bldg., S. F. Owners, First Congregational Church of San Francisco. Contractors, Stockholm and Allen, Mondnock Bldg., S. F. General construction only. Contract price not stated.

Warehouse Bids Opened By C. Q. M.

M. Fisher Low Man For Two Large Reinforced Concrete Storehouses at Fort Mason.

Bids opened for the construction of two large reinforced concrete storehouses, which are to be erected at the Transport Docks at Fort Mason, show M. Fisher low on proposition No. 1 at \$167,548 and on No. 2 at \$133,583. Clinton Fireproofing Co. were the next lowest bidders. Figures were taken as follows: Proposition No. 1, construction of both houses complete, except spiral chutes; prop. 2 construction only, both houses; Prop. 3 plumbing only, both houses; Prop. 4 electric work only, both houses; Prop. 5 elevator work, both houses; Prop. 6 spiral chutes, both houses; Prop. 7 deduct from Props. 1 and 2 for each marquee omitted; Prop. 8 deduct if shed roof over railroad tracks is omitted; Prop. 9 deduct if cement gun finish is omitted; Prop. 10 deduct if pile foundation is omitted and building is carried on concrete foundation; Prop. 11, deduct per cubic yard if rock is furnished by Government; Prop. 12 deduct if Clinton Fab is used; Prop. 13 deduct if flat slab type of construction is used; Prop. 1 unit price per cubic yard for excavating; Prop. 15 unit price per cubic yard for filling; Prop. 16 unit price per cubic yard for concrete work; Prop. 17 unit price per pound for reinforcing steel.

Plans for the buildings were prepared under the direction of the Constructing Quartermaster's office at Fort Mason and figures were opened at that office. The following is a complete list of all bids received:

Store Houses, Fort Mason.

W. W. Anderson and Dan R. Wagner (2) \$179,300; (1) \$1,900; (8) \$5,250; (9) \$3,950; (10) \$17,500; (11) 90c; (14) 75c. If under 1000 cubic yards: \$1.75 if over 1000 cubic yards; (15) 45c; (16) \$7.00; (17) 3½c.

OAKLAND AND ALAMEDA

RESIDENCE—2 story, and base, frame, \$4,000, Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, John G. Weir. The dwelling will be erected in the Claremont Tract and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Open fire places will be used in the living room and library. Mantels will be of brick and tile. An automatic water heater will be installed. Plans provide for furnace heat. Tile wainscot will be used in bath rooms and kitchen. Composition flooring is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. Parker. The dwelling will be erected in the Fourth Ave. Terrace and has been designed for an eight room house with bath and sleeping porch. Interior finish will be largely of pine with some veneer hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of brick and tile. The wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$5,000, Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2311 Telegraph ave., Berkeley. Owner, H. E. Evelett. The dwelling will be erected on the north side of Russell street near Piedmont ave., and has been designed for an eight room house with bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. The wainscot is specified in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW—2 story and base, frame, \$3,000, Berkeley, Alameda Co., Cal. Architect, J. B. Brown, Sawyer, Owners, Brown and Home Builders, San Francisco and The Alameda, Northgate. This dwelling, as so far mentioned here before. Plans are complete and work is about to be started. The house will contain six rooms and bath. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick. A large sleeping porch will be built on one side of the house. The wainscot will be used in the bath room and kitchen. Exterior of the bungalow will be covered with cement plaster on metal lath. The work will be done by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base,

frame, \$5,000, Oakland, Cal. Architect, Clay M. Barrrell, Albany Bldg., Oakland. Owner, Dr. McMath. The dwelling, designed for an eight room house with bath and sleeping porch, will be erected in Adams Point. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor under the supervision of the architect.

RESIDENCE—2 story and base, frame, \$3,000, Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. The house will be erected in the 4th Avenue Terrace and will contain six rooms and bath. Interior will be finished in pine throughout. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Tile will be used in the bath room and kitchen. Exterior of the dwelling will be covered with shingles. Plans are being prepared.

BUNGALOWS—4 1/2 story and base. Cost not stated. Oakland, Cal. Architect, William H. Rateliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. These houses will be erected on property located at the northeast corner of Kyles avenue and Broadway and each house has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood. Oak floors will be used in the principal rooms. Each living room will have an open fire place with tile or brick mantel. Tile wainscoting will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected on 21st street and has been arranged to contain six suites of three rooms and bath each. Interior finish will be of pine throughout. There will be a hot water system and steam heat. Bath rooms will have the wainscot. All entries will be equipped with wall beds and will have private baths. Entrance will be finished in tile. Exterior of the building will be covered with rustic and sidplap. Plans are being prepared.

JAIL WORK AND PLUMBING—Cost not stated. Oakland, Cal. Architects, Palmer, Hornbostel and Jones, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids opened for jail equipment for the new city jail show M. G. West low on all propositions, submitted for the equipment. J. Looney Co. submitted the only figure for plumbing. A complete list of all figures appear under the heading of Oakland and Alameda County in this issue.

FLATS—2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected in Oak Park

Tract and has been designed to contain two flats of five and six rooms. Interior finish will be of pine throughout. There will be open fire places in the living rooms. Mantels will be of brick and tile. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

Oakland Jail Bids Opened By Board.

Figures For Jail Equipment Received.
J. Looney Company Submit Only
Bid for Plumbing Work.

Bids were opened by the Oakland City Council November 20th for the jail work in the City Hall. The bids were submitted under the following alternates: (1-A) Complete; (1) tool-proof plates, bars and doors for Bessemer plates in two rooms; (2) substitute Bessemer plates and bars for all tool-proof plates and bars in one room; (3) substitute Bessemer material for all tool-proof material throughout; (3-A) grille work as in No. 2, except material in 1-A as being tool proof; (4) tool proof cells in room 1204 and Bessemer material throughout for tool proof originally specified for room 1204; (5) work complete as in No. 2, except door locking devices.

Oakland Jail Work.

Pauly Jail Building Co. (1-A) \$31,597; (1) \$26,090; (2) \$29,299; (3) \$29,069; (3-A) \$31,597; (4) \$30,127; (5) \$28,594.

Waterhouse & Price (1-A) \$35,470; (1) \$41,911; (2) \$34,706; (3) \$31,198; (3-A) \$35,054; (4) \$35,496; (5) \$32,708.

Balston Iron Works (3) \$38,372.

M. G. West Co. (1-A) \$24,968.50; (1) \$29,192.50; (2) \$24,022.50; (3) \$22,733.50; (3-A) \$24,121.50; (4) \$24,528.50; (5) \$19,511.50.

J. Looney submitted the only figure for plumbing which was received. His bid for this work was, \$7,960 on the original plans and specifications and an alternate of \$7,860.

Bids for the jail equipment and plumbing were taken under advisement

LOS ANGELES AND SOUTH-CALIFORNIA.

RESIDENCE—2 story and base, frame, \$20,000. Los Angeles, Cal. Architect, Frank T. Kewley, Consolidated Realty Bldg., L. A. Owner, Dr. C. P. Thomas. This dwelling will be erected in Brentwood Place and has been designed for a 15 room house with baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used throughout. Besides the residence a two story garage with accommodations for four machines and chauffeur's quarters will be erected on the lot. Plans provide for a central heating system, vacuum cleaning and automatic water heaters. There will be open fire places and the or brick mantels. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$50,000. Los Angeles, Cal. Architects, Hunt and Burns, Laughlin Bldg., L. A. Owner, Mr. House. The dwelling will be erected in Oak Knoll

and has been designed for fifteen room house with several porches and sleeping porches. A garage will also be erected on the lot. Interior of the house will be finished in hardwoods, pine and white enamel. Hardwood floors will be used throughout. Plans provide for steam heat and six fire places. Mantels will be of tile and brick. Tile floors and walls will be used in the bath rooms. There will be a vacuum cleaning system and automatic water heater. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

APARTMENT HOUSE—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, L. L. Jones, 1. W. Hellman Bldg., L. A. Owner's name withheld. The building will be erected on West Park street near Harvard covering an area of 25 by 100 feet. There will be two stories on the first floor and a total of 16 rooms arranged for two and three room suites on the upper floors. Interior finish will be of pine and redwood. All suites will have wall beds and en-suite bath rooms. Bath rooms will be of composition floors and tile wainscot. Plans provide for steam heat and hot water system. Exterior of the building will be faced with pressed brick. Patent store fronts are specified. Plans are being prepared.

STRUCTURAL STEEL FOR MUNICIPAL DOCK NO. 1—Cost not stated. Los Angeles, Cal. Engineer, Chas. Engineer, Los Angeles. Owners, City of Los Angeles. W. B. Kyle of San Francisco was low bidder at \$88,978 for the construction of steel work for Dock No. 1, Los Angeles Harbor. Additions or deductions to be made at the rate of 3.15¢ per lb. Other bids were Dwellen Iron Works \$94,991, 3.4¢ per lb., additions or deductions; Security Construction Co. \$97,692, 3.49¢ per lb.; Baker Iron Works, \$102,000; Russell-Green-Powell Co., \$104,190; Mesmer Rice, \$109,470; Milwaukee Bridge Co., \$110,356; Shaw & Trust Co., \$124,986.

WAREHOUSE ADDITION—2 story and base, Class A. Cost not stated. Los Angeles, Cal. Architect, L. A. Bruns Sturges, Story Bldg., L. A. Owners, Lyon Fireproof Storage Co. This work will consist of a two story addition to the present four story Class A building. The structure covers an area of 50 by 145 feet. A new passenger elevator will be installed and the present freight elevator will be extended into the new portion of the building. Interior partitions will be of metal lath and plaster. Exterior finish will be of pine. There will be metal window sash and frames and fireproof doors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITAL—3 story and base, Class A construction, \$200,000. Los Angeles, Cal. Architects, Garret & Farrell, Currier Bldg., L. A. Owners, French Hospital Association. The building will be erected at the corner of 12th and Castelar street and will have footages of 28 and 120 feet. There will be 25 private rooms, operating rooms, 10 baths, and wards. Exterior walls will be of reinforced concrete and tile on the floors and roof. Interior partitions will be of hollow tile. The floors and wains-

coting will be used in the halls and operating rooms. Plans provide for steam heat and elevator service and vacuum cleaning system and other modern conveniences. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOL—1 story and base, reinforced concrete, \$30,000. Bishop, Inyo Co., Cal. Architect, Samuel Clements, Bishop. Owners, Bishop School District. The building will be designed to contain eight class rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat and a modern system of ventilation. Programme clocks and vacuum cleaning will be installed. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

MUSIC HALL—2 story and base, reinforced concrete, \$90,000. Claremont, Los Angeles Co., Cal. Architect, Myron Hunt, Hiernian Bldg., L. A. Owners, Pomona College. The building will be built in shape of a letter Y, and will have a total frontage of 260 ft. and an average width of 45 feet. There will be an audience room to seat 1000, 5 studios and 16 practice rooms; reinforced concrete frame and gallery, hollow tile, filler walls, plaster exterior, tile roof, artificial stone trim, hardwood and pine trim, plumbing, wiring, heating. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick and steel, \$40,000. Ontario, San Bernardino Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Chaffey Union High School District. Portions of the old walls are now standing and use will be made of these in constructing the new building. Fireproof stairways and corridors will be used. Interior will be finished in pine throughout. There will be a central heating system and programme clocks, vacuum cleaning and a modern system of ventilation. Plans call for eight class rooms, auditorium and offices. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

STORES AND OFFICES—3 story and base, brick and steel, \$50,000. Hollywood, Los Angeles Co., Cal. Architect, E. P. Parcher, McCadden Place, Hollywood. Owner, C. E. Tolerman. The building will be erected on Hollywood Boulevard covering an area of 75 feet square. First floor has been arranged for four stores and the upper floors for 30 suites of offices. Foundation will be of reinforced concrete and frame of steel. Exterior walls will be faced with pressed brick. Plans provide for steam heat, elevator service and metal window sash and frame. Interior will be finished in pine throughout. There will be patent store fronts and marble base. Plans are complete and figures are being taken.

TELEPHONE EXCHANGE—6 story and base, Class A construction, \$100,000. Los Angeles, Cal. Architect, Colby, 333 Grant avenue, S. F. Owner, Pacific Telephone and Telegraph Co. This work has been mentioned here before. The building will be erected on South Hill street and will have a frontage of 74 1/2 feet by a depth of 75 feet. A contract for the structural steel has been awarded to the Baker Iron Works of Los Angeles for \$25,800. Balance of the work is now out for figures. Bids will close on December 1st.

STORES AND LOFTS—5 story and base, Class A construction, \$10,000. Los Angeles, Cal. Architect, George W. Hodling, Washington Bldg., L. A. Owner, M. Brown. The building will be erected at the corner of Boyd and Omar streets covering an area of 65 by 160 feet. Construction will be fireproof throughout with reinforced concrete floor, walls and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Interior will be finished in pine and metal. Metal window sash and frames will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

GARAGE—1 story and base, brick and steel, \$30,000. Coronado Beach, San Diego Co., Cal. Architect, E. Ervast, Spreckels Bldg., San Diego. Owners, Coronado Hotel. The building will be erected on the hotel grounds and will cover an area of 65 by 200 feet. A concrete floor and foundations, brick walls and steel roof trusses will be used. Exterior walls will be faced with pressed brick. Special gasoline storage tanks are specified. Interior will be finished in pine. There will be metal window sash and frames. Plans are complete and the work is being done by Day Labor.

Contracts Awarded.

COLD STORAGE ADDITION—3 story addition, brick construction, \$25,000. Los Angeles, Cal. Architect, John E. Kunst, Higgins Bldg., L. A. Owners, Marble Brewing Co., Contractor M. Stepan, 1942 South Los Angeles street, L. A. Contract price, \$25,000.

CLUB HOUSE—2 story and base, brick and steel, \$32,000. Santa Barbara, Santa Barbara Co., Cal. Architect, J. Corbly Poole, Bothin Bldg., Santa Barbara. Owners, Neighborhood House Association, Contractor, Alfred Jensen, 1208 Chappalla street, Santa Barbara. Contract price, \$32,000.

RAIL STATION—1 and 2 story and base, Class A and Class C construction, \$250,000. Los Angeles, Cal. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Architects Parkinson & Bergstrom, Security Bldg., L. A. associated. Owners, Southern Pacific Co., Contractors, Alta Planning Mill Co., 830 McGarry street, L. A. Contract price, \$250,000. Note—This work has been held up by the city of Los Angeles until recently when resolutions were passed by the City Council permitting the construction of the building. Operations will be started in a few days.

PORTLAND AND OREGON.

FACTORY ALTERATIONS—4 story and base, brick, \$25,000. Portland, Ore. Architect, Ernest Kroner, Worcester Bldg., Portland. Owners, Frye & Co. This work will consist of reconstructing the present building and constructing additional buildings for smoke houses, coolers, etc. All construction will be of brick and steel. Interior finish will be of pine throughout. There will be metal window sash and frames and fireproof doors. Exterior of the building will be faced with pressed brick. A large amount of special machinery will be required. Plans are nearly complete and figures will

be called for by the architect within a week or ten days.

STEEL PLANT—2 story and base, concrete and frame construction, \$40,000. Portland, Ore. Engineers, Engineering Department, Northwest Steel Co., Portland. The building will cover an area of 50 by 50 feet, giving the main portion of the building a floor area of 57,900 square feet. No interior finish will be used. There will be a cement floor and metal window sash and frames. Special machinery will be required. Exterior of the building will be faced with corrugated iron. Plans are complete and the work will be carried on under the direction of W. H. Cullers, Chief Engineer of the company.

APARTMENT HOUSE—7 story and base, reinforced concrete, \$250,000. Portland, Ore. Architect, W. H. Downing, Abington Bldg., Portland. Owner's name withheld for the present. The building will be erected on a corner in the downtown district and when complete will be the largest and most modern apartment house structure in Portland. Preliminary plans only have been prepared but these show a building with a total of over 125 suites of two and three rooms. All apartments will have private baths and wall beds. Provision has been made for a swimming tank, Turkish bath, parlors, amusement rooms and a large ball room. Construction will be fireproof with exterior walls of reinforced concrete, concrete floors and roof. Interior partitions will be of metal lath and plaster. Exterior of the building be faced with cement plaster. All reinforced concrete work will be in the hands of Hartman and Walsh. Further mention will be made of the work as plans progress.

Contracts Awarded.

SCHOOL—2 story and base, stone, \$200,000. Bend, Ore. Architects, Swartz & Lesqueux, Spokane, Wash. Bend School District. Contractors, Brosterhous Bros., Bend. Contract price, \$200,000.

SEATTLE AND WASHINGTON.

TUNNEL AND SHAFTS. In connection with Harbor Street, \$200,000. Seattle, Wash. Engineer, City Engineer, Seattle. Owners, City of Seattle. Plans have been completed for the construction of a 900 foot tunnel under Lake Union and for two shafts, 150 feet deep. Concrete will be used. Bids for this work will be called for at once. Full particulars can be secured from the City Engineer at Seattle.

CHURCH—2 story and base, reinforced concrete, \$45,999. Seattle, Wash.

Architect, J. A. Crutcher, New York Bldg., Seattle. Owners, First Methodist Episcopal Church, Seattle. The building will be erected at the northwest corner of Roy street and Broadway and has been designed in the classic style. The main auditorium will have a seating capacity of 750 people. Besides this room there will be Sunday School rooms, social parlors and pastor's study. Plans provide for a central heating system, probably steam, vacuum cleaning and other modern conveniences. Interior will be finished in pine and ornamental plaster. Exterior will be faced with cement plaster. Bids will be called for on the foundation work within a short time. Balance of the structure will be erected later.

BROS., Auburn. Contract price, \$115,500.
VIADUCTS AND RETAINING WALLS—Reinforced concrete construction, \$450,000. Vancouver, B. C. Engineer, City Engineer F. L. Fellows, Vancouver. Owners, City of Vancouver. Plans have been practically completed by the City Engineer, F. L. Fellows, for the construction of the four concrete viaducts in the east end of the city at a cost of \$450,000. The bridges will span the Great Northern Ry. Co.'s tracks and will be of concrete and steel construction, averaging about 500 ft. long and 100 feet wide. Considerable concrete retaining walls are called for. Figures will be called for shortly.

POWER PLANT—Class A construction, \$100,000. Seattle, Wash. Engineer not selected. Owners, City of Seattle. Plans will be prepared under the direction of Superintendent of Lighting, Ross, Seattle, for the construction of the first unit of the \$500,000 auxiliary steam plant for the lighting department of Lake Union, Seattle. This portion of the work will cost \$100,000. It is probable that the services of a specialist on this class of work will be sought. The matter is now being considered by the Board of Public Works.

DEPARTMENT STORE—3 story and base, brick and steel, \$100,000. Tacoma, Wash. Architects, Heath and Grove, National Realty Bldg., Tacoma. Owners, Dore and Gross, Seattle. The building will be erected on C street near 11th and will cover a large ground area. Construction will be practically fireproof. Interior finish will be of pine and hardwoods. Interior partitions will be of metal lath and plaster. There will be steam heat and elevator service. Arcade front with patent show windows and marble base is specified. Exterior of the building will be faced with pressed brick. Plans are complete and a general contract will be let.

SEATTLE'S ELECTRIC PLANT.

The Largest in the United States.

By Edward P. E. Troy.

Seattle may justly boast of possessing the largest municipal electric plant in the United States, with an income greater than any similar American municipal undertaking. The vote of its people last year, approving of the purchase of the Lake Cushman and White River power sites, will enable that city soon to operate one of the greatest electric plants in the world. It will furnish at cost 215,000 horse-power for the lighting of the city and its homes, and the operation of its manufacturing industries, thus insuring the commercial supremacy of that place.

From the beginning of the city in 1869 its charter has provided for municipal lighting. In 1902 the voters approved of a bond issue for that purpose, and in two years the plant was in operation. The private company was charging 20 cents per kilowatt for residence lighting. Immediately the city commenced to build its plant this rate was reduced to 12 cents.

The city commenced supplying current for eight and a half cents; in 1911 reduced its charge to seven cents, and last year to six cents. The company has been forced to follow the city in these reductions. As a result of municipal ownership, the people of Seattle are paying today one dollar for the same quantity of electricity that they had to pay three dollars for to the private company.

The city plant has also established a rate of three cents for cooking, washing, sewing, ironing and other domestic appliances. The people of Seattle, through municipal ownership, are furnished the great modern convenience—electricity—for all purposes in the home at such a low cost as will permit its use by every one.

There are over 800 arc and more than 5,000 other electric lamps in the municipal street lighting system. The cluster lights alone illuminate more

than twenty-five miles of streets. The company formerly furnished 213 acres at \$66 per year, and 1,891 other lights at \$15. The municipal plant gets \$54 for each arc and \$9.60 for incandescents. It will be seen that the company charged sixty-six per cent. more than does the city for incandescents, and twenty-two per cent. more for arc lamps. Thus municipal ownership has enabled Seattle to greatly increase its street lighting, making it one of the best lighted cities of America. Portland, San Francisco and Los Angeles could do as well if they became free from the corrupt influence of private lighting companies.

The total revenue of the plant for 1911 was \$727,384, and the operating expense, including interest, \$315,916. Of the profit, \$161,581 was set aside for depreciation, and the balance put into new construction. The power lines are being connected with those of the Tacoma municipal electric plant, insuring continuous service to each city should either of the plants meet with any accident. This will save the building of steam reserve plants by either city.

The entire plant was built by City Engineer R. H. Thompson, and his assistant, J. D. Ross, the latter of whom is now in charge of the plant. Mr. Ross gives the loyal citizens of Seattle credit for the splendid success of this plant, in spite of vicious opposition of the corrupt corporations oppressing it.

ARIZONA GREATEST COPPER PRODUCTION.

Has Output of Million Pounds a Day—Large Share of State's Gold and Silver production. Also Derived from Copper Ores—Mineral Production in 1912 Increases Over 50 Per Cent.

Arizona ranks first among the States in the production of copper, and copper mining is by far the mainstay of the mining industry of the State, according to E. W. Parker, of the United States Geological Survey. The recoverable copper content of the ores produced in Arizona in 1912 was 365,628,649 pounds, a million pounds a day. The value of this product was \$60,231,577. In 1911 the recoverable copper content of the ores produced in Arizona was 366,141,538 pounds, valued at \$38,267,692. The increase in 1912 was 58,897,111 pounds, or 16 per cent. in quantity, and \$21,963,685, or 57.4 per cent. in value. The total value of the mineral products of the State in 1911 was \$44,502,873; in 1912 it was \$67,497,838, an increase of over 50 per cent. The large increase in the production of copper was due principally to the development of steam-shovel operations on the low-grade porphyry and porphyry concentrating ores of the Ray district, in Pinal County, and the Miami district, in Gila County.

Second among the mineral products of Arizona is gold, in which the State ranks seventh. The only other important mineral product is silver, in which Arizona ranks sixth in production. The three metals, copper, gold, and silver, constitute nearly 98 per cent of the total production of the State. The gold production in 1912 was 181,997 fine ounces, valued at \$3,768,210, and the silver production was 3,190,387 ounces, valued at \$2,116,588. Nearly one-third of the gold output is ob-

tained in the reduction of copper ores, and most of the silver also comes from copper ores. Arizona produces also considerable quantities of lead and zinc, the former amounting in 1912 to 3,403 short tons, valued at \$56,290, and the latter to 4,379 short tons, valued at \$694,319. The total value of the metallic contents of the ores produced in Arizona in 1912 was \$67,060,350, or more than 99 per cent of the total mineral production of the State.

FARMERS TO COME UNDER COMPENSATION ACT.

A surprising number of farmers have declared their intention of exercising their optional right to come under the Workmen's Compensation Act.

For approximately six dollars a year they will be able to insure against damages for injuries to an employee, and this is being regarded as good a business proposition as fire insurance.

The Commission is at present at work on a schedule of insurance rates, which will be adjusted according to the risks of various employments.

Work is also going forward in regard to the safety appliances feature of the Act. Avoidable accidents are far more numerous than is generally realized. It is estimated that twenty-five deaths could have been prevented in this state last year if proper safeguards had been provided.

The safety provisions of the California law were taken from Wisconsin's Compensation Law. In that state it has had a marked success, employers joining heartily in carrying out requirements and suggestions to avoid injury of workmen. Upon thorough investigation they found that in the end it would pay them well to introduce the safeguards.

A favorite statement of the opponents of the Compensation Act is that if a teamster gets drunk and is hurt in falling off his wagon, the employer will be liable. It is chiefly on such gross misstatements that the attacks on the law are founded. The Act specifically provided that no liability arises when the accident is caused by intoxication or the willful misconduct of the injured employee.

Many employers who choose to come under the Accident law which has been in force during the last two years have become enthusiastic supporters of Workmen's Compensation. A leading baker in this city, who employs a hundred men, has become a staunch advocate. Elimination of damages suits and lawyer's fees is an advantage shared by employer and employee alike. Statistics show that only eight per cent of the workmen injured recovered anything in damage suits.

RAILROADS GET LINE EXTENSION.

In an application that has been filed with the Railroad Commission, the Tonopah and Tidewater Railroad Company asks authority to issue \$294,000 in bonds for the purpose of constructing a line of narrow gauge railroad, sixteen miles in length, in Inyo County. The line will connect the Bullfrog-Curtis Borax mine owned by the Pacific Coast Borax Company with the Ryan branch of the Tonopah and Tidewater railroad. Primarily it is intended to afford an outlet for the products of the borax mine and also for freight, freight and passenger business.

BUREAU OF MINES.

New Publications, (List 24.—Nov. 1913.)

BULLETINS.

Bulletin 69. Coal-mine accidents in the United States and in foreign countries, by E. W. Horton. 1913. 101 pp., 3 pls., 40 figs.

Bulletin 71. Fuller's earth, by C. L. Parsons. 1913. 38 pp.

TECHNICAL PAPERS.

Technical Paper 30. Accident prevention at Lake Superior iron mines, by D. E. Woodbridge. 1913. 31 pp., 7 figs.

Technical Paper 51. Possible causes of the decline of oil wells, and suggested methods of prolonging yield, by L. G. Huntley. 1913. 32 pp., 9 figs.

Technical Paper 60. The approximate melting points of some commercial copper alloys, by H. W. Gillett and A. B. Norton. 1913. 9 pp.

MINERS' CIRCULAR.

Miners' Circular 13. Safety in tunneling, by D. W. Brunton and J. A. Davis. 1913. 19 pp.

The Bureau of Mines has copies of these publications for free distribution, but can not give more than one copy of a same bulletin to one person. Requests for all papers can not be granted without satisfactory reason. In asking for publications, please order them by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

BLUE SKY LAW VINDICATED.

The "Blue Sky" law, which was held up by referendum and will be voted upon at next year's election has received a striking vindication in the failure of the Los Angeles Investment Company, the directors of which are now under federal indictment.

It is just such high finance concerns as this, by misrepresentations, induce investors to part with their good money that the law is aimed at.

Charles A. Elder, President of the elected board of directors, led the campaign against the blue sky enactment and it was he and his associates who supplied the funds for the circulation of the referendum petitions that defeated the new law.

Under the new law, Elder also made a number of public speeches and assailed Governor Johnson in a nasty fashion for having approved of this and other Progressive legislation.

LANDS RESTORED TO PUBLIC DOMAIN.

Quarter Million Acres Released by Recommendation of Secretary of the Interior.

Last month recommendations were made to the President by Secretary of the Interior Department, that there resulted in a net decrease of 200,000 acres in the outstanding withdrawals in public-land States. Nearly 600,000 acres of land previously withdrawn were restored to the public domain, and additional withdrawals of about 65,000 acres were made. The most restoration was one involving nearly 242,500 acres of coal land in Montana. In Utah 114,500 acres of withdrawn lands were likewise classified as to their coal value and restored. The withdrawals made during the year were all for the reservation of water-power rights, the largest being nearly 62,000 acres in Oregon and a

little over 1,000 acres each in Idaho and Washington, but in the latter two States the withdrawals were more than counterbalanced by restorations of over 2,000 acres of lands which investigation by the Geological Survey proves to have no value for power.

As a result of this work the withdrawals now outstanding include some what less than 65,000,000 acres, all but about 10,000,000 acres of which are lands that are awaiting examination as to their coal character. The progress that has been made in classification of supposed coal land is well illustrated by the fact that although about 55,000,000 acres await classification, nearly 51,000,000 acres have already been classified as to their coal value and restored to entry. Of this total, 18,500,000 acres have been classified as coal lands and valued at nearly \$741,000,000.

Great progress has likewise been made in the classification of lands as to their irrigability as required in the administration of the enlarged-homestead act. More than 203,000,000 acres in the arid and semiarid States have so far been classified as nonirrigable and thus rendered available for entry in homesteads of 320 acres each.

FRAME SHACKS IN FIRE LIMITS DEMOLISHING FAST.

The records of the Bureau of Building Inspection of the Board of Public Works show that fifteen permits have been issued for tearing down or removing frame shacks from within the Fire Limits since September 1st, the date of last report.

There are approximately 120 more of such structures in the Fire Limits yet to be removed.

A permit was issued to Wm. Wolff on September 8th for wrecking a three-story concrete and brick building at the southwest corner of M. Allister and Polk streets, this structure being located in the Civic Center.

EDITORIAL

The Chronicle prints an editorial on A Denial of Justice, in which it narrates a story of the failure of Montana farmers to obtain relief from smelter fumes because they did not have money enough to pay for the printing of a transcript on appeal to the United States Supreme Court.

This case is certainly a denial of justice. For the printing of a voluminous transcript is nearly all a waste of money any way and the method of appeal is five hundred years old. This cumbersome procedure, this failure of justice, is just what the progressives have sought to remedy. And just as soon as they propose some effective method that will deprive the rich of unequal opportunity or make special privilege for the scratch with the ordinary citizen then the Chronicle and all of its kind howl to high heaven. Now it normalizes on the failure of justice. When the recall was proposed it was voicing the sentiments of the "influential eastern journals" that California be deprived of statehood because it had dared to adopt such a suggestion.

Under present conditions appeals are

made to the Supreme Court of the United States on the most frivolous grounds. If the appellant has sufficient pull with the "eminent guys in mother Hubbard gowns" he can tie up a case indefinitely. Thus the litigant is put to the expense of going to Washington, waiting for years on an overcrowded calendar, generally to get an attestation of a decision rendered in a lower court years before.

What is needed is to simplify procedure, and get men on the Supreme bench who are big enough to keep pace with the times, and men who, even though they may have been corporation lawyers, are big enough to adopt methods that lead to equal justice in spite of hoary precedent that may have been laid down in the interest of a favored few.

The prevention of the need of charity is always in the mind of the men and women who are taking charge of the relief of persons in poverty. For instance, here are some of the measures favored by the Missouri State Conference of Charities and Corrections that just completed its annual conference at St. Joseph:

Better child labor laws, with age limit at 16 years, schooling through the eighth grade and a health certificate before permission to work in factories.

Better juvenile court laws.

A more elastic constitution.

Politics out of the state institution management.

Pensions for the blind.

The building of an industrial school for negro girls.

Protection of the rights of illegitimate children.

State reformatory for young women.

Abolition of common law marriage.

Workmen's compensation law.

Minimum wage board.

Extensions of widows' pensions.

Making of child abandonment a felony.

These measures are directed toward making people more efficient, removing the artificial handicaps that keep children from making the most of themselves, lightening the load of inequalities. A few years ago they were merely discussed at conferences of charity workers. Today they are finding their way happily into political platforms and are emerging into the stage of active achievement.

There has been built and there is now in successful operation in the Sahara desert a sun power plant pumping water for irrigation purposes in that arid region. The engine uses steam for its motive power and the boiler is the invention of Mr. Frank Shuman of Philadelphia and the plant was installed under his direction.

This boiler consists of a long trough upon which is focused the sun's rays from a parabolic mirror which is extended for a distance of about 200 feet. This mirror is mounted upon a steel frame that is tilted so as to get the maximum rays of the sun at all hours of the day. The heat thus conveyed upon the boiler converts the water into steam which is conveyed to an engine and there does service as does steam from any other source of heat.

The engine is said to furnish power at a cost many times cheaper than it could be procured in any other way.

As there is practically no cloudy days in the desert and the country is comparatively near the equator there is practically no limit to the amount of power that can be developed. Power from such a plant can be transmitted into electric energy and thence conveyed to any part of the country.

While water power is being fast appropriated and the coal and oil of the country are being rapidly exhausted this source of power may soon be utilized at first hand. Thus the desert which has been a waste since the world began may become the source of the world's power in the future. And the barren lands may be transformed into blooming fields by the wonders of mechanics and the defects of nature be transmuted into sources of industrial wealth and power.

After December 1st the ordinary celluloid moving picture may not be used in France. Instead an unflammable film must be used. Thomas A. Edison issued the following statement when informed of the new French law:

"There is no possible material known that takes the place of the present celluloid film. In this country the insurance companies have been so strict that everything pertaining to the film and machine is encased in iron and asbestos so that the chance of a fire is reduced almost to immunity. Out of 13,000 moving picture theatres we scarcely ever hear of a fire, although the theatres are running almost continuously. The amount of film stored in the fireproof booth at any one time is so small that it is difficult to imagine any danger to the theatre even if the whole amount should burn up. A properly designed machine provides immunity aside from the fireproof booth."

The Chronicle is much concerned over the rights of states in the conservation congress, that is now being held at Washington. In this matter the Chronicle is the champion of state rights. And as the federal policy of conservation has become developed and effective its opposition to federal control has steadily increased. For the same reason it has become the champion of the city owning and controlling its water front only since the Southern Pacific has been put out of control.

That the states have some rights in the domain included within their borders it is reasonable to suppose. But the question of disposing of the timber lands, the water power and the coal and oil lands which originally belonged to all the people as a nation is a question generally for the nation to decide. The nation's resources have long been exploited by special privilege. The question now is how best to preserve and conserve and administer what is left. The advocates and the sponsors of special privilege are all lined up on the side of the states. Naturally the people think there must be a nigger in the woodpile somewhere and are constrained to believe that the national administration is the better course.

A great hubbaloona has been raised over the Mayor's veto of the Municipal Open House ordinance. The Mayor's chief objection seems to be that of the perpetuity clause of the agreement

wherein the donors of the fund for the construction of the building have a prior right to the reserved seats and in the management of the building.

The question seems to have several angles. It is certainly a commendable spirit for people of wealth to contribute to a monumental building that will be a credit to the Civic Center plan. Especially at a time when the city can ill afford to increase its burden of taxation by completing the plans for a Civic Center. And particularly in the construction of an opera house whose success in a financial way would be very problematical.

The Chronicle states that the Mayor is stooping to dirty politics and acting the part of a demagogue. Also that he opposes it for the reason that the control would always be in intelligent hands and be out of politics.

The natural inference to be drawn from the remarks of the Chronicle is that only the people who are able to contribute to the fund for the municipal opera house are fit to govern. In other words such people as Mike De Young and his associates are the divinely anointed. They possess wealth and intelligence and should rule.

If this is the sentiment voiced by the donors the Mayor did a wise thing in vetoing the measure on general principles. For the self-assurance of these self-accoladed citizens is appalling. Many of them have acquired their wealth by methods that are questionable to say the least. And when they assume the rule of the Pharisee and criticize people for acts that may not agree with their preconceived notions the criticism is usually taken for what it is worth.

Supervisor McLean makes an intelligent statement, according to reports. He says that he voted against the measure on its passage because he thought that the city ought to be able to take over the building at any time by paying to the donors the amount subscribed. And as the ordinance contained no such provision he was not in favor of its passage. He says that he is now informed that the city could acquire it by condemnation proceedings just as it might acquire any other property and that he does not know how he would vote on the measure if such is the case.

It seems like some such reserve provision might be made. The donors could be protected by returning them their money at any time they were denied their preferential privileges. And it is doubtful if the public would demand the privilege of attending grand opera at a price which the preferred seats would cost for many many years to come. It is to be regretted that the contribution of public-spirited citizens can not be accepted where it would tend to beautifying the city and adding to its educational institutions and furthering its artistic culture. Perhaps some plan may yet be devised that will be agreeable to all concerned.

While the big talk about the Municipal Opera House is on and the question as to first choice of seats is being agitated, will some kind member of the Board of Supervisors or the Chief of Police or some other official, kindly take up the matter of the ticket sales at the Orpheum and other theatres that are more or less popular.

What is the reason that when a citizen wants to go to the Orpheum,

for instance, that he has to go to a saloon or a cigar stand to get a ticket? Why is it that if you go to the box office three days ahead the best you can get is the 26th row while the saloon man can go at 8 o'clock on the same evening and get much better seats?

Playhouses are quasi public institutions and the public should be equally favored in the choice of seats. As it is all the best seats are farmed out and anybody who wants to go and get a comfortable seat has to submit to a petty graft. In New York it is even worse. The speculator on the sidewalk hold you up for about a double price. The only journal that has consistently fought this petty graft through all the years is "Life." It is a stereotyped sentence set in italics which it usually runs at the end of its theatrical criticism which reads "The speculator on the sidewalk means a crooked management inside."

Here is a view of the Mexican situation taken from the Sacramento Bee:

"There is in Mexico a curious medley of politics, which puzzles outsiders, and which most Mexicans, probably, do not understand, as the great majority of them are densely ignorant.

There are at least seven distinct parties, each with a leader of some note. Of these the Zapatistas are the most numerous. They claim to be in the majority.

The next in order is probably the Liberal Party, divided into three branches.

Other parties are the Catholics (in name at least), the Anti-re-electionists, the Constitutionalists, and the Socialists.

The composition of most of these parties is said to be much mixed, so no real harmony exists among them.

The Zapatistas are the Zapata Party, or party of the pious, which includes the Maderistas. But now it appears, the Constitutionalists are crying "Via Zapata!" with the view of adding to their own ranks.

The Zapatistas are followers of Zapata, and their great demand is distribution of land to the poor.

There are other party distinctions and complications, but it would be a hopeless task to attempt to describe them.

Evidently, in view of these numerous, opposing, and seemingly irreconcilable political divisions, most of them burning with animosity toward one another, the outlook in Mexico for peace and unity is not very good.

If it be true that the Zapatistas are the majority party, and if they opposed to the Constitutionalists, under Carranza, recognition of the latter by the United States would not be likely, in the long run, to help the situation very much.

The Constitutionalists have received much attention in the United States, but this seems to be a mistake because they hold one or two of the northern States of Mexico, along the Texan border, which naturally brings their operations into view from this side of the line.

In this regard the Christian Science Monitor prints an article on political conditions in the neighboring "Republic" which it says was written by a Mexican who was at one time a high official there, but it does not give his name.

The Mexican writer opposes recognition of Carranza and armed intervention by the United States. He declares would lead to war, which he advocates "mediation," which concert of action by the United States and the various States of Central and South America, for the purpose of restoring order in Mexico and bringing about a stable government, and to assist it with moral and moral support.

Of course, the writer argues, would not hurt the pride of Mexico, nor would intervention, and would be likely to accomplish the desired result without resistance.

The suggestion seems well worth consideration at Washington, as a cautious compromise between "absent treatment" and forcible interference in Mexican affairs.

EXPOSITION WORK FAR AHEAD OF SCHEDULE.

SAN FRANCISCO, Nov. 19.—Director of Works Harris D. H. Connick, in a report just submitted to President Charles C. Moore of the Panama-Pacific International Exposition, declares that the Palace of Machinery is 93% completed. He states that very little more carpenter work is to be done, that the window frames are all in place and are being glazed; that the skylights are completely glazed, and the roof about completed.

PALACE OF EDUCATION—All wall framing and sheathing is in place. The dome is rapidly nearing completion. The building is now ready for shaft work and plastering. The average number of men employed during the past month has been 175.

PALACE OF FOOD PRODUCTS—The erection of the super-structure of this building practically started on the first of October, and its erection since then has been phenomenal. About 80% of the frame work is in place. The setting of the roof skylight is in place. The average number of men employed has been 185.

PALACE OF AGRICULTURE—The contractors are preparing to raise the super-structure and progress has been made upon the concrete fire walls.

LIBERAL ARTS PALACE—The entire floor work has been completed and erection of columns and trusses started early in the month and 160,275,000 feet was raised in the air. The total number of men employed during the past month has been 110. The total of lumber incorporated in the building up to date was 1,800,000 feet.

MANUFACTURERS BUILDING—One half of the framing material has been installed and about 30,000 feet of lumber are in place. Parts of the building are ready to receive shaft and work in the shaft stops and are being raised rapidly and satisfactorily.

TRANSPORTATION BUILDING—The 2,500,000 feet of lumber incorporated in the framing of the super-structure is being erected at a rapid rate. A large lack of steel at which is unable to start erection of the tower.

AUDITORIUM—Cast iron basis, first tier of columns, first story steel, and a portion of the second floor steel, have been erected. The contractor still has 60 days to complete the work and he will have very little difficulty in doing it.

VARIED INDUSTRIES BUILDING—The floor has been completed and the erection of the super-structure under way. More than 450,000 feet of lumber has been placed in the floor and a like amount was placed in the super-structure. All the staff has been cast and the south and east fronts are ready to receive the same. About 185 men have been engaged in this building.

MINES AND METALLURGY BUILDING—To date 1,500,000 feet of lumber have been used in the super-structure and flooring. Walls are being framed as fast as the super-structure goes up, and they will be ready to set staff almost at once. A very large portion of staff has been cast.

Director Connick in his report also shows that 14,929 feet of high pressure water system piping has been installed; that there are 165 head of stock with proper equipment busily engaged in grading the main roadway in the Concession district, grading the Fine Arts Blag, and doing other work; that the plumbing in all the exhibit palaces is going on apace, and in most instances has been completed.

Connick also reports that the Government warehouses have been moved from the site and have been placed on foundations in their new location in the Presidio. He reports further that the first shipment of steel for the Fine Arts Palace will arrive in this city early in January.

The fire alarm system is now being installed throughout the grounds and there is a fire company with apparatus ready for emergency. The Director of Works states that fifty men are engaged in the enlargement of sculpture for the Exposition.

The sowing of the beds in the south garden for lawn has been completed and the entire area has been covered with a carpet of green. Up to date 670 pines in variety ranging in height from 12 to 24 feet have been boxed and bottomed and ready for shipment. In the nursery are 45,000 cuttings of geraniums.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

CORRESPONDENCE WITH CONSULS.

The suggestion is made that all communications to consular officers be addressed

The American Consul,

At ———,

the name of the other not being given. Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what

language correspondence should be conducted.

No. 11998. "Hubbel" plugs.—A business man in a European country informs an American consular officer that it would like to get the names of manufacturers of "Hubbel" plugs for vacuum cleaners. The firm states that it is greatly interested in this article and wants to buy large quantities.

No. 12000. Electric lights.—An American consul in Canada reports that a committee from a local city council recently visited certain cities in the United States to inquire into the lighting system of the business sections. As a result of this trip the city will install 96 magnetic lights of illuminous are lights. Plans and specifications may be had by applying to the superintendent of the electric-light plant, whose name can be had by applying to the Bureau of Foreign and Domestic Commerce.

No. 11992. Vulcanized fibers.—An American consular officer in a European country reports that a resident of his district is desirous of representing American manufacturers of vulcanized fibers. Correspondence may be in English.

No. 12001. Steel rails.—A report from an American consul states that a European business man would like to act as agent for American manufacturers of heavy and light steel rails. The utilization of water power for mills and factories, and the development of mines and mining in the country in question have opened up a market for iron and steel rails. The recent inauguration of a direct steamship line with the United States should place American manufacturers in a position to successfully compete with foreign concerns.

No. 11987. License to exploit forest tract.—Sealed proposals in duplicate will be received by the Director of Forestry, Manila, P. I., until December 10 for a 20-year exclusive license to cut and gather timber, firewood and other forest products, and remove stone and earth from certain forests in the Philippine Islands. Copies of the conditions governing this license will be furnished to interested persons by the Bureau of Insular Affairs, War Department, Washington, D. C. That bureau also has in its files for inspection a forest map of the tract referred to and a detailed report of a forest survey made of it. Should prospective bidders be unable to prepare bids within the specified time, the Bureau of Insular Affairs upon receipt of such notice by December 8 will take steps to have the date of opening postponed for a suitable time.

No. 11988. Electric-lighting machinery and plant.—An American consular officer reports that the city board of a foreign municipality invites tenders for supplying the machinery and plant required for the installation of electric light. The machinery must be of the latest and most improved type and worked by naphtha. Electric energy required, about 100 kilowatts. If possible payment in yearly installments, for a term of years. All correspondence should be in Russian or German.

No. 11980. Timber sale.—The American consulate general at Vancouver reports that sealed tenders will be received by the Minister of Lands until

December 26 for the purchase of a pulp license. Three years will be allowed for the removal of the timber. Particulars may be obtained of the Chief Forester, Victoria, British Columbia, Canada.

No. 11990. Detachable motors for boats.—A business firm in a European country informs an American consular officer that it wishes to import external motors for boats, similar to a cut furnished and which may be obtained from the Bureau of Foreign and Domestic Commerce. Manufacturers should communicate with this firm as soon as possible.

No. 12017. School desks.—It is reported that the Department of Public Instruction in a foreign country will soon be in the market for 6,000 school desks of the type commonly used in the United States. An American consular officer has furnished the name of the official to whom catalogues, price lists, and correspondence in regard to the matter should be addressed. It is preferable that communications, etc., be in Spanish.

No. 12022. Rowboats.—An American consul reports that a society in his district has made inquiries regarding American rowboats of the knock-down variety. Twelve to sixteen foot boats are desired, and particulars as to cost f. o. b. New York, cubic feet shipping measurements, and other useful information should be forwarded to a member of the society named.

No. 11993. Telephone and telegraph apparatus.—A foreign Government telegraph office desires information concerning apparatus for the transmission of telephone messages over the telegraph wires already installed throughout the country. Information is also desired concerning the machine which is attached to wires to receive the messages directly connected with a typewriter, printing the message as it is received. Exporters of such apparatus should communicate in Spanish only with an official named by an American consul.

No. 11994. Electric railway.—The American consulate at St. Michaels, Azores, has forwarded copies of a prospectus for building and operating an electric railway on that island, for which proposals are invited by the Junta Geral (local Parliament).

No. 11995. Electric derrick cranes.—Pats are requested for supplying and erecting two new 5-ton electric derrick cranes, fitted with 75 feet steel latticed jib, steel body, timber stays, and sleepers. The lifting gear to be single and double purchase, fitted with a powerful foot-lever brake. Wire ropes to be used both for lifting and derricking gear, the lift rope being fitted with a ball-bearing swivel hook. The motor to be 12-brake horsepower, by the Lancashire Dynamo Co., and controlled by a tramway type controller, with necessary resistance. Apply to Mr. R. Carlyle, builder, Elsinore Road, 104 Trafford, Manchester, England, for further particulars.

No. 12007. Wrought-iron pipes.—A report from an American consular officer states that a local business man, who is able to furnish good references, is desirous of representing American manufacturers of wrought-iron pipes. Correspondence may be in English.

SHEET METAL WORK
Warm Air Furnaces

1515 14th Avenue
East Oakland, Cal.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

The best and cheapest reversible
window on the market.

Common Sense Window

Invented and manufactured by
L. H. BIRTH, 19th and Carolina Sts.,
also 119 Jessie St.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

For Sale By All Druggists, or will be sent by mail postpaid by the manufacturers,

BUILDING AND INDUSTRIAL NEWS

A Weekly Publication Devoted to the Architectural, Building and
Industrial Activities of the Pacific Coast

Successor to:

California Architect.

Industrial News of Alameda Co.

Builder and Contractor.

Western Builder.

— THIS WEEK'S ILLUSTRATIONS: —

Two Illustrations Of Alameda County's
New Infirmary, Designed By Architect
Charles Peter Weeks of San Francisco.

WEDNESDAY, DECEMBER 3, 1913.

SAN FRANCISCO AND OAKLAND,

CALIFORNIA

*Electric
Weld*

**Combination
Boiler and Gas
Water Heater**

The

SOLUTION

To Your Hot Water
Problem.

Gives an inexhaustable supply of hot water to any part of the home, with 30 per cent less gas than any system ever produced.

Gas Appliance Sales Co. of America

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

“KINNEAR” STEEL ROLLING DOORS & SHUTTERS

KINNEAR STEEL ROLLING DOORS are designed to afford fire protection and for the closure of all openings in which ease and speed of operation and economy of space are considerations. They are adaptable to all classes of new or old building construction and by their use make possible the closing of very large openings which could not otherwise be conveniently covered.

In addition to the above uses, their extensive employment for fire protection and the high degree of efficiency shown by them in actual fires, has caused the KINNEAR Company to produce a shutter of a distinctly fire retardant character. With this end in view, numerous tests extending over a period of five years were made, and effects carefully noted. As a result, we are now in a position to offer for special fire protective purposes KINNEAR Steel Rolling Doors and Shutters of the “Abacus” Construction, all of which bear the label of the “National Board of Fire Underwriters’ Laboratories.”

Special Catalogue showing Abacus Construction can be obtained on application.

Recent great conflagrations have fully vindicated the claim of the “KINNEAR” STEEL ROLLING DOOR to pre-eminence as a fire-stop. Placed side by side with various other forms of fire retardants it has in every case remained in place even after the others were destroyed.

We will consider ourselves favored if allowed to explain and make quotations on any constructions meeting your definite needs.

**We have just received from the press a new Handbook on Steel Rolling Doors and Shutters Illustrated only with California Installations.

Editorial Comment.

The Solano Irrigated Farms proposition has gone glimmering into the land of beautiful dreams along with the Mississippi Bubble and other Utopian promotion schemes that have held public attention in other times. Whether it fell upon times that were inopportune or failed in the financial backing of its overlords has not been made public, but one thing seems certain and that is that the project has failed and those who have invested their good money in the scheme are liable to wait some time before they receive any returns. Real estate men have just cause to complain of such pretentious promotions that go up in smoke and ruin the market for a long, long time. Such schemes as these demonstrate again the need of a blue sky law that will exercise some sort of intelligent supervision over stock subscriptions and this sort of land sales. The question now is, for those who paid money and had agreements to purchase lands in the project, how are they to get their money back or get the land under the terms of the agreement?

The Los Angeles Investment Company that failed and whose officials are now under indictment, is the one that was most active in circulating the referendum petition on the blue sky law. Now there is some means of inquiring into these flamboyant concerns before they brush and scatter ruin in their wake.

Colonel Goethals places the date of probable opening of the canal as April next in his report giving plenty of time for any exigency that may arrive in the meantime.

There seems to be no question of the success of the canal as far as the locks and the mechanism is concerned. The only thing that the chief engineer puts any question on is the uncertainty of slide at Culebra cut and the retention of sufficient water in Gatun Lake. The only source of loss to this supply is by leakage and evaporation, barring the amount used at the locks for the purpose of putting ships through these different levels. Inasmuch as this lake is fed by rivers that drain a country subject to an enormous rainfall the water would seem to be no serious cause of alarm that the water supply will be insufficient.

The Mexicans can hardly be called a civilized race in view of the recent events that have transpired there. Huerta has assumed control of the government through the assassination of his chief. In the recent victory of the rebels against his government the victorious chief has retaliated by as-

saulting defenseless prisoners. The one difference this mode of procedure has from the American Indian is that so far as reported none have been tortured to death or burned at the stake.

So far as the outside world is concerned the best thing that could happen would be that the warring factions would exterminate each other. For of all the breed of human beings with which the creator has peopled the earth the Mexican is the most worthless. Like the dogs of that country they are absolutely worthless except to fight among themselves. Were it not for the destruction of property and the sacrifice of innocent lives it would be a good thing to ship in arms and ammunition and let them annihilate each other.

The award of \$6,000,000 increase in the wages of 100,000 trainmen in the East means that the interest on \$120,000,000 shall be spent not on improved service for the public but on the employees. This might be very well if the roads were permitted to earn the money by adequate charges for the service rendered, but that is a horse of another color. The particular railroads involved in the decision have invested \$2,000,000,000 more, and have earned \$5,000,000 less during the three years since they were forbidden to advance rates, and have been compelled to increase expenses."

The above is quoted from the San Francisco Chronicle. It does not occur to the champion of the special interests to suggest that the water might be squeezed out of that capital. It has even been the custom of these corporations to resist a demand for an increase in wages or a lowering of freight rates on the ground that they could not pay interest on their capital. But that capital usually represented about three times as much as actually went into an investment. Chairman Eschlehn, of the Railroad Commission, suggests that one method for railroads and other public service corporations to get on a basis of physical valuation would be for them to go into the hands of a receiver and then start out with an appraised valuation of something like one-third of the amount of money actually invested. This of course would do away with the big promotion fees and the slick financial methods of the speculative class all of which the Chronicle would greatly deplore.

While moving pictures are being used for slow purposes and great historical dramas are being created for the amusement of the multitude, they are being used also for historical purposes as well. Not long ago the

Roumania organized a company of production of a film of about 1,000 yards in length, being a repre-

Machinery At The Forest Products Exposition.

By C. D. Kordon.

Members of the wood-working trades have doubtless taken note of the fact that arrangements are being made to have a Forest Products Exposition. It will be held next year in Chicago, the Coliseum having been selected as the place; and immediately following the conclusion of the display there, another ten-day exhibition will be held at the Grand Central Palace in New York. It is intended to give the east as well as the west an opportunity to see what wood is, how it is made, what it is used for, and what it is the best material that can be devised for the purposes to which it is being applied.

The idea back of the exposition is obviously a desire to meet the attacks which have been made on wood by the manufacturers of substitute materials. These attacks have undoubtedly had their effect, and it is easy to point up instances in which the article made of wood has been displaced by one of some other material. In the building field wood is almost, if not quite, tabooed, especially for the larger buildings, neither floors nor interior trim, in many cases, being of a material that seems to be best suited for this work, especially when it is treated to render it fire-resisting. In the package-making trades the box and the barrel have alike suffered, paper boxes and steel casks having taken the place of the wooden container in a lot of instances. Metal furniture instead of wood is another case of the good old reliable material being shoved aside, solely for the fun of a moment. It hurts the lumber business, hurts the wood-worker and hurts those who are interested in selling machinery and supplies to that trade.

When the exposition was first broached, a good many people seemed to think that what was needed was merely a display of finished goods. In other words, that by showing handsome wood products, that one would be impressed with the beauty and utility of these goods and that one inclined to use them instead of substitutes. Fortunately, however, this suggestion did not remain quiet for long after it was put before the great showman who is to have charge of the details of the exhibition. What he heard that the display was to be made up as indicated above, he took back and laughed.

"Your show would last fifteen minutes," he said. "The show, which must be attractive to the exhibition if it is to be a success, will be motionless, dead process, and no matter how attractive, will draw no crowd. You must have machinery running, stuff being made, actual work being done, to draw the interest of the observer, either as expert; and consequently we must have a show that will be given, not that at least to displays of machinery to be used in working in wood."

And so it has been decided to all intents and purposes. That is that ma-

chinery will have in the exposition a place larger, probably, than is intended now. And such a display, instead of detracting from the interest in wood products, will only emphasize it, by calling attention to the marvelous perfection of the equipment and the processes which are now available to the wood-worker, all of them helping to produce good goods at the lowest possible price. So the exposition of machinery in connection with a display of forest products, so far from being out of accord with the idea of the show, is really an integral part of the basic idea back of it.

One might venture the assertion without risking too much, that when the doors of the Coliseum are flung open next April, one of the first things to get attention and one of the last to lose it will be the machinery exhibits. The products made of wood will be seen and studied; but, after the rounds have been made, the visitors will come back to the machines. The big glue-jointers, making big ones out of little ones; the dovetailing machinery used in the box factory; the equipment used in the production of turned goods, which in the production of turned goods, which is a class of machinery work, has been developed to a high point—these and other important units in the machinery display will have their devotees. And the chances are that most of those looking on with greatest interest will be members of the wood-working trade who have not been keeping up with what has been going on in other branches of the trade than their own.

Thus the saw mill man, who has been doing all sorts of things himself in the past few years with machinery, will wonder at the equipment shown for use in the planing mill and factory. The box manufacturer will be astonished at the progress made in the manufacture of barrels, for though the two branches of the package business are closely allied, the average box-maker probably thinks that most barrels are still hand-coopered. Thus to name but one end of the business, we are getting all the information we can about his own proposition, will find plenty that is novel and interesting in the equipment being offered for the use of the other fellow.

As an exposition of the really remarkable advances made in the equipment of the wood-working trades from the stump to the factory, the machinery section of the show ought to be a real contribution to public knowledge. Take the saw mill, for example. The numerous changes which have been introduced since the first saw-mill and the portable power plant were doing most of a work of lumbering, are not only being introduced, but with clever machinery, resaws and planers, sections of the device, the lumberman is enabled to do as much in a few minutes as he used to do in a day. The added processes, as the resaw, planer and his additions to shoring, plan-

ing, way of steam plants for seasoning purposes constitute another big item. The use of distilling apparatus as a means of getting at the by-products has now become standardized, so that it may be included in the equipment of the up-to-date saw mill, as a result of which it will easily be admitted that vast progress has been made in that department of the business.

The manufacture of thin lumber opens up another big class with which people outside the trade are not generally familiar. From the time when veneers were first sawed until the present, when the great bulk of thin stock is cut with a lathe, is a far cry, apparently, and yet it covers a comparatively short space of years. The slowing of the rotary machine, the shaver and the saw in action, would amaze not only the general public, but a lot of people who ought to be thoroughly familiar with their operations.

The intense interest which the wood-worker has in the machinery used in some other than his own immediate department was well illustrated not long ago when a crowd of lumbermen visited a manufacturing center not far from their own town. They went to rough the saw mills of the latter city, seeing the processes with which they were familiar; but they stopped longest in a planing mill which was operated in connection with one of the saw mills. The lumber manufacturers could hardly get away from the jointer, and watched its operations for so long that their hosts had finally to lead the way to some other part of the plant. It goes without saying that the same attitude will be shown when the exposition opens.

A feature of the show which is part of the machinery division, in its general ideas, at least, is that which has to do with the treatment of wood. This would naturally include drying, with all the modern processes which have been brought to the aid of the man who can no longer wait for nature to perform the essential operation of seasoning, while the work of crosscutting and timbers, shingle-dipping, impregnating for fire protection purposes, and the like, will furnish spectacles for the eyes of the ultimate consumer as well as the factory man, who will be worth looking at.

When one gets down to cases, the part that machinery plays in the operations of the wood-working trades is literally tremendous. While it is accepted as a matter of course, and need without thought of the debt the industry owes to the machine, many interesting facts, it is well to be remembered that had not man-made machinery been constantly perfected for the benefit of the worker in wood, the history of the competition of other materials would have been much more different. The case with wood, however, is that it is a material which has been improved and the wood worker has been improved with it. The progress of the industry is made from it, and the progress of the human race is made from it. The progress of the industry is made from it, and the progress of the human race is made from it.

ago, form the best bulwark against the ultimate success of substitute materials.

The Forest Products Exposition promises to be one of the greatest events that the wood-worker has ever participated in, and will mark an industrial milestone for many lines of business. But it is safe to say, six months in advance of the show, that the machinery department will be one of the outstanding features of the exhibition, and will impress not merely the public, to whom everything will be new, but chiefly the members of the wood-working trades themselves.

AMERICAN WOODS AND THEIR REPUTATION.

By Wesley T. Christine.

Did I ever fall to com. bot to see a Mississippi river roustabout drop a melon? If it has, do you recall what happened? Did he not grab the seedless heart of that melon, take a huge bite and kick the offending rind into the river?

That is about on a parallel with the way the people of North America have treated the wonderful timber wealth of this continent. They grabbed the heart, used a portion of it and destroyed the remainder.

A time came when there was not enough heart to go around, when the heart did not drop at their feet and someone, related to the covote, raised a mournful wailing cry of timber exhaustion.

What really had happened was that the American roustabout, the user of forest products was asked to take that portion of the forest watermelon in which the seeds grow. He objected strenuously to the trouble of picking out the seeds. He mourned the passing of the days when he could split black walnut into rails, when he could cut oak and cherry for his stove or the place and when he could buy clear white pine strips for fences at a nominal price.

He longed for the seedless heart of the watermelon as a portion.

It may prove something of a shock to the people of the United States who have said for a long time, "exhaustion may be an exaggeration in 1913." It is true because of the condition of the forest last year, and the million feet of timber.

Not only is there more now than there was ten years ago but if resources are properly managed there is more to come in the next ten years.

Two classes of woods are now being used in the building. Now we are using the heart of the wood. In the woods that are cut, the heart is used for the heart of the building. The heart of the wood is used for the heart of the building. The heart of the wood is used for the heart of the building.

In 1907 the United States Forest Service was established. It was the first time in the history of the United States that the government had taken charge of the forest. It was the first time in the history of the United States that the government had taken charge of the forest.

The United States Forest Service is now in charge of the forest. It is the first time in the history of the United States that the government has taken charge of the forest.

"that there ain't any lumber, anyhow." Compared with the price of other commodities the price of lumber is not high. As for the other part of it, usually the markets of the United States and Canada are over-supplied with exceptionally high grade building and factory lumber of all kinds.

The use of wood "as wood" is the big question for consideration, at this time when so many new, some of them untried and unproven, substitutes are being pressed upon the attention of the builder. To the great American public wood is wood, light or heavy, solid, striped or mottled in appearance.

In the form of lumber it is difficult to identify varieties, difficult even for those who have been engaged in the manufacture and sale of lumber all their lives. Certain woods are recognized readily by those familiar with lumber, but certain other woods look very much like them and the novice quickly becomes confused. Besides, there are no text books from which he can ascertain anything about lumber, he is not greatly interested in the subject, so when in the market for lumber he orders the sixes he requires and leaves it to the dealer to furnish the particular kind he carries in stock.

The dealer is in business for business reasons and ordinarily will handle those kinds that yield him the greatest profit. The architect serves as a check in some cases, but the vast majority of American people buy certain sizes, rather than certain sizes of certain kinds of lumber.

Whether or not the home builder is consciously interested in this question of lumber values and supplies, it concerns him directly, regardless of how or with what he builds. In the first place there is no substance manufactured that will take the place of wood as a shield against the elements. The nearest approach to wood is paper, made largely or entirely of wood fiber held in place with an artificial glue.

And materials, heralded as building trade revolutionizers when placed on the market, are forgotten in a few years. The structures built of such materials are dismantled and the material forgotten, while wood and wood structures continue to serve with the unvarying faithfulness with which they have served mankind since the beginning of the world.

The competition between wood and substitutes for wood may be regarded as a family affair in which the outsider has no part, and in which, if he be wise, he will not take sides.

Commercially woods are divided into two classes: Hardwoods and soft woods. The classification first mentioned embraces all of the broad-leaved trees of America. To "soft woods" is assigned all the needle-leaved or cone-bearing trees, also known as coniferous woods.

Like all general classifications this one may prove confusing. Some of the hardwoods are softer than some of the soft woods. Conversely, some of the soft woods are heavier, stronger and harder than some of the hardwoods.

Therefore it is not sufficient for the builder to ask for hardwood or soft wood for any purpose but is incumbent on him to specify the kind. Luckily most Americans have a very good idea of the general run of woods, though are not so familiar with their

relative values as they should be.

Hardwoods represent 20 to 22 per cent of the total production of lumber but for the purpose of this article may well be considered first.

Two of the hardwoods in which affection centered early in the history of our development are scarce now but have not disappeared from the market. These are black walnut and cherry. The small product now reaching the market is used largely by the factory trade, for furniture, gun stocks, moldings, machinery parts, etc. Manufacturers of forty-five different products, in Illinois, are using black walnut wholly or in part. Reports on cherry show about the same range of uses.

Should any builder desire to use either wood they may be procured and to judge by the wholesale price they should not cost very much more than choice white oak.

Decreases in the production of walnut and cherry caused manufacturers to inquire into the merits of other kinds of hardwood timber. The northern and eastern forests abounded in birch to which subsequently was given the nickname "the mahogany of North America," because of its physical—not color or grain—resemblance to the prized wood of the tropics.

The southern Appalachian and other southern states contained a heavy growth of red gum. This was one kind of timber neglected by the early settler who regarded it as part of the "rind" of the forest melon. It was taken up gingerly at first because of its indifferent reputation due to the fact that it was no like other woods and could not be handled with the same degree of carelessness. It was the south's offering as a substitute for the walnut and cherry it did not have and has been a very acceptable and valuable one.

These two woods, red gum and red birch, largely have taken the place of walnut and cherry in the building field and to some extent in the manufacturing field as well. White oak and red oak are produced in abundance and are put on the market in better shape now than formerly. These woods are more valuable now than ever before, therefore are given better care throughout their journey from the woods to the consumer. Oak has played an important part in the history of mankind as well as in the history of North America. Respecting current use perhaps it is sufficient to say that it is employed as the wooden parts of 276 different products of Illinois factories.

Yellow poplar, the great river and factory wood of the Ohio river valley, because of early wasteful practices and the farmer's habit of girdling trees and later burning them, is becoming scarce. Wagon manufacturers and producers of vehicles and farm machinery were the first to voice alarm. There is not going to be sufficient yellow poplar to make wagon bodies for free-born American citizens to ride about in or to haul things around in and how can we possibly make a vehicle without a yellow poplar body?

The how was to bring cottonwood on the market and to create millions of dollars in timber values by the simple demonstration that cottonwood was suitable for vehicle bodies and for scores of other uses.

Aspen, alder, and white oak are the one-time mainstays of the lumber and farm implement manufacturers. These woods were used for axes, splitting poles, tongues and other wooden parts of the running gear. Longleaf yellow pine now is being used almost exclusively for pole stock. Maple, birch, beech, red gum, rock elm, ash, hickory and white oak are competing for the remainder of the trade.

Basswood, perhaps the softest, lightest and most even textured of the better known hardwoods, is maintaining its place in the industries. It divides honors with white pine as the piano key stock of the country, it is made into molding, siding and used for scores of purposes by the timber trade.

Chestnut is little known in western markets except as a basket wood, but it is a wood very extensively used in the east.

Among the woods of minor production are persimmon, used in the manufacture of lasts and shuttle blocks; holly, good for the same such purposes; beech, now a flooring wood and a good one; soft elm, the standard material for chair rounds, legs and for staves and hoops.

Oak may be termed the national trim and furniture wood. It now is called upon to divide honors with birch and red gum and with others showing beauty of color and figure, among them being many of the so-called soft-woods.

Yellow poplar, basswood, sap gum and tupelo are retaining their places among the siding and outside trim woods. These woods are soft, and will hold paint, two of the necessary characteristics.

In considering lumber as a building material the user should regard it as a raw material. A house, barn, corncrib, garage, office or household furniture or contrivance of any kind into the construction of which wood enters is a finished product the cost of which is made up of three items: Value of the raw material, cost of labor and profit.

It costs as much to handle the least valuable and least suited wood, usually as it does to handle the most valuable and best suited kind. The only difference in the cost of two articles, one made from the best material and from the poorest raw material, would be the difference in the cost of the raw material. In house building much of the difference in the cost of the raw material is offset by the expense of cost of handling the better kind. That is not a very startling thing in itself but it adds to one's knowledge.

Each home owner should select the kind of lumber for the several purposes for which it is to be used on a basis of their present and for such purposes. He can secure fairly reliable information from all lumber dealers, from lumber trade papers, from all building papers and from any of the organized bodies that are giving the several kinds of wood publicity.

Fifteen years ago the building and factory trades of the United States entertained certain prejudices regarding wood values. These prejudices were accepted as a matter of course. Today these notions are being modified. With good material, with a better material at a fair price is a matter of necessity. Perhaps the pendulum is swinging too far in the direction of indiscriminate

use of woods, for certain kind of wood now are being employed for purposes for which they are not suited, but something was necessary to bring the people of this country out of the expensive habit of eating melon rinds and to teach them that other portions of the forest melon are good and should be used.

A REBEL IN THE CAMP OF ARCHITECTS.

Under the above head, W. H. H. Nelson in the November number of The International Studio gives an interesting discussion of the invention of a new order of architecture by A. A. Cantin of San Francisco who is associated in Seattle with Charles Hayes with offices in the Melhorn Bldg.

Mr. Cantin has not been asty in proclaiming his discoveries for following his inspiration he departed for Europe where in Rome and elsewhere for four years he applied himself diligently to the task of putting his ideas into the crucible of practical experience. Having ascertained beyond the shadow of a doubt that these ideas were feasible in every detail, Mr. Cantin returned to America and patented his designs. It may seem strange that an architect's ideas should be subject to patent, but this new-style architecture possesses unprecedented features, and the inventor or discoverer conceives himself the right to supervise any development that may ensue. He is, however, seeking no monopoly as the license fee for using the style is nominal.

"This new-style architecture," writes Mr. Nelson, "is based upon a fundamental order of architecture, with the addition of a new arch and column combination. It results from an effort to fathom the reason for the disavowing by the ancient Greeks of the combination of the arch and column from their beautiful structures. Although they were fully aware of the use of the arch, yet history does not record any single building of importance where such a combination occurred, which undeniable fact invites reflection. It seems a safe hypothesis, therefore, that they deemed such a combination as unfinished and, consequently, unbecoming in design. Of course it is to Italy that we must turn to judge the merits and demerits of past and present styles. Past-style arches betray unbecoming structure, lacking in cohesion between column and archivolt, the arch itself feels a sense of unrest in bearing the arch moldings dead ending against the top of the abacus. The addition of the bolsters and entablatures, however, to the top of the column and the column lends no beauty to the combination. It is not truth to the construction."

"A most prominent defect of the arch is the overhanging of the archivolts of the column by which the appearance is created, and it is the arch may exist, the column is not."

"It would be impossible to discuss in this article to go any length into the technical refinements of the new arch and column, the combination of the defects are eliminated, the arch and finish of the capital and the proper termination of the archivolts upon the column and the

new-style architecture should clearly commend itself to architects and sculptors alike, as it offers splendid opportunities of design permits them to impress their personality upon a structure, making it a symbol of its purpose and an impressively beautiful plan is possible with any other style. Then, it would give immense scope in the designing of columns; magnificent effects could be assured by different colored marbles being used for capital and shaft. Such a colored combination is of immense importance and quite out of the question in old-style architecture.

The most notable feature is the placing of statues upon consoles in the interiors of the capitals, by which means the interiors and exteriors of structures can be enriched. Here again architect and sculptor can co-operate, as in theatre foyers and lobbies, public halls and vestibules, too, lend themselves to the most varied treatment, and may thus win fresh interest in the eyes of the visitor. At present, outdoor statues are too high to be admired properly, and are soon disfigured by exposure, but if placed about the column capital in the new style these objections would automatically vanish. Take, for instance, a modern room, and very little imagination must show the immense possibilities of Mr. Cantin's design which lends itself equally to Spartan simplicity or lavish elaboration. Transplant yourself for a moment to the new postoffice in New York City, opposite the Pennsylvania Railroad Station. What a splendid field presents itself here for architect and sculptor to unite in placing upon the column capital allegorical figures in keeping with the historical legend carved in the frieze!

"The human figure is the most appropriate decoration for capitals and must surely supersede the present designs, with their monotonous cast-iron appearance. In capitals where the figure or bust is used in a leaf-work design, a jumbled effect is produced and the main motif is lost. A glance at the old-style capitals in elevated positions shows 'spottiness' and fails to give a clean-cut appearance when observed from a new ground.

"To create a new architecture it is essential that one possess a fundamental basis. This might ordinarily sound like a platitude, but the many efforts to butt against tradition and evolve a new style in this country, have failed utterly, for the very simple reason that the modes employed have lacked this essential quality. In Mr. Cantin's design the column and arch, with frieze and perforated capitals, form a new order of architecture to add to the Doric, Ionic, the Corinthian composite and Tuscan orders. A new factor is introduced in the new standards by the combination of the combinations. It is essential to place a column of a new order under an entablature of a new order. Change in the formation of the column. As an arch is an essential part of the structure from which the column grows, it could not be a complete structure. The new style adds to the old style, creating new methods of building, and makes a finished column, and with well-proportioned archivolts.

ture decoration, and the requirements for beauty, utility and stability.

"What use are heavy overhanging cornices? On the other hand, beautiful shadow-play may be expected from these perforated cornices in the new style because they are perforated in the farthest overhanging part; open-work portions may be filled with tracery or with colored glass, the sunlight projecting the colors among the shadows upon the frieze. This is a point of considerable importance if we are to construct with an eye to fine effects.

"In old-style architecture the height is too shallow to carry proportionately the superimposed load, while in new-style this difficulty is obviated by extending the capital right up to the underside of the frieze, which member must be planned in proper relation to the load it carries. The sculpture work on the panels of the capital has a low relief at the base and center of the panel, heavier at the top so as to cast proper shadows at the abacus line. In illustration of this precept, the reader's attention is called to Goujon's figures in the Fountain of the Innocents, in Paris. To revert for a moment to the Renaissance period, it is interesting to reflect what use the architects and sculptors would have made of this new-style architecture in their column capitals and perforated cornices. As the column capital bears the shape of a Latin cross, it is safe to say that all their ecclesiastical architecture would have been carried out in this style and enriched with madonnas, Christ on the Cross, saints and angels, etc.

"Men like Michelangelo, Donatello, Goujon and Thorvaldsen would have left us a rich heritage of beautiful motifs in stone and marble, but the classical style columns did not appeal to them as worthy material for their art.

"In the old-style architecture the abacus is so thin as to appear brittle; ears of foliage at the angles give no solidity to it, and a bunch of leaves at the top of a column carrying untold tons of masonry seems almost childish in conception."

The voice is Jacob's but the hands are the hands of Esau. The notes are "International Studio's" notes but the ideas are the ideas of Mr. Cantin. Like that publication, the Daily Record accepts no responsibility and is in no wise acting as the champion of new-style architecture. We realize that Mr. Cantin has developed new features which we are pleased to present to our readers. It is very questionable whether it is possible to discover a new order at any time and still more so in the present commercial age. Also we believe that we can detect certain flaws and discrepancies in these designs with subsequent criticism and debate will doubtless ensue. Meanwhile, any one seeking intelligently to improve present conditions of architecture in America, endeavoring yeoman service, and all in accordance with his problems, who at least commend Mr. Cantin for his attempt to prescribe a new diet for the suffering infant American architecture.

In conclusion we would quote from Frank E. Wallis, who, in an excellent chapter on "The Architect and the Future," writes as follows:

"The big, dominating force in America today is its industrial feudalism, and its restraining force is the ideal of the individual. This is developed to a point unknown in the previous history of architecture. The opportunities given the average American to express himself in domestic architecture are unique. The condition is undoubtedly an outcome of the interesting partnership between the industrial overlord and his retainers. The overlord requires libraries, institutions of learning, banks and palaces, and we have them. On the other hand we have today a domestic architecture of the highest degree of excellence, a new expression which is not only comfortable and fit but beautiful and supremely convenient.

Science will continue to build more and more amazing temples for the overlord as long as the industrial ideal retains its power. And when the time comes for the third great revolution, or evolution, and that ideal is destroyed or modified, out of the conflict, saved by the ideal of the individual unit, will arise a new and vital power, perhaps approaching the ideal socialism of the thirteenth century without the attending horrors perhaps a world citizenship, and science will build temples to the new ideal, and a new style will be born."

Mr. Cantin is now in San Francisco, supervising the construction of numerous models of his different illustrations.—Seattle Daily Record, Nov. 24, 1913.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$15,000. Architect, L. Mastropasqua, 550 Washington street, S. F. Owner, M. Victoria Sattini. The building will be erected at the southeast corner of 23rd and Bryant streets and will cover an area of 50 by 52 feet. The first floor has been arranged for stores and upper two floors will contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and redwood. Some oak floors will be used. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 2 story and base, Class C construction, \$15,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mr. Burbank. The building will be erected on the north line of Sacramento street east of Taylor, having a frontage of 25 feet and a depth of 87½ feet. Plans show a total of six suites of two and three rooms. All apartments will have private bath rooms and wall beds. Interiors will be finished in pine, white enamel and elm panels. There will be steam heat, a vacuum cleaning system and hot water supply. Main entrance and vestibule will be finished in the Spanish Renaissance style. Exterior of the building will be faced with red pressed brick laid in white joints and trimmed with terra cotta. Plans are complete and figures will be taken at once.

VENICE, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Arthur G. Lindley, 1106 Hollingsworth, L. A. Owner, C. L. Smart. The house will be erected on Billows avenue and has been designed for an apartment house containing 60 rooms which are to be arranged in two and three room suites. Interior finish will be of pine and redwood with some elm panels. All suites will have private baths and wall beds. There will be steam heat and a hot water system. Vacuum cleaning will probably be installed. Baths will be

finished in tile. Exterior of the building will be faced with cement plaster. Preliminary plans only have been prepared.

LOS ANGELES, CAL.—Apartment house, 14 story and base, Class A construction. Cost not stated. Architect, De Forrest Howry, Van Nuys Bldg., L. A. Owners represented by W. C. Montgomerie and Co., Black Bldg., L. A. A site on Figueroa street south of Washington has been secured and a building covering an area of 130 by 100 feet will be erected. It is intended to arrange the interior for 47 suites of which twelve will be duplex apartments containing from eight to ten rooms while the balance of the apartments will range from five to seven rooms. Construction will be of the Class A type with a complete steel frame, exterior walls of brick and concrete faced with pressed brick and terra cotta. Preliminary plans have been prepared. Further mention will be made of this work as the plans progress.

Contracts Awarded.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$13,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. Contractor, Charles Coburn, general construction. Contract price, \$11,500. Note—This contract does not include steam heat, finish hardware, wall beds, wall paper, shades, gas ranges or fire escapes.

CHURCHES.

FRESNO, FRESNO CO., CAL.—Church, 2 story and base, Class A construction, \$100,000. Architect, eastern firm whose name is not given. Owners, First Christian Church of Fresno. Rev. Brendon pastor, Rev. Shirley P. Shaw assistant pastor. Rev. Brendon has secured a set of plans from architects in the east who have built for him before. The congregation has secured a large site on one of the best located corners and will shortly start construction. The building will probably be faced with stone. Plans have not yet been received in Fresno and a detailed description of the building will be given later.

LOS ANGELES, CAL.—Church, 2 story and base, Class C buildings, \$125,000. Architect, Joseph De Remer, Title Insurance Bldg., L. A. Owners, Wil-

shire Presbyterian Congregation. The group will consist of the main church, Sunday school building and manse. All of the structures will be in the Gothic style in design. The church, which is 115 feet and the manse and gallery will accommodate 100 people. Will have a high basement and will contain a large lecture room, apparatus room. The Sunday school building will be a two-story basement structure 60 by 115 feet. The basement will contain a large dining room, kitchen, lavatories, toilet room, etc. The upper stories will contain the Sunday school auditorium with a gallery, class rooms and classrooms. The manse will also be a two-story structure, but no other details have been definitely decided. Concrete foundation and basements will be exterior walls with artificial stone trim, slate roof, reinforced concrete floors, composition finish floors, masonry interior partitions, oak trim, plumbing and electric wiring. The building will have a separate heating and ventilating plant. The plans will be completed and the Sunday school building erected immediately. The completion of this building will be followed by the erection of the manse and main church edifice.

REDONDO, LOS ANGELES CO., CAL.—Curen, 1 story and base, brick, cost not stated. Architect, Albert H. Martin, Higgins Bldg., L. A. Owner, Roman Catholic Church of Redondo. The building will cover an area of 28 by 106 feet and will contain a main auditorium seating 250 people. Interior will be finished in pine throughout. Plans provide for a central heating system. A clay tile roof will be used. Exterior of the building will be faced with blue pressed brick. Plans are now being prepared.

FACTORIES & WAREHOUSES.

PORTLAND, ORE.—Ware house, 2 story and base, reinforced concrete. Cost not stated. Architect, P. L. Spelle Browne, Mohawk Bldg., Portland. Owner's name withheld for fear suit. The building will be erected at the corner of 15th and Hoyt streets, covering a ground area of 100 feet square. Construction will be practically fireproof with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile or metal lath and plaster. Plans provide for automatic sprinkler system, fire lines and metal window sash and frames. Steel chutes will probably be installed. Exterior of the building will be faced with cement plaster. Two large elevators are to be specified. Plans are complete and figures are being taken.

STOCKTON, SAN JOAQUIN CO., CAL.—Potting works, alterations and additions, frame, \$3,000. Architect, Ralph P. Morrill, Odd Fellows Bldg., Stockton. Owners, Rainier Potting Works. This work will consist of alterations to the present buildings and the construction of new sheds. Exterior walls covered with corrugated metal. Plans are being prepared and figures will be called for shortly.

Contracts Awarded.

PORTLAND, ORE.—Ware house, 2 story and base, of reinforced concrete, \$75,000. Architects, Emil Schacht & Sons, Commonwealth Bldg., Portland. Owners, D. P. Thompson Estate. Contractors,

The Boyajoun-Arnold Co., Portland. Bldg., Portland. Contract price, \$75,000.

SEATTLE, WASH.—Ware house and lofts, 7 story and base, reinforced concrete, \$125,000. Architects, Samuels & Lawton, Alaska Bldg., Seattle. Owners, A. Hambach Co. Contractors, Puget Sound Bridge and Dredging Co., Central Bldg., Seattle. Contract price, \$125,000.

FIRE HOUSES.

SAN FRANCISCO.—Fire house, 2 story and base, brick and steel, \$30,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County, of San Francisco. Sixteen sets of bids were opened on the Board of Public Works on November 24th for the construction of Fire Engine House No. 48. The lowest figure was submitted by Newsum, Wold and Kohn at \$29,555. A contract will probably be awarded to this firm. A complete list of the other figures received will be found in this issue under the heading of San Francisco.

RICHMOND, CONTRA COSTA CO., CAL.—Fire house, 1 story and base, brick, \$12,000. Architect, Niblett, Richmond. Owners, City of Richmond. Bids opened for the construction of a new building to house Engine Company No. 2 show Paul Glazer low at \$12,365 with an alternate bid of \$13,870. A contract will probably be awarded to him at the next meeting of the Commissioners. A complete list of the other figures received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

FLATS.

SAN FRANCISCO.—Flats, 2 story and base, brick and steel, cost not stated. Architects, Rousseau and Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The architects are preparing preliminary plans for three separate four-story brick buildings which are to be erected on the west side of Stockton street near California, covering a ground area of 78 by 147 1/2 feet. Each of these structures will contain four large flats of nine rooms and two baths. Interiors will be handsomely finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for steam heating, hot and cold running water and vacuum cleaning. Bath rooms will have composition floors and tile walls. Exterior treatment of the buildings has not been fully decided upon. The mention will be made of this work shortly.

GOVERNMENT WORK AND SUPPLIES.

Reclamation Work.

The secretary of the committee authorized the Reclamation Service to proceed at once to locate and select important divisions of the Project of Irrigation work in the Colorado River units of the work area to be undertaken. 1st. Excavation of the East Fork system from the headworks to the junction with the Lower Colorado, providing for the drainage of 100,000 acres between the Selig and Gifford canal systems; following this excavate

the headworks and lateral system will be completed.

2nd. Construction of headworks, excavation of present Selig ditch, and construction of upper end of the Selig ditch, a distance of 4 miles; construction of lower end of extension and Selig branch and the completion of the Peach Valley lateral.

3rd. Construction of Intermitte, Payson, Selma, and Roubidoux laterals and extension of Spring Creek and East Creek laterals.

The total expenditures approved for the completion of the three canal systems is \$711,650 and the completed work will provide for the future irrigation of 78,000 acres.

The Encampment project includes among its notable engineering features the Great Gunnison tunnel, 6 miles long, crossing the mountain barrier which separates the Gunnison River from the Snake Encampment Valley.

Pearl Harbor, Steel Tank.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for one elevated steel tank and tower at the naval station, Pearl Harbor, H. T.:

Chicago Bridge & Iron Co., 1300 W. 37th street, Chicago, Ill., \$15,500.

The Rock Island Bridge & Iron Works, Rock Island, Ill., \$15,444.

The C. S. Steel Products Co., 30 Chambers street, New York City, \$10,083.

The Des Moines Bridge & Iron Co., Pittsburgh, Pa., if constructed in seven months, \$14,900; alternate A, \$12,285; alternate B, \$13,550; alternate C, \$12,600; if constructed in six months, \$15,400; alternate A, \$12,585; alternate B, \$13,550; alternate C, \$12,990.

The Memphis Steel Construction Co., Memphis, Tenn., \$16,965.

The Ritter-Conger Mfg. Co., Leesport, Pa., \$18,115.

Casper, Wyo., Post Office.

All bids received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, of the U. S. post office at Casper, Wyo., have been rejected.

Douglas, Wyo., Post Office.

All bids received by the supervising architect, Treasury Department, Washington, D. C., for the construction of the U. S. post office at Douglas, Wyo., have been rejected.

Management of Navy-Yard Plants.

There is every likelihood that the House naval committee will take up the question of the management of navy yards. That is a subject which comes directly to the notice of individual members, largely by virtue of their personal encounter with the problem in their visits to the navy yards of the Atlantic coast during the last summer. On those occasions they were profoundly impressed, according to their own statements, with the need of some consistent, simplified, economical process which would save the merit of uniformity of system. It was not surprising to observe that there should come out of the out-of-the-ordinary deliberations a method of management of the navy yards. At least, some of the prominent and influential members of the committee have expressed themselves in favor of

and a change. They have heard much of the merit of placing civilians in control of the navy-yard plants and found much to criticize in the prevailing methods, which were described to them, among others, by the committee of workmen at the Boston navy yard, where it was explained that the frequent changes necessary among naval officers resulted in much confusion and the increased cost of operation, notably in the overhead charges. It is realized by the members, who have thought anything on the subject, that it is not easy of solution, and the conservative element is prepared to proceed with caution. This will probably have the effect of preventing precipitate action, even in the way of recommendation, and may result in the organization of a board, which shall not include naval officers in its composition, but which shall be made up of representatives, senators, and civilian experts, to report to Congress at the beginning of the second regular session in December, 1914. That will give a short session for legislative action, and by that time the result of the congressional elections of that year will be known. It may be considered that the committee should possess information without any such delay, but as the situation appears now there are indications that the committee will seriously take up the question of navy-yard management with a determination to do something.

—HALLS & SOCIETY BLDGS—

PORTLAND, ORE—Club house, 1 and 3 story and base, frame and brick, \$29,000. Architects, Robinson & Thomas, Chamber of Commerce Bldg., Portland. Owners, Laurelhurst Club. Plans for the entire structure will be prepared at this time, although the building will be erected in two units, the first will be about two-thirds of the structure planned. There will be a large ball-room 50x49 and a dining room will be built in the future. This is to be 40x40. Between those two rooms will be the club proper. This will be divided into a large reception room and cloak and billiard rooms. A steam heating plant and other modern conveniences will be installed. Exterior of the building will be faced with cement plaster. Working drawings are nearly complete.

BAKERSFIELD, KERN CO., CAL.—City hall alterations, brick and steel, \$27,000. Architect, Thomas B. Wiseman, Producer's National Bank Bldg., Bakersfield. Owners, City of Bakersfield. This work was mentioned here when plans were first out for figures. All bids received were above the amount available and were rejected. Plans have been revised to bring the work within the \$27,000 and new figures will be opened on December 5th. Plans can be seen from Architect Wiseman.

SAN FRANCISCO—Art museum, 1 and 2 story and base, Class C construction. Cost not stated. Architects, Lewis P. Hart, Crocker Bldg. S. P. Owners, California Academy of Sciences. Plans have been completed for the first section of the museum, and they were approved by the Board of Supervisors. The building will be erected at the south side of the museum grounds and fronting it, so that its facade will be almost directly opposite the Golden Gate Park Memorial Museum. For the present,

the westerly wing, with rear wings, will be built. Later the central building and the easterly wing will be added. A structure of classic design and one story high, its white limestone exterior will have a monumental character and a dignity fitting its environment. When both wings are built, with the central structure, its entire frontage will be about 100 feet long. The first building will accommodate the various departments of the academy and have a main exhibition hall 160 feet long and 60 feet wide and a smaller exhibition hall. Both halls will be used for exhibits of the museum of natural history. In one of the rear wings will be the departments of the academy on the first floor and offices and library on the second floor. The structure will be fireproof, with tiled floors, and it will be lighted through skylights in the exhibition halls. As the plan is a comprehensive one designed for future enlargement, until the whole structure is complete, it provides for paved courts between the back wings, which may be covered with glass roofs. The central building is dominated by a grand dome and rotunda, upon which will open the exhibition halls. Spaces for cases and exhibits are twenty-five feet wide, so that very large crowds may pass through the building without congestion. Construction is to begin as soon as possible.

LOS ANGELES, CAL.—Public hall, 1 story and base, frame. Cost not stated. Architect, Otto Janssen, Story Bldg., L. A. Owners, East Rose Hill Improvement Association. The building will be erected on East Rose Hill Drive and has been designed for a civic and social center. The structure will be erected on a hill side, the surrounding grounds being terraced. A main auditorium seating 200 people is provided besides smaller parlors and smoking rooms. Interior will be finished in pine with maple floors. A gas steam system of heating is specified. Exterior will be covered with rustic and roof with shingles. Plans are complete and the work will be done by Day Labor.

HOSPITALS

ELMERIDGE, SONOMA CO., CAL.—Nursery building, one story, concrete and frame. Cost not stated. Architect, George B. McDougal, Sacramento. Owners, State of California. Bids opened at Sacramento for the construction of this building show Boxton-Dillon Co., Hearst Bldg., S. P., low at \$17,440. No contract has been awarded. A complete list of the figures received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

NAPA, NAPA CO., CAL.—Laundry building, 2 story and base, concrete and frame, \$16,000. Architect, State Architect George B. McDougal, Sacramento. Owners, State of California. Bids opened at the Napa State Hospital show Robert Trost low at \$15,850. No contract has been awarded. A complete list of these figures appear under the heading of Marin, Contra Costa and Sonoma Counties.

SEDRO-WOOLLEY, WASH.—Kitchen and cold storage building, 1 story and base, reinforced concrete, \$25,000. Architects, Saunders and Lawton, Alaska Bldg., Seattle. Owners, Sedro-Woolley Insane Asylum. Plans have been completed for the construction of a large

kitchen building and cold storage plant for the State Insane Asylum and figures will probably be called for this week by the State Board of Control. Interior will be finished in pine, marble and tile. Gas ranges will be installed. Exterior of the building will be faced with cement plaster. Plans and full particulars can be secured from the architects.

Contracts Awarded.

LOS ANGELES, CAL.—County farm school, superintendent's residence, kitchen and dining room, brick and frame, \$64,770. Architect, George Low, County Superintendent of Construction, L. A. Owners, Los Angeles County. Contractor, J. F. Atkinson, Story Bldg., general construction. Contract price not stated. J. Hokum, 4312 Moneta ave., L. A., plumbing, \$1,429.

HOTELS.

OAKLAND, CAL.—Hotel alterations, 5 story and base, Class C construction, \$50,000. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Abrahamson Bros. The building located at the southeast corner of 13th and Clay streets is to undergo extensive alterations. Interior will be completely rearranged and extensive exterior alterations will also be made. There will be new plumbing, plastering, steam heat, electric work, painting and elevator service. Patent store fronts, plate glass windows and marble bases will be used. Plans will also include a hot water supply and vacuum cleaning. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. The building will be erected on North Main street and will have a frontage of 90 feet by a depth of 117 feet. Besides the hotel lobby plans provide for 15 stores on the first floor. Upper floors will contain a total of 150 guest rooms and 24 baths with 15 showers. Interior will be finished in pine throughout. There will be steam heat, elevator service, a vacuum cleaning system, hot water supply and other modern conveniences. Bath rooms will have composition floors and tile wainscot. Metal window sash and frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SOUTH PASADENA, LOS ANGELES CO., CAL.—Hotel and stores, 2 story and base, brick, \$10,000. Architect, Arthur B. Benton, 114 North Spring street, L. A. Owner, Mrs. Gertrude Opman. The building will be erected at the corner of Mission and Fair Oak avenue covering a ground area of 105 by 85 feet. There will be stores on the first floor. Upper floor will be arranged for the hotel office and a number of guest rooms and baths. Interior will be finished in pine and redwood. Bath rooms will have tile floors and wainscot. Plans provide for steam heat and a hot water supply. There will be patent store fronts. Exterior will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 3 story and base brick and steel. Cost not stated. Architects, Train and Williams, Exchange Bldg., L. A. Owner, P. W. Wachter. The building will have a street frontage of 75 feet and a depth of 15 feet. Four stories and a hotel lobby will occupy the first floor. Upper floors will be subdivided into guest rooms and a number of public and private baths. There will be steam heat, elevator service and a hot water supply. Interior finish will be largely of pine with some elm panels. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

FRESNO, FRESNO CO., CAL.—Hotel, 2 story and base, brick, \$20,000. Architect, R. F. Sleehin, Fresno. Owner, James Ryan. The building will be erected at the corner of Tubbs and F streets covering an area of 75 by 90 feet. There will be three stories on the first floor besides the entrance to the hotel. Upper floor will be arranged for a total of 25 guest rooms and several baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water system. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

OAKLAND, CAL.—Hotel, 6 stories, 7 story and base, Class A. Cost not stated. Architect, E. D. Young, Central Bank Bldg., Oakland. Owner, H. A. Powell. Contractor, J. C. McCloud, Oakland, plastering work. Contract price, \$9,107.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Storm water drain box. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the construction of a storm water drain box to be constructed at the west end of the Race Track on the Exposition grounds have been completed. Bids on this work will be opened by the Buildings and Grounds Committee on December 11, at 10 o'clock. Plans and specifications can be obtained from the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

SAN FRANCISCO.—Exposition building, frame and concrete construction, \$50,000. Architect, A. W. Dickey, Central Bank Bldg., Oakland. Owners, Territory of Hawaii. Architect Dickey has been commissioned to prepare plans for the building which is to be erected at the 1915 Exposition grounds. The design will be unique. Exterior will be covered with cement plaster. A Rector system of heating will be installed. Working drawings are now prepared and figures will be called for shortly.

SAN FRANCISCO.—Main entrance tower, frame and steel construction. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the general construction of the main entrance tower on the Exposition grounds have been completed and are now out for figures. Separate proposals will be allowed for

the sewer and water piping, electric wiring and elevator work. An official proposal appears in another column of this issue. Bids will be opened by the Buildings and Grounds Committee on December 11th.

POST OFFICES.

BRIGHAM CITY, UTAH.—Post office, 1 story, base, and mezzanine floor fireproof construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans are complete and figures will be opened on January 2nd in Washington for the construction of the new Federal Building at Brigham City. The structure will be classic in design with exterior faced with cut stone. Interior partitions will be of hollow tile and metal lath and plaster. A composition and copper roof is specified. Plans can be secured from the Supervising Architect at Washington or from the Custodian of the site at Brigham City.

GRAND JUNCTION, COLO.—Post office, 1 story and base, fireproof construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids will be opened on January 6th in Washington, D. C. for the construction of this building. The structure will cover a ground area of approximately 3,700 square feet and is to be fireproof throughout. Exterior walls will be faced with pressed brick and stone. Roof will be of tile and composition. Interior finish will be of pine and hardwoods. Steam heat, equipment and lighting fixtures will be included in the contract. Plans can be secured from either the Supervising Architect at Washington, D. C. or from the Custodian of the site at Grand Junction, Colo.

RAILROAD CONST., STATIONS AND EQUIPMENT.

VANCOUVER, B. C.—Car barn, 2 and 2 story and base, reinforced concrete, \$200,000. Architect, Engineering Department British Columbia Electric Co., Vancouver. Owners, British Columbia Electric Co. The building will be erected at the corner of Main and Quebec streets covering an area of 172 by 310 feet. The Main street frontage will be one story high and the Quebec street frontage two stories. Construction will be fireproof throughout. A cement floor will be used on the first floor. Plans provide for steam heat and modern mechanical equipment. Exterior will be faced with cement plaster. Metal window sash and frames are specified. Plans are now being prepared.

RESIDENCES.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, E. A. Skakade 219 20th street, S. F. The dwelling, which is now being designed for a six room house with bath, will be erected on the east line of 20th avenue 200 feet south of Alcazar street. Interior will be finished with oak throughout with oak floors in the parlor, room and dining room. There will be a large open fire place and a fireplace mantel. Bath room will have a glass

door floors and tile wainscot. Tile wainscot will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$4,000. Architects, R. Kodes and Marsh, 3372 16th street, S. F. Owner, M. J. Terranova. The dwelling will be erected on Paris street between persia and Russia and has been designed for a seven room house with sitting and sleeping porch. Interior finish will be of pine and elm panels. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or stone. Tile wainscot will be used in the bath room and kitchen. Composition floors are specified. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$3,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Scoble, 363 14th avenue, S. F. Mr. Scoble is one of the city's best known residence builders and has erected many homes in both Sunset and Richmond Districts. This house will be erected on the north side of Lake street east of 20th avenue and has been designed for a seven room dwelling. Interior will be finished in pine with elm panels in the living and dining rooms. Oak floors will be specified for the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Composition floors and tile wainscot will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$2,500. Architect, H. C. Baumann, Chronicle Bldg., S. F. Owner, E. A. Janssen, Hearst Bldg., S. F. The dwelling has been designed for a six room house with bath and sleeping porch and will be erected on the east side of Mississippi street. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. A large open fire place with brick or tile mantel will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$8,500. Architects, Ward and Holme, Alaska Commercial Bldg., S. F. Owner, H. G. Patterson. The dwelling will be erected at the northeast corner of Hyde and 15th streets and will extend to the neighborhood of eight to ten two baths and sleeping porch. Interior will be handsomely finished in pine with some hardwood veneer. Oak floors will be used in the parlor and dining room. A wide fireplace and open fire places. Mantels will be of tile or brick. Bath rooms will have soap stone floors

and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence alterations, etc., frame construction, \$5,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Mrs. Katherine P. Hooker. Mrs. Hooker is now erecting a large city home on property near the site of this dwelling and will let contracts for moving the old building and remodeling it. The work will include new plastering, electric work, painting and plumbing. Exterior alterations will also be made. Plans are complete and figures are being taken by the Architects.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, Arthur M. Moore. The dwelling will be erected at the corner of Pacific and Hager avenues and has been designed to contain eight rooms, baths and sleeping porch. Interior will be finished in pine with some elm panels and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Composition floors and tile wainscot will be used in the bath rooms. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base frame. Cost not stated. Architects, Rousseau and Rousseau, Monadnock Bldg., S. F. Owner, Louise T. Greuner. The dwelling will be erected on the north side of Claremont avenue west of Forrest street on a lot covering an area of 16 by 125 feet. Interior has been arranged for eight rooms, baths and sleeping porch. Interior will be finished in pine with hardwood veneer in the dining room and living room. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of the composition floors and tile wainscot will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Bungalow, 1 1/2 story and base frame, \$1,200. Architect, Leonard H. Ford, 2736 Commercial street, Berkeley. Owner, Mrs. L. Carson. The dwelling will be erected in the average Heights and has been designed to contain seven rooms, bath and sleeping porch. All interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantels will be of brick. Composition floors will be used in the bath rooms. Tile wainscot will be used in the kitchen and dining room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being taken.

SACRAMENTO, CAL.—Residence, 2 story and base frame, \$3,000. Architects, none. Owner, J. M. Kelly, 1211 X street, Sacramento. The dwelling

will be erected in West Curtis Oaks and will contain six rooms and bath. All interior finish will be of pine. Some oak floors will be used. A large open fire place and tile mantel will be used in the living room. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster and rustic. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

SAN MATEO, SAN MATEO CO., CAL.—Residence and garage, 2 story and base frame, \$15,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owner, William C. Duncan. The dwelling has been designed for a country home with 10 to 12 rooms, baths and sleeping porch. The garage will also be a two story structure with accommodations for four machines and living quarter for the men above. Interior of the dwelling will be finished in pine and hardwoods. There will be a central heating system, open fire places, vacuum cleaning and a hot water supply. Mantels will be of tile and brick. Oak floors will be used in the principal rooms. Bath rooms will have tile floors and wainscot. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Bungalows, 1 1/2 story and base frame, \$2,000 each. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Thomas Seoble, 263 14th avenue, S. F. These houses will be erected on the west side of 41th avenue near Cabrillo and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with some elm panels. Oak floors will be used in the living and dining rooms. There will be large open fire places with tile and brick mantels. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster, brick veneer and cobble stones. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base frame, \$2,750. Architect, none. Owner, A. R. Lapham, 1833 McAllister street, S. F. The dwelling will be erected on the east side of 12th avenue south of Anza and has been designed to contain seven rooms and bath. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be a large open fire place and tile or brick mantel in the living room. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base frame, \$2,000. Architect, none. Owner, Louis Johnson, 223 Greenbank ave. Piedmont. The dwelling, designed for a seven room house, will be erected on Greenbank avenue west of Grand. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Brick mantels will be used. Tile will be composition floors and tile wainscot in the bath rooms. A large sleeping

porch is also provided. There will be tile wainscot in the kitchen and an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base frame. Cost not stated. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, James R. Talisman. The dwelling has been designed to contain eight rooms, bath and sleeping porch and will be erected on Pacific and Hager avenues. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heater, vacuum cleaning and tile wainscot will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base frame, \$2,000. Architect, none. Owners, Sullivan & Leet, East 15th street, San Jose. The dwelling will be similar to several others recently erected by the same owners, and will contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Oak floors will be used in the dining room and living room. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO.—Foundation, balustrades, etc., for residence tract, \$2,500. Architect, Ralph P. Merrill, Odd Fellows Bldg., Stockton. Owners, Hammon, Jones & Williams, Stockton. Construction will be of concrete, Chaco stone and ornamental iron. A number of ornamental electroliers will also be used. Plans are complete and figures are being taken.

Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base frame, \$9,000. Architect's name not given. Owner, James Briscoe, Contractor, Fred L. Gilbre, Fresno. Contract price, \$10,000.

FRESNO, FRESNO CO., CAL.—Residence, 2 story and base frame, \$9,085. Architect, Edward T. Foulkes, Crocker Bldg., S. F. Owner, W. A. Sutherland, Contractor, D. A. Wilkins, Fresno. Contract price, \$9,085.

SCHOOLS.

EUREKA, HUMBOLDT CO., CAL.—School, 2 story and base, reinforced concrete. Cost not stated. Architect, William H. Weeks, 75 Post street, S. F. Owners, Eureka Union High School District, Architect William H. Weeks has completed working drawings for the new High School building, which is to be erected in Eureka, Humboldt County. The building will cover an area of 214 feet by 180 feet and is designed in the classic style. Construction will be of reinforced concrete except the upper story, which will be of the slow burning type. Exterior is to be faced with cement plaster in imitation of stone. Eight class rooms, a principal's office, the teachers' rooms,

17th and Bryant streets and will cover an area of 50 by 52 feet. The first floor has been arranged for stores and upper two floors will contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and redwood. Some oak floors will be used. There will be steam heat and a hot water supply. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, Class C construction, \$15,000, San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mr. Burbank. The building will be erected on the north line of Sacramento street east of Taylor, having a frontage of 25 feet and a depth of 87½ feet. Plans show a total of six suites of two and three rooms. All apartments will have private bath rooms and wall beds. Interiors will be finished in pine, white enamel and elm panels. There will be steam heat, a vacuum cleaning system and hot water supply. Main entrance and vestibule will be finished in the Spanish renaissance style. Exterior of the building will be faced with red pressed brick laid in white joints and trimmed with terra cotta. Plans are complete and figures will be taken at once.

FIRE HOUSE—2 story and base, brick and steel, \$30,000, San Francisco. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Sixteen sets of bids were opened by the Board of Public Works on November 26th for the construction of Engine House No. 48. The lowest figure was submitted by Newsom, Wold & Kahn at \$29,555. A contract will probably be awarded to this firm. A complete list of the other figures received will be found in this issue under the heading of San Francisco.

FLATS—3 1-story and base brick and steel. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The architects are preparing preliminary plans for three separate four-story brick buildings which are to be erected on the west side of Stockton street near California, covering a ground area of 78 by 137½ feet. Each of these structures will contain four large flats of nine rooms and two baths. Interiors will be handsomely finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for steam heat and cold running water and vacuum cleaning. Bath rooms will have composition floors and tile wainscoting. Exterior treatment of the buildings has not been fully decided upon. Further mention will be made of this work shortly.

POST OFFICE—1 story, base and mezzanine floor. Fireproof construction. Cost not stated. Brigham City, Utah. Architect, Supervising Architect Oscar Wendrock, Washington, D. C. Owners, United States Government. Plans are complete and figures will be opened on January 2nd in Washington for the construction of a new Federal Building at Brigham City. The structure will be classic in design with exterior faced with cut stone. Interior

partitions will be of hollow tile and metal lath and plaster. A composition and copper roof is specified. Plans can be secured from the Supervising Architect at Washington or from the Custodian of the site at Brigham City.

POST OFFICE—1 story and base, fireproof construction. Cost not stated. Grand Junction, Colo. Architect, Supervising Architect, Oscar Wendrock, Washington, D. C. Owners, United States Government. Bids will be opened on January 6th in Washington, D. C. for the construction of this building. The structure will cover a ground area of approximately 5,700 square feet and is to be fireproof throughout. Exterior walls will be faced with pressed brick and stone. Roof will be of tile and composition. Interior finish will be of pine and hardwoods. Steam heat, equipment and lighting fixtures will be included in the contract. Plans can be secured from either the Supervising Architect at Washington, D. C. or from the Custodian of the site at Grand Junction, Colo.

OFFICES—26 story and base, Class A construction, \$1,000,000, San Francisco. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owners, Hobart Estate. This building has been fully described in these columns before when construction was first contemplated. Figures have been taken on the various parts of the work and contracts will be let within a few days.

ART MUSEUM—1 and 2 story and base, Class A construction. Cost not stated. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, California Academy of Sciences. Plans have been completed for the first section of the museum of the California Academy of Sciences and they were approved by the Park Commissioners. The building will be erected at the south side of the music-concourse and frontage so that its facade will be almost opposite the Golden Gate Park Memorial Museum. For the present, the westerly wing, with rear wings, will be built. Later the central building and the easterly wing will be added. A structure of classic design and one story high, its white limestone exterior will have a monumental character and a dignity fitting its environment. When both wings are built, with the central structure, its entire frontage will be about 400 feet long. The first building will accommodate the various departments of the academy and have a main exhibition hall 160 feet long and 8½ feet wide and a smaller exhibition hall. Both halls will be used for exhibits of the museum of natural history. In one of the rear wings will be the departments of the academy on the first floor and offices and library on the second floor. The structure will be fireproof with tiled floors, and it will be lighted through skylights in the exterior walls. As the plan is a comprehensive one designed for future enlargement until the whole structure is complete, it provides for paved courts, between the back wings, which may be covered with glass roofs. The central building is dominated by a grand dome or rotunda, upon which will open the exhibition halls. Space for case and exhibit is twenty-five feet wide so that very large crowds may pass through the building without congestion. Construction is to begin as soon as possible.

BUNGALOWS—1 1-story and base, frame, \$2,000 each. San Francisco. Architect, Edward E. Young, 231 Kearny street, S. F. Owner, Thomas Scobie, 36 14th avenue, S. F. These houses are erected on the west side of 14th avenue near Cabrillo and each has been designed to contain six rooms and bath. Interiors will be finished in pine and covered with some elm panels. Oak floors will be used in the living and dining rooms. There will be large open spaces with tile and brick manteles. The wainscot will be used in the bath rooms and kitchens. Interiors will be covered with cement plaster, brick veneer and cobble stones. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,750, San Francisco. Architect, none. Owner, A. R. Lapham, 1853 26th street, S. F. The dwelling will be erected on the east side of 12th avenue south of Anza and has been designed to contain seven rooms and bath. Interiors will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be a fireplace on the living room and tile or brick mantel in the living room. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath and rustic. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, frame, \$13,000, San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, James Ward. Contractor, Charles Coburn, general construction. Contract price, \$11,500. Note—This contract does not include steam heat, fire escape hardware, wall beds, wall paper, shades gas ranges or fire escapes.

City Bids Opened.

Newsom, Wold & Kahn Low for Engine House No. 48. Bids Also Opened for Cleaning Brick.

Sixteen sets of figures were opened by the Board of Public Works at their meeting held, November 26th, for the construction of Fire Engine House No. 48. Plans for the building were prepared by the City Department of Architecture. The lowest figure was received from Newsom, Wold & Kahn at \$29,555 and that firm will probably be awarded the work.

Figures were also received for cleaning brick for the City Hall. A complete list of all bids opened follows:

Edward Malley, Prop. A. \$1.50 per M; Prop. B. \$2.00 per M.
No contracts were awarded.

George Browne Post Dead.

World Famous Architect Passes Away Suddenly at His Home in New Jersey. Designer of Many Structures.

George Browne Post, regarded as one of the world's most famous architects, died suddenly last Friday at his home in Bernardsville, New Jersey, after an illness lasting less than twenty-four hours.

Among the buildings of which he was the architect are the New York Stock, Cotton and Produce exchanges, the College of the City of New York, the Pulitzer building, the equitable building (which was burned two years ago), the residences of Cornelius Vanderbilt and Collis P. Huntington in New York, and the Manufactures and Liberal Arts building at the Chicago world's fair.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, Cost not stated, Piedmont, Alameda Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland, Owner, Arthur M. Moore. The dwelling will be erected at the corner of Pacific and Hager avenues and has been designed to contain eight rooms, baths and sleeping porch. Interior will be finished in pine with some oak panels and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Composition floors and the wainscot will be used in the kitchen. Tile will also be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, Cost not stated, Oakland, Cal. Architects, Roussseau & Roussseau, Concord Bldg S E. Owner, Louise T. Green. The dwelling will be erected on the north side of Claremont avenue, West of Forrest street on a lot covering an area of 10 by 125 feet. Interior has been designed for eight rooms, baths and sleeping porch. Interior will be finished in pine with oak and hardwood veneer. In the dining room and living room oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Composition floors, and tile wainscot will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures will be taken at once.

RUNGALOW — 2 story and base, frame, \$3,200, Oakland, Cal. Architect, Leonard H. Smith, 2145 Center street, Berkeley, Owner, Mr. L. Carson. The dwelling will be erected in the avenue Helga and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine or redwood. Hardwood floors will be used in the living

room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Composition floors are specified in the bath rooms. Tile wainscot will be used in the kitchen and bath room. An automatic water heater will also be installed. Exterior of the bungalow will be covered with cement plaster on metal lath. Plans are being prepared.

HOTEL ALTERATIONS—5 story and base, Class C construction, \$50,000, Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Abrahamson Bros. The building located at the southeast corner of 13th and Clay streets is to undergo extensive alterations. Interior will be completely rearranged and extensive exterior alterations will also be made. There will be new plumbing, plastering, steam heat, electric work, painting and elevator service. Patent store fronts, plate glass windows and marble base will be used. Plans will also include a hot water supply and vacuum cleaning. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with cement plaster. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$3,000, Piedmont, Alameda Co., Cal. Architect, none. Owner, Louis Johnson, 223 Greenbank ave., Piedmont. The dwelling, designed for a seven room house, will be erected on Greenbank avenue west of Grand. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Brick mantels will be used. There will be composition floors and the wainscot in the bath rooms. A large sleeping porch is also provided. There will be tile wainscot in the kitchen and an automatic water heater. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, Cost not stated, Piedmont, Alameda Co., Cal. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owner, James R. Talisman. The dwelling has been designed to contain eight rooms, bath and sleeping porch and will be erected on Pacific and Hager avenues. Interior will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heater, vacuum cleaning and the wainscot will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

HOTEL PLASTERING—5 story and base, Class A. Cost not stated, Oakland, Cal. Architect, F. D. Voorhes, Central Bank Bldg., Oakland. Owner, H. A. Powell. Contractor, J. C. McDonald, Oakland, plastering work. Contract price, \$9,107.

STORES—1 story and base, brick and steel, \$18,000, Berkeley, Alameda Co., Cal. Architect, Clay N. Burrell, Albany Block, Oakland. Owners, Colin Bros. Contractors, Morris & Muller, 1601 Telegraph avenue, Oakland. Contract price \$18,000. Notes—Subfigures are now being taken on all parts of the work.

Lofty Bell Tower Started.

First Work On The Sather Campanile Begins At U. of C. at Berkeley.

With an acrobatic mechanic clinging to its top, the first nine-ton steel column for the new \$200,000 Sather Campanile has been swung into place and the University of California's great bell-tower has started its three-hundred foot climb toward the sky. It will be completed by 1915. Slender and lofty, its gleaming walls all of white granite and marble, the Sather Campanile will be a splendid landmark, visible from ocean vessels as they enter the Golden Gate and from all the cities clustering around San Francisco Bay. It is a memorial to its donor, Mrs. Jane K. Sather of Oakland, giver of many rich endowments to the University of California. In the open belfry will hang the Sather Bells, for which Mrs. Sather gave a special gift of \$25,000. From these chimes the University hymns, patriotic airs, or any other melodies desired may be rung out. Of noble grace, dignity, and beauty, precious in material, in mass and height comparable with such structures as the Campanile of Venice, Giotto's tower in Florence, and the Giraldia of Seville, and itself keynote for the surrounding landscape and architectural glories of the Berkeley campus, as developing under the great Hearst Plan, the Sather Campanile is destined to become one of the world's most famous towers.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

FIRE HOUSE—1 story and base, brick, \$12,000. Richmond, Contra Costa Co., Cal. Architect Narbett, Richmond. Owners, City of Richmond. Bids opened for the construction of a new building to house Engine Company No. 2 show Paul Glazer low at \$12,365 with an alternate bid of \$11,870. A contract will probably be awarded to him at the next meeting of the Commissioners. A complete list of the other figures received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

LAUNDRY BUILDING—2 story and base, concrete and frame, \$16,000. Napa, Napa Co., Cal. Architect, State Architect George B. McDougal, Sacramento. Owners, State of California. Bids opened by the State Board of Control for the construction of a laundry building at the Napa State Hospital show Robert Trost low at \$15,850. No contract has been awarded. A complete list of these figures appear under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

NURSERY BUILDING—1 story, concrete and frame. Cost not stated. Eldridge, Sonoma Co., Cal. Architect, George B. McDougal, Sacramento. Owners, State of California. Bids opened at Sacramento for the construction of this building show Boxton-Dillon Co., nearest Bldg., S. F., low at \$17,440. No contract has been awarded. A complete list of the figures received will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

FRESNO, MODESTA, SANISLAUS AND CENTRAL CALIFORNIA.

CHURCH—2 story and base, Class A construction, \$100,000. Fresno, Fresno Co., Cal. Architect, eastern firm whose name is not given. Owners, First Christian Church of Fresno. Rev. Brendon pastor, Rev. Shirley P. Shaw, assistant pastor. Rev. Brendon has secured a set of plans from architects in the east who have built for him before. The congregation has secured a large site on one of the best located corners and will shortly start construction. The building will probably be faced with stone. Plans have not yet been received in Fresno and a detailed description of the building will be given later.

CITY HALL ALTERATIONS—Brick and steel, \$27,000. Bakersfield, Kern Co., Cal. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, City of Bakersfield. This work was mentioned here when plans were first out for figures. All bids received were above the amount available and were rejected. Plans have been revised to bring the work within the \$27,000 and new figures will be opened on December 5th. Plans can be secured from Architect Wiseman.

HOTEL—2 story and base, brick, \$20,000. Fresno, Fresno Co., Cal. Architect, R. F. Stechin, Fresno. Owner, James Ryan. The building will be erected at the corner of Tulare and F streets covering an area of 75 by 30 feet. There will be three stores on the first floor besides the entrance to the hotel. Up-

sleeping porch. The garage will also be a two-story structure with accommodations for four machines and living quarters for the men above. Interior of the dwelling will be finished in pine and hardwoods. There will be a central heating system, open fire places, vacuum cleaning and a hot water supply. Mantels will be of tile and brick. Oak floors will be used in the principal rooms. Bath rooms will have the floors and wainscot. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BUNGALOW—1 story and base, frame, \$2,000. San Jose, Santa Clara Co., Cal. Architect, none. Owners, Sullivan and Leet, East 15th street, San Jose. The dwelling will be similar to several others recently erected by the same owners and will contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Oak floors will be used in the dining room and living room. There will be a large open fire place and tile mantel. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN JOSE AND THE SANTA CLARA VALLEY,

RESIDENCE AND GARAGE 2 story and base, frame, \$17,000. San Mateo, San Mateo Co., Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S F. Owner, William C. Deegan. The dwelling has been designed for a country home with 10 to 12 rooms, baths and

per floor will be arranged a total of 25 guest rooms and some of these interior finish will be finished in wood. There will be steam heating and a hot water system. Patent safes are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.
RESIDENCE—2 story, brick base, frame, \$10,000. Fresno, Fresno, Cal. Architect's name not given. Owner, James Ericson. Contract price, \$1,000.
RESIDENCE—2 story, brick base, frame, \$9,985. Fresno, Fresno, Cal. Architect, Edward T. Foulkes, Stockton Bldg., S. P. Owner, W. A. Stanford. Contractor, D. A. Wilkins. Fresno. Contract price, \$9,985.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCE—2 story, brick base, frame, \$2,500. Sacramento, Cal. Architect, none. Owner, W. D. McKay, 1211 X street, Sacramento. The dwelling will be erected in West Oaklands and will contain six rooms and bath. All interior finish will be of pine. Some oak floors will be used. A large open fire place and tile mantel will be used in the living room. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster and rustic. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

SCHOOL—2 story and base reinforced concrete. Cost not stated. Eureka, Humboldt Co., Cal. Architect, William H. Weeks, 75 Post street, S. E. Owners, Eureka Union High School District. Architect William H. Weeks has completed working drawings for the new High School building, which is to be erected in Eureka, Humboldt County. The building will cover an area of 214 feet by 180 feet and is designed in the classic style. Construction will be of reinforced concrete, except the upper story, which will be of the slow burning type. Exterior is to be faced with cement plaster in imitation of stone. Eight class rooms, a principal's office, the teachers' rooms, the bookkeeping and typing department and the assembly hall take up the space on the first floor. All class rooms throughout the building are equipped with blackboards and teacher's closets. The assembly hall has a seating capacity of 75 students and will be used for student work. The floor is level, but the stage is raised and built on a slight rise. It is one of the most artistic buildings in the city. As additional equipment, there are several other rooms, it has a large motion picture outfit, a large fireproof box for the moving picture machine. There is a bank of windows to the hall, three main exits, the exits being provided. The assembly hall is given over to five sections, two science, lecture rooms, a gymnasium, a chemical and physics laboratory, a girls' restroom and stage boxes. The drawing room is on the second floor and have built-in ceiling and lights, regulated by a switch, will permit of the adjustment of the lights

and shadows as desired. The laboratory is absolutely modern.
FOUNTAIN, BALDWIN STRAIDEN, LTD.
For residence tract, \$25,000. Stockton, San Joaquin Co., Cal. Architect, R. P. Morrell, Odd Fellows Bldg., Stockton. Owners, Hammon, Jones and Wilson. Construction will be of concrete, Caen stone and ornamentation. A number of ornamental cast-iron figures are being taken.

BOTTLE WORKS ALTERNATE AND ADDITIONS—Frame, \$100,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owners, Rainier Bottling Works. This work will consist of repairs to the present buildings and construction of new sheds. Excavations will be covered with corrugated metal. Plans are being prepared and names will be called for shortly.

Wilson & Christensen,	21,182

LOS ANGELES AND SOUTH-ERN CALIFORNIA.

PUBLIC HALL—1 story and base, frame. Cost not stated. Los Angeles, Cal. Architect, Otto Janssen. Story Bldg., L. A. Owners, East Rose Hill Improvement Association. The building will be erected on East Rose Hill Drive and has been designed for a civic and social center. The structure will be erected on a hill side the surrounding grounds being terraced. A main auditorium seating 200 people is provided besides smaller parlors and smoking rooms. Interior will be finished in pine with maple floors. A gas steam system of heating is specified. Exterior will be covered with rustic and roof with shingles. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base reinforced concrete. Cost not stated. Capistrano, Orange Co., Cal. Architects, Walker and Sawyer, Hibernian Bldg., L. A. Owner, Miss Grace M. Dalph. The dwelling will contain ten rooms and four baths. Construction will be of reinforced concrete with metal lath and plaster partitions and clay tile roofs. There will be steam heat and open fire places. Mantels will be of tile and brick. Pine, redwood and hardwood finish is specified. Oak floors will be used throughout. All bath rooms will have cement floors and tile wainscot. There will be a vacuum cleaning system and hot water supply. Exterior of the dwelling will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Venice, Los Angeles Co., Cal. Architect, Arthur G. Lindley, 1304 Hollingsworth, L. A. Owner, C. L. Smart. The building will be erected on B. Lewis avenue and has been designed for an apartment house containing 60 rooms which are to be arranged in two of 12 room suites. Interior will be of pine and redwood with some tile work. All suites will have private baths and will have. There will be steam heat and a hot water system. Vacuum cleaning will probably be included. The building will be finished in tile. The exterior of the building will be faced with pressed brick. Preliminary plans of the structure prepared.

APARTMENT HOUSE—1 story and base, Class A concrete. Cost not stated. Los Angeles, Cal. Architect, Joe Forrest Howry, 1304 Bldg., L. A. A site on Figueroa Street south of

Washington has been secured and a building covering an area of 120 by 100 feet will be erected. It is intended to arrange the interior for 47 suites of which twelve will be duplex apartments containing from eight to ten rooms while the balance of the apartments will range from five to seven rooms. Construction will be of the Class A type with a complete steel frame, exterior walls of brick and concrete faced with pressed brick and terra cotta. Preliminary plans have been prepared. Further mention will be made of this work as the plans progress.

CHURCH—3 2-story and base, Class C buildings, \$125,000. Architect, Josepe De Remer, Title Insurance Bldg., L. A. Owners, Wilshire Presbyterian Congregation. The group will consist of the main church, Sunday school building and manse. All of the structures will be Tudor Gothic in design. The church will be 80x115, and the main auditorium with gallery will accommodate 700 people. Will have a high basement which will contain a large lecture room and apparatus room. The Sunday School building will be a two-story and basement structure 60x111 feet. The basement will contain a large dining room, kitchen, lavatories, boiler room, etc. The upper stories will contain the Sunday school auditorium with a gallery, class rooms and accessories. The manse will also be a two-story structure, but no other details have been definitely decided. Concrete foundation and basements, brick exterior walls with artificial stone trim, slate roof, reinforced concrete floors, composition finish floors, hollow tile interior partitions, oak trim, plumbing and electric wiring. Each building will have a separate heating and ventilating plant. The plans will be completed and the Sunday school building erected immediately. The completion of this building will be followed by the erection of the manse and main church edifice.

CHURCH—1 story and base, brick. Cost not stated. Redondo, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Roman Catholic Church of Redondo. The building will cover an area of 38 by 106 feet and will contain a main auditorium seating 350 people. Interior will be finished in pine throughout. Plans provide for a central heating system. A clay tile roof will be used. Exterior of the building will be faced with blue pressed brick. Plans are now being prepared.

HOTEL—1 story and base brick and steel. Cost not stated. Los Angeles, Cal. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. The building will be erected on North Main Street and will have a frontage of 90 feet by a depth of 117 feet. Besides the hotel lobby, plans provide for 15 stores on the first floor. Upper floors will contain a total of 150 guest rooms and 21 baths with 15 showers. Interior will be finished in pine throughout. There will be steam heat, elevator service and a vacuum cleaning system, hot water supply and other modern conveniences. Bath rooms will have composition floors and tile wainscot. Metal window sashes and frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL AND STORES—2 story and

base, brick, \$10,000. South Pasadena, Los Angeles Co., Cal. Architect, Arthur B. Benton, 111 North Spring Street, L. A. Owner, Mrs. Bertine L. Ozmun. The building will be erected at the corner of Mission and Fair Oak Avenue covering a ground area of 105 by 85 feet. There will be stores on the first floor. Upper floor will be arranged for the hotel office and a number of guest rooms and baths. Interior will be finished in pine and redwood. Bath rooms will have tile floors and wainscot. Plans provide for steam heat and a hot water supply. There will be patent store fronts. Exterior will be faced with pressed brick. Plans are being prepared.

HOTEL—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owner, F. W. Wechter. The building will have a street frontage of 75 feet and a depth of 95 feet. Four stories and the hotel lobby will occupy the first floor. Upper floors will be subdivided into 60 guest rooms and a number of public and private baths. There will be steam heat, elevator service and a hot water supply. Interior finish will be largely of pine with some elm panels. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

Contracts Awarded.

COUNTY FARM STABLES, SUPER-INTENDENT'S RESIDENCE, KITCHEN AND DINING ROOM—Brick and frame, \$61,770. Los Angeles, Cal. Architect, George Low, County Supt. of Construction, L. A. Owners, Los Angeles County. Contractor, J. P. Atkinson, Story Bldg., general construction. Contract price not stated. J. Hokum, 1312 Montana Ave., L. A., plumbing, \$14,329.

PORTLAND AND OREGON.

WAREHOUSE—2 story and base, reinforced concrete. Cost not stated. Portland, Ore. Architect, P. Chapelle Browne, Mohawk Bldg., Portland. Owner's name withheld for the present. The building will be erected at the corner of 15th and Hoyt streets covering a ground area of 100 feet square. Construction will be practically fire proof with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile or metal lath and plaster. Plans provide for an automatic sprinkler system, fire doors and metal window sash and frames. Spiral chutes will probably be installed. Exterior of the building will be faced with cement plaster. Two large elevators are to be specified. Plans are complete and figures are being taken.

CLUB HOUSE—1 and 2 story and base, frame and brick, \$20,000. Portland, Ore. Architects, Robinson & Thomas, Chamber of Commerce Bldg., Portland. Owners, Laurelhurst Club. Plans for the entire structure will be prepared at this time, although the building will be erected in two units; the first will be about two-thirds of the structure planned. There will be a large ballroom 80x10 and a dining room will be built in the future. This is to be located between these two rooms will be the club proper. This will be divided into a large reception room and cloak and billiard rooms. A steam

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

CORRESPONDENCE WITH CONSULS.
The suggestion is made that all communications to consular officers be addressed

The American Consul,

At

the name of the office not being given. Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name, it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what language correspondence should be conducted.

No. 12026. Machinery for handling dairy products.—An American consular officer has forwarded a copy of a communication from one of the directors of a large dairy association in his district, relative to a visit which he is making to the United States in the interest of the association. Copy of the complete report, giving full details, will be sent to interested firms by the Bureau of Foreign and Domestic Commerce.

No. 12027. Hardware specialties and tools.—A commission merchant in France, representing large varnish works in the United States, informs an American consular officer that he would like to act as agent for some good-selling American hardware specialties. He mentions particularly tools for carriage making, for automobiles, motor cycles and motor equipment in general for use in making of all kinds. Correspondence with this merchant may be in English.

No. 12028. Automobile vacuum road cleaners.—An American consular officer reports that a business in his district, which states that it is in a position to furnish the Government with a desire to receive orders for the same, with an exclusive agency for Italy from American manufacturers of automobile vacuum road cleaners. The firm in question states that it has an illustration

of such a machine working in the United States. This firm already represents American general machinery builders. Correspondence should be in English.

No. 12029. Gas electric cars and electric baggage trucks.—A report from an American consular officer states that a railroad in his district has under consideration a scheme to use gas electric cars on one of its branch roads. A railway company intends to use electric baggage trucks at its stations. Full information regarding these matters can be obtained by addressing officials named in the report.

No. 12032. Building materials, machinery, and concrete mixer.—An American consular officer transmits the name of a Canadian firm which desires to obtain quotations on builders' materials, machinery, contractors' supplies, and concrete mixing machines. Correspondence may be in English and prices, to be quoted f. o. b., stated in United States currency. Terms of payment, 2 per cent discount 10 days or net 30 days. The firm in question states that it is in touch with European manufacturers, and prices quoted must compare favorably with those of the European exporters if business is to result.

No. 12033. Automobile catalogues and price lists.—An American consul in Australia desires automobile manufacturers in the United States to send him catalogues, together with price lists and discounts to foreign dealers. He is frequently asked about certain American cars, but is unable to supply detailed information, as catalogues showing the cars in question are not on file in his office.

No. 12034. Machinery for making carpets. A resident of a South American country in forms an American consular officer that he wishes to purchase machinery for making carpets, and would like to hear from manufacturers. He requests catalogues and full particulars. Correspondence may be in English.

No. 12043. Steam tug.—The American consulate at Madrid, Spain, reports that proposals are requested by the Junta de Obras del Puerto de Gijón-Musol for the purchase of a steam tug for harbor use, the estimated cost of which is \$16,850. Plans are on file in the Secretaría de la Junta de Obras del Puerto de Gijón-Musol. Gijón-Musol, Spain, where they may be seen. Bids must be sent to the same office before December 22.

No. 12021. Sporting goods, paper novelties, and advertising specialties.—

E. H. Williams

Chalmer Munday

Munday & Williams Attorneys-at-Law

Special Attention Given to Building Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

A person, with apparently good business connections in South Africa, informs an American consulate that he wishes to get into touch with American novelty firms dealing in sporting goods novelties, paper novelties, and advertising specialties, for the purpose of securing sole South American agencies. Interested American firms may send duplicate catalogues with full particulars to the person in care of the consulate forwarding the inquiry.

No. 12023. Agricultural implements.—An American consulate has received inquiries for the names of American manufacturers of agricultural implements used in connection with the groundnut (peanut) industry. The inquirer states that he is interested in a number of groundnut farms in West Africa, and that he is desirous of installing there the latest agricultural implements.

No. 12035. Face brick.—An American consular officer has forwarded the name of a firm in his district which desires to enter into communication with American manufacturers of fancy face brick, enameled and plain. Correspondence may be in English, and quotations may be given in United States currency. Prices should be quoted f. o. b.

No. 12036. Hardware, contractors' supplies, engines, and concrete mixers.—A report from an American consular officer in Canada states that a firm in his district desires to receive from American manufacturers catalogues, price lists, and discount sheets of hardware specialties, contractors' supplies, concrete mixers, and gasoline engines. Correspondence may be in English.

No. 12037. Hardware, paints, and novelties.—A business man in a Latin American country informs an American consular officer that he would like to represent American manufacturers of hardware, paint, and novelties of a general nature.

No. 12038. Lumber and dry room.—An American consul in a European country reports that a firm in his district manufacturing fine furniture would like to import whitewood and mahogany. The firm also desires to purchase a dry room and would like offers from American concerns. Correspondence should be in German.

No. 12039. Black tin.—A business man in a European country informs an American consulate that he would like to import black tin from the United States, if prices compared favorably with those of English concerns from which he now purchases. Correspondence should be in German.

No. 12041. Flour, wire, roofing, oils, cement, etc.—An American consular of-

deer in Brazil writes that the country with good interest is anxious to make direct agreements with the United States for connections to cover southern Brazil with American firms handling the following articles: Wheat flour, codfish, woolen clothing and other purposes, wire fencing or zinc roofing, keel, iron, oil, pitch, and tar, saws, iron and steel bars. Manifestly, for these articles in the United States you may be interested. Should you be Portuguese, to the firm in question whose name can be obtained from the Bureau of Foreign and Domestic Commerce

No. 12043. Groceries and hardware specialties.—An American consular officer in Canada presents a letter of introduction from a local person who desires to be taken into consideration with American exporters of groceries and hardware specialties. Correspondence may be in English, and prices in American currency, quoted f.o.b. Terms of payment, 30 days net. The exporter desires to purchase in large quantities.

No. 12045. Lumber, tobacco, flour, hardware, meats, etc.—The writer informs an American diplomat, with whom he is desirous of contracting, of his willingness to trade with American exporters of the following articles:—Pigs, apples, corn, leaf tobacco (the bags each contain one leaf and half barrels), hams, sausages, bacon, and corned beef. The writer asks the Correspondence should be sent to the person referred to and return to the English!

No. 12072. **Chairs, timber, leather, and furnishing lines.**—A. J. Kell, wholesale dealers in furniture, 1115 Broadway, Australasia, informs an American consular agent that it wants to deal in furniture with American manufacturers of the following lines: Kitchens, dining room chairs, knee chairs, washstands, oak for marbled turning, and other turnings, but not for the manufacture of new furniture lines. The agent is told that it does only a wholesale furniture business and that it is not in the manufacturing line, except that it has opened offices in Melbourne, Australia, and already has a small furniture business in furniture and leather. The English and Continental communications, according to the agent, are simple, direct, and to the point, and to terms was satisfactory and to the point, and was kept on hand.

would be glad to receive communications from such manufacturers as far as possible. Catalogues should be sent to the officer forwarding the request for his files.

No. 12554. Nail and hook making machinery. A business man in Germany has written an American consul that he wishes to purchase nail-making machines for his factory for making nails and hooks of all kinds for industrial purposes. He states that he is interested originally in Germany but cannot find what he wants and would like to get into communication with an American firm that can supply him with such machines. His competitor is said to possess such equipment. Correspondence should be in German.

No. 12,056. *Proposities for the Spanish Navy.*—The American consul at Madrid reports that proposals are requested in the Navy Department of Spain for supplying projectiles of all kinds for a period of 12 years. The projectiles, combat and practice, of all kinds must be manufactured according to certain plans and details which are on file at the Jefatura de Construcción de Artillería del Ministerio de Marina, Madrid, Spain. The concessionary will be engaged within two years for the right of award of this contract to set up a factory for the complete manufacture of the projectiles in Spain and to use material of Spanish production exclusively. The estimated quantities to be ordered will amount to \$263,495 each year of the first four years of the contract and \$44,637 each year for the balance of the term. All details concerning this contract may be obtained by direct correspondence in Spanish with the Jefatura de Construcción de Artillería del Ministerio de Marina, Madrid, Spain.

No. 12067. Mining tools and machinery.—The American Consulate at Madrid, Spain, reports that the Director General de Fomento and the Inspeccion General de Minas has issued the following instructions for supplying the Almaden mines (lead and antimony) owned by the Spanish Government and operated by an English company with mining tools, etc. needed for the year 1914. The value of a year's supply is estimated at \$156,000. All specifications are to be in the Administracion General de Minas de Almaden, Almaden, Province of Ciudad Real, Spain. Proposals may be submitted by December 31, 1913.

No. 12062. Hardware, agricultural implements, and machinery. An Annual Personal Report of the Agricultural and Mechanical Hardware Manufacturers Association would like some 2000 copies of this hardware manufacturers' directory, a daily implement, and more information for a special offer. Write for details to the Association for the Hardware Manufacturers, 1000 Pennsylvania Avenue, N.E., Washington, D.C. 20002. Send prompt replies to the above cable address. Attention: Mr. J. H. Smith.

East Oakland, Cal.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

Thirteenth Year No. 49

Editorial Comment.

November is usually the coldest month of the year not only in California, of the Eastern States, but so far as the building industry is concerned throughout the country. For then the season's rain begins and there is a general wind up of work in hand and a cessation before the next year's work begins. This year is no exception to the rule. Contracts for construction work of all kinds let in San Francisco for the past month amounted to \$1,555,222. Of this \$1,350,329 was for private work and \$204,893 for city construction. Of the private work the following division is made: Brick and fireproof buildings, \$380,455; frame construction, \$554,776; alterations and additions, \$156,117. Panama-Pacific contracts let, \$257,291.

But few contracts were let for large buildings during the month, the total amount for fire proof construction being smaller than any month since November, 1910. So that the lack of important buildings being projected is primarily due the smallness of the building record rather than general building that has caused the total to be less than the average.

Compared with former years the record for November during the past decade is as follows:

November, 1904	\$ 896,297
November, 1905	1,159,463
November, 1906	6,733,965
November, 1907	1,382,755
November, 1908	2,604,586
November, 1909	1,807,973
November, 1910	807,938
November, 1911	2,647,318
November, 1912	2,169,945
November, 1913	1,555,322

While this year's total fell below that of last and the year before, it is not far below the average for the last ten years and is notably more than 1904, 1905, 1907 and 1910. So that on the whole it is about an average for the same month during the past decade.

Compared with the preceding months of the present year the record is as follows:

1913.	
January	\$ 5,057.80
February	2,160.54
March	5,526.19
April	3,754.41
May	2,806.00
June	2,850.00
July	5,826.98
August	5,144.94
September	4,450.00
October	2,772.00
November	1,000.00

The above figures are the average of all the construction work within limits of San Francisco. While the figures are not too far from the truth, sometimes great fluctuations occur.

Only in the month the general average is more than above the two million mark. Government work and harbor construction has been an important part of the total of some months while in others it has been entirely lacking. Altogether the figures for the last eleven months amount to \$39,771,677. This is a considerable amount of money to be spent on building construction in these quiet times and in general so far as figures of the builders of San Francisco can be obtained.

What we may be our estimate of President Wilson it is generally conceded that he has ideas of his own and that he is endeavoring to put them into effect. Also that he is not trying to lead the government in the interest of a select group of men, but for the general good. In other words that his heart is right and that he is seeking to solve the problems that confront him on the broad ground of statesmanship. In reference to the Mexican situation Joseph H. Choate, the noted attorney of New York and former ambassador of Great Britain, spoke recently at the annual banquet of the New York Chamber of Commerce as follows:

"You may call it diplomatic business, you may call it executive business, but it is fair to presume that the President is in possession of information vastly superior to that which even all of the members of the Chamber of Commerce possess. He knows what he is about. He knows what he is coming at.

One thing we are sure of—that he will bring peace, that he is for preserving the Union at all hazards, and that by no means shall this Nation be plunged into a destructive and dreadful war. He is entitled to support from us without regard to party and without regard to colors. We must stand by our President through thick and thin, and we will come out right in the end."

If the Hearst papers would copy the statement and proceed along the line there indicated a great deal more comment would be shown and the anonymous William Randolph might be edited with a little sense.

sacking of Indians, Senator W. A. reported as leading the delegation to the Hetch-Hetchy area in 1906. In the common expression, "He certainly is a son of a Indian," the native city of Los Angeles is implied. The Owens River is the thought of being "fought off" the Hetchy project was the thought of San Francisco and the city have good reason to be proud of their Works. Elsewhere, the city has been like a "son of a" load. The fact that the majority of the city's population is of Irish descent is a fact that is well known.

THE FEDERAL INCOME TAX

An Assembling and Analysis of the Provisions of the New Revenue-Building Statute, With Suggestions as to How It Should be Obeyed.

By Joseph J. Scott, Collector of Internal Revenue.

If two vital distinctions are kept in mind in considering the new Federal Income Tax, little difficulty will be experienced in understanding its scope and the method of its operation. The specific regulations providing the process by which the Government will assess and collect the tax cannot be detailed in full here, but perhaps in indication of their application can be given that which will be sufficient to inform the tax-payer in general of his liability and his duties. In short, the purpose of this analysis—if it may so be termed—is to reduce the rather technical phraseology of the statute to the simple language of every-day affairs, to summarize the requirements of the law and suggest how they can most conveniently be obeyed by the thousands of persons and corporations from whom the tax will be collected in California.

As just stated the law clearly defines two divisions of the tax that should be understood at the outset and ever kept in mind. It provides a normal tax of one per cent, on all net incomes in excess of certain specified exemptions and deductions, and an additional, or graduated, tax on incomes in excess of \$20,000 a year, with the percentage of payment increasing as determined stages of prosperity are reached and passed. That is one of the distinctions noted above; the other is to be found in those provisions of the law that make the status of one individual so different from that of the corporate taxpayer by assessing against the individual both the normal and (where the income justifies it) the additional tax, while levying on the corporate taxpayer only normal tax.

These two distinctions sound, therefore, he given constant thought to the reader follows the definitions of the scope of the law as to "persons" and "corporations." The term "persons" is employed to designate individuals as contrasted with corporate tax payers, while under the term "corporations" are assembled all corporate bodies, joint-stock companies or associations, life insurance companies. Thus, a general reference to "persons" and "corporations" in the following digest may be understood.

Personal Income Tax.

Inasmuch as the tax is levied on incomes of individuals will also be the easiest number it is given in the following definition. And the first question to answer is: Who is required to pay the tax? Succinctly stated the answer is:

Persons Affected.

1. Every citizen of the United States, whether residing in the country or abroad.
2. Every resident alien in the United States, though not a citizen.
3. Every resident of this country deriving income from the United States.

Rates of Taxation.

Any person coming under one of the above headings will be taxed on income according to the following scale:

1. Normal tax of 1 per cent on income in excess of \$3,000 a year.

2. Additional tax according to the following scale:

(a) One per cent, upon the amount by which net income exceeds \$2,000, but does not exceed \$5,000.

(b) Two per cent, upon the amount by which net income exceeds \$5,000, but does not exceed \$75,000.

(c) Three per cent, upon the amount by which net income exceeds \$75,000, but does not exceed \$100,000.

(d) Four per cent, upon the amount by which net income exceeds \$100,000, but does not exceed \$250,000.

(e) Five per cent, upon the amount by which net income exceeds \$250,000, but does not exceed \$500,000.

(f) Six per cent, upon the amount by which net income exceeds \$500,000.

Who Make Returns.

Who, then, must account to the Government? Who must render to the collector of internal revenue a statement, in detail, showing gross income, the allowable exemptions and deductions, if any, and, computed therefrom, net income? The law, in general, makes the liability in this respect attach as follows:

1. Every person of lawful age having a net income of \$3,000 or more a year.

2. Guardians, trustees, executors, administrators, agents, receivers, conservators, and others (persons or corporations) acting in a fiduciary capacity—the return to be made of the income under their control as if they were reporting for themselves.

Such is the comprehension of the law, and any exceptions to its operation must be based on an accounting for the individual's tax as withheld at the source.

What Is Taxable Income?

Having determined who are accountable to the Government the next question is: What will the Government regard as income subject to taxation or as constituting gross income from which the taxable net income is to be computed? The answer sweeps the field of human endeavor, a few taking cognizance of the following:

1. Gains, profits and income derived from salaries, wages, or compensation for personal services of any kind.

2. From professions, vocations, business, trade and dealings in real or personal property.

3. From interest, rent, dividends, securities, and the income from property, not the value of property acquired by gift, request or descent.

Receipts Not Taxable.

There are, however, certain receipts or items of common receipt and value that are exempt from taxation.

1. The proceeds of the sale of the policies received by the beneficiary upon the death of the insured, if the same be accounted for, and which are exempt from the tax-free provision of the law.
2. The amount paid to an insured person or to his estate, or to an annuity contract.

Interest on the bonds of a State or any political subdivision of the State, or on the bonds of the United States, or any of its possessions, is likewise exempt. This provision covers practically all bonds of a public character.

Computation of Net Income for Persons.

As a basis for the assessment of the normal tax of one per cent, the net income of persons will be computed by deducting from gross income (as hereinafter defined under the heading "What Is Taxable Income?") the following items:

1. The necessary and actual expenses of carrying on the person's business, whatever that business may be.

2. This allowance must be distinctly understood, however, as not including personal, living or family expenses.

3. All interest paid during the year on indebtedness.

4. All National, State, county, school and municipal taxes, but not those taxes assessed against local benefits. "Local benefits" are meant, for instance, street improvements, sewerage and similar betterments by which the value of a particular property is assumed to be enhanced to an amount equal to the assessment for the benefits against the owner of the property.

5. Losses suffered in trade or by fire, storm or shipwreck, during the year, and not compensated for by insurance or otherwise.

6. Debts due the taxpayer ascertained to be worthless, and charged off within the year.

7. A reasonable allowance for exhaustion, wear and tear of property through use. In the case of mines the allowance for depletion of ores and other natural deposits shall not exceed five per cent of the value at the mine of the output for the year. This provision also covers oil wells. Under no circumstances will any expenditure for permanent improvements or new buildings be allowed as a deduction, it being assumed that such expenditures increase the value of the property.

8. Dividends on the stock or from the net earnings of any corporation payable on its net income.

NOTE: This deduction is allowable

insofar as the computation of net income for the normal tax is concerned. The individual is required, however, in making return to the Government, to account for income tax dividends. While these dividends are not subjected to the normal tax, they are assessed against the individual as corporations paying taxes, and they cannot be deducted from the normal tax, since they are contributory to the gross incomes in excess of \$3,000.

Therefore must be accounted for the purpose of the additional tax. The return of them is required, and the amount of the normal tax is computed on the basis of the total income, including the dividends.

NOTE: This, too, is required.

NOTE: This, too, is required.

tribute to income subject to the additional tax, and so must be accounted for in the personal return, even though it be as a deduction in respect to the normal tax.

9. General exemption of \$3,000. Then \$1,000 extra if the person making the return have a wife living with him, or a husband living with her. However, should both husband and wife have taxable incomes and be living together, the total exemption is \$4,000.

Corporation Income Tax.

The first thing to be noted in respect to the assessment of the income tax against corporations is the absence of any provision for an exemption, as in the case of persons. Under the special excise tax law of August 5, 1909, corporations were given the benefit of an exemption of \$5,000. The income tax law, however, requires that those corporations organized in the United States pay the normal tax on entire net income, and that those corporations organized under the laws of a foreign country pay the normal tax on all the net income accruing from business transacted and capital invested in the United States.

Corporations Exempt.

Certain corporations are exempt. They are listed below:

1. Labor organizations.
2. Agricultural and horticultural associations.
3. Mutual savings banks not having capital stock represented by shares.
4. Fraternal beneficiary societies and orders.
5. Domestic building and loan associations.
6. Mutual cemetery companies.
7. Religious, charitable, scientific and educational associations.
8. Officers of commerce, boards of trade, and civic organizations in general.

Computation of Net Income for Corporations.

For a corporation, the income is ascertained, not as it will be ascertained, but as it is ascertained, by deducting from gross income the following items:

1. All ordinary and necessary expenses for the maintenance and operation of the business.
2. All losses actually sustained and uncompensated for by insurance or otherwise. There will be considered a loss if there is a depreciation in the value of the property, if the property is sold at a loss, or if the value of the property is less than the cost of the property.

3. All losses actually sustained and uncompensated for by insurance or otherwise. There will be considered a loss if there is a depreciation in the value of the property, if the property is sold at a loss, or if the value of the property is less than the cost of the property.

4. All losses actually sustained and uncompensated for by insurance or otherwise. There will be considered a loss if there is a depreciation in the value of the property, if the property is sold at a loss, or if the value of the property is less than the cost of the property.

5. All losses actually sustained and uncompensated for by insurance or otherwise. There will be considered a loss if there is a depreciation in the value of the property, if the property is sold at a loss, or if the value of the property is less than the cost of the property.

6. All losses actually sustained and uncompensated for by insurance or otherwise. There will be considered a loss if there is a depreciation in the value of the property, if the property is sold at a loss, or if the value of the property is less than the cost of the property.

Foreign Corporations.

The same system will be followed in ascertaining the net income of corporations existing under the laws of a foreign country except that cognizance will be taken only of that part of the corporation's income accruing from business transacted and capital invested in the United States.

Special Allowances for Insurance Companies.

In this connection insurance companies are covered by certain special provisions which may be summarized as follows:

1. Insurance companies in making returns can deduct from gross income the net addition, if any, required by law to be made within the taxable year to reserve funds; also the sums other than dividends paid on policy and annuity contracts.

2. Mutual fire insurance companies need not return as income any portion of premium deposits returned to policyholders, but must return as taxable income all income received by them from all other sources, plus those portions of the premium deposits retained by the companies for purposes other than for loss, expenses, and reinsurance reserves.

3. Mutual marine insurance companies can deduct amounts repaid policyholders on account of premiums paid or on account of interest accruing on such amounts between the time of becoming due and payment.

4. Life insurance companies need not include as taxable income that portion of any premium paid back or credited to a policyholder, or treated as an abatement of premium.

Collection of the Source.

Of more immediate interest than any other feature of the Income Tax law is that provision regarding the collection of the normal tax of one per cent. at what is known as "the source of income." While neither persons nor corporations will have to file their returns of income at this time (the law allowing them until March 1, 1914), still both persons and corporations have a keen interest now in the statute's requirement that the tax be withheld at the source, persons because they are principally affected by the withholding of the tax on their incomes and corporations because the liability for withholding, in the main, attaches to them.

Income Subject to Withholding Provision.

The general provision is that the normal tax of 1 per cent. shall be withheld by all persons, firms, partnerships, companies, corporations, joint-stock companies or associations, and insurance companies, in whatever capacity acting. This also applies to lessors of mortgagors, of real or personal property, to trustees, executors, administrators, agents, receivers, conservators, and employers, having the control, receipt, custody, disposal, or payment of interest, rent, salaries, annuities, or person exceeding \$3,000 for the year, annuities, or other fixed or determinable annual income of taxable year.

Withholding Tax on Interest on Bonds.

The general provision of the law must, however, be explained in some detail as it affects the deduction at the source of the 1 per cent. on bond interest. The responsibility here rests

mainly on the banks, but the application of the law is of keen interest to every bondholder. The persons concerned under this provision are all citizens of the United States, wherever they reside, and all residents of the United States, even though they not be citizens.

The law makes the debtor corporation—that is, the corporation which has issued the interest-bearing bonds or securities—the source. Or, if the corporation has appointed, or desires to appoint, a paying agent, the Government will look to the paying agent as the source.

When Tax Shall Be Withheld at Source.

For the purpose of collecting the normal tax on all coupons and registered interest originating or payable in the United States, the debtor corporation (the corporation of issue), or its paying agent, is required to withhold the tax. Note in this respect that the Government goes back to the actual source of the interest in placing liability. Such, at least, is the basis on which the Government will proceed. There are, however, certain conditions affecting this situation to which the closest attention should be given, as they are detailed here as simply as possible.

Must Identify Coupons.

The first condition is that the debtor corporation (or its paying agent) must withhold the tax, and that no other bank, trust company or individual taking coupons or interest orders for collection, or otherwise, shall withhold the tax; provided the coupons, or interest orders, when deposited with the bank are accompanied by certificates showing their owners. In other words, the person taking his coupons to a bank for collection must fill out the prescribed certificates by which the identity of his coupons will be preserved as they pass on to the corporation owing the interest.

When First Collecting Agent Withholds Tax.

There will be circumstances, however, in which the first bank or other collecting agency receiving the coupons or interest orders will be required to withhold the tax. In the event the coupons are not accompanied by a certificate of ownership—when presented possibly by some person other than the owner—the bank first receiving them shall attach its own certificate giving information as to either the owner or the person presenting them. This first bank shall then itself deduct and withhold the tax, and in transmitting the coupons for collection, so endorse them that the paying corporation or its agent will not again make a deduction for the tax.

It is patent that under such requirements as to identify, the bank receiving coupons will have to insist upon knowing either the owner or the person presenting the coupons.

Must Deduct Tax From Registered Interest.

A corporation whose bonds may be registered, both as to principal and interest, is required to deduct the normal tax of 1 per cent. before sending out checks for interest or before honoring interest orders, under the same theory as that governing deductions from coupons.

Exemptions Claimed in Presenting Coupons.

In circumstances that leave the final

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

MARSHFIELD, ORE.—Apartment house, 2 story and base, brick and reinforced concrete. Cost not stated. Architect, Newton C. Grant, Chamber of Commerce Bldg., Portland. Owner, C. A. Melvin. The building will be erected on a corner site and has been designed to contain a number of two and three room suites, all of which will have private bath rooms and wall beds. Interior finish will be of pine and redwood. Some hardwood floors will be used. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster and pressed brick. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$17,000. Architects, Fabre and Bearwald, Merchants' National Bank Bldg., S. F. Owner, A. Artus. The building will be erected on Pacific avenue west of Jones and has been designed to contain six suites of three rooms and bath each. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat, a hot water supply and vacuum cleaning. All suites will be equipped with wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house, 3 story and base, brick, \$35,000. Architect, Lewis M. Garden, Melan Bldg., S. F. Owner represented by E. M. Meyers, Richmond. The building will be erected at the corner of Elmer and Macdonald avenues covering an area of 50 by 100 feet. Interior has been arranged for suites of two and three rooms with wall beds and private baths. There will be steam heat, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and tile wainscot. Interior finish of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

PASADENA, LOS ANGELES CO., CAL.—Apartment house, 2 story and base, brick. Cost not stated. Architect, Louis De P. Major, St. Louis Bldg., Pasadena. Owner's name withheld. The building will be erected on four Oaks avenue covering a large ground area. Plans provide for a garage and seven stories on the first floor. Upper floor will be arranged for two suites of two rooms and a single room with en suite bath. There will be steam heat and hot water system. A number of the single rooms and en suite will be equipped with disappearing beds. Interior will be finished in pine and redwood. Patent steam radiators will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGES AND DAMS.

TACOMA, WASH.—Viaduct, reinforced concrete and steel, \$400,000. Engineer, Engineering Department of Oregon-Washington Railroad and Navigation Co. Owners, Oregon-Washington Railroad and Navigation Co. Plans have been received by Attorney Walter Christian in Tacoma for the reinforced concrete viaduct which is to be erected by the above mentioned railroad across the city waterway. Bids will be called for about January 1st. Further mention will be made in these columns at that time.

CHURCHES.

SAN FRANCISCO—Church, 1 story and base, frame, \$10,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, African M. E. Church. This new building will be erected at the corner of Geary and Webster streets and will contain a main auditorium seating 350 people, a pastor's study and social rooms. Interior finish will be of pine throughout. A central heating system will be installed. Exterior of the building will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are complete and figures will be called for at once.

OAKLAND, CAL.—Church, 1 story and base, brick or reinforced concrete, \$60,000. Architects, Coxhead & Knowles, Hearst Bldg., S. F. Owners, Plymouth Congregational Church. A new site has been secured at the corner of Piedmont and Laurel avenues and plans are rapidly being completed for the new structure. Design is in the English Gothic style and the building will be in the shape of a Greek cross. The sum of \$15,000 has already been raised and the balance is promised. Construction will not be started until February or March and it is hoped to complete the building by August of next year. Details of construction are not available at this time. Further mention will be made of the work.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Church, 1 and 2 story, brick and steel, \$100,000. Architect, H. M. Patterson, O. T. Johnson Bldg., L. A. Owners, Congregational Church of Long Beach. Contractor, C. T. McGraw, 2501 East 11th street, Long Beach, general construction. Contract price, \$100,000.

FACTORIES & WAREHOUSES.

STOCKTON, SAN JOAQUIN CO., CAL.—Warehouse, 2 story and base, brick, \$10,000. Architect, none. Owner, Mary P. Marshall, 315 South American street, Stockton. The building is to be erected near the Southern Pacific tracks and will cover a considerable ground area. Interior will be left unfinished. Construction will be of the extra heavy type with considerable structural steel. There will be metal window sash and frames and fireproof doors. Exterior of the building will be faced with stock brick. Plans are complete and

the work will be done by Day Labor.

PORTLAND, ORE.—Factory group, 1 and 3 story, frame, \$100,000. Architect's name not given. Owners, Pacific Furniture Specialties Mfg. Co., Lumber Exchange Bldg., Portland. A group of several buildings will be erected on property at the intersection of 27th and Morgan streets. The first building on which work will be started immediately, will be a three story structure covering an area of 60 by 100 feet. Construction will be of the heavy frame type. As soon as this building is completed work will be started on both buildings. Plans are being prepared and all contracts will be let by the owners.

SEATTLE, WASH.—Factory addition, 2 story and base, reinforced concrete, \$25,000. Architect, V. W. Voorhees, Elitel Bldg., Seattle. Owners, A. P. Ghiglione & Sons. The addition will cover an area of 90 by 93 feet and will be practically fireproof throughout. There will be metal window sash and frames. Plans provide for steam heat, elevator service and a drying system. Interior finish will be of pine. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO—Laundry, 2 story and base, reinforced concrete, \$12,000. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Ellis street near Jones covering a considerable ground area. The entire first floor will be occupied by the laundry. Upper floor will be arranged for flats. Interior finish will be of pine and redwood. A cement floor will be used on the ground floor. Special laundry machinery will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

FIRE HOUSES AND JAILS.

Contracts Awarded.

OAKLAND, CAL.—City Jail equipment, \$30,000. Architects, Hornbostel & Jones, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Pauly Jail Construction Co. Contract price, \$30,127.

SAN FRANCISCO—Fire house, 2 story and base, brick and reinforced concrete, \$20,000. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Newsum, Wold & Kohn, S. F., general construction Engine House No. 48. Contract price, \$29,555.

FLATS.

SAN FRANCISCO—Flats and store, 2 story and base, frame. Cost not stated. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owner, R. C. Bingley Jr., 573 Mission street. The building will be erected on the east side of 9th avenue between I and J streets. There will be one store and a living apartment on the first floor and a large modern flat on the second floor. Interior finish will be of pine and redwood throughout. Oak floors will be used in the living room. There will be an open fire place and brick mantel. Bath room will have the wainscot. Exterior of the building

will be covered with rusted metal shap-lap. Plans are being prepared. A general contract will be let.

SAN FRANCISCO—Flat and store, 2 story and base, frame, \$25,000. Architect, none. Owner, John F. Hiler, 3579 19th street, S. E. The building will be erected at the north-west corner of Geneva and Vienna streets and will contain a store on the first floor and a flat of five rooms above. Interior will be finished in pine to top out. Oak floors will be used in the living and dining rooms. There will be an open fire place with the mantel. The wainscot will be used in the bath room and kitchen. Exterior of the building will be covered with rusted metal shap-lap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FRESNO, FRESNO CO., CAL.—Flats, 2 story and base, frame, Cost not stated. Architects, Smith, Stewart & Glass, 244 Kearny st., S. E. and Republic Bldg., Fresno. Owner, George Scotting, Fresno. The building, which has been designed for a high class residential flat building, will be erected at the corner of K and Stanislaus streets. Interior has been arranged for four modern flats of six rooms and bath each. Open air sleeping porches will also be a feature of the building. Interior will be finished in pine with hardwood floors in the principal rooms. Bath living room will have an open fire place. Baths will have composition floors and tile wainscot. Exterior of the house will be covered with rusted metal. Plans are being prepared.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, brick. Cost not stated. Architect, none. Owner, P. T. Plafie, care of Don Lee, California and Van Ness ave., S. E. The building will be erected at the northwest corner of Market and Polk streets and has been designed for a station where automobiles can stop to fill gasoline and make minor repairs. Construction will be of the Class C type. There will be an open front door and exterior faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—Garage, 1 story and base, brick. Cost not stated. Architects, Mayberry and Pickel, Pacific Electric Bldg., L. A. Owners, Park Estate. The building will be erected on Gartland avenue south of Seventh street and has been designed for a commercial garage. The structure will cover an area of 27 by 147 feet. A cement floor will be used. The interior will be of pine throughout. Steel joist trusses and metal window sashes and frames will be used. Exterior of the building will be faced with cement plaster. Plans are nearly completed and figures will be called for soon.

Contracts Awarded.

LOS ANGELES, CAL.—1 story and base, brick \$17,000. Architects, Garrett and Farwell, 1000 Broadway, L. A. Owner, Mr. Irving. Contractor, J. W. Morrison, Builders Bldg., Los Angeles. A contract price \$15,000.

GOVERNMENT WORK AND SUPPLIES.

Albany, Oreg., Post Office.

The following bids were received by

the supervising architect, Treasury Department, Washington, D. C., November 26 for the construction of the U. S. post office at Albany, Oreg.

Sound Construction & Engineers Co., Seattle, Wash., limestone, \$80,000; sandstone, \$61,869.

J. H. Wiese, Omaha, Neb., limestone, \$64,770; sandstone, \$63,186.

The Campbell Building Co., Salt Lake City, Utah, sandstone, \$3,776.

Arthur W. Kutsche, Portland, Ore., limestone, \$76,000; sandstone, \$70,000.

Fred Erickson, Salem, Oreg., limestone, \$58,975; sandstone, \$57,636.

George Jackson, Portland, Oreg., limestone, \$75,000.

Baumberg & Mattson, Astoria, Oreg., limestone, \$62,390; sandstone, \$60,000.

J. H. Tillman, Portland, Oreg., limestone, \$74,400; sandstone, \$71,400.

Fort Yellowstone, Sewer.

Bids for outfall sewer at Fort Yellowstone, Wyo., opened December 10, 1920, have been canceled. The work will be re-advertised next year.

HALLS & SOCIETY BLDGS.

SAN FRANCISCO—Museum, 1 story and base, Class A construction, \$560,000. Architect, Lewis P. Holtz, Crocker Bldg., S. F. Owners, California Academy of Sciences. Architect, Lewis P. Holtz has completed working drawings and is now taking measures for the construction of the first two wings of the new museum which is to be erected in Golden Gate Park by the California Academy of Sciences. The structure will cost \$500,000, but the Academy of Science, which is undertaking the project, plans to build at this time only a portion. The sections now to be erected will require an outlay of \$165,000. They will eventually form the west portion of the entire building. The present plans call for a building with a frontage of 119 feet and a depth of sixty-two feet. This will provide an exhibition hall of a scale seldom equaled in American museums, as it will be 157 feet long by the clear, and will have a width of thirty-three feet between the main glass cases, while the height of the interior will be forty feet. A special feature to be used in the construction of this room will be the introduction of sunlight from the roof, directed through the exhibition cases, thereby being used to prevent too much heat of the sun striking the specimens and to diffuse the light. The entire section of the hall, where the main display will stand, will have softly mounted light, so as to bring out the exhibits in their most attractive form. This main hall there will be a series of two stories, and additional space for search work with ample storage.

The park commissioners have given their approval to the plans for the building and bids on the construction contracts are being received. The contracts will be awarded to the lowest bidder. The work will be done by the factors of the Academy of Sciences.

SAN FRANCISCO, CAL.—Crushed rock and concrete, 100,000 cu. yds. Cost not stated. Architects, Brown and Brown, 251 Kearny street, San Francisco. Owners, City and County of San Francisco. Plans are complete and figures are now being called for.

Work for the U. S. Hall, These will be opened by the Board of Works on December 16. Bids will be opened on the 17th, only for brick and tile facing of the courts in the city hall. Bids will particularly on the second floor of Public Works.

NEVILLES, CAL.—Lodge hall and store and base, Class A construction, Cost not stated. Architects, Walls and Morgan, Van Nuys, Cal. Owners, Independent Odd Fellows. The building located at the north west corner of Flower streets, Fresno, is on a large lot and contains store rooms and purserooms. Stores and a large room will occupy the first floor. The floors are designed for large lodge and will be covered with concrete. The walls will be of reinforced concrete and the roof will be of corrugated brick. There will be hollow sections, metal window sashes and some metal trim. Plans will show steam, hot, elevator service and modern conveniences. The building is to cover an area of 100 feet. Bids will be called for the plans can be completed.

LOS ANGELES, CAL.—2 story and base, reinforced concrete, Cost not stated. Architects, Williams, Evans & Budge, L. A. Masonic Hall Association. The building will be 50 feet long and has been designed for use on the first floor. The upper floor will contain the lodge room, banquets and other offices. Interior will be of pine with hardwood floors. The building will be faced with cement plaster. Plans are being prepared.

LOS ANGELES, CAL.—2 story and base, reinforced concrete, Cost not stated. Architects, Williams, Evans & Budge, L. A. Masonic Hall Association. Contracts Awarded.

FRESNO, FRESNO CO., CAL.—Lodge hall alterations, 3 story and base, brick, \$20,000. Architects, Smith, Stewart and Glass, 244 Kearny st., S. F. and Republican Bldg., Fresno, owners, Fresno Old Fellows' Hall Association. Contractor, H. A. Hansen, Fresno. Contract price, \$20,000.

HOSPITALS

ELDRIDGE, SONOMA CO., CAL.—Nursery building, concrete and frame construction. Cost not stated. Architect, State Architect George B. McDougall, Sacramento, Owners, State of California. All figures received by the State Board of Control for the building at the Eldridge State Home have been rejected and new figures will be called. The lowest figure, that submitted by Buxton-Dillon Co. of San Francisco, was not accompanied by a 10 per cent check. All other bids were above the amount available for construction.

NAPA, NAPA CO., CAL.—Laundry building, 1 story and base, concrete and frame, \$16,500. Architect, State Architect George B. McDougall, Sacramento, Owners, State of California. The bid of Robert Trost, lowest received for the construction of this building, has been rejected as the check accompanying same was not for 10 per cent of the amount. R. S. K. MacMillen, the next lowest bidder, is within the amount appropriated and may be awarded the contract. His bid is but \$650 higher than that of Robert Trost. Saturday last a mes. came from the State Department of Engineering stating that up to that time no action had been taken except to return all checks except that of R. S. K. MacMillen. The work may be refigured.

HOLLYWOOD, LOS ANGELES CO., CAL.—Old people's home, 2 and 3 story and base, brick and steel, \$50,000. Architect, George M. Easton, 436 West 12th street, Los Angeles. Owner, Mrs. Hanna A. Baldwin. The building will be erected on Franklin Boulevard and will contain stores on the first floor. Upper floors will be arranged similar to a hotel and will contain 120 guest rooms, a number of which will have private bath. Plans provide for steam heat, vacuum cleaning and a hot water plant. Interior finish will be of pine and hardwood. Besides the rooms above mentioned there will be a general ward and operating room. Freight and passenger elevators will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hospital, 5 story and base, reinforced concrete. Cost not stated. Architects, Garrett & Merrill, 1001 Broadway, L. A. Owners, Methodist Hospital Association. The building will be located on South Hope street near Jefferson and will cover an area of 15,000 sq. ft. First floor will contain 100 examination, sterilizing and treatment rooms, 20 rooms, offices, 100 beds, 100 and eight private rooms. Upper floors will be arranged for 100 private rooms to each floor. The building will be of metal lath, concrete and hollow tile. Corridors and all rooms will be tiled. Bathrooms will be tiled for tile and concrete. Both floors will have vacuum cleaning and steam and hot water supply.

ply. Exterior of the building will be faced with cement plaster. Plans have been revised and new figures are now being taken.

HOTELS.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete, \$20,000. Architect, L. Mastrapasqua, 580 Washington street, S. F. Owner, N. Capurro. The building will be erected at the southeast corner of Broadway and Barker Place and will have street frontages of 10 by 57 feet. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will be subdivided into 60 rooms and a number of private and public baths. There will be steam heat, elevator service and a hot water supply. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with tile. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 11 story and base, Class A construction, \$100,000. Architects, Barnett, Haynes and Barnett, Wright and Callender Bldg., L. A. Owner, Fred Grass, San Francisco. The building will be erected on the west side of Main street between 24th and 25th streets. There will be one store besides the main entrance and lobby on the first floor. Upper floors will be divided into a total of 150 guest rooms, a large percentage of which will have connecting baths. Provision is also made in the plans for a number of large light sample rooms. There will be steam heat, two passenger and one freight elevator, vacuum cleaning system and hot water supply. Interior will be finished in pine and hardwoods. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are nearly complete and figures will shortly be called.

Contracts Awarded.

PORTLAND, ORE.—Hotel and stores, 2 story and base, brick, \$35,000. Robert F. Tegan, Morgan Bldg., Portland. Owner, A. L. Parkhurst. Contractor, E. B. White, Lumber Exchange Bldg., Portland. Contract price, \$35,000.

LOS ANGELES, CAL.—Hotel, 1 story and base, brick and steel, \$34,000. Architect, L. L. Jones, L. W. Hellman Bldg., L. A. Owner, Julia M. Martin. Contractor, Fred M. Siegel, Stimson Bldg., L. A. Contract price, \$30,000.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$75,000. Architects, Morgan, Walls and Morgan, Van Ness Bldg., L. A. Owner, Victor Bonet. Contractors, F. O. Engstrom Co., Fifth and Seaton Sts., L. A. General construction only. Contract price, \$75,000.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State Exhibit building, concrete and frame construction, \$50,000. Architect, Charles B. Meyer, 1 Union Square, New York City. Owners, State of New York. All figures received for this building sometime ago have been rejected and new bids are now being called. Figures will be opened on December 20th in New York City by the State Commissioners. The structure is one of the

largest of the State Buildings which will be erected at the Panama-Pacific Exposition. Plans and specifications can be secured from the Director of Works in the Service Bldg., San Francisco or from the architect in New York. An official proposal for this work appears under another heading in this issue.

SAN FRANCISCO—State Exhibit building, frame construction, \$25,000. Architects, Wayland & Fennell, Boise, Idaho. Owners, State of Idaho. Architects Wayland & Fennell of Boise, Idaho, together with Major Reed of the Idaho Commission, are stopping at the Palace Hotel. They have plans for the States' Exhibit Palace, which is to be erected at the 1915 Exposition, and are taking figures from local contractors. These figures are stated to be about \$10,000 higher than bids received from Boise contractors. Both of these low men have been called to San Francisco to look over the grounds and general conditions before signing a contract. After looking over the grounds if conditions are such as to prevent them signing a contract, new figures will be called.

POST OFFICES.

ALBANY, ORE.—Post office, 2 story and base, brick and stone, \$75,000. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. The lowest figure received for the construction of this building was presented by F. A. Erickson of Salem. His bid for sandstone was \$57,650 and for limestone \$58,975. A contract has not been awarded.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Municipal railroad supplies and equipment. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans are complete and figures will be opened by the Board of Public Works on December 31st for furnishing the following quantities of materials and equipment for the proposed new municipal roads. The amount of bond required to be filed with the bid for each of the various equipment is noted here: Redwood ties, bond \$10,000; steel rails, rail joints and fastenings, bond \$60,000; air brake equipment, bond \$60,000; steel ties, rods and nuts, bond \$1,000; car bodies, bond \$75,000; rail spikes, bond \$1,000; the plates and rod braces, bond \$4,000; car trucks, bond \$20,000, and track specials, bond \$20,000. Plans and full particulars can be secured from the office of the City Engineer. Official proposals for the above appear in another column of this issue.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, brick and stone, \$60,000. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, E. Sheldon Potter. This work has been mentioned here a number of times before when plans were being prepared and when figures were called. All bids have been rejected and the low man determined. Contracts will be shortly awarded. The dwelling will be erected at the northwest corner of Jackson and Cherry streets and will contain in the neigh-

borhood of 14 rooms, several baths and sleeping porches. A garage will also be erected on the lot. Interior of the house will be handsomely finished in pine and imported hardwoods. Oak floors will be used throughout. Bath rooms will have tile floors and wainscot. A central system of heating, probably steam, will be installed. Plans also provide for a vacuum cleaning system, hot water supply and other modern conveniences. Exterior of the house will be faced with pressed brick and cut stone.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,600. Architect, Joseph Cahen, 45 Kearny street. S. F. Owner, Mrs. Harris. The dwelling will be erected on Clifford street in the Ashbury Heights District and has been designed for a seven room house with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater is specified. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame. Cost not stated. Architect, John J. Foley, 46 Kearny street. S. F. Owner, Mr. Brueck. The dwelling will be erected on the San Bruno Road and will contain about seven rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room and a brick mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Edward G. Bolles, 660 Market street. S. F. Owners, S. A. Horn Building Co. The dwelling will be erected on Lot F in the Sea Cliff Addition. Work on the complete the dwelling will consist of eight rooms, three baths and a sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for a central heating system, probably furnace heat, open fire places and a vacuum cleaning system. Mantels will be of brick and tile. An automatic water heater and hot water supply is also specified. The wainscot and doors will be used in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Edward G. Bolles, 660 Market street. S. F. Owners, S. A. Horn Building Co. The dwelling has been designed for a seven room house and will be erected on 22nd avenue in the Sea Cliff Addition. Interior finish will be of pine and white enamel with oak floors in the principal rooms. Plans also provide for sleeping porch. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater and vacuum

cleaning system will be installed. Tile wainscot and composition doors will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architects, Hutchinson Bros., 170 12th street Oakland. Owner, M. E. Vaughan. The dwelling will be erected on the avenue and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Max Tollen. The dwelling will be erected in the Claremont Tract and has been designed for an eight room house with baths and sleeping porch. Interior will be handsomely finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Vacuum cleaning system will probably be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,600. Architect, none. Owner, H. M. Swalley, 745 Grand avenue, Oakland. The dwelling will be erected at the northeast corner of Cheney avenue and Walker street and will contain eight rooms, two baths and a sleeping porch. All interior finish will be of pine. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. The wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owner, Walter Clark, 1000 Broadway, Oakland. The dwelling will be erected on Mission street west of Gilbert and will contain six rooms and bath. Interior will be finished in pine and redwood veneer. Oak floors will be used in the principal rooms. There will be a furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and

in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, William H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Public Builders. The dwelling will be erected on the south side of Channing Way east of College avenue and has been designed for a 15 room house with several baths and sleeping porches. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater, vacuum cleaning and other modern conveniences will be installed. The wainscot and composition floors will be used in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SACRAMENTO, CAL.—Residences, 2 story and base, frame, \$2,500 each. Architect, none. Owners, Wright and Kambrough, 317 J street, Sacramento. These houses will be erected on 14th and 21st streets respectively, and will be arranged for six room dwellings. Interiors will be finished in pine and hardwood. Oak floors will be used in the living room, dining rooms and reception halls. There will be large open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$25,000. Architect, William Knowles, Hearst Bldg., S. F. Owner, William C. Murdock. This dwelling will be erected in Forest Hill and will be designed in the Spanish style. The house will contain in the neighborhood of 15 rooms, several baths and sleeping porches. A large and swimming pool will also be constructed. Interior of the house will be finished in pine, hardwoods and white enamel. Oak floors will be used in the principal rooms. A central heating system and open fire places will be used. Mantels will be of brick and tile. There will be a vacuum cleaning system and automatic water heaters. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of red tile. Plans are being prepared.

AK KNOLL, LOS ANGELES CO., CAL.—Residence, 2 story and base. Cost not stated. Architect, none. Owners and Montgomery Trust Savings Bldg., L. A. Owner, A. G. Oakland avenue, Oakland. The dwelling has been designed for a ten room house with several baths and sleeping porches. It will also be erected on a lot adjacent to the house and will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will have composition floors and open fire places. Mantels will be of brick and tile. A vacuum cleaning system, open fire places and automatic water heaters will be installed in the house. Exterior of the house will be of red brick and tile. Plans are being prepared.

water system. Exterior of both the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PASADENA, LOS ANGELES CO., CAL.—Residence, 2 story and base, hollow tile construction, \$50,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Mr. House. This dwelling will be erected in Oak Knoll and has been designed for a fifteen room house with several baths and sleeping porches. Interior finish will be largely of hard woods. There will be steam heat, open fire places, brick and tile mantels, vacuum cleaning system, automatic water heaters and other modern conveniences. Exterior will be covered with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, J. J. Jennings, 3211 O street, Sacramento. The house has been designed to contain six rooms and bath. Interior finish will be of pine and redwood throughout. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with mantel of brick or tile. The wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SCHOOLS.

SAN FRANCISCO—School, 3 story and base, frame, \$15,000. Architects, Bliss and Faville, Ballou Bldg., S. F. Owner, Protestant Episcopal Bishop of California. This building has been designed for a Boys' Home and will be erected at the northwest corner of Potrero avenue and 25th street. The building will cover an area of 56 by 58 feet and will be arranged for dormitories, class rooms, dining hall, kitchen and a manual training department. Interior will be finished in pine and redwood. There will be a modern system of heating and ventilating. Hot water supply and vacuum cleaning are also included in the plans. Exterior of the building will be covered with stipples and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—School, 2 story and base, reinforced concrete and frame. Cost not stated. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the meeting of the Board of Public Works, held on December 3rd for the construction of the Marshall School show R. Ragrose low on the general construction as follows: Prop. A \$62,187; Prop. B \$61,860; and Prop. C \$52,150. The Vico Engineering Co. are low on the heating and ventilating at \$2,733; Alex. Coleman, plumbing, \$6,672; and the Decker Electric Co., electric work \$2,260. No contracts have been awarded.

SEATTLE, WASH.—School, 2 story and base, brick \$36,000. Architect, V. W. Voorhees, Ellet Bldg., Seattle. Owners, S. and D. Dist. No. 10. This work was mentioned in the columns when the architect was commissioned to prepare plans. The building will contain nine class rooms, manual training

department, principal's office and teachers' rooms. Besides these rooms plans provide for an auditorium 32 by 72 feet. Interior finish will be of pine with maple floors in the auditorium and class rooms. There will be steam heat, a modern system of ventilation, program clocks and vacuum cleaning. Exterior of the building will be faced with tapestry brick. Plans are complete and figures will be called for at once.

TACOMA, WASH.—School gymnasium 2 story and base, reinforced concrete, \$60,000. Architects, Heath and Grove, National Realty Bldg., Tacoma. Owners, City of Tacoma. All figures recently received for the construction of the Stadium High School gymnasium have been rejected as being above the appropriation. Plans are being revised and new figures will probably be called for about December 15th. Further mention of the work will be made at that time.

AUBURN, WASH.—School, 2 story and base, brick and steel. Cost not stated. Architect V. W. Voorhees, Ellet Bldg., Seattle. Owners, Auburn School District. Plans have just been approved for this building. The structure will cover a ground area of 38 by 110 feet and has been designed to contain ten class rooms, domestic science and manual training departments, gymnasium, music and literature study halls and principal's office. Interior will be finished in pine with maple floors. Plans provide for a central heating system and modern ventilation. There will be program clock and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans will be ready for figures about January 1st.

Contracts Awarded.

GLOBE, ARIZ.—School, 2 story and base, reinforced concrete. Cost not stated. Architects, Royal W. Lescher and John Rinker Kibby, Phoenix. Owners, Globe School District. Contractors, Michaelson and Wiedman, Golbe, general construction except plumbing and heating. Contract price, \$54,208.

CHENEY, WASH.—School, 3 story and base, brick and reinforced concrete. Cost not stated? Architect's name not given. Owners, State Normal School. Contractors, Bartlett-Roth & Co., Lewis Bldg., Portland, general construction. Contract price, \$267,025. Ben Olsen, Tacoma, heating and ventilating, \$23,000; P. J. Coff, Spokane, plumbing, cost not stated; and J. J. Agutter & Co., Seattle, electric work, \$6,960.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN FRANCISCO—Redressing basalt blocks. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Figures opened by the Board of Public Works at their December 3rd meeting show P. J. Gartland low at \$13.14 per thousand for redressing a total of approximately 100,000 old basalt brick. A contract has not been awarded.

SAN FRANCISCO—Alterations to overflow structure. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and received the approval of the Board of

Works for alterations to the overflow structure at 4th and Brannan streets. Bids will be opened by the Board of Public Works on December 10th.

EUGENE, ORE.—Power plant construction and steel construction, \$3,000,000. Engineer, George E. Edmondstone, Portland. Owners, Oregon Electric Railway Co., Portland. Construction of an immense hydro-electric power plant by the Oregon Electric Railway on Clear Lake, 80 miles east of Eugene in the Cascade Mountains, will be started by George E. Edmondstone, hydraulic engineer, who will have charge. According to estimates of Engineer Edmondstone, the cost will be in the neighborhood of \$3,000,000 and 45,000 horsepower will eventually be developed. Work on the first unit will begin next June. There will be two plants, the first to generate 20,000 horsepower. It is planned by the Hill railway interests to furnish electrical current for the entire western part of the state. Surveyors are now at work on two routes for transmission lines, one down the McKenzie river toward Eugene and the other down the Santiam toward Albany. A tunnel through the walls of Clear Lake will carry the water in a 10-foot conduit a mile and a half under a 500-foot head to the first power plant. The second plant will take the water from the first plant, carry it further down the river below McKenzie falls to a second set of generators. The second plant will be larger than the first. The current will be carried over heavy transmission lines at 110,000 volts. The wires will be a third of an inch in diameter.

Contracts Awarded.

BURLINGAME, SAN MATEO CO., CAL.—Reservoir, concrete construction, \$14,000. Engineer, City Engineer, Burlingame. Owner, City of Burlingame. Contractor, Robert Trost, San Francisco. Contract price, \$14,000.

HILLYARD, WASH.—Water system, complete construction, \$88,000. Engineer Wadhams, Poulson Bldg., Spokane. Owners, Town of Hillyard. Contractors, James Kennedy Construction Co., Blake-McFall Bldg., Portland. Contract price, \$88,000.

STORES.

SAN FRANCISCO—Stores and lofts, 2 story and base, reinforced concrete, \$15,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners, Malcolm Jacobs and Burritt. The owners have secured additional property adjoining their lot on the west and will construct a larger building than was at first intended. Plans for the building show a two story structure instead of a one story. First floor will contain stores and offices and upper floor modern lofts. The structure will be carried on a scow foundation. Interior will be finished in pine throughout. A cement floor will be used. Exterior will be faced with cement plaster. Plans are complete and figures will be called for shortly.

SAN FRANCISCO—Wholesale building, 1 story and base, reinforced concrete. Cost not stated. Architect, William H. Crim Jr., 125 Kearny street, S. F. Owner, Alfred Gonzales. The building will be erected on the north line of Washington street east of Davis and has been designed for a wholesale commission house. There will be a

pile foundation, cement floor and patent store fronts. Interior will be finished in pine throughout. Exterior will be faced with cement plaster. Plans are complete and a contract will be let at once.

SAN FRANCISCO—Subway between office buildings, reinforced concrete, \$2,500. Architect, Nathaniel Blaisdell, 255 California street, S. E. Owners, Insurance Exchange and Merchants' Exchange. This work will consist of constructing a subway between the basements of these two large office buildings. Plans have been prepared and are now up before the Building Inspector for consideration. Further mention will be made of the work.

SAN FRANCISCO—Store and office alterations, brick construction. Cost not stated. Architects, Hightett and Headman, Phelan Bldg., S. E. Owners, Montgomery Block Realty Co. This work will consist of extensive alterations to the building at the southeast corner of Montgomery and Washington streets. Included in the work will be new interior finish, plastering, plumbing, electric work and steam. Elevator will also be overhauled. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

LOS ANGELES, CAL.—Stores and offices, 3 story and base, Class C construction. Cost not stated. Architect, Myron Hunt, Hibernal Bldg., L. A. Owners, Standard Oil Co. The building will be erected at the corner of Aurora and San Fernando streets covering an area of 90 by 120 feet. The structure has been designed for a branch office and warehouse. Interior finish will be of pine and hardwood. There will be metal window sash and frames. Some tile and marble are specified. Plans provide for steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. STORES AND OFFICES.

FRESNO, FRESNO CO., CAL. Store fixtures. Cost not stated. Architects, Swartz, Hotchkiss & Swartz, Bowell Bldg., Fresno. Owner, J. M. Crawford. Plans are being prepared for store fixtures for the space leased by Mr. Crawford, an optician, in the Griffith-McKenzie Building. Interior finish will be of hardwood, mahogany and tile. Some plate and art glass will be used. Plans are being prepared.

Contracts Awarded.

FRESNO, FRESNO CO., CAL. Stores and residence, 2 story and base, brick \$30,000. Architect, Eugene Matthews, Forsythe Bldg., Fresno. Owner, Jacob Riehter. Contractor, Christopher Rieht, Fresno. Contract price, \$30,000.

LOS ANGELES, CAL. Stores and offices, 13 story and base, Class A construction. Cost not stated. Architect, Thornton Fitzhugh, Pacific Electric Bldg., L. A. Owners, Building Owners Co., Contractors, National Fireproofing Co., Central Bldg., L. A. general construction only. Contract price, \$100,000.

THEATRES.

FRESNO, FRESNO CO., CAL. Theatre alteration and addition, 1 story and base, brick and steel, \$100,000. Architect, Eugene Matthews, Forsythe Bldg., Fresno. Owner, L. L. Cox. This work has been contemplated for some

time but no architect has been selected until recently. The building to undergo alteration is located at the corner of Fresno and J streets. The work will be extensive and will include structural steel, plastering, painting, plumbing, elevator work, electric work and interior decorating. Upper floors will be fitted up for offices and a part of the first floor will be used for stores. Exterior facing will be of pressed brick. Plans are being prepared.

SEATTLE, WASH.—Theatre and offices, 4 story and base, reinforced concrete, \$125,000. Architects, Warren L. Milner & Co., Arcade Bldg., Seattle. Owners, Alaska Theatre Co. All figures received for this work have been rejected. Plans have been revised and contractors who first figured the work are preparing new estimates. The building will be of fireproof construction and is to be erected at the corner of Second and Seneca avenues. Bids are to be in the hands of the architects by the end of this week.

SEALED PROPOSALS.

PROPOSALS.
OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on **Wednesday, the 31st day of December, 1913,** for furnishing and delivering the following material:

A quantity of steel tie rods and nuts for the construction of the Extensions of the Municipal Railway System.

Said material must be in accordance with the specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be commenced and completed within the time limits set forth in said specifications.

The amount of the bond for faithful performance of the contract has been fixed at \$100,000.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County for an amount not less than ten per centum of the aggregate of the proposal.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL, Secretary.

Said material must be in accordance with the specifications thereon on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be commenced and completed within the time limits set forth in said specifications.

The amount of the bond for faithful performance of the contract has been fixed at \$60,000.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County for an amount not less than ten per centum of the aggregate of the proposal.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works

F. J. CHURCHILL,
Secretary.

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC WORKS OF THE CITY AND COUNTY OF SAN FRANCISCO.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 10th day of December, 1913, for furnishing and delivering the following material:

A quantity of motor equipment for the construction of the extensions of the Municipal Railway System.

Said material must be in accordance with the specifications thereon on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be commenced and completed within the time limits set forth in said specifications.

The amount of the bond for faithful performance of the contract has been fixed at \$65,000.

All proposals offered shall be accompanied by a check certified by a responsible bank payable to the order of the Clerk of the Supervisors of said City and County for an amount not less than ten per centum of the aggregate of the proposal.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works

F. J. CHURCHILL,
Secretary.

ing will be erected on Clifford street in the Ashbury Heights District and has been designed for a seven room house with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater is specified. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. Brueck. The dwelling will be erected on the San Bruno Road and will contain about seven rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room and a brick mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co. The dwelling will be erected on Lot F in the Sea Cliff Addition. When complete the dwelling will contain eight rooms, three baths and a sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for a central heating system, probably furnace heat, open fire places and a vacuum cleaning system. Mantels will be of brick and tile. An automatic water heater and hot water supply is also specified. The wainscot and doors will be used in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$6,000. San Francisco. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co. The dwelling has been designed for a seven room house and will be erected on 22nd Avenue in the Sea Cliff Addition. Interior finish will be of pine and white enamel with oak floors in the principal rooms. Plans also provide for sleeping porch. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater and vacuum cleaning system will be installed. The wainscot and composition floors will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

STATE EXHIBIT BUILDING—Concrete and frame construction, \$250,000. San Francisco. Architect, Charles E. Meyers, 1 Union Square, New York City. Owners, State of New York. All figures received for this building sometime ago have been rejected and new bids are now being called. Figures will be opened on December 20th in New York City by the State Commis-

sioners. The structure is one of the largest of the State Buildings which will be erected at the Panama-Pacific Exposition. Plans and specifications can be secured from the Director of Works in the Service Bldg., San Francisco or from the architect in New York. An official proposal for this work appears under another heading in this issue.

STATE EXHIBIT BUILDING—Frame construction, \$25,000. San Francisco. Architects, Wayland and Fennell, Boise, Idaho. Owners, State of Idaho. Architects Wayland & Fennell of Boise, Idaho, together with Major Reed of the Idaho Commission, are stopping at the Palace Hotel. They have plans for the States' Exhibit Palace, which is to be erected at the 1915 Exposition and are taking figures from local contractors. These figures are stated to be about \$10,000 higher than bids received from Boise contractors. Both of these low men have been called to San Francisco to look over the grounds and general conditions before signing a contract. After looking over the grounds, if conditions are such as to prevent them signing a contract new figures will be called.

CHURCH—1 story and base, frame, \$10,000. San Francisco. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, African M. E. Church. This new building will be erected at the corner of Geary and Webster streets and will contain a main auditorium seating 350 people, a pastor's study and social rooms. Interior finish will be of pine throughout. A central heating system will be installed. Exterior of the building will be covered with cement plaster on metal lath. A red clay tile roof will be used. Plans are complete and figures will be called for at once.

FLATS AND STORE—2 story and base, frame. Cost not stated. San Francisco. Architect, Theo W. Lenzen, Humboldt Bank Bldg., S. F. Owner, R. C. Bingley Jr., 573 Mission street. The building will be erected on the east side of 9th Avenue between 1 and J streets. There will be one store and a living apartment on the first floor and a large modern flat on the second floor. Interior finish will be of pine and redwood throughout. Oak floors will be used in the living room. There will be an open fire place and brick mantel. Bath room will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are now being prepared. A general contract will be let.

FLAT AND STORE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, John F. Haner, 2579 14th street, S. F. The building will be erected at the northwest corner of Geneva and Vienna streets and will contain a store on the first floor and a flat of five rooms above. Interior will be finished in pine throughout. Oak floors will be used in the living and dining rooms. There will be an open fire place with tile mantel. The wainscot will be used in the bath room and kitchen. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GARAGE—1 story and base, brick. Cost not stated. San Francisco. Architect, none. Owner, P. T. Prather, care of Don Lee, California and Van

Ness Avenue, S. F. The building will be erected at the northwest corner of Market and Polk streets and has been designed for a station where machines can stop to fill gasoline and make minor repairs. Construction will be of the Class C type. There will be a cement floor and exterior faced with cement plaster. Plans are being prepared.

CITY HALL WORK—Crushed rock and tile and brick work. Cost not stated. San Francisco. Architects, Baker & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans are complete and figures are now being called for furnishing crushed rock for the City Hall. These bids will be opened by the Board of Public Works on December 10th. Bids will be opened on December 17th by the same body for brick and tile facing for two large courts in the City Hall. Plans and full particulars can be secured from the Board of Public Works. Official proposals appear under another heading in this issue.

HOTEL—4 story and base, brick and steel, \$35,000. San Francisco. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, Harry Rosenberg. This work was mentioned here sometime ago when plans were first started. The building will be erected on the west side of Hyde street near Sutter and will have a frontage of 40 feet by a depth of 127 feet. Interior has been arranged for a total of 68 guest rooms, nearly all of which will have private baths. There will be steam heat, elevator service, a vacuum cleaning system and hot water supply. Interior finish will be of pine and redwood. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOTEL—3 story and base, frame, \$25,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. Architect Charles J. Rousseau, 46 Kearny street, has completed plans and specifications for a three-story and basement frame hotel building, covering an area of 50 by 100 feet, which is to be erected at the southwest corner of Scott and Lombard street near the main entrance to the Panama-Pacific Exposition. Exterior of the building will be covered with cement plaster on metal lath. Plans provide for a spacious lobby, ladies' parlor and reading rooms, which will be finished in hardwoods and imported tapestries on the walls. There will be five stores on the first floor and a total of 52 guest rooms with twenty-five per cent baths on the upper floors. Nearly all guest rooms will face Lombard street and will command a grand view of the Exposition Grounds and upper bay. There will be steam heat, a hot water supply vacuum cleaning system and electric curling irons. Plans will be put out for figures very shortly.

HOTEL—4 story and base, reinforced concrete, \$20,000. San Francisco. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, N. Capurro. The building will be erected at the southeast corner of Broadway and Barker Place and will have street frontages of 40 by 57 feet. There will be one store besides the hotel entrance

and lobby on the first floor. Upper floors will be subdivided into 60 rooms and a number of private and public baths. There will be steam heat, elevator service and a hot water supply. Interior finish will be of pine throughout. Patent store fronts are specified. Exterior of the building will be faced with tile. Plans are being prepared.

MUNICIPAL RAILROAD SUPPLIES AND EQUIPMENT—Cost not stated. San Francisco, Engineer, City Department of Engineering, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans are complete and figures will be opened by the Board of Public Works on December 31st for furnishing the following quantities of materials and equipment for the proposed new municipal roads. The amount of the bond required to be filed with the bid for each of the various equipment is noted here. Redwood ties, bond \$10,000; steel rails, rail joints and fastenings, bond \$50,000; air brake equipment, bond \$5,000; steel ties, rods and nuts, bond \$1,000; car bodies, bond \$75,000; rail spikes, bond \$1,000; tie plates and rod braces, bond \$4,000; car trucks, bond \$20,000, and track specials, bond \$20,000. Plans and full particulars can be secured from the office of the City Engineer. Official proposals appear in another column of this issue.

SCHOOL—2 story and base, frame, \$16,000. San Francisco, Architects, Bliss and Faville, Balboa Bldg., S. F. Owner, Protestant Episcopal Bishop of California. This building has been designed for a Boys' Home and will be erected at the northwest corner of Potrero avenue and 25th street. The building will cover an area of 56 by 55 feet and will be arranged for dormitories, class rooms, dining hall, kitchen and manual training department. Interior will be finished in pine and redwood. There will be a modern system of heating and ventilating. Hot water supply and vacuum cleaning are also included in the plans. Exterior of the building will be covered with shingles and cement plaster on metal lath. Plans are complete and figures are now being taken.

SCHOOL—2 story and base, reinforced concrete and frame. Cost not stated. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the meeting of the Board of Public Works held on December 3rd for the construction of the Marshall School show R. Ringrose low on the general construction as follows: Prop. A, \$62,187; Prop. B, \$64,560; and Prop. C, \$62,150. The Victor engineering Co. are low on the heating and ventilating at \$7,733; Alex. Coleman, plumber, \$6,972 and the Decker Electric Co., electric work, \$2,260. No contracts have been awarded.

REDRESSING BASALT BLOCKS—Cost not stated. San Francisco, Engineer, City Department of Engineering, Temporary City Hall S. F. Owners, City and County of San Francisco. Figures opened by the Board of Public Works at their December 3rd meeting show P. J. Gartland low at \$12.74 per thousand for redressing a total of approximately 100,000 old basalt brick. A contract has not been awarded.

ALTERATIONS TO OVERFLOW

STRUCTURE—Cost not stated. San Francisco, Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans have been completed and received the approval of the Board of Works for alterations to the overflow structure at 1th and Brannan streets. Bids will be opened by the Board of Public Works on December 10th.

STORES AND LOFTS—2 story and base, reinforced concrete, \$15,000. San Francisco, Architects, O'Brien Bros, Clunie Bldg., S. F. Owners, Malcolm Jones and Burritt. The owners have secured additional property adjoining their lot on the west and will construct a larger building than was at first intended. Plans for the building show a two-story structure instead of a one story. First floor will contain stores and upper floor modern lofts. The structure will be carried on a scow foundation. Interior will be finished in pine throughout. A cement floor will be used. Exterior will be faced with cement plaster. Plans are complete and figures will be called for shortly.

WHOLESALE BUILDING—1 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, William H. Crim Jr., 425 Kearny street, S. F. Owner, Alfred Gonzales. The building will be erected on the north line of Washington street east of Davis and has been designed for a wholesale commission house. There will be a pile foundation, cement floor and patent store fronts. Interior will be finished in pine throughout. Exterior will be faced with cement plaster. Plans are complete and a contract will be let at once.

SUBWAY—Between office buildings, reinforced concrete, \$2,500. San Francisco, Architect, Nathaniel Blaisdel, 255 California street, S. F. Owners, Insurance Exchange and Merchants' Exchange. This work will consist of constructing a subway between the basements of these two large office buildings. Plans have been prepared and are now up before the Building Inspector for consideration. Further mention will be made of the work.

STORE AND OFFICE ALTERATIONS—brick construction. Cost not stated. San Francisco, Architects, Righetti and Headman, Phelan Bldg., S. F. Owners, Montgomery Block Realty Co. This work will consist of extensive alterations to the building at the southeast corner of Montgomery and Washington streets. Included in the work will be new interior finish, plastering, plumbing, electric work and steam. Elevator will also be overhauled. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

APARTMENT HOUSE—2 story and base, frame, \$17,000. San Francisco, Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, A. Artus. The building will be erected on Pacific avenue, west of Jones and has been designed to contain six suites of three rooms and bath each. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat, a hot water supply and vacuum heating. All suites will be equipped with

wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

LAUNDRY—2 story and base, reinforced concrete, \$12,000. San Francisco, Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner's name withheld. The building will be erected on Ellis street near Jones covering a considerable ground area. The entire first floor will be occupied by the laundry. Upper floor will be arranged for flats. Interior finish will be of pine and redwood. A cement floor will be used on the ground floor. Special laundry machinery will be installed. Exterior of the building will be faced with cement plaster. Plans are being prepared.

RESIDENCE—2 story, attic and base, frame, \$25,000. San Francisco, Architect, William Knowles, Hearst Bldg., S. F. Owner William C. Murdock. This dwelling will be erected in Forest Hill and will be designed in the Spanish style. The house will contain in the neighborhood of 15 rooms, several baths and sleeping porches. A garage and swimming pool will also be constructed. Interior of the house will be finished in pine, hardwoods and white enamel. Oak floors will be used in the principal rooms. A central heating system and open fire places will be used. Mantels will be of brick and tile. There will be a vacuum cleaning system and automatic water heaters. Bath rooms will be finished in tile. Exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of red clay tile. Plans are being prepared.

Contracts Awarded.

FIRE HOUSE—2 story and base, brick and reinforced concrete, \$30,000. San Francisco, Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Newsom, Wold & Kohn, S. F. general construction Engine House No. 48. Contract price, \$29,555.

City Bids Opened.

Construction of Marshall School With Heating, Electric Work and Plumbing Figures Opened.

Bids opened by the Board of Public Works for the general construction of the Marshall School show R. Ringrose low on the three propositions as follows: Prop. A, \$62,187; Prop. B, \$64,560 and Prop. C, \$62,150. Bids were also opened at the same meeting for the heating and ventilating, Victor Engineering Co. low at \$7,733 and for the plumbing, Alex. Coleman low at \$6,972. electric work, Decker Elec. Con. tr. Co. low at \$2,260. P. J. Gartland submitted the lowest figure for redressing approximately 100,000 old basalt blocks. His figure for this work was \$12.74 per thousand.

The following is a complete list of all figures opened:

General Construction Marshall School.
Wold & Goodwin, low \$62,187;
\$72,900, (ex) \$69,500.

H. S. Williams, low \$69,500; (ex) \$72,900, (ex) \$70,171.

BUILDINGS ERECTED SINCE THE FIRE.

Building records show that \$233,217, 767 has been invested in building construction since the fire of 1906.

This amount does not include the vast expenditures being made by the Exposition Company in the Fair Grounds, nor does it include the permanent improvements being made by the United States Government in the fortifications and administration buildings within the city limits; neither does it include the State's quota in harbor improvements, docking facilities, Armory and State Normal School extensions.

The following is a tabulated report on all building construction from May, 1906 to November 29th, 1913:

Class	No. of Bldgs	Amount
Class "A"	163	\$ 32,212,954
Class "B"	195	14,273,556
Class "C"	2619	77,896,958

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architects, Hutchinson Bros, 470 13th street, Oakland. Owner, M E. Vaughn. The dwelling will be erected on 4th avenue and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Automatic water heater will be installed. Bath room will have a composition floor and tile wainscot. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$8,000. Berkeley, Alameda Co., Cal. Architect, Albert Farr, Foxcroft Bldg., S. F. Owner, Max Thelen. The dwelling will be erected in the Claremont Tract and has been designed for an eight room house with baths and sleeping porch. Interior will be handsomely finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Vacuum cleaning system will probably be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, H. M. Swalley, 745 Grand avenue, Oakland. The dwelling will be erected at the northeast corner of Cheney avenue and Walker street and will contain eight rooms, two baths and a sleeping porch. All interior finish will be of pine. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with

cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story, end base frame, \$35,000. Oakland, Cal. Architect, none. Owner, Wallace Clark 1222 Oakland avenue, Oakland. Two dwelling will be erected on Matzer street west of Gilbert and will contain seven rooms and bath. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base frame, \$15,000. Berkeley, Alameda Co., Cal. Architect, William H. Rutledge Jr., First National Bank Bldg., Berkeley. Owners, Alameda County Home Builders. The dwelling will be erected on the south side of Channing Way east of College avenue and has been designed for a 13 room house with several baths and sleeping porches. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater, vacuum cleaning and other modern conveniences will be installed. Tile wainscot and composition floors will be used in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

CHURCH—1 and 2 story end base, brick or reinforced concrete, \$60,000. Architects, Coxhead and Knowles, Hearst Bldg., S. F. Owners, Plymouth Congregational Church. A new site has been secured at the corner of Piedmont and Laurel avenues and plans are rapidly being completed for the new structure. Design is in the English Gothic style and the building will be in the shape of a Greek cross. The sum of \$45,000 has already been raised and the balance is promised. Construction will not be started until February or March and it is hoped to complete the building by August of next year. Details of construction are not available at this time. Further mention will be made of the work.

Contracts Awarded.

CITY JAIL EQUIPMENT—\$20,000. Oakland, Cal. Architects, Horrosted & Jones, New York. Associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Parry Jail Construction Co. Contract price, \$20,125.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Richmond, Contra Costa Co., Cal. Architect, Lewis M. Gorden, Phelan Bldg., S. F. Owner, represented by E. M. Meyers, Richmond. The building will be erected at the corner of Elmer and Macdonald avenues covering an area of 50 by 100 feet. Interior has been arranged for suites of two and three rooms with wad beds and private baths. There will be steam heat, vacuum cleaning system and hot water supply. Bath rooms will have composition floors and the wainscot. Interior finish will be largely of pine. Some oak floors will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

NURSERY BUILDING—Concrete and frame construction. Cost not stated. Eldridge, Sonoma Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. All figures received by the State Board of Control for the building at the Eldridge State Home have been rejected and new figures will be called. The lowest figure, that submitted by Bixton-Hillon Co. of San Francisco, was not accompanied by a 10 per cent check; all other bids were above the amount available for construction.

LAUNDRY BUILDING—1 story and base, concrete and frame, \$16,500. Napa, Napa Co., Cal. Architect, State Architect, George B. McDougall, Sacramento. Owners, State of California. The bid of Robert Frost, lowest received for the construction of this building, has been rejected, as the check accompanying same was not for 10 per cent of the amount. R. S. K. MacMillen, the next lowest bidder, is within the amount appropriated and may be awarded the contract. His bid is but \$50 higher than that of Robert Frost. Saturday last a message from the State Department of Engineering stated that up to that time no action had been taken except to return all checks except that of R. S. K. MacMillen. The work may be refigured.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

FLATS—2 story and base, frame, cost not stated. Fresno, Fresno Co., Cal. Architects, Smith, Stewart & Glass, 241 Kearny street, S. F. and Republican Bldg., Fresno. Owner, George Scouting Fresno. The building, which has been designed for a big class residential flat building, will be erected at the corner of K and Stanislaus streets. Interior has been arranged for four modern flats of six rooms and bath each. Open air sleeping porches and also be a feature of the building. Interior will be finished in pine with hardwood floors in the principal rooms.

Each living room will have an open fire place. Baths will have composition doors and tile wainscot. Exterior of the house will be covered with rustic. Plans are being prepared.

THEATRE ALTERATION AND ADDITION—1 story and base, brick and steel, \$100,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, L. I. Cory. This work has been contemplated for sometime but the architect has been selected until recently. The building to undergo alteration is located at the corner of Fresno and J streets. The work will be extensive and will include structural steel, plastering, painting, plumbing, elevator work, electric work and interior decorating. Upper floors will be fitted up for offices and a part of the first floor will be used for stores. Exterior facing will be of pressed brick. Plans are being prepared.

STORE FIXTURES—Cost not stated. Fresno, Fresno Co., Cal. Architects, Swartz, Hotchkiss and Swartz Rowell Bldg., Fresno. Owner, J. M. Crawford. Plans are being prepared for store fixtures for the space leased by Mr. Crawford, an optician, in the Griffith-McKenzie Building. Interior finish will be of hardwood, linoleum and tile. Some plate and art glass will be used. Plans are being prepared.

Contracts Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—2 story and base, brick. Cost not stated. Pasadena, Los Angeles Co., Cal. Architect, Louis Du P. Millar, St. Louis Bldg., Pasadena. Owner's name withheld. The building will be erected on Fair Oaks avenue covering a large ground area. Plans provide for a garage and seven stores on the first floor. Upper floor will be arranged for two suites of three rooms and 28 single rooms with eight baths. There will be steam heat and a hot water system. A number of the single rooms and both suites will be equipped with disappearing beds. Interior will be finished in pine and redwood. Patent store fronts will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LODGE HALL AND STORES—3 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owners, Independent Order of Odd Fellows. The building will be erected at the northwest corner of 12th and Flower streets.

Easement will contain a large banquet room, together with store rooms and paraphernalia rooms. Stores and a large assembly room will occupy the first floor. Upper floors have been designed to contain seven large lodge-halls with committee chambers and offices. Construction will be of reinforced concrete with the exterior faced with terra cotta and pressed brick. There will be hollow tile partitions, metal window sash and frames, and some metal trim. Plans provide for steam heat, elevator service and other modern convenience. The structure is to cover an area of 100 by 150 feet. Bids will be called for as soon as plans can be completed.

LODGE HALL—2 story and base, reinforced concrete. Cost not stated. Fillmore, Ventura Co., Cal. Architects, Train & Williams, Exchange Bldg., L. A. Owners, Masonic Hall Association of Fillmore. The building will be 90 by 90 feet and has been designed for two stores on the first floor. Upper floor will contain the lodge room, banquet hall and three offices. Interior finish will be of pine with hardwood floors in the lodge hall and banquet room. Plans provide for steam heat. Patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

ASSOCIATION BUILDING—3 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, A. B. Benton, 114 North Spring street, L. A. Owners, Young Men's Christian Association (colored). The building is to be erected at the corner of 9th and Tennessee streets and will be arranged for stores on the first floor. Upper floors will contain the association rooms, gymnasium and dormitories. There will be steam heat and a hot water supply. Interior finish will be of pine with some maple floors. Patent store fronts also will be specified. Exterior of the building will be faced with pressed brick. Preliminary plans have been prepared.

LODGE HALL—2 story and base, brick and steel, \$20,000. Hollywood, Imperial Co., Cal. Architects, Mayberry and Parker, Pacific Electric Bldg., L. A. Owners, Hollywood Masonic Temple Association. First floor will contain four stores with plate glass windows set in copper fronts. Upper floor has been arranged for a lodge room, banquet hall and ante chambers besides twelve modern offices. There will be a central heating system and a hot water supply. Interior will be finished in pine with maple floors in the lodge rooms and banquet hall. Exterior of the building will be faced with pressed brick. Plans are being prepared.

OLD PEOPLE'S HOME—2 and 3 story and base, brick and steel \$50,000. Hollywood, Los Angeles Co., Cal. Architect, George M. Easton, 126 West 15th street, Los Angeles. Owner, Mrs. Hanna A. Baldwin. The building will be erected on Franklin Boulevard and will contain stores on the first floor. Upper floors will be arranged similar to a hotel and will contain 120 guest rooms, a number of which will have private baths. Plans provide for steam heat, vacuum cleaning and a hot water plant. Interior finish will be of pine and hardwood. Besides the rooms above mentioned there will be a general ward and operating room. Freight

and passenger elevators will be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOSPITAL—5 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. The building will be erected on South Hope street near Jefferson and will cover an area of 141 by 45 feet. First floor will contain three operating rooms, sterilizing room, special surgical rooms, office, directors' room, ward and eight private rooms. Upper floors will be arranged for eleven private rooms to the floor. Interior partitions will be of metal lath and plaster and hollow tile. Corridors and bath rooms will have tile floors. Plans provide for steam heat, elevator service, both freight and passenger, a vacuum cleaning system and hot and cold water supply. Exterior of the building will be faced with cement plaster. Plans have been revised and new figures are now being taken.

HOTEL—11 story and base, Class A construction, \$100,000. Los Angeles, Cal. Architects, Barnett-Haynes & Barnett, Wright & Callender Bldg., L. A. Owner, Fred Gruss, San Francisco. The building will be erected on the west side of Main street between 5th and 9th streets. There will be one store besides the main entrance and lobby on the first floor. Upper floors will be divided into a total of 150 guest rooms, a large percentage of which will have connecting baths. Provision is also made in the plans for a number of large light sample rooms. There will be steam heat, two passenger and one freight elevators, vacuum cleaning system and hot water supply. Interior will be finished in pine and hardwoods. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Working drawings are nearly complete and figures will shortly be called.

RESIDENCE—2 story and base, frame. Cost not stated. Oak Knoll Los Angeles Co., Cal. Architects, Montgomery & Montgomery, Trust and Savings Bldg., L. A. Owner, A. G. Bohannon. The dwelling has been designed for a ten room house with bath and sleeping porch. A garage will also be erected on the lot. Interior of the house will be finished in pine and hardwood. Oak floors will be used throughout except in the bath rooms which will have composition floors and the wainscot. There will be a central heating system. Open fire places will be installed in the principal rooms. Mantels will be of brick or tile. Plans include vacuum cleaning and a hot water system. Exterior of both the dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, hollow tile construction, \$50,000. Pasadena, Los Angeles Co., Cal. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Mr. House. This dwelling will be erected in Oak Knoll and has been designed for a fifteen room house with several baths and sleeping porches. Interior finish will be largely of hardwoods. There will be steam heat, open fire places, brick and tile

and a vacuum cleaning system, automatic water heaters and other modern conveniences. Exterior will be covered with cement plaster. A clay tile roof will be used. Plans are complete and figures are being taken.

STORES AND OFFICE—3 story and base, Class C construction. Cost not stated. Los Angeles, Cal. Architect, Myron Hunt, Hibernian Bldg., L. A. Owners, Standard Oil Co. The building will be erected at the corner of Aurora and San Fernando streets covering an area of 90 by 120 feet. The structure has been designed for a branch office and warehouse. Interior finish will be of pine and hardwood. There will be metal window sash and frames. Some tile and marble are specified. Plans provide for steam heat and elevator service. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GARAGE—1 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Park Estate. The building will be erected on Garland avenue south of Seventh street and has been designed for a commercial garage. The structure will cover an area of 27 by 147 feet. A cement floor will be used. Interior finish will be of pine throughout. Steel roof trusses and metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

RATTAN FURNITURE FROM HONG-KONG.

[Consul General George E. Anderson, Hongkong, British China.]

The exports of rattan and sea-grass furniture from Hongkong to the United States have increased fully 100 per cent in the past two years. The increase in recent months has been almost altogether in rattan, as distinct from the linen and sea-grass goods.

While the latter goods have many attractive features, including their low cost of manufacture, there are many objections to them, and now that their hold upon the consumer as a novelty is becoming lost they are going out of demand, and the leading Hongkong manufacturer gives it as his opinion that in another six months practically no more sea-grass goods will be exported.

Sea-grass furniture is made by winding twine manufactured from a light green sea grass or bamboo or wood frames, both as a cover or flims for the frame and as body of the chair or other article. This twine is manufactured from a marsh grass growing in immense quantities in the swamps of many South China coast districts, particularly in the Pearl River delta and along the West River. Similar chairs are also made from twine made of a so-called linen fiber, the latter being much the better grade goods and costing much more.

The rattan articles, which have always been the standard goods in this trade and which are again coming into increasing popularity, are made both from rattan core and rattan peel, the latter, as a rule, serving for veranda chairs, tables, and settees. All these goods are made in many varieties and in many grades, though it is not always easy to distinguish between the grades when new, hence classification, and valuation of such goods are matters of great difficulty. Most such goods are made in small Chinese shops under the order of a broker, who generally furnishes the workmen with the materials and often cash for labor, and the work is practically done on a "sweet-on" basis by the shopkeeper, a few cheap employees, and members of his family. Goods thus made are generally manufactured on bamboo frames. The materials often are not of first grade, the various portions of the frames often are imperfectly fitted and fastened, and the body of the goods generally is faultily constructed.

There is one large foreign-sette factory in Hongkong, owned by an American, in which goods are manufactured on wooden frames. This factory is fitted with more or less modern appliances and machinery, and the body of the article is finished more perfectly. Chinese-made goods generally are colored by native stain without special preparation. The foreigners on goods are generally dipped in stain and

shellacked. There is considerable difference in price, but the higher priced goods are more durable, and the trade is tending in direction of the better grade goods.

The chief cost of these goods in the United States is the freight. As a rule, the freight on a rattan chair from Hongkong to the United States, by reason of its bulk, will equal and often exceed its original cost. Freight on such goods to Europe, particularly to overland points, will exceed the original cost considerably. The chief demand for the goods at present is from the United States, England, especially London, and Australia.

BAR SILVER.

Premiums on cash and nearby months in bar silver has been a feature for some time of this branch of the metal trade in London. The fact that the Indian government had made its purchases for the time being has meanwhile caused some selling. Financial difficulties which developed later at Bombay caused some further easing in values.

China appears still to be on the selling rather than on the buying side of the market. One factor to which little attention has been given is the issue of paper currency in that country for the payment of troops. The revolt of the South, which ended about a month ago in the victory of the Peking government, had been financed by liberal issues of paper currency by the provisional government in the revolutionary district. One effect of this was to drive out silver as a currency, causing more or less accumulation at banking centers and making China markets the lowest in the trade. More recently this condition has partly corrected itself, without, however, going far enough to change the relative position of China as a seller.

MOTION PICTURE FILMS IN FOREIGN TRADE OF THE U. S.

Twenty-five thousand miles of motion picture films, enough to stretch around the globe at the Equator, will be the export record of the United States in the calendar year 1915. The United States is the world's greatest manufacturer of motion picture films, probably three-fourths of the entire films of the world being manufactured in this country. Large quantities of films are sent out of the country, both as blank or unexposed films and as finished films ready for use in the stereopticon.

The rapid increase in this branch of the export trade of the United States resulted in the establishment by the Bureau of Foreign and Domestic Commerce, Department of the Interior, of a detailed record, which shows the quantity, measured by feet, and the value of films exported from the country; the plain films and films ready for use, separately stated, and the countries of destination, and the ports through which this distribution is made. This record shows a total export and portation in the nine months ended with September of 652 million feet of unexposed or plain films, and 273 million feet of exposed or films ready for use in the stereopticon, making a total of 925 million feet during the period.

In a single month of September, however, the total was 14½ million feet, and should the remaining months of the year make a similar record, the exports of the year which ends this month would be 133 million feet or slightly more than 25,000 miles. The distance around the earth at the equator. In 1912, the first full calendar year for which figures are given, the total length of films exported was 621 million feet, or less than half the prospective total of 1913. The stated value of the films exported in the nine months ended with September, 1913, is about 3½ million dollars, being \$1,811,000 for the 652 million feet of unexposed films and \$1,636,000 for the 232 million feet of exposed films ready for use in the stereopticon, or an average of 2½ cents per foot for the unexposed and of 7 cents per foot for the exposed films.

England is by far the largest purchaser of films from the United States, and this applies especially to the unexposed films. Of the 80 million feet of films of both classes exported in the calendar year 1912, 70 million feet went to England, 5½ million feet to Canada, a little over 1,000,000 feet to France, three-quarters of a million to the Philippines, over a half million to Brazil, nearly a half million to New Zealand and Labrador, a quarter of a million to Australia, and slightly less than a quarter of a million to Japan. Most of the films going to Canada, Newfoundland and the Philippines are exposed.

The importation of motion picture films amounts to a little more than a million feet per month, the total for the nine months ended with September, 1913, being 104 million feet and for the corresponding months of 1912, 121 million feet. Nearly all of the imported films are in the finished state ready for use. The import price, depending from 5 to 6 cents per foot. About one-half of the total importation is from France, which supplied approximately 7 million feet out of 114 million feet imported in the fiscal year 1913. Italy supplied 2½ million feet, Denmark 2½ million feet, and Denmark 2½ million feet, while 81,000 feet came from Japan and 83,000 feet from India.

STATISTICAL RECORD OF THE PROGRESS OF THE UNITED STATES, 1800-1913.

A general survey of the growth of the United States in population, commerce and industry is presented in a new Statistical Record of the Progress of the United States, 1800-1913, just issued by the Bureau of Economic and Domestic Commerce, Department of Commerce. The publication contains statistical data of the country in the most detailed form, a series of comprehensive tables of the world and the United States, in which the United States is compared with the leading nations of the world as to the quantities of their imports and exports.

The population of the United States is shown to have increased from 82,433 square miles in 1800 to 3,026,789 in 1913, and the population from 3,208,181 to 97,000,000 exclusive of the Alaska territory. The American flag is flying over the production of 108,000,000 of industry. The value of the United States' exports in 1913, 1912, 1911, 1910, 1909, 1908, 1907, 1906, 1905, 1904, 1903, 1902, 1901, 1900, 1899, 1898, 1897, 1896, 1895, 1894, 1893, 1892, 1891, 1890, 1889, 1888, 1887, 1886, 1885, 1884, 1883, 1882, 1881, 1880, 1879, 1878, 1877, 1876, 1875, 1874, 1873, 1872, 1871, 1870, 1869, 1868, 1867, 1866, 1865, 1864, 1863, 1862, 1861, 1860, 1859, 1858, 1857, 1856, 1855, 1854, 1853, 1852, 1851, 1850, 1849, 1848, 1847, 1846, 1845, 1844, 1843, 1842, 1841, 1840, 1839, 1838, 1837, 1836, 1835, 1834, 1833, 1832, 1831, 1830, 1829, 1828, 1827, 1826, 1825, 1824, 1823, 1822, 1821, 1820, 1819, 1818, 1817, 1816, 1815, 1814, 1813, 1812, 1811, 1810, 1809, 1808, 1807, 1806, 1805, 1804, 1803, 1802, 1801, 1800.

54,000 tons in 1810 to 50 million in 1912; copper, from 100 tons in 1845 to 55,000 in 1912; petroleum, from 81,000 gallons in 1859 to over 9 billion gallons in 1912; cotton, from 75,000 running bales of 500 pounds each in 1800 to 14 million in 1912; wheat, from 84 million bushels in 1810 to 730 million in 1912; and corn, from 378 million bushels in 1810 to over 3 billion in 1912; while similar increases are noted in other products of agriculture, mining and manufacture.

The tables of the pamphlet show a corresponding increase in foreign commerce: Imports, from 55 million dollars in 1821 to 1813 million in 1913; and domestic exports, from 52 million in 1821 to 2429 million in 1913; while the share which manufactured products (including prepared foodstuffs) form of the total exports increased from less than 18 million dollars in 1821 to 1½ billion dollars in 1913.

Other statistical data contained in the publication in question relate to national finance, education, agriculture, transportation, consumption of leading staples, prices, etc., comprising the principal facts, in epitomized form, to be presented in the forthcoming 1913 edition of the Statistical Abstract of the United States.

NEW JERSEY AS A MINING STATE.

Second Largest Producer of Zinc—Turns City Banks Into Wealth.

New Jersey is the only State in any importance as a mineral producer in which the utilization of the clay resources constitute the chief industry and represents over 50 per cent of the total output of the State, according to figures compiled by Edward W. Parker, of the United States Geological Survey, in cooperation with the Geological Survey of New Jersey. The clay products of the State have included every variety of brick and tile and every variety of pottery produced in the United States, as classified by the Federal Survey. The value of the clay products in 1912 reached the great total of \$19,828,553, of which \$10,902,633, or more than 50 per cent, was represented by the value of the brick and tile products and \$8,925,920 by pottery. This shows a total increase over 1911 of \$1,660,325. In the value of clay products in 1912 New Jersey ranks third among the States, being exceeded by Ohio and Pennsylvania. It is second in the value of pottery products, and fourth in the value of brick and tile products. In 1912 it was first in the production of china and sanitary ware and ranked among the first five States in the production of most of the varieties of clay products.

Including the recoverable zinc content of the ore produced in New Jersey, the zinc produced in the State in 1912 amounted to 69,555 short tons, valued at \$9,626,191, making the zinc-mining industry second in importance in the State and giving New Jersey second place as a producer of zinc, Missouri being first. The center of the zinc-mining industry in New Jersey is the famous Franklin Furnace district, in Sussex County, where mining has been carried on continuously for over 60 years.

Third among New Jersey's mineral industries is the manufacture of Port-

land cement, the production in 1912 being 4,199,645 barrels, valued at \$3,052,098. The value of stone quarried was \$1,716,829 and of sand and gravel \$1,146,610. The only other mineral product of New Jersey which exceeded \$1,000,000 in 1912 is iron ore, of which 366,823 long tons as produced, valued at \$1,192,816.

The total value of the mineral products of New Jersey in 1912 was \$36,881,930.

EXPOSITION PROGRESS.

The electric lighting and power systems of the Panama-Pacific International Exposition will include some conspicuous features. Chief among these will be the system of illumination, which will be almost revolutionary in its character, containing at least eighteen details that will be adopted at this Exposition for the first time in the history of decorative electrical illumination.

Instead of following the old custom of outlining the various palaces and other architectural structures by means of incandescent lamps, the entire facade of each building and tower will be flooded by means of screened luminous arcs and hidden batteries of searchlights, the system will present a brilliant, but not dazzling, illumination, in all colors of the solar spectrum, the light emanating not from within, but from without.

The various parts of the towers will be picked out by means of imitation "jewels," as they are called, which are cut glass gems of the highest grade, the facets being all tin-polished, and the "jewels" being of assorted colors, to secure this result. They will be placed in such manner as to dangle easily under the influence of the breezes, which will cause them to scintillate in the sun's rays by day, and in artificial beams by night. By means of electric searchlights projected upon them, they will exhibit all the primary colors at night ever scintillating.

INDUSTRIAL ACCIDENT REPORTS.

Letter From Board Calls Attention to Necessity of Annual Report.

A circular has been sent out to all employers calling attention to the requirement of the State law in regard to industrial accidents. The following is the complete text:

Dear Sir:—Your attention is called to the fact that Chapter 53, Extra Session Laws of 1911, made it imperative for every employer of labor in the State of California to report to the Industrial Accident Board every case of personal injury to any employee arising out of or in the course of employment and causing a disability of one week or more.

Inasmuch as it is urgent for the Industrial Accident Board to know the number of industrial accidents happening since January 1, 1913, in order scientifically to determine insurance ratings under the Boynton Workmen's Compensation, Insurance and Safety Act (Chapter 176 of the Laws of 1913) effective January 1, 1914, your co-operation is solicited.

If accidents have occurred to any of your employees kindly advise us as to the name of the injured person, the

date of the accident and the period of disablement in each case. If none has occurred please return a statement to that effect.

Yours very truly,

INDUSTRIAL ACCIDENT BOARD,
T. N. Dean, Statistician.

LAUNDRY MACHINERY IN THE FAR EAST.

[Consul General George E. Anderson, Hongkong.]

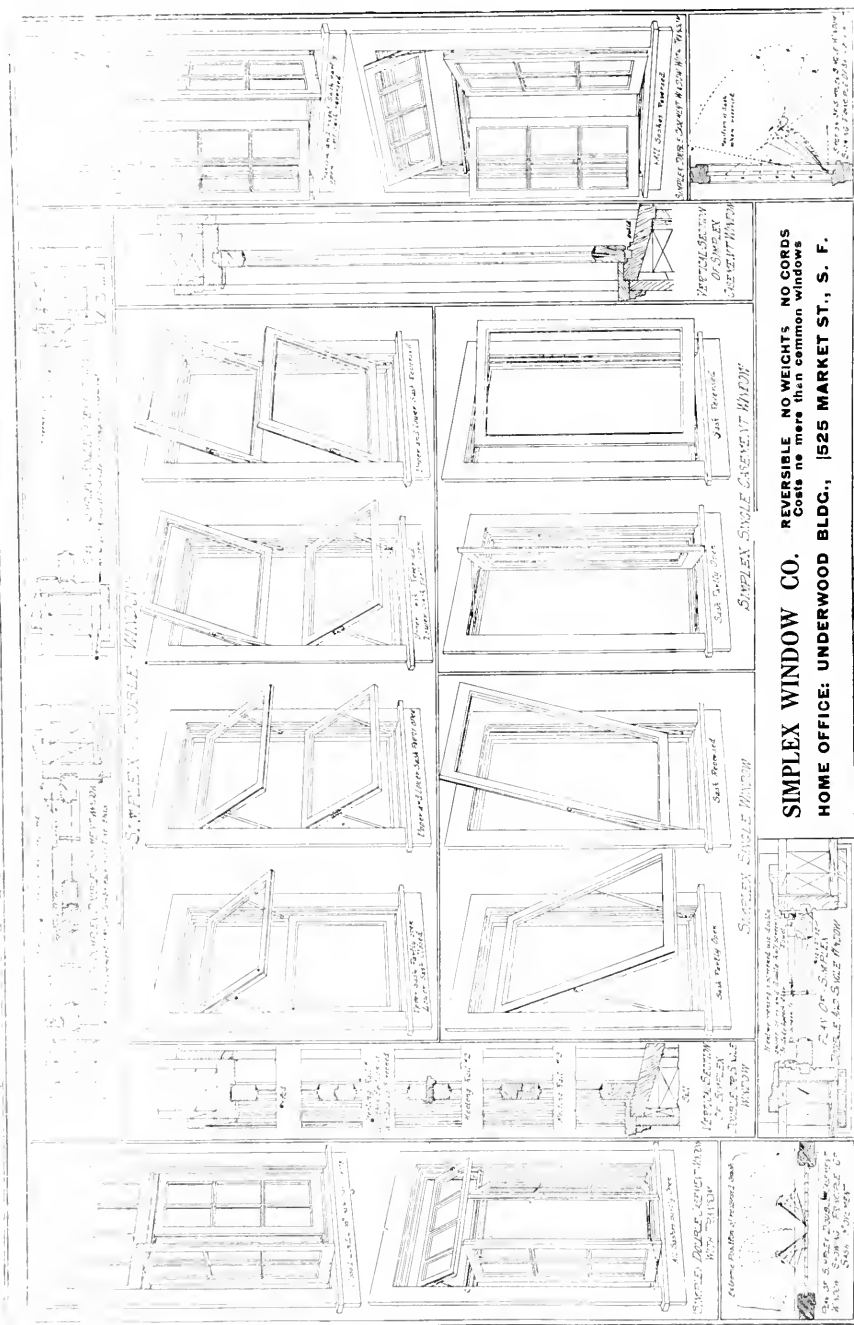

The modern steam laundry is beginning to secure a firm hold in the larger centers of foreign population in the Far East. In this fact there is considerable promise for the export of American laundry machinery, for as a rule American equipment of this type is the most effective and economical.

Cheap labor, especially that of women and children, has retarded the introduction of modern laundries all over Asia and the Far East. Even now in Japan, the most advanced of the Eastern nations, the bulk of laundry work for the public is done by hand. In Asiatic countries clothing is usually washed by beating on stones, tramping in vats, and other primitive machines. Not even are modern washboards, not to mention washing machines, in use. In tropical places like Hongkong, where an abundance of fresh linen and clean wash clothing is a necessity of prime importance, most of the work is still done by hand, the majority of families supporting a Chinese "amah," or woman, and sometimes a man for laundry work only. The heavy starched goods, however, can seldom be laundered satisfactorily by these employees. There are native laundries of some importance in nearly all cities, but they do all their work by hand, though establishments will occasionally be found containing one or two of the less expensive laundry appliances. Many of the hotels of the Far East have laundries of this description. Of actual modern laundering establishments, however, there are none other than those mentioned herein.

Location of Steam Laundries.

The most advanced community in the Far East in this respect is Manila, where an extensive laundry establishment operated under the most advanced American methods has built up a large business. Even in Baguio, the "summer capital" of the Philippines, a steam laundry is operated during the season. Along the Chinese coast, however, Hongkong is the only city with such an establishment. It has been successful during the past two years and now seems to be in a thriving condition. The plant is almost entirely American. It consists of 13 rotary washers, 9 shirt and collar machines, 3 steam ironing machines, collar shapers, and 2 Hoffman pressing machines of American make; and a starching machine, steam ironers, flannel-finishing machines, a flannel washer (Williamson), and benzine cleaning machines of English make. This laundry uses the boiled process of starching, employing American materials.

The success of the modern laundries already established is likely to lead to similar concerns in other ports, but in the meanwhile it is likely that the chief opportunity for the sale of

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

other day to "stick to the farm and keep out of politics."

Evidently Speaker Clark appreciates that politics is a poor business, growing poorer right along, and about to go out altogether.

An Eastern Kansas editor suggests that if Colonel Roosevelt is ever President again he will go Mr. Wilson one better and make Congress go to the White House and listen while he reads the message from the front steps.

The Hetch-Hetchy measure has passed the Senate by a vote of 13 to 25. It is a foregone conclusion that the President will sign the bill as a man of his intelligence could not very well do otherwise.

So now it would seem that the last legal stumbling block in the way of a pure water supply for the bay district had been removed and that now it becomes a question of finance and construction detail.

Some farmers of the San Joaquin Valley may have thought that they were being deprived of water for irrigation purposes. But in reality they will be benefited by San Francisco using the Hetch-Hetchy. For the damming of the head waters of Tuolumne will impound the flood streams when the snow melts and allow the water to be distributed at an even rate throughout the year. And this dam is in a government park it is highly improbable that the United States Government would ever have constructed and irrigation project there or allowed any private corporation to impound the water for private purposes.

Altogether the granting of the Hetch-Hetchy permit has been the greatest thing that has happened to San Francisco and the entire Pacific Coast for many a day. And in view of the vital importance of this great measure it is almost unthinkable that private greed could obstruct the consummation of so worthy an object.

Among other things will be the development of electric power which will be of service to the people of the San Joaquin Valley. And the development of this water supply will be a lasting benefit to the people of the state.

In an extended speech at the Progressive meeting held last Saturday afternoon, Governor Johnson outlined the principles of Progressivism and stated the broad ground upon which the party is founded. In his characteristic style and forceful manner he showed the Progressive party was the dominant party in the country today and that it was time for the progressive of all parties to get together under one banner, the flag of progressive principles. In brief the Governor showed what has been accomplished by the progressives in California and pointed out the obvious path for the future. The following extracts give a brief outline of the main points:

"We are to reorganize, consolidate, or amalgamate for what? The only answer is 'To Win.' But we would rather go down to defeat with our principles than win without them. In the last analysis, reorganization and consolidation of the old regime means the perpetuation of the political freedom so dearly won."

The first duty of Government is to its men and its women and its children, and its first concern and its primal purpose should be the health, and welfare and happiness of its humanity. When this lesson is understood, Government by tradition is past.

We found a State forgetful of its duty to its citizens and cringing toward a political master. Today there is no political master, and the first concern of the State is the happiness and welfare of its People.

The decisions of the Railroad Commission have saved to The People of California many millions of dollars and Progressivism could rest upon its accomplishments alone, in presenting the record to The People of the State.

The saving that has been made by the Board of Control totals millions; but beyond that saving, every man today is free to do business with the State of California, to present his claims, and his bids, and to have them fairly and justly considered.

No employee of the State in the future need worry concerning his position because of politics. He is now judged by merit, and the Civil Service Commission, as at present constituted, will insist upon merit and efficiency as the sole tests.

The Government of the State of California now insists that there shall be computed in the cost of business as well the human deterioration and breakage, and that the maimed body of the worker shall receive the same attention and the same care that the maimed machinery receives.

The health of women who are compelled to toil, the future citizenship of the State, demand that the hours of labor of women should be limited and Progressives have limited those hours to eight and have enforced the administration of the law thus limiting.

More in two sessions of the Legislature has been done for humanity in this State than in all other preceding sessions of the Legislature taken together.

Progressivism gave to California the Initiative, the Referendum, the Recall.

Progressivism recognized the right of suffrage in women and gave it to the women of the State.

Progressivism, by amendment of the Constitution, put into the hands of The People the power of preserving their liberties, the power of writing their own laws, the power of repealing laws that might be inimical to their interests.

The Progressives of California—mindful of the dignity of California; firm in the right of the State to legislate within its jurisdiction as it desired; understanding the tremendous problem presented—had the courage to act in the face of tremendous opposition nationally; gave to the State the Anti-Alien Land Bill and passed it; and with the bill laid for all time the ghost that had frightened so many in the past."

The National Housing Association met in Cincinnati last week. The purpose of the organization is to provide proper housing for the people and especially the tenants of large cities. It agitates the passage of tenement house acts and the regulation of the

building codes of the cities so as to provide light and air for the occupants of the crowded districts in the cities' slums.

California has been progressive in this matter for its Tenement House Act and the regulations of the building codes of the several cities are such that no such tenements as exist in the Eastern cities could be built here. And the cities here are not large as compared to the great centers of population in the Eastern states.

Sunlight and air are the necessary elements to man's existence. These simple primary truths must be taught and enforced by laws in the crowded centers of population. Otherwise the sick and ill fed will be compelled to live in unsanitary places and disease will germinate and spread and perpetuate itself. Especially is this true of tuberculosis, which depends for its existence on such conditions. People must be taught how to live by the rule and enforcement of law.

The Hearst newspapers are a strange combination. They remind one of a vaudeville show. The cartoonists and the special writers are the headliners and they are the real talent that causes people to read the dailies owned and controlled by William Randolph. But the big editorials of William Randolph on the big subjects of the country are enough to make a cub wolf climb a tree. They are an insult to the intelligence of an owl.

But like the cheap vaudeville Hearst gets the audience. His headliners draw the crowd. And whatever he has to say has a wide circulation so he continues to claim the credit for the rains and the sunshine, prosperity and progress and all the good in the world.

The request of Secretary of the Navy Daniels to construct at Hunter's Point a dry dock capable of receiving the largest ships of the navy is a necessity on this coast and a good thing to San Francisco. Here is the key to the Pacific and here is the deep water in a land locked bay that is capable of taking ships of any draught. When the Panama canal opens the need of such a dock will be more and more a necessity and with guaranty of the United States Government the Union Iron Works can well afford to build it.

The Chronicle presents a unique argument against direct legislation. From the fact that there have been forgeries committed on the referendum petition on the Red Light Abatement Bill the conclusion is that it is impossible to have direct legislation without corruption. That conclusion is certainly worthy of a muttonhead. In other words if reform legislation does not immediately reform every body and transform a sinner into a saint it is therefore a failure.

The crimes here complained of were committed by the henchmen of the old regime. Certainly no person who favored the Red Light Abatement Act forged a name to the Referendum petition. And as this was one of the measures that the Chronicle ascribed to the crazy legislature these forgeries must have been perpetrated in the interest of the people that the Chronicle represents.

Reinforced Concrete In Bridge Building.

Some Opinions of the Value and Limitations of This Material As Opposed to Steel Construction.

The question of the relative merits of reinforced concrete and steel, which has been touched on recently in the editorial columns of this journal, is one of very considerable interest not only to engineers and to contractors, but also to municipal authorities and others who are contemplating the construction of bridges. It is one of the many debatable matters upon which the best authorities disagree, and upon which it is extremely difficult to arrive at a definite and unbiased decision. Concrete construction has many enemies, who refuse to countenance its adoption under any circumstances, and it has also a large and growing army of friends, many of whom, in their enthusiasm, see only its manifold advantages without recognizing its commercially economic limitations. Unreasoning condemnation of concrete by its opponents is a mistake as fatal to the selection of the best available method of construction as is its universal adoption by its advocates. Both are to be avoided as far as possible by the engineers who desire to obtain the best and most economical results.

The Western Canada Contractor has been successful in obtaining the opinions of a number of influential engineers on the question at issue. Below we publish some of these, and in our next issue others will be given. We feel that the matter is of sufficient general interest to justify the space devoted to it, and while we do not anticipate that anything we publish will change the opinions of either the reinforced concrete or the steel construction partisans, it is possible that the publication of the views of recognized authorities will be of interest to our readers, and will enable them to form their own ideas with regard to the merits and limitations of both methods of construction.

A Railway Engineer's Views.

C. H. Cartledge, bridge engineer to the Chicago, Burlington & Quincy Railroad Company, says, in connection with his experience of reinforced concrete bridges:

The Chicago, Burlington & Quincy Railroad Company has, since 1905, been engaged in replacing all its temporary structures in permanent form whenever possible and whenever conditions would permit. It has been its practice to use reinforced concrete in one form or another. The statements up to the end of the last calendar year have not all been completed, but previous statements show that on the lines east of the Missouri river we have constructed and now maintain track over 27,000 feet of reinforced concrete bridges, exclusive of culverts and arches and concrete pipes, and in none of these has there been any sign of failure or any indication which would warrant the assumption that the material is not perfectly suited to the purposes for which it was designed. Since 1906 we have installed under the roadbed about 150,000 lin. ft. of reinforced concrete pipe, this is 3 in. and 4 in. in thickness, and not a

single failure has occurred from any cause. I have not at present a figure for the amount of concrete bridging in place on the lines west of the Missouri river, but I believe that it is somewhat more than the figure for the lines east. Besides the foregoing we have, on steel bridges, placed a number of concrete slab decks supporting the ballast and ties, and of these we had in place about 11,000 ft. at the last report, or something over two miles. There have been one or two failures of these decks, caused by their having been built in very cold weather, but no damage or accident to trains has resulted in any case, as there has been ample warning of the damage. It has been my experience in numerous tests of reinforced concrete that warning of failure is given long before actual failure takes place, and this is true to a far greater extent than is the case with timber or steel.

As an instance of what has occurred in my experience as showing the dependability of reinforced concrete, I will cite the instance of an arch of a 75-ft. span carrying a railroad track. The arch was founded upon piling driven in sand, the wing walls of this arch were parallel to it, extending upon the abutment and not connected to the spandrel walls, so that when a very heavy scour occurred, washing the sand from beneath the foundations of its wing walls, a settlement of about 2 inches took place in one foundation, resulting in the flattening of the arch. It is interesting to know that no cracks appeared in the arch ring proper. The only crack discernable was between the spandrel wall on the extrados of the arch.

It has been my duty for the last few months to prepare and report upon reinforced concrete on the railroads of the United States for presentation to the International Railway Congress, and among the questions propounded is this: "Is your opinion of concrete as a material of construction for railroad structures generally favorable?" The answer to this has been in every case "Yes," although I have replied from only about half of those addressed so far. Another question is: "Have you had experience on the influence of repeated stress, especially with regard to the adhesion of the concrete to the reinforcement?" Every correspondent has reported to me that there has been no deterioration from the influence of repeated stress or vibration. This agrees with my own observation of ten years' experience with reinforced concrete construction under heavy railroad traffic, each structure receiving thousands of impacts from the passage of every freight train.

I may add that it is our standard construction for track elevation, superstructures in cities to build of reinforced concrete. My opinion is that with good foundation assured, the factors of first cost and maintenance are the ones which should decide the question as to the character of the

structure, and I have no hesitation in asserting from my own experience that the maintenance cost of reinforced concrete in either flat slabs or arches is much less than that required for steel, and that concrete ought to be used whenever its first cost is equal to that of steel or less, and this, of course, will be the case in the majority of instances of ordinary loadings.

Cost of Maintenance Emphasized.

Robert E. Gaut, of Gaut & Chase, Chicago, is in favor of concrete structures, and expresses his opinion as follows:

Among the largest single users of reinforced concrete for general purposes are railroads and municipalities, and I am referring to these two users as being typical of the general use of reinforced concrete construction. For many years reinforced concrete has been in general use by the great majority of American railroads for all purposes for which concrete or masonry construction could be used. On most of the railroads today such construction is the standard.

Concrete is universally used for substructure work and in practically all cases where arched structures are possible. The extent to which concrete is used on American railroads is shown by the very large annual orders for cement which are placed by railroads, these amounting to over 500,000 barrels per year. The writer has in mind many large arched structures in railroad use, and does not know of a single failure where such work was properly designed and constructed.

A most excellent and modern example of the use of reinforced concrete for railroad purposes is to be seen in Chicago in connection with the Soo Line (Canadian Pacific) freight terminal. This work is now in process of construction and consists of a two-deck structure of reinforced concrete throughout, the track level being the upper deck. Over 100,000 cubic yards of reinforced concrete material is being used in this structure. The writer might add that other and much larger developments of the same nature are now being planned in Chicago and elsewhere, and that in each case they are to be constructed of reinforced concrete.

Practically all American cities are using reinforced concrete arched structures wherever a fixed structure is possible. Many very notable examples are mentioned in which wide arched spans are employed. As far as the writer is able to recall, no serious difficulties have been experienced in either the building or maintenance of such structures, and as far as is possible to state they have in every case proved satisfactory to the extent in which they were built.

As item of maintenance, reinforced concrete is an important item. It is the fact that the reinforced concrete structures are properly designed and built that the item of maintenance can profitably be neglected with the exception, of course,

that the roadway surface would have to be maintained in the same way in either case.

An Opinion From England.

J. Partington, a well-known English consulting engineer and bridge designer, deals with the subject in the following manner:

The question of the relative merits of steel and reinforced concrete as materials for bridge construction is a big one, and one which cannot be dealt with off-hand. It is my opinion that the adage "Circumstances alter cases" is particularly applicable to the problem under consideration. There are instances where the employment of reinforced concrete is feasible, and there are others where steel is to be preferred. It is only by a consideration of the exigencies of a particular case that a decision can be arrived at one way or the other. Broadly speaking, the writer considers that steel is generally a better material to employ for structures on account of its greater reliability.

In this country we do not employ reinforced concrete to anything like the same extent as it is employed on the American continent, and our experience of its behavior is, therefore, to a certain extent, limited. I think I am right, however, in stating that of recorded structural failures or partial failures, a larger percentage have occurred in concrete than in steel, when one considers the relative extent of the employment of each. For this reason I am of the opinion that steel is the more dependable material, and therefore the more advisable for bridge construction, in which dependability is the chief requisite.

In order, however, to comply with your request for as unbiased an opinion as possible, I should like to point out that reinforced concrete construction is still in its infancy, and that it is probable that a great many failures have been due to the fact that we do not yet fully understand the nature of the material with which we are working. In other words, it is probably our lack of knowledge, with its inevitable consequence of faulty design, which has caused the failures, rather than any inherent defects in the material itself. Should this be the case the passage of time and the carrying out of investigation will do much to remove the existing disability under which reinforced concrete labors. We have much yet to learn, such matters as variations of temperature within the body of the concrete itself and the stresses occasioned thereby, the effects of temperature and atmospheric humidity at the time of setting on the strength of the concrete, and many other points having never been satisfactorily investigated as yet.

As times are I consider steel to be decidedly preferable to reinforced concrete in a great majority of cases, not only for bridges, but for other structures which are heavily loaded. Where a sound foundation is assured, and where moderate spans can be conveniently employed concrete bridges can be adopted with advantage, and are to be commended on account of their low cost of maintenance. Otherwise my own personal choice would lean to steel.

Erosion of Steel by Atmosphere.

The following is a reproduction of a part of an article written for the Concrete-Cement Age by F. P. McKibben, professor of civil engineering, Lehigh University, Pa., and touches on an important aspect of the question:

The adaptability of concrete to bridge construction is due primarily to its permanency. It does not rust. It requires no paint. In short, maintenance charges are reduced to a minimum when a well-built concrete bridge is in place. This quality appeals strongly to engineers, but more so to taxpayers.

Highway bridges are notoriously neglected and these structures, when made of steel, are frequently very short-lived. The examination of nearly 700 highway bridges, many of which are of steel, has convinced the writer of the truth of this statement. Some structures receive no attention from the time the contractor leaves them until conditions are so bad as to force action, for steel cannot resist corrosion when in contact with damp earth, or over railroads where locomotive gases are active, and even where neither of these agencies is at work, but where dirt and acids pass through the floorings to the steel below. Cases are on record in which parts of steel bridges have been completely eliminated by corrosion in less than fifteen years, and in extreme instances 10 years have been the term of service of some steel parts exposed to undue corrosive influences. The average life of steel highway bridges is, of course, longer than the periods given, but continuous maintenance is the price paid to insure it.

AN ARCHITECT'S FEES.

In view of the many published statements about the large fee to be received by Guy Lowell, the architect of the new court house for New York, it is interesting to observe the element of uncertainty which attaches to the profit to be derived from an undertaking of this magnitude.

The cost to an architect of preparing his drawings and specifications and seeing that they are properly carried out, in offices run on the best business basis, is at least one-half of his commission, says the Philadelphia Ledger. This, however, applies only to the general class of buildings and not to residential or public and monumental work. The cost is then as high as 75 per cent of the architect's commission.

The United States government prepared a statement which was submitted in congress (senate document No. 916, 62nd congress, second session) which gave the average cost of preparing drawings and specifications alone, exclusive of superintendence or any other field expenses, for the years 1905 to 1911, inclusive, to be 6.2 per cent. This was for preparing the drawings for the buildings erected by the United States government and done by the supervising architect of the treasury, a man known for his great executive ability, and, therefore, done with the greatest economy possible.

Reports have been submitted by the state architect of New York showing that the cost to the state for preparing the plans and specifications made in the state architect's office exceeds 6 per cent. The cost to the New York

Central railroad for preparing the plans for their new station has exceeded 6 per cent. Therefore, an architect who is able to prepare the plans for a \$10,000,000 building at a cost to him of less than 6 per cent of the total cost of the building, must run his office in the most economic manner possible and take his chance that the work may cost him more than his entire fee.

It seems to be the general impression in many unformed places that an architect makes a few sketches taking a few days of his time and for this work receives an enormous fee. The fact of the matter is that to prepare the plans for a \$10,000,000 court house, will require the services of from 20 to 30 high-priced draughtsmen, as well as a number of engineers and specialists on structural work, heating and ventilation, sanitation, mechanical equipment, etc., working for a period of at least five years; will require a large office at a high rental, and with the most economic administration, his work will cost about \$450,000. This will leave him about \$150,000 profit, or about \$300,000 a year.

What business man is there who is willing to head a \$10,000,000 corporation with a salary of \$30,000 a year? What corporation is there of this size that pays its counsel less than this amount? Such men, however, receive these salaries without investing any of their own money to obtain it. The architect must invest about \$450,000 in actual cash paid out to receive his profit of \$150,000.

All of the above has nothing to do with the professional training and skill of the architect and for which he receives his compensation. He must, therefore, not only invest his own money and run a large business office with a chance of running it at a loss, but he must give his skill to the designing, his knowledge of engineering and construction, and his training in sculpture and mural decoration in order that he may obtain his fee.

Of course, it would be possible for an architect to have his work cost him less than one-half of his commission, and the result would be poorly prepared plans and specifications and inadequate superintendence of the erection of the building, which would result in a greater cost of the building, a far greater cost than any saving in the commission paid to the architect. In carrying out the work of the new court house, the architect will have to give almost his entire time and attention to this one piece of work and in comparison to the fees or salaries paid to the best men in other professions, his compensation will be very small.

NOTICE OF NON-RESPONSIBILITY.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner, J. V. De Ryana. The building will be erected on California street between 5th and 6th avenues. There will be three stories on the first floor and seven suites of two and three rooms on the upper floors. Interior will be finished in pine with some elm panels. Oak floors will be used in the living rooms. All apartments will have wall beds and private bath rooms. Plans provide for steam heat, a hot water system and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Marble entrance and base will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 4 story and base, Class C construction, \$25,000. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, I. Rosenberg. The building will be erected on the west side of Hyde street north of Sutter and has been designed to contain a number of two and three room suites with baths. Interior finish will be of pine and hardwood. There will be steam heat, a hot water system and vacuum cleaning plant. Bath rooms will have cement floors and tile wainscot. There will be one automatic elevator. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 5 story and base, Class C construction, \$80,000. Architect, William H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owner, J. A. Elston. The building, which will be one of the largest apartment houses yet erected in Berkeley, will occupy a site on Telegraph avenue at the intersection of Durant avenue. There will be several stories on the first floor besides the main entrance and lobby. Upper floors will contain a large number of two and three room suites equipped with all modern conveniences. Interior finish will be of pine throughout. Oak floors will be used in the living rooms and corridors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. There will be patent store fronts. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

RIEHLOND, CONTRA COSTA CO., CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, Lewis M. Gardiner, Phelan Bldg., S. F. Owner, Mrs. E. Hubbard. The building will be erected at the corner of Elmer and Macdonald avenues covering an area of 50 by 100 feet. There will be stores on the first floor and a number of two and three room suites on the upper floors. Interior finish will be of pine throughout. There will be steam heat and a hot water supply. All apartments will have wall beds and private baths. Composition floors and

tile wainscot will be used in the bath rooms. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, S. Long. The building will be erected at the corner of 19th and Church streets and has been designed to contain a number of two and three room suites with baths. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat, a vacuum cleaning system and wall beds. All suites will have wall beds. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

Contracts Awarded.

SAN FRANCISCO—Apartment house, 3 story and base, brick, \$13,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mrs. Lilly Burbank. Contractor, J. Eric Johanson, 2726 20th street, S. F. Contract price, \$13,000.

BANKS.

SANTA ANA, ORANGE CO., CAL.—Bank and offices, 5 story and base, Class A construction. Cost not stated. Architects, T. Beverley Keim Jr. and Co., Los Angeles Investment Bldg., L. A. Owners, Farmers' and Merchants' Bank of Santa Ana. This work has been mentioned here before when plans were first started. Working drawings have been approved and figures will be called for shortly. The structure will be erected at the corner of Fourth and Main streets and will cover an area of 50 by 100. The bank will occupy the entire first and mezzanine floors. Each of the upper floors will be subdivided into 14 modern offices. Interior finish will be of pine, hardwood, marble and tile. There will be a complete steel frame and exterior walls of brick, faced with pressed brick and terra cotta. Plans provide for steam heat, elevator service, a vacuum cleaning system and fireproof vaults.

Contracts Awarded.

LOS ANGELES, CAL.—Bank ornamental iron work, \$22,500. Architects, William Curlett & Son, Phelan Bldg., S. F. Owners, Merchants' National Bank, Contractors, Rudgear-Merrell Co., S. F. Contract price, \$22,500. The Wessels Marble and Tile Co., H. W. Hellman Bldg., L. A., has been awarded a contract for the marble and tile work on the same building at approximately \$16,000.

BRIDGES AND DAMS.

SAN MATEO, SAN MATEO CO., CAL.—Bridge, wood construction. Cost not stated. Engineer, County Surveyor Neuman, Redwood City. Owners, San Mateo County. Plans have been approved for the construction of a wooden highway bridge in the First Road District. Plans are now out for figures.

Bids will be opened by the County Supervisors on December 29th. Plans can be secured from the County Surveyor, Redwood City. An official proposal appears in another column of this issue.

Contracts Awarded.

TILLAMOOK BAY, ORE.—Jetty work, crushed rock and concrete, \$629,624. Engineer, General Kingham, Owners, United States Government, Contractors, Gleibisch & Joplin, Portland. Contract price, \$629,624.

CHURCHES.

TUCSON, ARIZ.—Church, 2 story and base, brick. Cost not stated. Architects, Frohman & Martin, Slavin Bldg., Pasadena, al. Owners, Grace Episcopal Church. The building will be erected at the corner of Stone and University avenues and will be designed in the Gothic style. There will be a large main auditorium seating 500 people. Sunday school rooms, pastor's study and social rooms. A rectory will be erected later. Interior finish will be of pine and hardwood. A maple floor will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared. Further mention will be made of the work as plans progress.

COURT HOUSES.

ALTURAS, MODOC CO., CAL.—Court house, 2 story and base, reinforced concrete, \$90,000. Architect, F. J. De Longchamps, Reno, Nevada. Owners, Modoc County. Plans presented by Architect De Longchamps in competition with some fifteen other architects were awarded first place and he has been commissioned to proceed with the working drawings. The building is a fine example of the classic design and will be faced with granite and cement plaster. Construction will be as fireproof as the funds available will allow. Plans provide for spacious offices for the various county officials, two large court rooms with ante chambers, a meeting room for the supervisors and large public space. Several fireproof vaults are also included in the plans. Interior will be finished in pine and hardwoods. Metal window sash and frames and metal furniture will be used. There will be a central heating system, probably steam heat. Plans are to be completed and ready for figures by the January meeting of the supervisors and it is hoped to let contracts for the construction not later than February.

FRESNO, FRESNO CO., CAL.—Hall of Records, 2 story and base, reinforced concrete, \$100,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, Fresno County. The building will be fireproof throughout and has been designed in the classic style with eight stone columns and a marble and tile entrance. The first floor will be arranged to accommodate the offices of the County Clerk and County Assessor. Entire upper floor will be given over to the County Recorder. Floors and interior partitions will be of concrete. Ceilings will be finished in marble and tile. A large art glass dome will be one of the features of the building. Plans call for steam heat, vacuum cleaning, oil burning furnaces and metal window sash and frames. Fireproof

vaults will be provided for each of the county officials. Exterior of the building will be faced with cement plaster and terra cotta. Plans have been approved.

♦ FACTORIES & WAREHOUSES.

BREWERY GROUP—1 and 2 story, Class A construction, \$500,000 to \$1,000,000. San Francisco. Architect, V. Wyss Thalman, David Hewes Bldg., S. F. Owners, United Brewers Consumers' Association. The association has secured a lease on a large tract of land in the southern part of the city with available spur track facilities and are now selling stock in the company. Original plans for the buildings have been revised and it is reported that the stock is finding a ready market. Construction will probably be started early in the new year.

ICE STORAGE PLANT—1 story and base, brick, \$20,000. Fresno, Fresno Co., Cal. Architect, R. F. Felchin, Fresno. Owners, Consumers' Ice Co. This work is in the nature of an addition to the company's present plant. The building will cover a considerable ground area and has been designed with exterior walls of extra thickness. There will be a concrete foundation and cement floor. Metal window frames and sash and wire glass are also specified. Interior finish will be of pine and spruce. Modern refrigerating machinery and equipment are called for in the general construction. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

SAN FRANCISCO—Brewery group, 1 and 2 story, Class A construction, \$500,000 to \$1,000,000. Architect, V. Wyss Thalman, David Hewes Bldg., S. F. Owners, United Brewers Consumers' Association. The association has secured a lease on a large tract of land in the southern part of the city with available spur track facilities and are now selling stock in the company. Original plans for the buildings have been revised and it is reported that the stock is finding a ready market. Construction will probably be started early in the new year.

FRESNO, FRESNO CO., CAL.—Ice storage plant, 1 story and base, brick, \$20,000. Architect, R. F. Felchin, Fresno. Owners, Consumers' Ice Co. This work is in the nature of an addition to the company's present plant. This building will cover a considerable ground area and has been designed with exterior walls of extra thickness. There will be a concrete foundation and cement floor. Metal window frames and sash and wire glass are also specified. Interior finish will be of pine and spruce. Modern refrigerating machinery and equipment are called for in the general construction. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

Contracts Awarded.

SACRAMENTO, CAL.—Warehouse, 3 story and base, brick. Cost not stated. Architect, name not given. Owners, Northern Electric Co. Contractors, Jurech-Hader Co., Sacramento. Construction cost not stated.

WAREHOUSE—3 story and base, reinforced concrete, \$100,000. Portland, Ore. Architect, P. Chappell Browne, Mohawk Bldg., Portland. Owner, W.

P. Crawford. Contractor, James P. Taylor, Couch Bldg., Portland. Contract price, \$10,000.

PORTLAND, ORE.—Warehouse, 2 story and base, reinforced concrete, \$10,000. Architect, P. Chappell Browne, Mohawk Bldg., Portland. Owner, W. P. Crawford. Contractor, James P. Taylor, Couch Bldg., Portland. Contract price, \$10,000.

♦ FIRE HOUSES AND JAILS.

BERKELEY, ALAMEDA CO., CAL.—Fire house, 2 story and base, reinforced concrete, \$25,000. Architect, William H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. Plans have been completed for a modern fire house which is to be erected on Durant avenue east of Shattuck. The building will contain apparatus rooms, office and store rooms on the first floor. Upper floor will be arranged for living quarters for the men, a general assembly room and reading and card room. Plans provide for steam heat, an oil burning system, special plumbing, vacuum cleaning and a hot water supply. Interior finish will be of pine and hardwoods. Wall beds will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened on December 23rd.

♦ FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame. Cost not stated. Architects, H. Geiffuss & Son, 45 Kearny street, S. P. Owner's name withheld. The building has been designed to contain a store on the first floor and two modern flats on the upper floor. Interior finish will be of pine throughout. Each of the living rooms will have an open fire place with tile or brick mantel. Bath rooms will have tile wainscot. Patent store fronts will be used in the first floor. Exterior of the building will be covered with rustic and shiplap. Plans are complete and a contract for the grading has been awarded to John Kilso for approximately \$1,000. Bids are being called for on the balance of the work.

SAN FRANCISCO—Flats, 3 3-story and base, frame, \$6,000 each. Architect, none. Owner, Adrienne E. Thompson, 1876 15th street, S. F. These three buildings will be erected on the east side of Duboce street north of 15th. Each has been designed to contain five small apartment flats. Interior finish will be of pine with some elm panels and oak floors. Each flat will have a private bath with composition floor and tile wainscot. There will be open fire places and tile mantels. Wall beds will be used. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$2,500. Architect, none. Owner, J. Harold Johnson, 752 9th avenue, S. F. The building will be erected on the east side of 9th avenue south of California covering an area of 24 by 59 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places

and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster, rustic and shiplap. Plans are complete and in the hands of the owner, who will do the work by Day Labor. All materials are now being purchased.

♦ GARAGES.

OAKLAND, CAL.—Garage and sales rooms, 4 story and base, reinforced concrete, \$35,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, Cuyler Lee. This building, which has been mentioned here before, has been increased in size since the original plans were prepared. These drawings provided for but one story, and since new plans have been prepared for a four-story structure. Construction will be practically fireproof. The design is in the calistic style. Exterior will be faced with cement plaster. Interior of the front portion of the building will be finished in hardwoods, tile and marble. There will be patent store fronts and plate glass windows. The building is to be erected at the corner of 24th and Broadway. Bids are now being taken.

LOS ANGELES, CAL.—Garage, 2 story and base, brick. Cost not stated. Architect, Reginald D. Johnson, Staats Bldg., L. A. Owner, Mrs. N. Rose. The building will be erected on Figueroa street near Washington covering an area of 50 by 150 feet. The structure has been designed for a commercial garage and besides the storage space, will contain a completely equipped machine shop, paint shop and body works. Interior will be finished in pine. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Garage, 1 story and base, brick, \$15,000. Architects, Garrett and Farrell, Currier Bldg., L. A. Owner, James Irving. Contractor, L. W. Morrison, Builders' Exchange, L. A. Contract price, \$15,000.

♦ GOVERNMENT WORK AND SUPPLIES.

The acting secretary of war has transmitted to Congress plans and detailed estimates for the construction of barracks and quarters for the garrisons of the mobile army and coast artillery in the Island of Oahu and in the Panama Canal Zone, in accordance with provisions of the act of Congress approved June 23, 1913. The letter is as follows:

Estimates for Barracks and Quarters,

War Department,

Washington, Nov. 6, 1913.

Sir: I have the honor to submit herewith complete plans and detailed estimates for the construction of barracks and quarters for the garrisons of the mobile army and the coast artillery in the Island of Oahu and in the Panama Canal Zone, prepared in accordance with the provisions of the act of Congress approved June 23, 1913, making appropriations for sundry civil expenses of the government for the fiscal year ending June 30, 1914 (Public No. 3) page 79, viz:

"The secretary of war is authorized and directed to cause to be prepared and submit to Congress on or before Dec. 15, 1913, complete plans for, and detailed estimates of, barracks and quarters for the mobile army and sea-coast artillery on the Canal Zone and in the Hawaiian Islands."

These estimates are submitted, first, for organizations at full statutory strength and, second, with regiments of the infantry army increased to a possible maximum of 3,000 men.

It will be noted that, although these estimates for the construction in the Canal Zone include estimates for the construction of buildings with steel frames and stucco, tile and stucco, and buildings composed of concrete block, detailed plans for buildings of concrete block only are forwarded for construction on the Canal Zone. This type has been accepted as most suitable in view of the statement of Colonel Goethals at the hearing before the House committee on appropriations concerning estimates for the construction of and the fortification of the Panama Canal for the fiscal year 1914 that, in his opinion, concrete-block construction in the Canal Zone is superior to cement-gun or the hollow tile and stucco methods.

The estimates, representing the total cost of the project, are based upon the following strength of garrison, which has been determined, after full and careful study by the general staff, as necessary for the Hawaiian Islands and the Panama Canal Zone, in order that these possessions, which are of vital importance to the United States, may be securely held at all times:

Schofield Barracks, H. T.—Two regiments of infantry (statutory strength); one regiment of cavalry; one regiment of field artillery; one battalion of heavy field artillery; one field signal company; one telegraph company, signal corps; one aeronautical detachment, signal corps, and two field ambulance companies.

Fort Shafter, H. T.—Four regiments of infantry (statutory strength) and one battalion of engineers.

Fort Ruger, H. T.—Two companies of coast artillery for sea-coast defenses proper and one company of coast artillery to man the heavy siege batteries for the land defenses.

Fort Kamehameha, H. T.—Five companies of coast artillery for the sea-coast defenses proper, one company of coast artillery for the mine defenses at Pearl Harbor and Fort Armstrong, and two companies of coast artillery for manning the heavy guns for the land defenses.

Fort De Russy, H. T.—Two companies of coast artillery for the sea-coast defenses proper.

Fort Armstrong, H. T.—Artillery detachment.

Canal Zone—Three regiments of infantry (statutory strength); one squadron of cavalry; one battalion of field artillery (mountain); 12 companies of coast artillery, one company of engineers; one telegraph company, signal corps; one aeronautical detachment, signal corps, and one ambulance company.

For so much of the general scheme as, in the opinion of the department, is absolutely necessary and can be economically undertaken at this time the following estimates, based on statutory

strength only, were included in the regular annual estimates of appropriations required for the service of the fiscal year ending June 30, 1915, forwarded to the secretary of the treasury for inclusion in the annual book of estimates, fiscal year 1915:

Under the heading "Military Posts," Schofield Barracks, Hawaii—Barracks for one regiment of infantry and sewage-disposal plant, \$413,000.

Fort Shafter, Hawaii—Barracks and quarters for headquarters and two battalions of infantry, \$479,000.

Under the heading "Cavalry post, Hawaii:"

Schofield Barracks, Hawaii—Completing accommodations for one regiment of cavalry, \$154,000.

Under the heading "Sea-coast defenses, Philippine Islands and Hawaii:"

Fort Kamehameha, Hawaii—Barracks and quarters for four companies of coast artillery, \$531,200.

Fort De Russy, Hawaii—Barracks and quarters for one company of coast artillery, \$176,400.

Total for Hawaiian Islands, \$1,553,000.

Under the heading "Army quarters, storehouse, etc., Canal Zone:"

Repairs to canal buildings, \$100,000.

Construction of necessary stables and gun sheds, \$193,780.

Barracks, etc., for eight companies of coast artillery at Balboa dump, \$684,000.

Barracks, etc., for two companies of coast artillery, at Margarita Island, \$225,800.

Repairs to canal buildings at Toro Point, \$5,000.

Water and sewer system, roads, walks and lighting system at Toro Point, \$60,000.

Total for Canal Zone, \$1,268,580.

Total for Hawaiian Islands and Canal Zone, \$2,822,150.

The estimates for the Hawaiian Islands provide for barracks for one regiment of infantry, officers' quarters for which have already been provided; completing barracks and quarters for one regiment of cavalry and a sewage-disposal plant, all of these at Schofield Barracks; barracks and quarters for headquarters and two battalions of infantry at Fort Shafter; barracks and quarters for four companies of coast artillery at Fort Kamehameha, and barracks and quarters for one company of coast artillery at Fort De Russy. These funds, if appropriated, will permit the completion of the permanent barracks for two regiments of infantry (at full statutory strength), one regiment of cavalry, seven companies of coast artillery, and will leave temporary barracks for two regiments of infantry (at full statutory strength), one regiment of field artillery, technical troops, and five companies of coast artillery; if the infantry regiment at full statutory strength (1,836 enlisted) is adopted for the garrison, barracks and quarters, either temporary or permanent, will have to be provided for two more regiments of this arm. On the other hand, if the larger regiment is adopted, the existing barracks for the men, both temporary and permanent, at Schofield Barracks and at Fort Shafter, will have to be increased but no additional officers' quarters will be required. This will result in a saving of \$602,221.96, as there will be about 100 less sets of officers' quarters to be provided

with the four large regiments (at full statutory strength) than with the six regiments at statutory strength. The number of men will be practically the same in either case. Temporary barracks should be avoided if possible, as it is uneconomical at stations where troops are to be maintained permanently.

Alternate estimates are also submitted herewith for the construction of infantry barracks at Fort Shafter and Schofield Barracks, Hawaiian Islands, based upon, first, full statutory strength (1,836 enlisted) and, second, maximum strength of 3,000.

It should be understood that the estimates of appropriations as submitted to the secretary of the treasury for inclusion in the annual book of estimates, fiscal year 1915, are based on the statutory strength of infantry regiments.

The estimates for construction in the Canal Zone are based upon the assumption that sufficient canal buildings will be available for the shelter of the great bulk of the personnel of the mobile army and for the enlisted and commissioned personnel of that portion of the coast artillery forming the garrison of the artillery defenses at Toro Point. Certain funds are also estimated for as necessary for the modification of these buildings to make them Panama the sanitary conditions are such that it would be most unwise to suitable for quarters for officers and enlisted men and for the construction of the necessary shelter for animals.

I consider that the amounts requested are absolutely necessary in order properly to shelter the troops. At present troops until proper shelter is provided. The coast-defense works are rapidly being completed, and it is of the greatest importance that the estimates for barracks and quarters for the coast artillery be granted, as the guns will be in position before the barracks can be completed, and artillery troops should be on hand as soon as the guns are ready for service.

Very respectfully,

Henry Breckenridge,

Acting Secretary of War.

To the Speaker, House of Representatives.

New Army Work.

The quartermaster general has directed that the following work he performed at various Army posts:

Letterman General Hospital, Cal.—Extension to hot and cold mains, electrical conduits, water and sewer mains, etc., to nurses' corps building, detention ward, hydrotherapeutic ward, etc. The bids called for by the constructing quartermaster at Fort Mason, Cal.

Army Work.

The quartermaster general of the army has authorized the following work at Army posts:

Fort Mason, Cal.—Extending electric-light system on transportation dock, bids to be opened by the quartermaster at Fort Mason.

Fort Huachuca, Ariz.—Constructing one double captain's quarters and one double blacksmith's shop, bids to be opened by the quartermaster of the post.

The chief of the bureau of yards and docks, Navy Department, Washington, D. C., has accepted the bid of the Ridgeway Dynamo & Engine Co., Ridgeway, Pa., \$2,749 in amount, for furnishing a motor generator set at the U. S. naval station, Pearl Harbor, T. H.

Regulating Valves.

Abstract of bids for needle regulating valves for Military dam, North Platte project, Neb., received under advertisement No. 218 (Washington number), opened at Los Angeles, Cal.:

Pittsburgh Valve Foundry & Construction Co., Pittsburgh, Pa., \$4,328; at Pittsburgh, Pa., 105 days; eight 61,000 lbs.

Coffin Valve Co., Boston, Mass., \$4,755; at Neponset, Mass., 162 days; weight 55,700 lbs.

Hinman Hydraulic Mfg. Co., Denver, Colo., \$5,173; at Denver, Colo., 59 days; weight 57,800 lbs.

Best Mfg. Co., Pittsburgh, Pa., \$5,240; at Verona, Pa., 2 in 75 days and 2 in 95 days; eight 74,000 lbs.

Poer & Mining Machinery Co., Cudahy, Wis., \$5,261; at Cudahy, Wis., 106 days; weight 57,000 lbs.

Rosedale Foundry & Machine Co., Pittsburgh, Pa., \$5,420; at Pittsburgh, Pa., 120 days; weight 62,000 lbs.

Minneapolis Steel & Machinery Co., Minneapolis, Minn., \$5,619.71; at Minneapolis, 65 working days; weight 62,000 lbs.

Advance Machine Co., Los Angeles, Cal., \$5,782.42; at Los Angeles, Cal., 96 days; weight 62,000 lbs.

Pelton Water Wheel Co., San Francisco, Cal., \$6,675; at Harrisburg, Pa., 2 in 80 days and 2 in 110 days; weight 66,200 lbs.

Providence Engine Works, Providence, R. I., \$6,990; at Providence, R. I., 150 days; weight 65,000 lbs.

Fulton Engine Works, Los Angeles, Cal., \$7,195; at Los Angeles, Cal., 120 days; weight 65,000 lbs.

Air-Break Switches.

Abstract of bids for 33,000-volt air-break switches, adv. 251, for Minidoka project, Idaho, bids opened at Los Angeles, Cal.:

(Charles Farnham) Pacific Electric Mfg. Co., San Francisco, Cal., \$342, 2 per cent in 10 days; at San Francisco, Cal., 10 days; shipping weight, each 875 lbs.

Railway & Industrial Engineering Co., Pittsburgh, Pa., \$460, 2 per cent in 10 days; at Pittsburgh, Pa., 20 days; weight 500 lbs.

Electric Appliance Co., San Francisco, Cal., \$609, 2 per cent in 10 days; at Chicago, Ill., 10 days; weight 3,100 lbs.

Foundries at Navy Yards.

The bureau of steam engineering of the Navy Department will take up the question of foundries at the various navy yards, a subject which is regarded as entitled to careful consideration. It is proposed to have special attention paid to the probability that a great portion of the future large casting needs of the Navy may be most efficiently met by the establishment of a central foundry at a navy yard pos-

sessing the greatest natural advantages. It may, in fact, be found desirable to have more than one central foundry; one navy yard may be selected for the central steel foundry, another for the central brass foundry, and another for the central iron foundry. It is held that every navy yard, however small, should have foundry facilities of sufficient capacity for the general work and to provide a certain reserve capacity for emergency wartime conditions.

Albany, Oreg., Construction.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the construction, including plumbing, gas piping, heating apparatus, electric conduits and wiring, interior lighting fixtures, and approaches, of the U. S. post office, Albany, Oreg.:

Bid 1, Fred A. Erixson, Salem, Oreg., 2, Palmberg & Mattson, Astoria, Oreg., 3, Sound Construction & Engineering Co., Seattle, Wash.

4, J. H. Wiese, 5, J. H. Tillman, Portland, Oreg., 6, George Isackson, Portland, Oreg., 7, Arthur W. Kutsche, Portland, Oreg., 8, Campbell Building Co., Salt Lake City, Utah.

For using light colored limestone for all stonework, except where granite is required—Bid 1, \$58,975; 2, \$62,390; 3, \$63,869; 4, \$64,770; 5, \$74,400; 6, \$75,000; 7, \$76,000; 8, no bid.

For using light-colored sandstone for all stonework, except where granite is required—Bid 1, \$57,650; 2, \$62,390; 3, \$61,869; 4, \$63,180; 5, \$74,400; 6, no bid; 7, \$76,000; 8, \$57,776.

For alternate A (substituting brick driveway for macadam etc., as specified), add—Bid 1, \$321; 2, \$800; 3, \$266; 4, \$200; 5, \$500; 6, \$200; 7, \$150; 8, \$464.

For alternate B (substituting Keene's cement for plastering, as specified), add—Bid 1, \$199; 2, \$780; 3, \$816; 4, \$600; 5, \$660; 6, \$800; 7, \$1,500; 8, \$316.

For alternate C (substituting metal frames for wood, etc., in connection with window screens, as specified), add—Bid 1, \$375; 2, \$280; 3, \$350; 4, \$350; 5, \$200; 6, \$500; 7, \$350; 8, \$180.

For alternate D (finishing unassigned offices, as specified), add—Bid 1, \$311; 2, \$660; 3, \$874; 4, \$650; 5, \$775; 6, \$642; 7, \$650; 8, \$168.

Amount included in alternate D for radiators and connections—Bid 1, no bid; 2, \$60; 3, \$289; 4, \$65; 5, \$100; 6, \$100; 7, \$100; 8, \$70.

Amount included in alternate D for all work specified under conduit and wiring—Bid 1, no bid; 2, \$80; 3, \$43; 4, \$25; 5, \$150; 6, \$50; 7, \$50; 8, \$10.

Amount included in alternate D for all work specified under lighting fixtures—Bid 1, no bid; 2, \$35; 3, \$75; 4, \$50; 5, \$100; 6, \$12; 7, \$10; 8, \$15.

Alternate E (substituting terra cotta for certain stone on front, as specified), deduct—Bid 1, \$357; 2, \$600; 3, \$1,172; 4, \$1,000; 5, none; 6, \$100; 7, \$100; 8, \$250.

Alternate F (for simplified treatment of certain portions of exterior of building, as specified), deduct—Bid 1, \$1,237; 2, \$2,500; 3, \$5,500; 4, \$5,000; 5, \$1,600; 6, \$1,800; 7, \$2,500; 8, \$250.

Alternate G (substituting wood for marble in connection with wainscot in public lobby and omitting plaster covers, as specified), deduct—Bid 1, \$299; 2,

\$800; 3, \$512; 4, \$100; 5, \$400; 6, \$1,000; 7, \$300; 8, \$5185.

Amount included in the proposal for all work specified under "Lighting fixtures"—Bid 1, \$536; 2, \$475; 3, \$498; 4, \$1,200; 5, \$1,100; 6, \$500; 7, \$550; 8, \$650.

HOSPITALS

SAN FRANCISCO—Refrigerating plant, Isolation Hospital. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. owners, City and County of San Francisco. Plans have been completed and are now in the hands of the Board of Public Health for the construction of a refrigerating plant at the Isolation Hospital. Bids will be opened on December 20th. Plans and specifications can be secured from the Board of Health, 1065 Mission street. An official proposal appears in another column of this issue.

SAN FRANCISCO—Hospital work, plumbing, heating and electrical construction. Cost not stated. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans have been completed and figures are now being taken for the installation of heating plant, electric work and plumbing at the Letterman General Hospital. Plans can be secured from the Constructing Quartermaster's Office at Fort Mason. Bids will be opened on December 23rd. An official proposal appears in another column of this issue.

HOTELS.

SAN FRANCISCO—Hotel, 2 story and base, frame, Cost not stated. Architect, Sidney B. Newson, Nevada Bank Bldg., S. F. Owner, Sylvain Levy. The building has been designed to contain stores on the first floor and a number of hotel rooms on the second floor. The structure will be erected on Third street near Harrison and will have a frontage of 25 feet by a depth of 80 feet. Only the first floor containing stores will be erected at this time. Interior finish will be of pine throughout. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Hotel, 3 story and base, frame, \$25,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. The building, which has been mentioned in these columns before, will be erected at the southwest corner of Lombard and Scott streets, overlooking the Exposition grounds. There will be five stores on the first floor and in the neighborhood of 50 guest rooms in the two upper floors. There will be steam heat, portable vacuum cleaners and a hot water supply. Interior will be finished in pine, and hardwood. Stores will have large plate glass windows and patent store fronts. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. The building is to be erected on North Main street opposite the Plaza, and will cover an area of 50 by 117 feet. The first floor has been arranged for fifteen stores besides the hotel entrance and lobby. Upper floors

will contain 150 guest rooms and a large number of baths. There will be steam heat, elevator service, vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwoods. Tile floors and wainscot will be used in the bath rooms. Metal window sash, frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and now out for figures.

PENILETON, ORE.—Hotel addition and alteration, 3 story and base, brick, \$55,000. Architects, Tourtelotte & Hummell, Northwest Bldg., Portland. Owners, Lendleton Hotel Co. The present building, covering an area of 100 by 120 feet on the first floor and 100 by 60 feet on the upper floors will be altered so as to make the upper floors uniform. Scagliola columns, cash stone and marble finish will be installed on the first floor. A new passenger elevator and plumbing is also to be provided. Upper floors in the new portion of the building will contain 24 rooms to the floor. Interior finish will be of pine and hardwood. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LIBRARIES.

COALINGA, FRESNO CO., CAL.—Library, 1 story and base, brick, \$10,000. Architects, Swartz, Hotchkiss & Swartz, Howell Bldg., Fresno. Owners, City of Coalinga. The building has been designed in the classic style and will be faced with pressed brick trimmed with terra cotta. Plans provide for a large reading room, children's room, stack room, librarian's office and toilets. There will be a central heating system and modern plumbing. Interior will be finished in pine and hardwood. Maple floor will be used. Plans are complete and figures are being taken.

MARSHFIELD, ORE.—Library, 1 story and base, brick, \$12,500. Architect, W. S. Turpen, Marshfield. Owners, City of Marshfield. Drawings submitted in competition with several other architects for the new building have been approved and will be forwarded to New York. The structure will contain reading room, children's room, librarian's office and stack room. Plans provide for a central heating system, probably steam. There will be pine and oak interior finish and maple floor in the reading room. Metal book shelves and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

WATTS, LOS ANGELES CO., CAL.—Library, 1 story and base, brick and concrete, \$7,100. Architect, E. R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, Town of Watts. Contractor, H. E. La Rue, Watts. Contract price, \$7,100.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State Exhibit Building, 1 and 2 story log construction. Cost not stated. Architects, Edward T. Foulkes, associated with Architect Hagio, Oregonian Bldg., Portland and Crocker Bldg., S. F. Owners, State of Oregon. The building will be erected in the State Exhibit Section of

the Panama-Pacific Exposition covering an area of 150 by 250 feet. A general contract, excluding the interior partitions, plumbing, heating and electric work will be let at this time. Plans are now out for figures. Bids will be called for later on the parts of the work not included in this contract. Plans can be secured from the architects' offices in either this city or Portland.

SAN FRANCISCO—Sanitary and storm water sewers. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for the construction of sanitary and storm water sewers, the Western States and Live Stock sections of the Exposition Grounds. Plans are now out for figures and bids will be opened on December 26th. Plans can be secured from the office of the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

SAN FRANCISCO—Main entrance tower, steel and frame construction. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened by the Buildings and Grounds Committee for the general construction of the Main Entrance Tower show Connery-Peterson Co., 46 Kearny street, low at about \$225,000. The next lowest figure was submitted by Neil A. McLean, Chronicle Bldg. No contract has been awarded.

Contracts Awarded.

SAN FRANCISCO—Structural steel, main entrance tower. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, Dyers Bros., S. F. Contract price not stated.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Round house equipment. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids are now being called for by the Board of Public Works for furnishing machine shop equipment for the Geary Street Municipal Car Barns. Plans and full particulars can be secured from the Board of Public Works. Bids will be opened on January 7th. An official proposal appears in another column of this issue.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, Joseph M. Geary, 23rd and Polson streets, S. F. Owners, Parkside Home Building Co. The dwelling will be erected on the west side of 25th avenue near Hylan street and has been designed for a seven room house with bath. Interior finish will be largely of pine with elm panels in three of the rooms. Oak floors will be used in the living room, dining room and reception hall. There will be two large open fire places with tile and brick mantels. 1 room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with shingles and a

brick veneer base. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Bungalows, 2 1/2 story and base, frame, \$2,000 each. Architect, none. Owner, Emil Nelson, 580 Jersey Street, S. F. These houses will be erected on 13th avenue near Judah and on Edinburgh street. Each house will contain six rooms and bath. Interior finish will be largely of pine. Oak floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$20,000. Architect, Charles Edward Hodges, Bankers' Investment Bldg., S. F. Owner, H. J. Jones, Southern Pacific Co. This dwelling will be erected in St. Francis Wood and will be designed in the Mission style. Interior has been arranged for 14 rooms, several baths and sleeping porches. Interior finish will be largely of hardwood and white enamel. Oak floors will be used in the principal rooms. Plans provide for a central heating system, hot water supply and a vacuum cleaning system. Bath rooms will have tile floors and wainscot. There will be a number of open fire places with tile and brick mantels. Exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of red clay tile. A frame garage will also be erected on the property.

SAN FRANCISCO—Residence, 3 story and base, frame, \$10,000. Architects, Bliss and Faville, Balboa Bldg., S. F. Owner, Edith P. Bliss. The dwelling will be erected at the northeast corner of Lyon and Vallejo streets and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine, hardwood and white enamel. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. The wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and a contract for the general work will be let at once. Other parts of the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2 story, attic and base, Class A construction, \$75,000. Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owner, L. Saroni. These buildings have been mentioned here before. A general contract was awarded some time ago to MacDonald & Kahn, Rialto Bldg., but the work has been delayed. Plans are being revised in order to include several more rooms and additional garages which will considerably increase the cost of the work.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Sidney B. Newsum, Nevada Bank Bldg., S. F. Owner, P. A. Bensmore. The dwelling will be located in Piedmont and has been designed for an eight room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There

will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$6,000. Architects, Milwain Bros., Delzer Bldg., Oakland. Owner, Frederick A. Allardt. The dwelling will be erected in the Crocker Highlands Tract and has been designed for an eight room house with baths and sleeping porch. Interior finish will be largely of pine with some hardwood veneer in the living and dining rooms. Oak floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. A garage will be erected on the lot. Exterior of both house and garage will be covered with cement plaster on metal lath. Plans are now being prepared.

ALAMEDA, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner, W. P. Edwards. The dwelling will be erected on Waterside Terrace and will contain eight rooms, bath and sleeping porch. Interior finish will be of pine, white enamel and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. The wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owners, Barry Building Co., 2527 Market street, Oakland. The dwelling has been designed for a seven room house and will be erected on Linden avenue south of Abine street. Interior finish will be of pine and hardwood. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Oak floors will be used in the principal rooms. Bath rooms will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster with a brick base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

FIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame \$5,000. Architect, Charles W. McCall, Center, Bank Bldg., Oakland. Owner, Mrs. Cleveland Baker. The dwelling has been designed for a seven room house with bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of brick. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architect, A. W. Smith, 1419 Broadway, Oakland. Owner, F. R. To Jan, Security Bank

Bldg., Oakland. The dwelling will be erected at the southwest corner of Cottage and Warfield avenues and has been designed for a seven room house. Interior finish will be of pine and redwood with some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Oak floors will be used in the living room, dining room and reception hall. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner, who will do the work by Day Labor.

FIEDMONT, ALAMEDA CO., CAL.—Bungalows, 2 1-story and base, frame, \$2,500 each. Architect, none. Owner, Joseph T. Collin, 825 5th street, Oakland. These houses have been designed for six room bungalows and will be erected on Ricardo avenue. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be large open fire places in the living rooms and brick or tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are now being purchased.

RICHMOND, CONTRA COSTA CO., CAL.—Bungalows, 3 1-story and base, frame, \$1,500 each. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, C. O. Clausen. These houses will be arranged for five rooms each and will be erected in the West Richmond Tract. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SACRAMENTO, CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento. E. E. Svedenstriker, 2318 I street, 2 story frame dwelling, \$2,700; Joseph Edenhofer, 3011 Cypress ave., 2 1-story frame dwellings, \$1,500 and \$1,000 respectively, and E. A. Pierce, 2267 First avenue, 2 2-story frame dwellings, \$3,000 each. Materials on all of these jobs are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 1/2 story and base, frame, \$3,000. Architect, none. Owner, C. Rasmussen, 415 11th street. The house will contain six rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of tile. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN JUAN CAPISTRANO, ORANGE CO., CAL.—Residence, 2 story and base, reinforced concrete, \$27,000. Architect, L. A. Benton, 111 North Spring street, L. A. Owner, John Forster. The de-

sign is in the Mission style and the dwelling has been arranged for ten rooms, two baths and sleeping porch. A garage will also be erected on the property. Interior finish will be of pine and hardwood. There will be a central heating system, probably hot water, vacuum cleaning plant and other modern conveniences. Bath rooms will have tile floors and wainscot. There will be open fire places and brick or tile mantels. Exterior of the house will be faced with cement plaster. A clay tile roof will be used. Plans are being prepared.

LOS ANGELES, CAL.—Residence, 2 story and base, brick. Cost not stated. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, William M. Humphreys. The dwelling will be erected on Rockwood avenue near Union avenue and has been designed for a ten room house with a number of baths. A two story brick garage will also be erected on the property. Interior of the house will be finished in oak and white enamel. Hardwood floors will be used throughout. Plans provide for steam heat, a hot water system, vacuum cleaning and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. All baths will be equipped with showers. Exterior of the dwelling and garage will be faced with ruffled brick. Plans are being prepared.

ASHLAND, ORE.—Residence, 2 story and base, frame, \$10,000. Architect, J. N. McNeil, Northwest Bldg., Portland. He designed for a large country home and will contain nine rooms, baths and sleeping porches. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. The wainscot will be used in the bath rooms. Exterior of the house will be covered with cement plaster. Plans are complete and figures will be taken at once.

PORTLAND, ORE.—Residence, 2 story and base, reinforced concrete, \$50,000. Architect, Eliza F. Lawrence, Chamber of Commerce Bldg., Portland. Owner, J. L. Bowman. The dwelling will be erected on Knott street between 17th and 18th streets and will be designed for a handsome city home. Construction will be fireproof. Details of the building have not been fully decided upon and a description can not be printed at this time. Further mention will be made of the work as plans progress.

Contracts Awarded.

SCHOOLS.

SAN JOSE, SANTA CLARA CO., CAL.—School gymnasium and manual training building, frame construction, cost not stated. Architect, State Architect George B. McDougall, Sacramento, Owners, State of California. Bids opened by the State Board of Control for the gymnasium building at the San Jose State Normal School show Morrison Bros. of Santa Clara low at \$2,361 and R. O. Summers of San Jose low on the manual training building at \$2,854. A complete list of the figures received for this work will be found under the heading of San Jose and the Santa Clara Valley.

INGLEWOOD, LOS ANGELES CO., CAL.—School, 5 1-, 2- and 3-story, brick, \$150,000. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood Union High School District. The group will consist of a two-story science hall 110 by 73 feet, a 3-story household economy building 110 by 60 feet, a part one and part two story manual arts building 182 by 94 feet and a one story gymnasium 128 by 68 feet with out-door swimming pool and a building housing a central heating plant. Interior finish will be of pine with maple floors. Plans provide for a vacuum cleaning system and program clocks. Exterior will be faced with pressed brick. Working drawings are being prepared and figures will be called for about January 1st. Further mention will be made of the work.

TACOMA, WASH.—School gymnasium, 2 and 3 story and base, reinforced concrete, \$62,000. Architects, Heath & Grove, National Realty Bldg., Tacoma. Owners, Stadium High School. Revised plans for this building have been completed and figures are now being called. The building will cover a considerable ground area and will be practically fireproof. Interior will be finished in pine and maple. There will be steam heat and special gymnasium fixtures. Metal window sash and frames are specified. Plumbing will include showers and tub baths. Exterior of the building will be faced with cement plaster. Bids are now being called.

FRESNO, FRESNO CO., CAL.—Normal School group, 1 and 2-story and base

Class A construction, \$370,000. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. State Architect George B. McDougall states that working drawings are nearly complete for the new State Normal buildings to be erected in Fresno. These buildings will be erected in three wings, covering a ground area of approximately 250 by 100 feet. Details of the construction have not been made public as yet. Architect McDougall states that plans will be complete and out for figures by March 1st. Further mention will be made of this work.

ALHAMBRA, LOS ANGELES CO., CAL.—School group 6 buildings, concrete construction. Cost not stated. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Alhambra. There will be probably six new buildings. The present building will be remodeled and will form the administration building of the group. As soon as Mr. Marsh completes the preliminary work and submits his report on cost, a special election will be called to vote a bond issue for the erection of all or a part of the proposed buildings.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Schools, 3 2-story brick and concrete. Cost not stated. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, Long Beach School District. Contractor J. W. Davison, 325 Walnut street, Long Beach, general construction three buildings. Contract price, \$76,718.86.

STORES.

SAN FRANCISCO.—Stores, 1 story and base, reinforced concrete, \$5,000. Architect, Marcus M. Meherin, Jr., 307 Scott street, S. F. Owner, A. Bianchi, 317 Washington street. The building will be erected in the wholesale district on the south side of Washington street west of Front and will cover an area of 30 by 120 feet. The building will be carried on a scow foundation and will have reinforced concrete walls and a concrete floor. Interior finish will be of pine throughout. There will be patent store fronts and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO.—Market and hall, 2 story and base, frame, \$10,000. Architect none. Owners, Sam and M. E. Spire, 309 Market street, S. F. The building will be erected on Mission street east of 22nd and will cover an area of 15½ feet by 116 feet. The first floor will contain a large market and store and upper floor has been arranged for a lodge hall. Interior finish will be of pine throughout. Some tile and marble will be used in the market. Exterior of the building will be covered with rustle and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

FRESNO, FRESNO CO., CAL.—Store alterations, 1 story and base, brick, \$5,000. Architect, Eugene Matthews, Forsyth Bldg., Fresno. Owner, James Porteous. This work will include new interior fixtures, finish, plumbing, plastering and electric work. New store fronts set in copper and with plate

glass windows will be installed. Plans are being prepared and figures will be called for shortly.

FRESNO, FRESNO CO., CAL.—Store, 1-story and base, reinforced concrete, \$15,000. Architect, R. F. Fehlelin, Fresno. Owner, Mrs. C. B. Shaver. The building will be erected at the southeast corner of J and Merced streets and will cover a large area. Construction will be fireproof throughout with exterior walls of reinforced concrete and interior partitions of hollow tile. Interior finish will be of pine and hardwood. There will be a central heating system, vacuum cleaning and metal window sash and frames. Patent store fronts will be specified. Exterior of the building will be faced with cement plaster. Plans are being prepared.

PORTLAND, ORE.—Stores and loft, 2 story and base, brick and steel, \$20,000. Architects, Camp and De Fox, 426 East Alder street, Portland. Owner, R. E. Gilman. The building will be erected at the corner of 5th and Couch streets covering an area of 100 feet square. The entire building has been leased to one firm who will install a large amount of special fixtures. Interior finish will be of pine with some hardwood veneer. Plans provide for elevator equipment and steam heat. Metal window sash and frames will be specified. Exterior of the building will be faced with pressed brick. Plans are being prepared and when complete the work will be carried to completion by the architects.

SAN FRANCISCO.—Store and nickelodeon, Class C construction, \$12,000. Architect, William Knowles, Hearst Bldg., S. F. Owners, Hind Estate. The building will be erected on the east side of Larkin street north of O'Farrell and will be arranged for a nickelodeon and stores. Interior finish will be of pine throughout. There will be a modern system of ventilation. Patent store fronts are specified. Exterior will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

LOS ANGELES, CAL.—Telephone exchange 6 story and base, Class A construction, \$230,000. Architect, T. W. Barrett, 333 Grant ave., S. F. Owners, Pacific Telephone and Telegraph Co. Contractors, Willard Slater Co., 2314 Santa Fe avenue, Los Angeles. Contract price, \$230,000. Note—The structural steel work has been awarded to the Parker Iron Works for \$25,800.

THEATRES.

SAN FRANCISCO.—Theatre, 6 story and base, Class A construction. Cost not stated. Architects, Woollett and Woollett, Newhall Bldg., S. F. Owners name withheld. Architects Woollett and Woollett have been commissioned to prepare plans for a large theatre and hotel building to be erected on property adjacent to Market street in the neighborhood of Mason street. The new structure will contain a 6-story hotel building now connected to the theatre entrance by a bridge. The hotel structure. A large room, owned by the L. of base. Two buildings will be used for a main auditorium of the theatre, while the rear portion of the lot will contain the lobby and dressing room. The street frontage will be used for a box. Con-

struction will be of the fireproof type. Names of the owners and the exact location of the building will be made known in a few days.

WATSONVILLE, SANTA CRUZ CO., CAL.—Theatre and stores, 2 story and base, reinforced concrete, \$50,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Appleton Co. The building will be erected on a corner lot covering an area of 60 by 160 feet. The first floor will contain a number of stores besides the theatre entrance and main auditorium and stage. Front portion of the second floor will be arranged for offices. Construction will be fireproof. There will be a central heating system, modern ventilation and a vacuum cleaning system. Interior finish will be of pine. Exterior of the building will be faced with cement plaster. Plans are being prepared and figures will be called for shortly.

McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **twelve o'clock, noon, Monday, January 5, 1914.** Said bids must be in duplicate, and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the sand blasting of the granite work and steps of the Capitol Building at Sacramento, California, in accordance with specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California. Such bids will be received for the Entire Work.

Cash, a bidder's bond or a certified check on the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Two (\$2.00) Dollars will be required on the specifications, the deposit to be returned immediately on the return of the specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Sand Blasting, State Capitol Building, Sacramento, California."

[Signed] W. F. McCLURE,
State Engineer. (*)

INVITATION TO CONTRACTORS.**PANAMA-PACIFIC COMMISSION OF THE STATE OF NEW YORK.**

SEALED BIDS OR PROPOSALS for the construction of the New York State Building on the grounds of the Panama-Pacific Exposition, San Francisco, Cal., will be received at the offices of the Commission, 140 West 42nd Street, New York City, until **12 o'clock, noon, on the 20th day of December, 1913.** Bids and proposals are invited for furnishing all labor and materials required for the completion of the following work:

1. Erecting a building for the New York Commission for the Panama-Pacific International Exposition at San Francisco.

The time allowed for erecting and completing the building is two hundred and twenty-five (225) Calendar days.

2. Installing the Plumbing, Water Supply and Gas Fitting in the building above mentioned.

The time allowed for completing the work is two hundred (200) Calendar days.

3. Installing the Steam Heating in the building above mentioned.

The time allowed for the completion of the work is two hundred (200) Calendar days.

4. Installing the Electric Work in the above mentioned.

The time allowed for the completion

of the work is seven-five (75) Calendar days.

The surety required for each bid or proposal is fifty (50) per cent of the bid or proposal.

Contracts will be awarded at a lump sum for each contract.

Contractors must comply with the laws of the State of New York relating to Public Buildings and Structures.

Form of proposals, together with copies of the Contracts and Specifications, may be had at the office of the Commission, 140 West 42nd Street, New York City, and drawings may be obtained from the Architect, Charles E. Meyers, 1 Union Square West, New York City, and at the office of the Director of Works, Service Building, San Francisco.

Contractors desiring blue prints will be required to deposit six (6) dollars, the cost price of printing.

JOHN M. E. MACK, Chairman.

R. A. TALE, Vice-Chairman. (*)

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., November 25, 1913.—Sealed proposals will be opened in this office at **3 p. m., January 6, 1914,** for the construction complete (including mechanical equipment, interior lighting fixtures and approach) of the United States post office at Grand Junction, Colo. One story and base building; ground area, 3,700 square feet; fireproof construction, stone and brick facing; tile and composition roof. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or at this office, in the discretion of the Supervising Architect, O. Wenderoth, Supervising Architect. (*)

PROPOSAL FOR BUILDING.

BUILDING, ETC.—Treasury Department, Supervising Architect's Office, Washington, D. C.—Sealed proposals will be opened in this office at **3 p. m., December 18, 1913,** for the construction complete (including mechanical equipment, interior lighting fixtures, and approaches) of the United States post office at La Junta, Colo. The building is two stories and base, with a ground area of approximately 5,240 square feet; stone, stucco, and terracotta facing; tile roof; first floor only of fireproof construction. Drawings and specifications may be obtained from the custodian of site at La Junta, Colo., or at this office, in the discretion of the supervising architect, O. WENDEROTH, supervising architect. (*)

PROPOSALS.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on **Wednesday, the 17th day of December, 1913,** for doing the following work, including the furnishing of the necessary labor and materials therefor, to-wit:

The brick and terra cotta facing work on two large courts of the City Hall.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within one hundred and eighty (180) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$5,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors for an amount not less than ten per cent of the aggregate of the proposal.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

REMOVAL NOTICE.

BILL & JACOBSON, formerly of 524-526 Pine street, are now located at 334 Riata Bldg. Phone Kearny 1601. Bradshaw Sanitary Garbage Chutes,

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

STATE EXHIBIT BUILDING—1 and 2 story, log construction. Cost not stated. San Francisco, Architects, Edward T. Foulkes, associated with Architect Hogue, Oregonian Bldg., Portland, and Crocker Bldg., S. F. Owners, State of Oregon. The building will be erected in the State Exhibit Section of the Panama-Pacific Exposition covering an area of 150 by 250 feet. A general contract, excluding the interior partitions, plumbing, heating and electric work will be let at this time. Plans are now out for figures. Bids will be called for later on the parts of the work not included in this contract. Plans can be secured from the architect's offices in either this city or Portland.

SANITARY AND STORM WATER SEWERS—Cost not stated. San Francisco, Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans have been completed for the construction of sanitary and storm water sewers for the Western States and Live Stock sections of the Exposition Grounds. Plans are now out for figures and bids will be opened on December 26th. Plans can be secured from the office of the Director of Works, Service Bldg. An official proposal appears in another column of this issue.

MAIN ENTRANCE TOWER—Steel and frame construction. Cost not stated. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids opened by the Buildings and Grounds Committee for general construction of the Main Entrance Tower show Summary-Peterson Co., 46 Kearny street, low at about \$225,000. The next lowest figure was submitted by Neil A. McLean, Chronicle Bldg. No contract has been awarded.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco, Architect, Joseph M. Geary, 23rd and Folsom streets, S. F. Owners, Parkside Home Building Co. The dwelling will be erected on the west side of 27th avenue near Ulloa street and has been designed for a seven room house with bath. Interior finish will be largely of pine with elm panels in three of the rooms. Oak floors will be used in the living room, dining room and reception hall. There will be two large open fire places with tile and brick mantels. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with singles and a brick veneer base. Plans are complete and work will be done by Day Labor.

BUNGALOWS—2 1/2 story and base, frame, \$2,000 each. San Francisco, Architect, none. Owner, E. M. Nelson, 250 Jersey street, S. F. These houses will be erected on 23rd avenue near Judah and on Edinburg street. Each house will contain six rooms and bath. Interior finish will be a large of pine. Oak floors will be used in the principal rooms. There will be large open fire place in each living room. Mantels will be of tile and brick. Tile wainscot will

be used in the bath rooms and kitchen. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base frame, \$20,000. San Francisco, Architect, Charles Edward Hodges, Bankers Investment Bldg., S. F. Owner, H. J. Jones, Southern Pacific Co. This dwelling will be erected in St. Francis Wood and will be designed in the Mission style. Interior has been arranged for 14 rooms, several baths and sleeping porches. Interior finish will be largely of hardwood and white enamel. Oak floors will be used in the principal rooms. Plans provide for a central heating system, hot water supply and a vacuum cleaning system. Bath rooms will have tile floors and wainscot. There will be a number of open fire places with tile and brick mantels. Exterior of the dwelling will be covered with cement plaster on metal lath. Roof will be of red clay tile. A frame garage will also be erected on the property.

RESIDENCE—3 story and base, frame, \$10,000. San Francisco, Architects, Bliss & Faville, Balboa Bldg., S. F. Owner, Edith P. Bliss. The dwelling will be erected at the northeast corner of Lyon and Vallejo streets and has been designed to contain eight rooms, baths and sleeping porch. Interior will be finished in pine, hardwood and white enamel. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Tile wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and a contract for the general work will be let at once. Other parts of the work will be done by Day Labor.

RESIDENCE—2 2-story, attic and base, Class A construction, \$75,000. San Francisco, Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owner, L. Saroni. These buildings have been mentioned here before. A general contract was awarded some time ago to MacDonald & Kahn, Rialto Bldg., but the work has been delayed. Plans are being revised in order to include several more rooms and additional changes will considerably increase the cost of the work.

APARTMENT HOUSE—3 story and base, Class C construction, \$25,000. San Francisco, Architect, Joseph Cahen, 45 Kearny street, S. F. Owner, I. Rosenberg. The building will be erected on the west side of Hyde street north of Sutter and has been designed to contain a number of two and three room suites with bath. Interior finish will be of pine and hardwood. There will be steam heat, a hot water system and vacuum cleaning plant. Bath rooms will have cement floors and tile wainscot. There will be one automatic elevator. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

FLATS—2 story and base, frame. Cost not stated. San Francisco, Architects, H. Geiffuss & Son, 45 Kearny street, S. F. Owner's name withheld. The building has been designed to contain a store on the first floor and two modern flats on the upper floor. Interior finish will be of pine throughout. Each of the living rooms will have an open fire place with tile or brick mantel. Bath rooms will have tile wainscot. Patent store fronts will be used in the first floor. Exterior of the building will be covered with rustic and stucco. Plans are complete and a contract for the grading has been awarded to John Kilso for approximately \$1,000. Bids are being called for on the balance of the work.

FLATS—2 3-story and base, frame, \$8,000 each. San Francisco, Architect, none. Owner, Adrienne E. Thompson, 1576 15th street, S. F. These three buildings will be erected on the east side of Dolores street north of 15th. Each has been designed to contain five small apartment flats. Interior finish will be of pine with some elm panels and oak floors. Each flat will have a private bath with composition floor and tile wainscot. There will be open fire places and tile mantels. Wall beds will be used. Exterior of the buildings will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

REFRIGERATING PLANT—Isolation Hospital. Cost not stated. San Francisco, Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans have been completed and are now in the hands of the Board of Public Health for the construction of a refrigerating plant at the Isolation Hospital. Bids will be opened on December 30th. Plans and specifications can be secured from the Board of Health, 1055 Mission street. An official proposal appears in another column of this issue.

HOSPITAL WORK—Plumbing, heating and electrical construction. Cost not stated. San Francisco, Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans have been completed and figures are now being taken for the installation of heating plant, electric work and plumbing at the Letterman General Hospital. Plans can be secured from the Constructing Quartermaster's Office at Fort Mason. Bids will be opened on December 23rd. An official proposal appears in another column of this issue.

HOTEL—2 story and base, frame. Cost not stated. San Francisco, Architect, Sidney R. Newsum, Nevada Bank Bldg., S. F. Owner, Sylvain Levy. The building has been designed to contain stores on the first floor and a number of hotel rooms on the second floor. The structure will be erected on Third street near Harrison and will have a frontage of 25 feet by a depth of 80 feet. Only the first floor containing stores will be erected at this time. Interior finish will be of pressed brick and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are being completed.

HOTEL—3 story and base, frame, \$25,000. San Francisco, Architect, Charles J. Rousseau, 16 Kearny street,

S. F. Owner's name withheld. The building, which has been mentioned in these columns before, will be erected at the southwest corner of Lombard and Scott streets, overlooking the Exposition grounds. There will be five stories on the first floor and in the neighborhood of 50 guest rooms in the two upper floors. There will be steam heat, portable vacuum cleaners and a hot water supply. Interior will be finished in pine and hardwood. Stores will have large plate glass windows and patent store fronts. Exterior will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ROUND HOUSE EQUIPMENT—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids are now being called for by the Board of Public Works for furnishing machine shop equipment for the Geary Street Municipal Car Barns. Plans and full particulars can be secured from the Board of Public Works. Bids will be opened on January 7th. An official proposal appears in another column of this issue.

FURNISHING CRUSHED ROCK AND REPAIRS TO OVERFLOW STRUCTURE—Cost not stated. San Francisco. Engineer, Engineering Department, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened by the Board of Public Works for furnishing crushed rock for the new City Hall show Enrico Biggio low at \$1.12 for rock from the old city hall site and the Clinton Fireproofing Co. low on rock from other sources at \$1.90. Robert Storrie Co. submitted the lowest figure for repairs to the overflow structure at Fourth and Brannan streets at \$750. A complete list of the bids submitted appears under the heading of San Francisco in this issue.

STORES—1 story and base, reinforced concrete. \$5,000. San Francisco. Architect, Marcus M. Meherin, Jr., 307 Scott street, S. F. Owner, A. Bianchi, 317 Washington street. The building will be erected in the wholesale district on the south side of Washington street west of Front and will cover an area of 30 by 120 feet. The building will be carried on a scow foundation and will have reinforced concrete walls and a concrete floor. Interior finish will be of pine throughout. There will be patent store fronts and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be done by Day Labor.

MARKET AND HALL—2 story and base, frame. \$19,000. San Francisco. Architect, none. Owners, Sam and M. E. Spire, 269 Market street, S. F. The building will be erected on Mission street east of 22nd and will cover an area of 45½ feet by 116 feet. The first floor will contain a large market and store and upper floor has been arranged for a lodge hall. Interior finish will be of pine throughout. Some tile and marble will be used in the market. Exterior of the building will be covered with rustle and shiplap. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

THEATRE—6 story and base, Class A construction. Cost not stated. San Francisco. Architects, Woollett and

Woollett, Newhall Bldg., S. F. Owner's name withheld. Architects Woollett & Woollett have been commissioned to prepare plans for a large theatre and hotel building to be erected on property adjacent to Market street in the neighborhood of Mason street. The new structure will adjoin a six-story hotel building now completed, the theatre entrance being through the hotel structure. A large area, formed by the L of these two buildings, will be used for the main auditorium of the theatre, while the rear portion of the lot will contain the stage and dressing rooms. The street frontage will be used for stores. Construction will be of the fireproof type. Names of the owners and exact location of the building will be made known in a few days.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner, S. Long. The building will be erected at the corner of 19th and Church streets and has been designed to contain a number of two and three room suites with baths. Interior finish will be of pine with some elm panels and oak floors. Plans provide for steam heat, a vacuum cleaning system and wall beds. All suites will have wall beds. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and ready for figures.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, J. Harold Johnson, 752 9th avenue, S. F. The building will be erected on the east side of 9th avenue south of Cabrillo covering an area of 24 by 59 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine with some elm panels. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Exterior of the building will be covered with cement plaster, rustle and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

STORE AND NICKELADEON—1 story and base, Class C construction, \$12,000. San Francisco. Architect, William Knowles, Hearst Bldg., S. F. Owners, Hind Estate. The building will be erected on the east side of Larkin street north of O'Farrell and will be arranged for a nickelodeon and stores. Interior finish will be of pine throughout. There will be a modern system of ventilation. Patent store fronts are specified. Exterior work fronts are specified. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

STRUCTURAL STEEL—Main entrance tower. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Contractors, Dyers Bros., S. F. Contract price not stated.

RESIDENCE—2 story and base, brick and stone. \$60,000. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owner, E. Sheldon Potter. Contractor, Isaac Penny, Pheasant Bldg., S. F. Contract price not stated.

APARTMENT HOUSE—3 story and

base, brick, \$13,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, Mrs. Lilly Burbank. Contractor J. Eric Johanson, 2726 20th street, S. F. Contract price, \$13,000.

plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$6,000, Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owner, Frederick A. Allardt. The dwelling will be erected in the Crocker Highlands Tract and has been designed for an eight room house with bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer in the living and dining rooms. Oak floors will be used throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath rooms will have composition floors and tile wainscot. A garage will be erected on the lot. Exterior of both house and garage will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, \$6,000, Alameda, Alameda Co., Cal. Architect, Leonard H. Ford, 2126 Center street, Berkeley. Owner, W. P. Edwards. The dwelling will be erected on Waterside Terrace and will contain eight rooms, bath and sleeping porch. Interior finish will be of pine, white enamel and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Tile wainscot will also be used in the kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base,

frame, \$4,000, Oakland, Cal. Architect, none. Owners, Barry Building Co., 2527 Market street, Oakland. The dwelling has been designed for a seven room house and will be erected on Linden avenue south of Ashby. Interior finish will be of pine and hardwood. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Oak floors will be used in the principal rooms. Bath room will have tile floor and wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster with a brick base. Plans are complete and in the hands of the owners who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$5,000, Piedmont, Alameda Co., Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Mrs. Cleveland Baker. The dwelling has been designed for a seven room house with bath and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of brick. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$3,900, Oakland, Cal. Architect, A. W. Smith, 1010 Broadway, Oakland. Owner, F. R. Jordan, Security Bank Bldg., Oakland. The dwelling will be erected at the southwest corner of Cottage and Warfield avenues and has been designed for a seven room

house. Interior finish will be of pine and redwood with some hardwood veneer. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Oak floors will be used in the living room, dining room and reception hall. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BUNGALOWS — 2 1-story and base, frame, \$2,500 each, Piedmont, Alameda Co., Cal. Architect, none. Owner, Joseph T. Collin, 825 51th street, Oakland. These houses have been designed for six room bungalows and will be erected on Ricardo avenue. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be large open fire places in the living rooms and brick or tile mantels. Bath rooms and kitchens will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE — 5 story and base, Class C construction, \$80,000, Berkeley, Alameda Co., Cal. Architect, William H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owner, J. A. Elston. The building, which will be one of the largest apartment houses yet erected in Berkeley, will occupy a site on Telegraph avenue at the intersection of Durant avenue. There will be several stores on the first floor besides the main entrance and lobby. Upper floors will contain a large number of two and three room suites equipped with all modern conveniences. Interior finish will be of pine throughout. Oak floors will be used in the living rooms and corridors. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. There will be patent store fronts. Exterior of the building will be faced with pressed brick and terra cotta. Plans are being prepared.

FIRE HOUSE — 2 story and base, reinforced concrete, \$25,000, Berkeley, Alameda Co., Cal. Architect, William H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. Plans have been completed for a modern fire house which is to be erected on Durant avenue east of Shattuck. The building will contain apparatus rooms, office and store rooms on the first floor. Upper floor will be arranged for living quarters for the men, a general assembly room and reading and card room. Plans provide for steam heat, an oil burning system, special plumbing, vacuum cleaning and a hot water supply. Interior finish will be of pine and hardwoods. Wall beds will be used. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened on December 23rd.

GARAGE AND SALES ROOMS — 4 story and base, reinforced concrete, \$35,000, Oakland, Cal. Architects, Willis Polk and Co., Merchants' Exchange Bldg., S. F. Owner, Cuyler Lee. This building, which has been mentioned here before, has been increased in size since the original plans were prepared. These drawings provided for but one story and since new plans

have been prepared for a four story structure. Construction will be practically fireproof. The design is in the classic style. Exterior will be faced with cement plaster. Interior of the front portion of the building will be finished in hardwoods, tile and marble. There will be patent store fronts and plate glass windows. The building is to be erected at the corner of 21th and Broadway. Bids are now being taken.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

LIBRARY—1 story and base, brick, \$10,000. Coalinga, Fresno Co., Cal. Architects, Swartz, Hotchkiss and Swartz, Rowell Bldg., Fresno. Owners, City of Coalinga. The building has been designed in the classic style and will be faced with pressed brick trimmed with terra cotta. Plans provide for a large reading room, children's room, stack room, librarian's office and toilets. There will be a central heating system and modern plumbing. Interior will be finished in pine and hardwood. Maple floor will be used. Plans are complete and figures are being taken.

STORE ALTERATIONS—1 story and base, brick, \$5,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, James Porteous. This work will include new interior fixtures, finish, plumbing, plastering and electric work. New store fronts set in copper and with plate glass windows will be installed. Plans are being prepared and figures will be called for shortly.

STORE—1 story and base, reinforced concrete, \$45,000. Fresno, Fresno Co., Cal. Architect, R. F. Felchin, Fresno. Owner, Mrs. C. B. Shaver. The building will be erected at the southeast corner of J and Merced streets and will cover a large area. Construction will be fireproof throughout with exterior walls of reinforced concrete and interior partitions of hollow tile. Interior finish will be of pine and hardwood. There will be a central heating system, vacuum cleaning and metal window sash and frames. Patent store fronts will be specified. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HALL OF RECORDS—2 story and base, reinforced concrete, \$100,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, Fresno County. The building will be fireproof throughout and has been designed in the classic style with eight stone columns and a marble and tile entrance. The first floor will be arranged to accommodate the offices of the County Clerk and County Assessor. Entire upper floor will be given over to the County Recorder. Floors and interior partitions will be of concrete. Corridors will be finished in marble and tile. A large art glass dome will be one of the features of the building. Plans call for steam heat, vacuum cleaning, oil burning furnaces and metal window sash and frames. Fireproof vaults will be provided for each of the county officials. Exterior of the building will be faced with cement plaster and terra cotta. Plans have been approved.

NORMAL SCHOOL GROUP 1 and 2 story and base, Class A Construction,

\$470,000. Fresno, Fresno Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. State Architect George B. McDougall states that working drawings are nearly complete for the new State Normal buildings to be erected in Fresno. These buildings will be erected in three wings, covering a ground area of approximately 250 by 400 feet. Details of the construction have not been made public as yet. Architect McDougall states that plans will be complete and out for figures by March 1st. Further mention will be made of this work.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCES — 1 and 2 story and base, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: E. E. Sydenstricker, 2318 1 street, 2 story frame dwelling, \$2,700; Joseph Edenhofer, 3011 Cypress ave., 2 1-story frame dwellings, \$1,500 and \$1,000 respectively, and E. A. Pierce, 2207 First avenue, 2 2-story frame dwellings, \$4,000 each. Materials on all of these jobs are now being purchased.

COURT HOUSE—2 story and base, reinforced concrete, \$90,000. Alturas, Modoc Co., Cal. Architect, F. J. De Longchamps, Reno, Nevada. Owners, Modoc County. Plans presented by Architect De Longchamps in competition with some fifteen other architects were awarded first place and he has been commissioned to proceed with the working drawings. The building is a fine example of the classic design and will be faced with granite and cement plaster. Construction will be as fireproof as the funds available will allow. Plans provide for spacious offices for the various county officials, two large court rooms with ante chambers, a meeting room for the supervisors and large public space. Several fireproof vaults are also included in the plans. Interior will be finished in pine and hardwoods. Metal window sash and frames and metal furniture will be used. There will be a central heating system, probably steam heat. Plans are to be completed and ready for figures by the January meeting of the supervisors and it is hoped to let contracts for the construction not later than February.

Contracts Awarded.

LOS ANGELES AND SOUTHERN CALIFORNIA.

RESIDENCE -- 2 story and base, reinforced concrete, \$25,000. San Juan Capistrano, Orange Co., Cal. Architect, A. B. Benton, 114 North Spring street, L. A. Owner, John Forster. The design is in the Mission style and the dwelling has been arranged for ten rooms, two baths and sleeping porch. A garage will also be erected on the property. Interior finish will be of pine and hardwood. There will be a central heating system, probably hot water, vacuum cleaning plant and other modern conveniences. Bath rooms will have tile floors and wainscot. There will be open fire places and brick or tile mantels. Exterior of the house will be faced with cement plaster. A clay tile roof will be used. Plans are being prepared.

RESIDENCE -- 2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Frank M. Tyler, Black Bldg., L. A. Owner, William M. Humphreys. The dwelling will be erected on Rockwood avenue near Union avenue and has been designed for a ten room house with a number of baths. A two story brick garage will also be erected on the property. Interior of the house will be finished in oak and white enamel. Hardwood floors will be used throughout. Plans provide for steam heat, a hot water system, vacuum cleaning and open fireplaces. Mantels will be of brick and tile. Bath rooms will have composition floors and the wainscot. All baths will be equipped with showers. Exterior of the dwelling and garage will be faced with ruffled brick. Plans are being prepared.

CHURCH--2 story and base, brick. Cost not stated. Tucson, Ariz. Architects, Frohman & Martin, Slavin Bldg., Pasadena, Cal. Owners, Grace Episcopal Church. The building will be erected at the corner of Stone and University avenues and will be designed in the Gothic style. There will be a large main auditorium seating 500 people, Sunday School rooms, pastor's

study and social rooms. A rectory will be erected later. Interior finish will be of pine and hardwood. A maple floor will be used. Exterior of the building will be faced with pressed brick. Plans are now being prepared. Further mention will be made of the work as the plans progress.

HOTEL—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Charles Gordon. Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. The building will be erected on North Main street opposite the Plaza and will cover an area of 90 by 117 feet. The first floor has been arranged for fifteen stores besides the hotel entrance and lobby. Upper floors will contain 150 guest rooms and a large number of baths. There will be steam heat, elevator service, vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwoods. The floors and wainscot will be used in the bath rooms. Metal window sash, frames and patent storm fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and now out for figures.

SCHOOL—5 1-, 2- and 3-story, brick \$150,000. Inglewood, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood Union High School District. The group will consist of a two story science hall 110 by 73 feet, a 3 story household economy building 110 by 67 feet, a part one and part two story manual arts building 182 by 91 feet and a one story gymnasium 138 by 68 feet with out door swimming pool and a building housing a central heating plant. Interior finish will be of pine with maple floors. Plans provide for a vacuum cleaning system and program clocks. Exterior will be faced with pressed brick. Working drawings are being prepared and figures will be called for about January 1st. Further mention will be made of the work.

BANK AND OFFICES—5 story and base, Class A construction, cost not stated. Santa Ana, Orange Co., Cal. Architects, T. Beverly Keim Jr. & Co., Los Angeles Investment Bldg., L. A. Owners, Farmers' and Merchants' Bank of Santa Ana. This work has been mentioned here before when plans were first started. Working drawings have been approved and figures will be called for shortly. The structure will be erected at the corner of Fourth and Main streets and will cover an area of 50 by 100 feet. The bank will occupy the entire first and mezzanine floors. Each of the upper floors will be subdivided into 14 modern offices. Interior finish will be of pine, hardwood marble and tile. There will be a complete steel frame and exterior walls of brick, faced with pressed brick and terra cotta. Plans provide for steam heat, elevator service, a vacuum cleaning system and fireproof vaults.

GARAGE—2 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, Reginald D. Johnson. Straits Bldg., L. A. Owner, Mrs. N. Rose. The building will be erected on Figueroa street near Washington covering an area of 50 by 150 feet. The structure has been designed for a commercial garage and besides the store space will contain a completely equipped machine shop, paint shop and body works. In terior will be finished in pine. There will be metal window sash and frames.

Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SCHOOL GROUP—6 buildings, concrete construction. Cost not stated. Alhambra, Los Angeles Co., Cal. Architect Norman F. Marsh, Broadway Central Bldg., L. A. Owners, City of Alhambra. There will probably be six new buildings. The present building will be remodeled and will form the administration building of the group. As soon as Mr. Marsh completes the preliminary work and submits his report on cost, a special election will be called to vote a bond issue for the erection of all or a part of the proposed buildings.

Contracts Awarded.

TELEPHONE EXCHANGE—3 story and base, Class A construction, \$230,000. Los Angeles, Cal. Architect, T. W. Burkett, 333 Grant ave. S. F. Owners, Pacific Telephone and Telegraph Co. Contractors, Willard Slater Co., 2314 Santa Fe avenue, Los Angeles. Contract price, \$230,000. Note—The structural steel work has been awarded to the Baker Iron Works for \$25,000.

BANK ORNAMENTAL IRON WORK—\$32,500. Los Angeles, Cal. Architects, William Curlett & Son, Poelan Bldg., S. F. Owners' Merchants' National Bank. Contractors, Rudger-Morel Co. S. F. Contract price, \$32,500. The Wesslein Marble & Tile Co., H. W. Hellman Bldg., L. A., has been awarded a contract for the marble and tile work on the same building at approximately \$70,000.

GARAGE—1 story and base, brick, \$5,000. Los Angeles, Cal. Architects, Garrett and Farrell, Currier Bldg., L. A. Owner, James Irving, Contractor, J. W. Morrison, Builders' Exchange, L. A. Contract price, \$15,000.

LIBRARY—1 story and base, brick and concrete, \$7,100. Watts, Los Angeles Co., Cal. Architect E. R. Jeffery, Citizens' National Bank Bldg., L. A. Owners, Town of Watts, Contractor, H. E. La Rue, Watts. Contract price, \$7,100.

RESIDENCE—2 story and base, frame, \$33,000. Pasadena, Los Angeles Co., Cal. Architects, Hunt and Burns, Laughlin Bldg., L. A. Owner, Henry House, Contractor, C. J. Nordquist, 322 Patterson street, L. A. Contract price, \$33,000.

RESIDENCE—2 story and base, frame, \$30,000. Beverly Hills, Los Angeles Co., Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Owner, E. L. Deane, Contractors, Milwaukee Building Co., Wright & Callender Bldg., L. A. Contract price, \$30,000.

SCHOOLS—3 2-story, brick and concrete. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, A. A. Burnside Sturgis, Story Bldg., L. A. Owners, Long Beach School District. Contractor, J. W. Davidson 325 Wilcox street, Long Beach. General construction, three buildings. Contract price, \$76,718.56.

PORTLAND AND OREGON.

RESIDENCE—2 story and base, frame, \$10,000. Astoria, Ore. Architect, J. N. McNeil, North-west Bldg., Portland. Owner, H. Jennings. The dwelling will be designed for a large country home and will contain five rooms, baths and sleeping porch. Interior finish will be of pine and

wood. Oak floors will be used in the principal rooms. There will be fireplace and open fire places. Mantels will be of brick and tile. The wainscot will be used in the bath rooms. Exterior of the house will be covered with cement plaster. Plans are complete and figures will be taken at once.

RESIDENCE—2 story and base, reinforced concrete, \$50,000. Portland, Ore. Architect, Eliza F. Lawrence, Chamber of Commerce Bldg., Portland, Owner, J. L. Bowman. The dwelling will be erected on Knott street between 17th and 18th streets and will be designed for a handsome city home. Construction will be fireproof. Details of the building have not been fully decided upon and a description can not be printed at this time. Further mention will be made of the work as plans progress.

HOTEL ADDITION AND ALTERATION—3 story and base, brick, \$35,000. Pendleton, Ore. Architects, Tourtellotte & Hummel, Northwest Bldg., Portland, Owners, Pendleton Hotel Co. The present building, covering an area of 100 by 120 feet on the first floor and 100 by 60 feet on the upper floors, will be altered so as to make the upper floors uniform. Scagliola columns, Oregon stone and marble finish will be installed on the first floor. A new passenger elevator and plumbing is also to be provided. Upper floors in the new portion of the building will contain 24 rooms to the floor. Interior finish will be of pine and hardwood. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

LIBRARY—1 story and base, brick \$12,500. Marshfield, Ore. Architect, W. S. Turpen, Marshfield, Owners, City of Astoria. Drawings submitted in competition with several other architects for the new building have been approved and will be forwarded to New York. The structure will contain reading room, children's room, librarian's office and stack room. Plans provide for a central heating system, probably steam. There will be pine and oak interior finish and maple floor in the reading room. Metal book shelves and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES AND LOFT—2 story and base, brick and steel, \$20,000. Portland, Ore. Architects, Cump and Lee, Box 436 Alder street, Portland. Owners, R. L. Glenn. The building will be erected at the corner of 5th and Commercial streets covering an area of 100 feet square. The entire building has been leased to one firm who will install a large amount of special fixtures. Interior finish will be of pine with some hardwood veneer. Plans provide for elevator equipment and steam heat. Metal window sash and frames will be specified. Exterior of the building will be covered with pressed brick. Plans are being prepared and when complete the work will be carried to completion as the plans are filed.

Contracts Awarded.

PUTTY WORK—Cris et al., Astoria, Ore., \$629.621. T. H. Cook, Bay City, Engineer, General K. L. L. Owners, United States Government. Con-

tractors, Griebel, & Joplin, Portland. Contract price, \$629,624.

SEATTLE AND WASHINGTON.

SCHOOL GYMNASIUM. 2 and 3 story and base, reinforced concrete, \$62,000. Tacoma, Wash. Architects, Heath and Grove, National Realty Bldg., Tacoma. Owners, Stadium High School. Revised plans for this building have been completed and figures are now being called. The building will cover a considerable ground area and will be practically fireproof. Interior will be finished in pine and maple. There will be steam heat and special gymnasium fittings. Metal window sash and frames are specified. Plumbing will include showers and tub baths. Exterior of the building will be faced with cement plaster. Bids are now being called.

Contracts Awarded.

WATER SYSTEM.—\$135,907. Centralia, Wash. Engineer, Stanley Macomber, City Engineer, Centralia. Owners, City of Centralia. Contractor, W. H. Mitchell, Alaska Bldg., Seattle. Contract price, \$135,907.

INCORPORATIONS.

San Francisco.

Toyland G. Co., Capital Stock, \$50,000; subscribed, \$50; shares \$10 each. Directors—G. T. Dunlap, W. Holcombe, F. J. Fisher, S. Carr, L. F. Muller, 1 share each. Place of business, San Francisco. Manufacturers Novelty Co., Capital Stock, \$10,000; subscribed, \$9,900; shares \$100 each. Directors—G. F. Lucas, J. T. Hayward, E. M. MacConnell, 33 shares each. Place of business, San Francisco. Pacific Coast Quarry Co., Capital Stock, \$20,000; subscribed, \$15; shares, \$1 each. Directors—F. D. Mitchell, A. Whearty, C. Searle, 5 shares each. Place of business, San Francisco.

T. Mori & Company, Capital Stock, \$30,000; subscribed, \$150; shares, \$50 each. Directors—T. Mori, J. P. O'Brien and L. G. Meyer, 1 share each. Place of business, San Francisco.

American Concrete Co., Capital Stock, \$10,000; subscribed, \$500; shares \$100 each. Directors—R. Glaze, E. Heger, R. D. Connolly, 1 share each. Place of business, San Francisco.

Steamer Solano Co., Capital Stock, \$130,000; subscribed, \$3,000; shares \$1300 each. Directors—R. A. Hiscox, N. H. Wood, O. T. Barlow, 1 share each. Place of business, San Francisco.

Star Clock and Suit Mfg. Co., Capital Stock, \$25,000; subscribed, \$30; shares, \$10 each. Directors—J. Rosenbaum, M. Rosenberg, R. Kalsch, 1 share each. Place of business, San Francisco.

The Emmendorf Hat Co., Capital Stock, \$15,000; subscribed, \$5; shares, \$1 each. Directors—P. E. Emmendorf, A. L. Emmendorf, P. W. Ruppert, 1 share each. Place of business, San Francisco.

Pacific Vagator Co., Capital Stock, \$25,000; subscribed, \$500; shares, \$100 each. Directors—G. W. Hinkley, F. D. Stringham, W. Holcombe, S. Carr, I. F. Miller, 1 share each. Place of business, San Francisco.

The Louis C. Muller Co., Capital Stock, \$10,000; subscribed, \$210; shares, \$10 each. Directors—L. C. Muller, E. Kitzelberger, 10 shares each; E. Fritz, 1 share. Place of business, San Francisco.

Hugo McKevitt & Son, Capital Stock, \$5,000; subscribed, \$20; shares, \$10

each. Directors—V. Hart, J. C. Quinlan, H. K. McKevitt, 1 share each. Place of business, San Francisco.

Mission Realty Co., Capital Stock, \$10,000; subscribed, \$30; shares, \$10 each. Directors—V. Hart, J. C. Quinlan, H. K. McKevitt, 1 share each. Place of business, San Francisco.

F. H. Heinrich & Co., Capital Stock, \$500; subscribed, \$50; shares, \$10 each. Directors—C. C. Haub, F. R. Heinrich, M. T. Bischof, M. A. Woodward, A. B. Weller, 1 share each. Place of business, San Francisco.

CONSTRUCTION WORK ABROAD.

CANADA.

Vancouver Improvements—Gas Plant.

Vancouver contemplates spending \$5,000,000 in the near future for city improvements, which includes \$1,000,000 worth of paving, several bridges, cause ways, viaducts, etc.

The Vancouver council has passed a resolution favoring the establishment of a municipal gas plant. The city engineer's estimate is that a plant could be established at an initial cost of \$250,000, enabling gas to be sold at \$1.16 per 1,000, while the minimum price for gas quoted by applicants for a franchise was \$1.40.

COLUMBIA.

Public Works.

The Government has appropriated through the Department of Public Works \$10,000 gold for constructing a customhouse at the port of Guapi, midway between Buenaventura and Tumaco on the Pacific coast; and \$15,000, for the defense of the port against Guapi River and for sanitation. The engineers are also instructed to make a thorough preliminary survey of a communicating route between Guapi and the central and southern provinces of Cauca, and if a feasible route be discovered the Government will at once authorize the development thereof. The Department of Fomento is authorized to expend \$5,000 additional for general development of the town of Guapi.

Railway Construction.

The Government authorizes reconstruction and repair of the Tolima Railway between a point opposite Girardot on the Magdalena River and Espinal in Tolima Department. This road was taken over by the Government in August last, and the improvements proposed will include general reconstruction of track, roadbed, building, etc., so the line may be opened to service as early as possible. Mr. Justino Manco has been appointed chief engineer in charge, and he may be addressed either at Girardot or Espinal, Columbia.

The Government has approved construction of an additional 3 miles of the Amagay Railway and has authorized the company to issue \$75,000 of Government-guaranteed bonds thereon—the amount of subvention provided for in 1907 contract. The company also secures 3,700 acres of public lands as a further subvention. This road is being built between Medellin and Amagay and is said to be paying already.

The Government also approves construction of 14 miles of the Antioquia Railway between Puerto Berri's and

Medellin and has authorized emission of \$74,160 in 6 per cent Government bonds, protected by customs duties, in conformance with law No. 61 of 1895, the amount of the national subvention to this corporation.

ARGENTINA.

Waterworks and Electric Plants.

The City Council of Bolivar, Province of Buenos Aires, has approved the specifications for the tenders that are to be invited for construction of waterworks in that town.

The Council of Bolivar has also approved the specification for the electric lighting of that town and tenders will shortly be called for.

The mayor of the city of Buenos Aires will shortly submit to the City Council the ad referendum concession authorizing the Lacroze Company to undertake public and private electric lighting. The terms of the concession are the same as those enjoyed by the Compania Alemana Transatlantica de Electricidad.

New Telephone Lines—Tramway.

The public works of the Rosario Municipality has reported favorably on the petition of Sr. A. Rechedei for a 40 year concession for a telephone system. At the expiration of the concession the property is to revert to the municipality.

The United River Plate Telephone Co. has purchased the telephone business in Rio Cuarto and Bell Ville, and it is probable that these two towns will be connected with the city of Cordoba, where the company is erecting suitable premises for installing an automatic telephone exchange, the first to be erected in Argentina. The result of the working of this exchange will be watched with considerable interest, for if it is a success it will mean that this system will be established in several other cities in which the company is interested.

J. Basante has applied to the Municipality of Villa Rica for a concession to establish a telephonic service between the town and the railway station, also for a tramway concession as well as one for electric lighting.

EAST AFRICA.

OPENING OF THE HAIFA-ACCA RAILWAY.

The Hedjaz Railway inaugurated the branch line from Haifa to Acca on October 14 by sending a free train to Acca with Haifa people. After the inauguration celebration at the Acca station, the train left with Acca people for Haifa. In the evening a train took the Acca people home and in return brought the Haifa people back from Acca.

For the beginning two trains a day are running to Acca. The customhouse and the landing place in Haifa have been quite in adequate to cope with the traffic but the Hedjaz Railway has made a new warehouse on their own jetty, and this warehouse has been rented by the customhouse, gratis, for storage of imported goods. The German Steamship Stambul was the first steamer to have its cargo stored in this new custom warehouse.

This improvement will enable Haifa and the Hedjaz Railway to compete

more briskly with Beirut for handling goods for Damascus, as there is no longer the lack of warehouse facilities which formerly caused the heavy expenses from the landing place to the customhouse, and from there to the railway freight station. Now a truck of the railway is just behind the new customhouse, and therefore the landing and forwarding expenses for Damascus goods will be very little in comparison with what they formerly were.

A large steam sawmill has been built at Troitsky Posad, on the Volga River, Russia, by Mr. Smirnov, a Moscow timber merchant, who is organizing a stock company with a capital of \$1,000,000. The output of the mill will be sold on the foreign market.

OIL BURNERS INSTALLED FOR THE UNITED STATES GOVERNMENT AT FORT BAKER, CAL.

By O. W. Degen, Civil Engineer, War Department.

A modern installation of oil burners using crude fuel oil and low pressure air at Fort Baker, California.

The War Department has just installed an oil burning plant for Barracks and Quarters at Fort Baker, Cal. The plans is divided into No. 1—Oil Supply Pipe Lines; No. 2—Oil Storage and Distributing Reservoirs; No. 3—Oil Pump and Motors; No. 4—Air Pipe Line Compressors, Motors and Oil Burners.

The oil is delivered by tank steamer and is pumped through a 6 inch pipe to a storage reservoir of a capacity of 100,000 gallons at an elevation of 100 feet. (This being the limit oil steamers care to pump). The reservoir is constructed in red rock, lined with 5 inch of concrete on sides using Clinton wire fabric as reinforcing; the interior was sprayed with cement gun, reservoir is covered. From this reservoir the oil is pumped into the small distributing reservoir of 10,000 gallons, also of reinforced concrete at an elevation of 200 feet by a 5-H. P. motor and Gould Triplex pump belt driven from there it is distributed through 4 inch wrought steel pipes through entire reservation, except branches to houses, which are 2 inch.

Great care had to be taken in getting the oil pipe tight and providing for expansion and contraction by inserting U-bends every 200 feet bedded in sand. The oil pipe lines are controlled by gate valves so any part can be shut out without interfering with the rest.

The apparatus for supply fuel air was installed in the Station, it consisted of two General Electric Centrifugal air compressors, each with a capacity of 750 cubic feet of free air per minute under a coat 2 pound pressure; each compressor is driven by an alternating current General Electric motor of 10-H. P. and 3400 revolutions per minute. The air pipe starts with an 8 inch size and reduced to 5 inch, 4 inch and 2 1/2 inch. Air and oil pipes were laid in the same trench close to the rear of the buildings. The air and oil pipes are extended into the basement of each building with gate valves outside of each building.

The oil supply to each building is provided with a pressure regulating valve so pressure is kept at about 20 pounds and an automatic cut-off valve.

Each building is provided with a Crane oil meter of disc type with a strainer and by-pass.

The burners were of the S. T. Johnson Company type, and the compressors, air line and burners were installed by this firm. Oil burners were installed for all the boilers, hot water heaters, bake ovens and ranges in the Post, thirty-seven burners in all.

The total amount of oil consumed during the month of October was 5,675 gallons at a cost of \$197.50 and 242,000 W. hours at 3 cents were required for electric power, a total cost of \$186.10; this will show a saving of about 76 per cent over coal. California crude fuel oil is used with heat value of 18,000 B. T. U. specific gravity .9065 and one gallon of this oil requires 187.5 cubic feet of air for combustion.

This installation being the first on a large scale completed by the Government opens up an entire new field of application in the use of fuel oil, no doubt future installations will be made to provide large cities with oil for fuel collected into reservoirs same as water and piped through the city streets in the same manner as water mains with taps to buildings, that is being done now at Fort Baker, this and the installation also about completed at Presidio of San Francisco are the first of its kind in the world.

The work was done and designed under the directions of the Contracting Quartermaster's office, Fort Mason, California, Col. George McK. Williamson and Capt. E. S. Walton, Quartermaster, O. W. Degen, Civil Engineer.

The oil tanks, pump and meter were constructed by the Contra Costa Construction Co., the oil pipe by Fingle Dunn Co., and the air lines, compressors and burners by the S. T. Johnson Company, of 1234 Mission St., San Francisco. The cost of the two oil tanks and pumping machinery was \$4350; for the oil pipe lines, \$1295, and air lines, compressors and burners, \$6380, or a total of \$15025 for the entire installation.

The installation has been a complete success and is much preferred by the soldiers to the coal burning, this requires no labor to speak of in operation, extreme cleanliness, no ashes or smoke.

The cost per hour for an army range using 1 1/2 gallons of oil per hour is about 3 cents including the cost of electric current.

Minor Jobs About Town

2198—Geary, brick 50 Leonard, owner, N. Gray & Co., Premises, contractor, P. J. Cole, 110 Jessie, cost \$175.
2608—Lake, add two rooms and concrete foundation, owner, G. Poli, Premier contractor, John C. Grant, 572 Lomb, cost, \$250.

SW Divisadero and Fell, one-story frame garage; owner, D. Hadger, 455 Divisadero; contractor, A. C. Madden, 450 Divisadero; cost, \$200.
400 Rhode Island, raise dwelling and add concrete foundation; owner, Louis Firpo, Premises, cost, \$150.

NE Bryant and 5th, alter front; owner, C. A. Seiler, Lessor, Premises, contractor, J. A. MacDonald, Premises, cost, \$300.

S Grunbuhl 100 W. Condon, concrete foundation and underpin, owner,

Collin, 2528 Mission; contractor, John B. Woolfrey, 2168 21st, cost, \$100.

W. Congdon 100 N. Ney, concrete foundation and underpin; owner, D. B. Woolfrey, 2528 Mission, contractor, John B. Woolfrey, 2168 21st; cost, \$100.

N Vallejo 55 W. Baker, one-story frame garage; owner, J. J. Baumgartner, 221 Humboldt Bank Bldg.; contractor, W. W. Rednall, 2700 Filbert; cost, \$250.

W. Peck, install 131 patent shingles; owner, Dresser McDonnell Co., 1949 18st, cost, \$170.

SE Ellis; lower floor; owner, John T. Peck, Premises; architect, O'Brien & Walker, cost, \$250.

247 Fillmore; alter front; owner, M. Kessler, Russ Bldg. contractor, L. Ave. & Sons, 2107 California; cost, \$250.

E. Plymouth 100 N. Sagamore, alter front, plaster and remove counters; owner, J. Rodgers, 2926 San Jose Ave.; cost, \$250.

NW Scottwell and Aztec add porch and two rooms; owner, A. Del Tredice, cost, \$200.

202 22nd; add one room; owner, Mrs. Bousier, Premises; contractor, Berwick & McKinley, 415 Texas; cost, \$200.

275 Church; one-story and basement frame dwelling; owner, J. C. Dennis, Premises, cost, \$125.

SE Fill, install door and rat proofing; owner, G. A. Meumiller, 14 25th; cost, \$250.

188 Francisco; minor changes on interior; owner, G. Delucchi, Premises, contractor, E. Missioletti, 2325 Taylor; cost, \$110.

70 Valencia; wire mesh floor; owner, H. D. Schmalzer, Premises; contractor, Pearson & Lee, 434 Grove; cost, \$145.

25 M. Allister erect marquise; owner, C. S. Mitchell, Premises, contractor, Federal Elec. Sign Co., 257 8th; cost, \$250.

12 Park 170 S. Green, new front; owner, Babin Real Estate Co., 604 Mission; architect, J. H. Ettler, 604 Mission; cost, \$250.

74 Hayes, enclose porch; owner, A. G. Birk, 700 Hayes; cost, \$200.

26 Mint Ave, erect metal cooling rack; owner, G. G. Compressed Yeast Co., Premises; contractor, H. P. Taylor, 101 California; cost, \$100.

250 and Guerrero, repair retaining wall; owner, F. Klevesahl, 19 25th; cost, \$250.

NW North Point and Leavenworth, alter operations; owner, F. Palmer, 28 K. 13, contractor, V. Filippou, 19 1st; cost, \$150.

250 1st St. Ave, add porch; owner, H. H. Weldon, Premises, contractor, Harry Heinz, 173 Josiah Ave.; cost, \$250.

N. P. 470 W. Masonic Ave., concrete foundation; owner, S. E. Estate, 420 1st St.; contractor, J. Salinas, 323 1st St.; cost, \$275.

SE 18th and Mason, minor alterations; owner, Jones & Kemp, Premises; cost, \$100.

N. 18th, man and Ellis, alter white wash; P. Beck, Premises, contractor, Jones Kragen, 743 Geary; cost, \$100.

Ke. A. 70 N. Union, repair kitchen; owner, L. Cardinal, 108 Kearny; contractor, P. Amoroso, 1316 Kearny; cost, \$100.

100 R. S. electric signs; owner, J. J. & Jones, Premises; contractor,

Novelty Elec. Sign Co., 165 Eddy; cost, \$209.

NW Sacramento and Leidesdorff; install side walk lights; owner, California Insurance Co., 550 Sacramento; contractor, Berger Mfg. Co., 1120 Mission; cost, \$151.

1659 Post; add one room; owner, M. Iuzka, Premises; cost, \$150.

3205 Mission; alter front; owner, Bates & Sharp, Premises; cost, \$100.

735 Post; electric sign; owner, C. A. Lyons, Premises contractor, Federal Sign System Elec., 257 8th; cost, \$145.

3239 Mission; concrete floors; owner, Mrs. Clecak, Premises; contractor, Carl Frank, 305 Bocana; cost, \$110.

1569 Haight; underpin store; owner, Louis Cohn, 3311 Jackson; contractor, A. M. Barnes, 1536 Haight; cost, \$110.

G. ROMAN COMPANY OCCUPIES NEW QUARTERS.

"Nothing succeeds like success." This statement has been often times used in reference to a successful business man, and to Mr. C. Roman it can be amply applied.

Mr. Roman moved to his new quarters, located at 173 Jessie street, from 507 Mission street the first of this month. Here he is in close touch with the numerous contractors and builders, being less than a stone's throw from the General Contractors' Association and just across the street from the Builders' Exchange.

Mr. Roman is a dealer in building materials and is able to quote the lowest market prices on his goods.

One of the fixtures in his office is a box of good cigars, which he always keeps on hand for the contractors, patrons and friends who call to see him.

NEW WAREHOUSE FOR SACRAMENTO.

A permit for the erection of a three-story brick warehouse at the southeast corner of Front and M streets, Sacramento at a cost of \$23,000 has been issued.

The application was made by the Northern Electric Company and Murrell and Haley have been awarded the contract. The lot has a frontage of 85 feet on M street and a depth of 150 feet.

A one-story brick warehouse, known as the Waterhouse and Lester building, covers a portion of it. Two stories will be added to this structure and the remainder of the lot will be covered with a new three-story building, fifty feet in height. Hall, Luhrs & Company will occupy the new addition to lower M street structure.

BUILDING PERMITS ISSUED FOR HOBART ESTATE BUILDING.

Structure to be Highest Office Building in the City.

The building permit was issued yesterday for the erection of the Hobart Estate Building on the north line of Market street east of Montgomery street. The plans having been submitted to the Board of Public Works and approved by Chief Building Inspector, John P. Horzgan.

This structure will be the highest office building in the city and will cover an area of 1599 square feet on the ground giving an area of 7199 square feet on each floor. It is to be 29

stories in height. The estimated cost of the structure is \$520,000, although it is safe to assume that the cost will reach \$600,000 by the time it is ready for occupancy. The fee for the building permit was \$210.

HUMANIZING HOUSES.

Houses are curious things. We take a morsel of illimitable space and wall it in and roof it over. Suddenly it ceases to be part of God's out of doors and becomes an entity with an atmosphere of its own. We warm it with our fires, we animate it with our affections, we furnish it with such things as seem good in our eyes. We do this to get shelter for our bodies, but we acquire as well an instrument for our spirits that reacts on us in its turn.

In other words, as we live our way into a house, adapting it to our need, the bricks and mortar, the paint and plaster, cease to be inert matter and become alive. Superficial sociologists have taunted women with being "more anabolic or plantlike" than man, but I count it her second glory. The plant is an organism that "slowly turns lifeless into living matter," and this is the thing that woman has done from the beginning with her shelter. In our houses we achieve almost an organic extension of our very selves.—Cornelia A. P. Comer in Atlantic.

USE OF SLIDE RULE.

It is rather strange that in a country such as Canada, where both in the office and in the field time and labor saving devices and systems are employed to such an extent, an instrument of such universal utility as the slide rule should be so little used. It is an instrument that should be in constant employment by every engineer, contractor and builder in the country, and yet we find that there are quite a number of the first named who do not use it, while among the builders and contractors its service is largely limited to the estimating departments of a few of the bigger concerns. One can only presume that its value as a time and trouble saver is not known to the bulk of those who might benefit by its use, and that the many contractors, engineers and builders who continue to work out their calculations by the old arithmetical processes do so because they do not know of the much simpler method offered by the slide rule.

There are many who look upon the slide rule as a mathematical instrument which requires mathematical knowledge of a high order to operate. They are, perhaps, told that it is a mechanical device for adding logarithms. So it is, but its use does not necessitate a knowledge of the rules governing logarithms. Any man of average intelligence can learn to use the slide rule in a few hours of tuition. After a week's practice he will be able to operate with sufficient confidence and speed to realize a saving of time on all calculations as compared with the arithmetical process, and in a month he will be an expert with the instrument, and able to carry out any ordinary calculation with a speed, accuracy and certainty which he could never approach by the usual methods.

In carrying out quantities the slide rule is of inestimable service. This will be realized when it is stated that by

its use any simple or decimal quantity can be multiplied by any other simple or decimal quantity by means of a single setting of the rule, and in a few seconds, without putting a figure on paper. Any division can be accomplished with equal facility. Fractions can be converted into decimals with similar ease, while the square or square root of any number can be obtained with the utmost simplicity—a marked contrast to the arithmetical process of the latter operations. Similarly the cube or cube root of any quantity can be obtained in a few seconds, with one setting of the rule. If it is required, the logarithm of any number can be read direct from a single operation of the slide, and the same holds good of tangents and sines of any angle, natural logarithms, and many other calculations used in the science of mathematics.

The slide rule has several other advantages in addition to the speed it renders possible in all calculation. With ordinary care it is impossible to make any of those big slips which are so easily made in figuring a calculation, and for this reason checking is redundant. A degree of accuracy of about 1 per cent can be obtained without difficulty in most cases, and this is quite near enough for practical purposes. The instrument can, moreover, be bought for a few dollars, and can be carried in the pocket without any inconvenience. It should be part of the equipment of every engineer and contractor who ever has any calculation to perform, and its usefulness is by no means limited to those engaged in these industries. Where the processes of multiplication, division, involution, evolution, or other simple arithmetical computations have to be performed, the slide rule will be found of incalculable benefit to its users.

REMARKABLE GROWTH IN WORK OF GEOLOGICAL SURVEY.

tary Lane. Notwithstanding the fact that within this period the former technologic branch of the Survey has become an independent organization, the Bureau of Mines, the older bureau is larger now than it was six years ago.

In personnel the net growth of the Survey since 1907 has been 37 per cent; in general correspondence the increase has been 43 per cent; the total distribution of reports and maps has increased 23 per cent; the increase in maps sold, 25 per cent; and the total cash receipts from sales of publications are larger by 60 per cent than in 1907.

The activities imposed by Congress upon the Geological Survey have been increasing faster than the appropriations provided heretofore, until now it is all too apparent that the organization is undermanned and under-equipped. The demand upon the Survey for more work can not be checked, but the means to meet the demand can be provided.

Positions Wanted

A YOUNG MAN of 26 with three years' office experience and two years' of special training at Cornell University desires a position in an architect's office. Location, California. Salary, \$20 a week. Address: P. O. Box 14, Care of Building and Industrial News, 560 Mission St., San Francisco.

Warm Air Furnaces

1515 14th Avenue
East Oakland, Cal.

A Perfect Ironing Board

"Disappears in the Wall"

The price of the regular sized Ironing Board including cabinet, large and small ironing boards and doors with hardware is

\$7.50

PEERLESS IRONING BOARD
SHOWING CABINET
SET IN PARTITION
CASED UP

THE PEERLESS IRONING BOARD is a marvel of compact convenience for apartments, flats and residences. It is out of sight and out of the way when not in use. The cabinet is built in the wall and the ironing board is rigid and firm. It cannot be knocked over or upset.

The Peerless Combination Ironing Board and Kitchenette Table combines the ironing board with a disappearing table in the most compact and convenient form. They are so inexpensive and unusually convenient that no new apartment, flat or residence can afford to omit them. Write for circulars giving full description.

Peerless Ironing Board

861 Phelan Bldg., San Francisco

THE
Safe Deposit Vaults
of the

BANK OF ITALY

Are Open Every Day of the Year

Including Sundays and Holidays

From 8 A. M. Until Midnight. Especially
Convenient for Builders and Contractors.

Boxes \$2 50 per year and upwards.

Junction Market, Mason and Turk Streets

The best and cheapest reversible
window on the market.

Common Sense Window

Invented and manufactured by
L. H. BIRTH, 19th and Carolina Sts.,
also 110 Jessie St.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Price 50 Cents

For Sale By All Druggists, or will be sent by mail postpaid by the manufacturers,

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT

Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Building operations for the month of November outside of California cities have shown a marked decline. From a list of 63 cities throughout the country, representing building centers, reports of permits issued during the month made to the American Contractor, Chicago, show a loss in the aggregate of 28 per cent, as compared with the same month last year. And this decline is noticeable particularly in the larger cities. Crop failures in the middle west may have had something to do with it, but the general business depression accompanying the proposed change in the tariff schedule and a sort of uncertainty in the money market has had as much to do with the result as anything else. The following are the figures for the month as reported:

City.	Nov. 1913	Nov. 1912
Akron.....	\$ 173,135	\$ 397,980

Total.....\$38,066,523 \$52,768,651

As the above list contains no reports from California cities no comparison is made here as the totals for the month for San Francisco have already been compared. Lack of uniformity in building laws and regulations in the different cities has prevented a fair comparison of building statistics. Thus in some cases the record for permits issued contains the amount for city work. In others not. Generally speaking San Francisco has suffered by comparison. But beginning with the new year a correct comparison of the building record can be made here as a complete record of all work done within the city limits has been kept for the years past.

It is said that William Randolph Hearst owns one million acres of land in Mexico land which he bought for a song and the timber upon which alone is easily worth \$2,000,000. Perhaps this may account in some degree for his militant jingoism in regard to the Mexican situation aside from the fact that Bryan blocked him in his attempt to put over his little deal with Wall street at the Baltimore convention.

Postmaster General Burleson is in favor of government ownership of the telephone and telegraph. He estimates that the acquisition of these lines will cost the government 900 millions of dollars, but predicts that they would pay for themselves in less than ten years. If his figures are right it gives some idea of the profit these utilities pay over upon their inflated capital. These public utilities should be owned and controlled by the government just as the rails are controlled. For modern civilization requires the use of these services as much as it does the mails. And it is only a question of time until the government assumes control of these means of communication.

The manufacture of incombustible linoleum, or, to speak more accurately, of linoleum that burns with difficulty has been a goal long aimed at by linoleum factories. The attempts previously made have been based on the plan of adding incombustible matter, such as asbestos or ammonium salts, to the mass during the process of fabrication. Far more promising is a new scheme, described in *Technische Monatshefte*, in which magnesium carbonate is added to the mass. All the carbonate have the property of giving off carbon dioxide when heated at high temperatures. This, as is well known, is a very heavy gas, which does not rise, but creeps along the floor. For this reason in case of a fire it would tend to cut off the supply of air from the linoleum. Magnesium carbonate is chosen because it breaks up at lower temperatures than any other carbonate. The principle involved is, of course, one commonly used in the manufacture of chemical fire-extinguishers.

A bill has been introduced in Congress seeking to create a bureau of Labor Safety in the Department of Labor with a special reference to investigation and examination of labor safety plans and devices. Such a bureau, if instituted, should give an impetus to the production and development of improvements in such devices for factory and railroad use, in fact wherever labor is employed. With more than six million factory employees and one million six hundred thousand railroad employees in the country, the demand for labor safety devices should be earnestly developed and their introduction and maintenance strictly enforced. No one is more interested in the provision of safety devices than the laborers in the particular industry to which the special devices relate and the demand sought to be created by legislation should receive attention from the workers themselves.—*Scientific American*.

The antiquity of man is a subject of unflinching interest to the human race. For since the first dawn of intelligence and man began to try to account for the phenomena by which he was surrounded, the question as to whence came all these things and whence came man are the questions which each succeeding generation has propounded to the world. Every race has some theory of creation embodied in its religion. And only within the past half century has the Darwinian theory of evolution been accepted by the scientific thought of the world.

Geological investigation has demonstrated the history of the world as written in the rocks and soils. In this book of nature the record goes back for millions of years. And in these rocky strata are embodied the fossil remains of the fauna and flora that peopled the world in the untold ages that have gone before, so that the scientist is enabled to construct from the data furnished a fairly accurate restoration of those remote times.

A skull of a man being has been found recently at Pitblown, Sussex, England, in a flint-bearing gravel which is the first fossil remains of an extinct man yet discovered. This object, with other skulls discovered at Haddesburg and La Chapelle have given the biologist a man much further back than was ever before been

supposed. Dr. J. Leon Williams, an eminent British scientist who has spent his life upon this branch of scientific research, has lately come to the United States and will deliver some lectures at the principal universities. His investigations from these fossil remains places man's antiquity back at least five hundred thousand years. This places a long period of time for prehistoric man, long untold centuries before he learned the art of speech. And the long centuries that it took to evolve him into an intelligent being such as was capable of constructing the pyramids and the great ruins of Western Asia.

These investigations into geological history are certainly interesting. They represent the small record that we have from the incomprehensible abyss of time.

The Pilgrimage to Mecca is still a standing menace to the health of the world, in spite of the sanitary precautions adopted by the various countries concerned, including the Ottoman Empire. The American consul general at Constantinople quotes statistics collected by the Turkish Sanitary Administration concerning the number of pilgrims who traveled to Mecca via ports of the Red Sea during 1912. There were \$2,995 of these, most of whom came by way of Jeddah, and of this number 41,671 had to be subjected to quarantine or other sanitary measures. Statistics of those arriving by the Hedjaz Railway and other overland routes are not given, but it is known that the annual number of pilgrims often exceed 100,000. In 1912, 198 vessels were engaged in carrying pilgrims, of which 134 were British, 22 Russian, 13 Dutch, and 29 Ottoman. As to the origin of the pilgrims, the largest number came from the Far and Middle East, including 15,000 from Bombay, 9,500 from Singapore, and 12,000 from Batavia. From the Indian Ocean, Gulf of Oman, and Persian Gulf regions came 4,823; from the Arabian and African coasts of the Red Sea, 23,168; and from ports on the Mediterranean, 6,741. Finally three Russian ports contributed 10,173, of whom 7,692 came from Sebastopol.—*Scientific American*.

The parcel post is fast doing away with the middleman in many respects. Farm products, for instance, can be shipped direct to the city consumer. In this it has a big advantage of the ordinary delivery methods. It goes away with the multiplication of delivery routes. Instead of ten or twelve separate equipments for conveying eggs or butter or other farm products to the consumers the United States Post Office has one systematized delivery.

What with mail order houses in the city and a chance for the farmer to deal direct with the consumer the time will soon come when the producer and the consumer will have a chance to fight the commission men's corner on products effectively.

The Evolution of the Elevator has not progressed so far in Europe as in this country, partly, perhaps, because the symmetry of European cities is not yet joined with the skyscraper, so that the elevator is hardly anywhere an indispensable necessity. An American consular report points out the fact that in the old World these contrivances are still

regarded chiefly as means of carrying passengers up, not down, an idea expressed in the names "elevator," "lift," and "ascenseur," used, respectively, in America, Great Britain, and France. The commonest type of elevator met with in medium-priced hotels in France and Germany is controlled by a series of push-buttons on the outside at the bottom of the shaft. A person wishing to go to the third floor enters the car, and an attendant who remains at the bottom pushes button number three, the car stops at that floor, and the passenger, on leaving the car, calls down the shaft that the car is free. There is no corresponding provision for coming down—stairs are for that purpose.

Gaby of the Lilies is to appear at the Cort Theatre. No doubt there will be a crowded attendance. About all there is to recommend her is the fact that she kicked over a throne. So far as known she has neither brains nor beauty to speak of and is a public character only from the fact that a homebred prince went crazy about her and as a consequence got kicked out of his own country.

WITH SOCIETY POWERLESS.

Concerning the garment workers' strike in St. Louis the St. Louis Republic says:

"In this instance, thanks to the unprejudiced and painstaking investigation of a citizens' committee, the public is familiar with conditions for which the agitator and unscrupulous labor leader cannot be blamed."

The citizens' committee reported that the labor leaders "were willing to efface themselves if by so doing negotiations with the manufacturers could be arranged." The state board of arbitration, through its chairman, Phil R. Toll of Kansas City, tried to arrange a settlement of the strike on the plan that Louis R. Brandeis, supported by Theodore Roosevelt and others, had used in the betterment of the New York conditions. The strikers signified their acceptance and so did ten of the thirty manufacturers. The other twenty refused the arbitration—and with the weak Missouri statute the arbitration board was helpless.

Of the conditions that induced the trouble the St. Louis Republic's editorial said:

"For the practice of hiring out the work to foremen under contract the manufacturers alone are to blame. For the wretched want of ventilation and the insanitary and crowded conditions the manufacturers alone are to blame. For the custom of working employees overtime the manufacturers alone are to blame. For the meager wages in many instances the manufacturers alone are to blame. Out of these conditions came the strike."

Certainly something better than greediness and carelessness of human life on the one side and violence and destruction of business on the other side ought to be in the hands of society for the adjustment of labor conditions and labor strikes.

After a Triangle shirtwaist fire society is "appalled" at conditions surrounding the workers. But when workers try to remedy those conditions for themselves they find society powerless to help them.

INTERNAL WATERWAYS.

Foreign Experience and California's Needs.

Report to the Commonwealth Club of San Francisco by Jacob M. Blake.

The history of canal building in modern times shows two periods of constructive activity widely separated in point of time and prompted by widely different motives with respect to the character and extent of the economic effect sought.

The greatest activity manifested in the United States in canal construction was before the construction and operation of the first railroads, and practically all the early canals of any importance were built and operated in part, at least, before the construction of railroads within the zone influenced by the canal system. Obviously the building of these canals was inspired, during the first quarter of the last century, by the great need for enlarged transportation facilities over the primitive means then at hand. The canals that were completed between the years 1825 and 1840 had already passed through periods of constructive activity, varying from ten to thirty-five years, prior to their completion. They could not, therefore, have been planned with respect either to type of construction or method of operation, with a view to meeting the railroad competition which they early had to face.

It soon developed that canals could not meet the unrestricted competition of the railroads, due to the limited service both in quantity and quality furnished by the former in contrast with the latter and its ever-increasing system of lateral feeders. The inevitable result of this unequal competition was an entire cessation from further canal construction, and a large decrease in the operation of canals through a period of something like seventy-five years. The census report of 1890 showed that out of 1,168 miles of canals costing approximately \$211,041,802, 2,215 miles or about one-half of the mileage originally constructed, and representing \$51,711,916, or twenty-five per cent of the whole capital investment in canals up to that time, had been abandoned. Since then other important canals and sections of canals have fallen into disuse, so that in 1906 it was estimated that the total mileage of unused canals in the United States amounted to 2,411 miles, and represented an expenditure of \$81,717,374.

The end of this long period of depression in canal construction and operation in the United States seems to be in sight, for the history of the operation of the Erie canal system in New York, in competition with the railroads, shows that the movement of traffic by artificial waterways is not impossible under conditions involving great density of traffic and a superabundance of commodities of large bulk and low freight values. The great decline in importance which the Erie canal has suffered in comparison with the periods of its largest usefulness, is due to its physical inadequacy, not with respect to the present size of the canal and to the number and size of its locks, to meet modern requirements. In the United States today the only activity

in connection with the construction and operation of canals is confined to the plans for the enlargement of this canal system for the accommodation of larger and more modern boats.

Canals in Other Lands.

You have already learned that it is not to the United States or to Great Britain that we can turn for information in regard to modern canal construction and operation. The most elaborate and efficient modern canal system in the world today is the inland waterway system of Belgium, and you have graphically illustrated the type of the successful modern European canal, both as to plan of construction and method of operation. For the purposes of this paper it is only necessary to summarize the canal situation there.

Belgium has an area of only 12,000 square miles. It has three thousand miles of ordinary railroads and two thousand miles of so-called "light" railways, or about a mile of railroad to every two and one-half square miles of area. In addition to this, in 1906 its canal system aggregated about sixteen hundred miles, giving that country altogether one mile of transportation for every two miles of area. This has since been considerably increased by the completion of other waterway projects which were then in the course of construction. Both the railroads and the waterways are owned by the state, the waterways being financed and built through the co-operation of the state and local authorities, the canals being provided by the central state government, while the terminals, with their wharves, docks and loading and discharging facilities are provided by the municipalities. The light railroads of Europe are ordinarily narrow-gauge and are furnished with lighter equipment than the standard roads, and do not undertake to move the heavier classes of freight to the extent that the other roads do, but are largely operated as feeders to the canals and rivers.

Canals Make Antwerp.

The city of Antwerp, too, and largest port in the world, owes its pre-eminence as the chief entry and distributing port of north-west Europe to the fact that it is the center of a system of inland waterways comprising navigable rivers, canalized rivers, and canals which extend into Germany, Holland, France and as far as Munich, 418 miles away, in a long cut in the year, and to Strasburg 501 miles away from April to October, to the river Rhine.

The magnitude of these combined waterways, centering at Antwerp, and their direct effect upon the commerce of the port are shown by the enormous growth of water-borne trade evidenced by barges at Antwerp between the years 1882 and 1912. In 1882 the total tonnage received and shipped at barges at Antwerp was about 1,000,000 tons, while in 1912 it was nearly 10,000,000 tons. The tonnage in 12,000,000 tons, or 1200 per cent increase, rest mainly on the water.

— would give an estimated tonnage by 1913 of over 20,000,000.

Preventing Cut-Throat Competition.

In Belgium the railroads and waterways are co-ordinately operated by the government. Through government ownership and control of both railroads and canals, the competition on the part of the railroads has been entirely eliminated, with the result that the canals are given preferential rates for carrying of those classes of freight which experience has shown cannot be handled as economically by the railroads. Prior to the co-ordination in operation of these two means of transportation, it was found that the railroads would underbid the canals upon all classes of freight, making up their losses in carrying freight too cheaply between a limited number of competitive points by excess charges upon goods carried between the unlimited number of non-competitive points; and this in spite of the fact that the use of the waterways was practically toll-free. It was soon determined, however, by actual experience that this discrimination operated equally to the disadvantage of the state and of the railroads. When it was found that the canal could offer no rate so low but that the railroad could still afford the loss incurred by carrying the goods at a still lower one, it was seen that two effects were inevitable: First, that no one could afford to resort to the use of the waterways, or prepare to handle large shipments at a moving rate by water; and second, that the railroads could not afford to move all the low-priced, bulky freight that the country was able to offer at a rate involving an actual loss upon the cost of moving it from place to place. The railroads in fact did not prepare to handle the aggregated tonnage which such a rate produced, but in their short-sightedness were satisfied merely with throttling the means of water transportation.

Following the law, however, that both the value and amount of traffic increases in a direct ratio with the multiplication of means of economical transportation, it was soon discovered that if the canals and inland waterways were operated upon such a basis as to encourage their greatest possible use in transporting bulky, low-priced freight, both the gross and net earnings of the railroads would be improved through large increases in the higher classes of productive traffic. The bulky commodities which constitute the form of traffic, and which are susceptible of economical transportation by water, be these either the raw materials or the finished products (the low transportation cost of which is essential to the industrial prosperity of the country), or the products of the soil, by saving in the transportation cost of water to the owner greatly increase the demand for the more highly productive transportation water, and railroads have for sale. The benefit of water transportation is therefore twofold, for the community as in

servation for California will have been given; for such action will involve an unnecessary utilization of the cheapest storage for the highest-valued use and the consequent waste of the whole economical value of the more expensive storage.

What has just been said with respect to the city's interest in developing an increased supply of cheap water for navigation uses, applies a great to its interest in the storage of cheap water for irrigation purposes, and it will still be considered by some to be a vital question whether the annual production from 150,000 to 200,000 acres of irrigated lands in the San Joaquin valley is not worth more to San Francisco than the annual interest on \$20,000,000.

In anticipation of the most productive development to come to the valleys of the Sacramento and San Joaquin rivers may be brought, it may be well always to remember that the cost of railroad terminals in San Francisco will operate in the future as an effective barrier to the building of short valley lines in competition with existing railroads. The improvement of these rivers and the building of an adequate canal system in connection therewith, presents the only ultimate solution of the problem involved in the movement of the products of the interior to tide water at San Francisco at the lowest transportation cost.

Public and Private Construction.

It is recognized that it is neither the time nor the place for putting forward any specific plan for the organization and construction of the canal project but when that time arrives consideration should be given to certain facts which past experience in the construction and operation of canals has developed. We have seen that in the experience of continental Europe, a system of inland waterways is most effective, if not practical, only when publicly owned and operated free, or substantially so, and it may be here said that tolls on the Erie canal were abolished in 1882. It was not best possible for me to determine the circumstances under which the canal and river improvements in Belgium were made, but we may assume that the construction work was done by public supervision and control. It is a well-known fact that European governments are competent to engage directly in these large construction enterprises with the confident expectation of obtaining satisfactory results. Unfortunately, outside of works executed by or under the supervision of United States army engineers, this has not been true here, and it is a notorious fact that public work has been formerly poor in quality and done at an excessive cost. Canals particularly are not adapted to construction through the agency of municipal corporations, for the reason that the latter are unable to proceed with the plans for the system and with the pioneer work of securing right-of-way and required facilities free from the interference of the railroads and other competitive interests, and without having to pay the additional values which the very fact of the improvement confers upon the property that must be secured as the work proceeds. In other words, canal building by its nature requires the same covert work that is essential to the successful organization and development of a competitive railroad project. The failure

to realize these facts is the chief explanation for the great discrepancy between the estimates of engineers and the cost of the completed work in the construction of the New York canals, where, in nearly every instance, the cost of the canals is exceeded by the estimates by one hundred per cent or more. No plan for the construction of a California canal project that does not anticipate the necessity for doing the preliminary physical and financial engineering and organization work so that a camera can snap to be immediately successful or reasonably economical.

A FEW SIDE-LIGHTS ON COST KEEP- ING

The development of a logical system of cost accounting will bring to the attention of the distribution of costs, never thought of before by the manufacturer. Also, will the manner of fixing responsibility will be seen where it has been shirked heretofore.

Let us take that particular class of expense due to error and see if we can properly place it in the same class of and of profit and loss. Begin with the proposition that mistakes are not always a loss, but that they are in the main. For instance, it frequently occurs that in a job of mill work many items are included than it is necessary to furnish. In case of market bids the buyer has no means of knowing this, and the amount saved is his own credit, constituting an abnormal profit on the item in which it occurs. Perhaps we figure a lot of twenty doors to be furnished and later find that five of them are metal doors and not included in the regular mill work. Now, if we put the price for the twenty doors figured on the fifteen doors actually made, we have no check on the legitimate profit on the work except as we keep a record of the circumstance. The extra work is included.

Let us now look at the other side of the question and see what happens when we figure fifteen doors and find that we must furnish twenty metal doors. If we put down the price of fifteen doors, and against that the cost of making twenty, we will have an abnormal loss and will be bound to the truth if we were in the former case.

It is contended by a few experienced accountants that all losses by over-estimates should be charged to over- and under-estimates after careful consideration. I am not sure this is the proper course, but I will go farther and say that all gains from over-estimates should be credited to over-estimates, thus offsetting in a measure the loss from error.

The only reason for separating the error profit or loss from the analysis of the job is to preserve a balance sheet on the cost of the various classes of items. If a balance of profit or loss due to error is in the over- and under-estimates added to all work of the same class, will hear its share of the over- and under-estimates. But if the errors are charged to the credit of each class of work as they occur, we find that the cost has not been kept close up being made.

Of course, it is a great deal easier to control the record of error in the estimating and listing of a job than it is after the work is done put into the mill under its proper order number. And for several reasons it is hard to

get the proper time and material reported in the handling of errors which arise from faults of the work.

It is a practice of a good cost system to figure the cost per unit the same as the estimated per unit, and multiply by the number of units required on the job, regardless of the number estimated. The time and material sheets will show the cost per item and the profit or loss in each case may be, and in a shape that will be of value in making future work. If the profit or loss due to error is included with a job, it will be taken care of in the final or summary sheet, and if it is thrown into the overhead account it will affect the monthly or yearly balance of that account, as the case may be.

It would seem that when we go into the analysis of business there are many things we have a ways considered simple and clear, which become obscured when we attempt to isolate them from their neighbors and put them in a class by themselves. And it is in this line of thought we intercept the queer ideas about it is ever-present, ever-fascinating, never-understood subject of error.

We not only do not know why we make mistakes at all, but we are not sure about whether many of our acts are mistakes or not. We have the general impression that mistakes are made and it is a sorry fact, too. But mistakes are not bad for the man who makes them, as in the case where we figure more than we have to furnish. And it is in regard to this latter instance I wish to cite one of the most real cases of error.

Not long ago a large factory received an order for the mill work for a large building, to be finished in quarter white oak. In the estimate that was made the business the current price of quarter white oak was used, as a basis of figuring. However, when it came to buying the material, the manager was able to buy two carloads of quarter white oak strips, from 2 1/2" wide up to 6-in., at a price about \$200 a thousand less than the market. This was not all of the saving, for the strips were so full in width that the whole lot made moldings and casings the scheduled width of the order, thus eliminating 75 per cent of a regular addition for waste.

Of course, there was no mistake on the part of the management in buying the lumber at the price indicated, but the amount involved is that of an abnormally low cost. If the lumber had been bought as figured in the estimate, the amount would have been the same. The large number of openings controlled by the lumber would have said that the amount representing the omitted work should have been credited to over- and under-estimates of error. And the value of the lumber on this job of frame and be so doubtful, as it might not be possible to duplicate this kind of order. We ought to forget the circumstances, and going to the low cost, and some in the future, when we are sure of the competition, place an estimate on the danger mark.

So we are rather forced to the conclusion that from a cost standpoint it is much an error to keep too much as it is to make too little. But some former mistakes do not had no against us at all and do not always

are, we naturally get the impression below the danger mark.

It has been suggested that a separate account be carried to determine the cost of errors, but it would be almost certain to add to the expense of the business instead of making it less. Besides this, the owners of the business would feel better if they did not know the full extent of this loss, for, like the men, they forget the gains of error and dwell upon the losses.

COMPANIONSHIP OF AN OPEN FIRE.

It is at night that the camp truly invites, and this by reason of the open fire, which is possessed of so companionable a quality that one would light it merely for the society it affords. When by chance the fire in the Temple of Vesta was extinguished, all business had to stop; the connection between heaven and earth was broken and must be restored. Something has gone out of the room when the hearth is bare, a genial presence indeed, but one that can be recalled—and so many have gone out that can never be recalled to an earthly campfire. A fire sings and talks and has solaced me on how many Western mountains and in how many Eastern woods! I summon the spirit of fire, wherever it may be, on the desert or by the lake; the companionable spirit obeys, and from the moment of its appearance I am no longer alone. It is perhaps not strange, then, that the campfire should seem a veritable being, seeing that this spirit has been friendly from my earliest years and has never failed to appear, wearing always the same genial face. Other friends die or change, but this one dies only to be born again and is ever the same, whether a hearth or a camp kettle invites his presence.—From "North and South," Stanton Davis Kirkham, published by Putmans.

THE BUSIEST RAILROAD TERMINAL.

To the Editor of the *Scientific American*: A paragraph in *Engineering Notes* in the October 18th number, gives the impression that the busiest railroad terminal in America is the South Station at Boston, with 38,111,507 passengers in and out.

It will probably surprise most of your readers to learn that the "Busiest Terminal in America" is not in Boston, nor in New York, nor yet in Chicago, but is in fact on the other side of the continent entirely.

The business of the Union Ferry Depot at San Francisco surpasses even that of the South Station at Boston by over a million and a half a year.

San Francisco is so situated that nearly all passengers reaching the city are compelled to do so over the ferry lines of the various railroads, all landing at the Union Ferry Depot.

For the fiscal year ending June 30th, 1913, the official figures give a total number of passengers handled as 29,955,573 distributed as follows:

Southern Pacific Co.	15,349,227
San Francisco-Oakland Terminal Railway	11,197,593
Western Pacific Railway	89,362
Santa Fe	299,987
Northwestern Pacific	5,324,506
Monticello Steamship Co.	482,988

Total 29,955,573
Oakland, Cal. EDW. G. MERWIN.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner, G. Podesta. The building will be erected on the east side of Polk street near Clay and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. All bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$17,000. Architects, Fabre and Bearwald, Merchants' National Bank Bldg., S. F. Owner, A. Artru. The building has been designed to contain a number of two and three room suites and will be erected on Pacific avenue near Jones. All suites will have connecting baths and wall beds. Interior finish will be of pine with elm panels and oak floors in the living and dining rooms. Plans provide for steam heat, a hot water system and vacuum cleaning. An automatic elevator will be installed. Bath rooms will be finished in tile with composition floors. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are now being figured.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$25,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Varra District and has been designed to contain a number of large suites ranging from five to seven rooms. Interiors will be handsomely finished in pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for steam heat, hot water system and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. All apartments will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building will have a brick veneer base and will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, brick and steel, \$35,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Talbot Investment Co. This building, which has been mentioned here before, will be erected on the north side of Mission street between Seventh and Eighth streets. The lot has a frontage of 37½ feet and a depth of 120 feet. There will be a number of stores on the first floor. Upper two floors will be arranged for apartments of two and three rooms with private bath and wall beds. Interior finish will be largely of pine. Plans provide for steam heat and a hot water system. Stores will have large

plate glass windows and patent store fronts. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Apartment house, 2 story and base, frame and concrete, \$32,000. Architect, none. Owner, E. M. Rasmussen, 277 Peerless Place, Portland. The building will be erected on 23rd street near Sandy and will have a street frontage of 56 feet by a depth of 96 feet. Interior will be arranged for suites of two and three rooms with baths and wall beds. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and subcontracts are now being let by the owner.

BRIDGES AND DAMS.

SEATTLE, WASH.—Tunnel and shaft construction, \$300,000. Engineer, City Engineer, Seattle. Owners, City of Seattle. Bids will soon be called for the construction of a 1200 ft. tunnel 12 ft. in diameter under Lake Union from Northlake to Southlake at a cost of \$300,000 which includes the cost of construction of two 150 ft. shafts 16 ft. in diameter. Bids for the shafts which were opened recently have been rejected and new bids will be figured on a basis of construction to two different levels and price for both shafts and tunnel.

SHELDON, WASH.—Dam, earth and concrete. Cost not stated. Engineer, City Engineer, Sheldon. Owners, City of Sheldon. Plans have been completed and figures are now being taken for a dam for the municipal water system at Sheldon. Bids will be opened by the City Council on January 15th. Plans and specifications can be secured from the City Clerk, P. D. Fairch, Sheldon.

CHURCHES.

SAN FRANCISCO—Church, 2 story and base, frame, \$15,000. Architect, W. J. Wythe, Central Bank Bldg., Oakland. Owners, African M. E. Church. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The building has been designed in the Mission style and will contain, besides the main auditorium, a Sunday School room, pastor's study and social rooms. Interior finish will be of pine and redwood. There will be a central heating system. A clay tile roof will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Church, 1 story and base, frame, \$5,000. Architects, Swartz, Hotchkin and Swartz, Rowell Bldg., Fresno. Owners, Catholic Church of Llanura. The building will contain a main auditorium and Sunday School rooms. Interior will be finished in pine and redwood. Plans

provide for furnace heat. Exterior of the building will be faced with resawed rustic. Plans are being prepared and figures will be called for shortly.

Contracts Awarded.

SEATTLE, WASH. — Synagogue, 2 story and base, brick and steel, \$32,000. Architect, H. Marcus Pretoria, Empire Bldg., Seattle. Owners, Chelver Baker Cholum. Contractors, Western Engineering Co., 503 Railroad avenue, Seattle. Contract price, \$32,000.

COURT HOUSES.

FRESNO, FRESNO CO., CAL.—Hall of Records, 2 story and base, Class A construction, \$100,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, Fresno County. The Grand Jury has recommended that the plans of Architect Mathewson be adopted for the new Hall of Records. His design shows a classic building with eight large stone columns across the front. Entrance will be finished in marble and tile. The first floor will contain offices of the County Auditor and Assessor while the entire second floor has been given over to the County Recorder. Construction will be fireproof, with exterior walls and floors of reinforced concrete and interior partitions of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwood and metal. Metal furniture and metal window sash and frames are specified. There will be steam heat, oil burning system and vacuum cleaning plant. An additional \$30,000 is to be spent in furnishings. Plans are being prepared.

FACTORIES & WAREHOUSES.

SAN FRANCISCO — Ice storage plant, 4 story and base, brick and steel. Cost not stated. Engineer, Charles Wallace, Postal Telegraph Bldg., S. F. Owners, National Ice and Cold Storage Co. The building will be erected at the southwest corner of Union and Battery streets and will cover an area of 90 by 120 feet. Construction will be of the extra heavy type. No interior finish will be specified. Plans provide for elevator service, special ice and cold storage machinery, metal window sash and frames. Exterior will be faced with stock brick. A contract for the structural steel has been awarded to the Vulcan Iron Works at \$20,000. Figures are now being taken on the various parts of the work.

SEATTLE, WASH. — Grain elevator, reinforced concrete construction. Cost not stated. Engineer, Port of Seattle Commission, Seattle. Owners, City of Seattle. At a special meeting of the Port of Seattle Commission a resolution was passed directing the engineer to prepare plans for a grain elevator to be erected in the East Waterway. The structure is to have a capacity of 500,000 bushels and is to be fireproof. No estimate of the cost or structural details can be given at this time. Further mention will be made of the work as plans progress.

Contracts Awarded.

SAN FRANCISCO — Warehouses, 2 story and base, reinforced concrete, \$118,456. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. M. Fisher was awarded the general con-

tract at \$118,456. The deductions were made from Mr. Fisher's bid as follows: Cement gun finish, \$1404, shed \$11,023, and flat slab, \$2,700. F. Scott was awarded the plumbing at \$5565. The Globe Electric Co. was awarded the wiring at \$4200 and the Haslett Warehouse Co. the spiral chute at \$1575. All bids received for the elevator work have been rejected and new figures will be called.

FRESNO, FRESNO CO., CAL.—Laundry, 1 story and base, brick, \$20,000. Architect, R. L. Felchin, Fresno. Owners, Fresno Steam Laundry. Contractor, Emmett Higgins, Fresno. Contract price, \$20,000.

FIRE HOUSES.

BERKELEY, ALAMEDA CO., CAL.—Fire house, 2 story and base, reinforced concrete, \$25,000. Architect, William H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. The building will be erected on the north side of Durant street near Shattuck avenue. Construction will be of reinforced concrete throughout. The first floor will contain apparatus room, office and repair shop. Upper floor has been arranged for the men's sleeping rooms, reading room and card room. Interior finish will be of pine and hardwood. Special electric and plumbing goods will be called for. Plans provide for steam heat. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and out for figures. Bids will be opened on December 23rd.

FLATS.

SAN FRANCISCO — Flats, 2 story and base, frame, \$3,000. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, G. Roscelli. The building has been designed to contain four small flats of four and five rooms. Interiors will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO — Flats, 3 story and base, frame, \$7,000. Architect, Charles Pontoni, 916 Kearny street, S. F. Owner, Angelina Cesana. The building will be erected on the west side of Mason street north of Pacific covering an area of 23 by 75 feet. There will be three flats of four and five rooms. Interior will be finished in pine and redwood with some elm panels and oak floors. Each living room will have an open fire place and tile mantel. Bath rooms will have composition floors and the wainscot. Automatic water heaters will be installed. Tile will be used in the entrance vestibules. Exterior of the building will be covered with rustic and shiplap. A brick veneer base will be used. Plans are complete and figures are being taken.

SAN FRANCISCO — Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, E. H. Kuhlman, 1108 Steiner street, S. F. The building is to be designed to contain two flats of five and six rooms and will be erected on Eureka street south of 22nd. Interiors will be finished in pine throughout. Oak floors will be used in the living

and dining rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

FRESNO, FRESNO CO., CAL.—Flats, 2 story and base, frame, \$7,000. Architects, Smith, Stewart and Glass, Republican Bldg., Fresno, and 211 Kearny street, S. F. Owner, George Shorling. The building will be erected at the corner of H and Stanislaus streets and will contain four modern residential flats. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. Each flat will have an open air sleeping porch. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Exterior will be covered with rustic. Plans are complete and figures are being taken.

GARAGES.

SEATTLE, WASH.—Garage, saucer track and grand stand, concrete and frame construction, \$75,000. Architect, Julian Everett, Walker Bldg., Seattle. Owners, Seattle Motor Speedway Association. These buildings will be erected at the Renton Junction Track and will consist of a large fireproof garage, machine shop and repair department. A saucer track and large grand stands are also contemplated. Preliminary plans have been approved but money is not yet available for construction. Further mention will be made of the work as the plans progress.

GOVERNMENT WORK AND SUPPLIES.

Dry Dock at Hunters Point.

The secretary of the navy has recommended that there be included in the naval appropriation act for the next fiscal year a provision authorizing him to enter into a contract for the use by the government of the dry docks at Hunters Point and San Francisco, Cal. It is to be stipulated that one of the docks shall be capable of docking the largest vessel that can be passed through the locks of the Panama Canal, and the contract to be entered into is to run for a period not to exceed six years from the completion of such a dock. It is proposed that the construction of the large dock shall be undertaken immediately upon entering into the contract and that it will be completed within 24 months. The annual rental is placed at \$50,000. The government would, of course, reserve prior and paramount use of these docks in time of war. It is also suggested that a provision be inserted providing for docking rates not in excess of commercial rates and for such other conditions as may be prescribed by the secretary of the navy prior to entering into the contract. The fact that the large battleships of the Navy are unable to make use of the facilities at Mare Island renders it imperative for the government to make some temporary provision for docking and repairs at San Francisco. At present it is necessary to send the large ships to Puget Sound for overhauling.

Service Gates, Elephant Butte.

The secretary of the interior has authorized the reclamation service to execute contract with the Coffin Valve Company, of Neponset, Mass., for furnishing service gates for the Elephant Butte dam, Rio Grande irrigation project, New Mexico. The contract price is \$33,248. The elephant Butte dam is one of the largest structures of the reclamation service, having a height of 300 feet and a length on top of 1,500 feet. The reservoir created by this dam will cover 67½ square miles, and will contain 500,000,000 gallons of water when full. It will be the largest storage reservoir in the world, with a storage capacity nearly a third greater than that of the Assuan dam, in Egypt. The structure will cost nearly \$5,000,000 and will provide water for 180,000 acres of land in the Rio Grande Valley. A considerable portion of this land has been under irrigation for several hundred years, and some of the old ditches of the Pueblo Indians are still in use.

Kuahuu, H. T., Naval Magazine.

The following bid was received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., December 6, for the marine guard at the U. S. naval magazine, Kuahuu, H. T.:

Item 1, work, complete, 2, do, reducing building by 6 ft. and reducing length of porch; 3, deduct from items 1 and 2 for omitting interior stain and floor finish; 4, deduct from 1 and 2 for omitting copper ventilators.

The Lord-Young Engineering Co., Ltd., Honolulu, H. T., item 1, \$4,400; 2, \$3,650; 3, \$50; 4, \$80.

PROSPECTIVE BIDDERS.

Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms: **Belgium City, Utah, Construction, January 2.**

Campbell Building Co., Salt Lake City, Utah.

The George Hinchell Co., Security Building, Chicago, Ill.

King Lumber Co., Charlottesville, Va. W. C. Boyer, P. O. Box 91, Grand Junction, Colo.

J. H. Wiese, City National Bank Building, Omaha, Neb.

Parrott Bros. Co., 205 Newhouse Building, Salt Lake City, Utah.

Duquoin, Ill., Construction, December 19

W. M. Allen Son & Co., Woolner Building, Peoria, Ill.

N. H. Shields, 515 Baum Building, Danville, Ill.

Mississippi Valley Construction Co., De Meill Building, St. Louis, Mo.

George W. Stiles Construction Co., Bookery Building, Chicago, Ill.

King Lumber Co., Charlottesville, Va. Rogers & Kiser, People's Gas Building, Chicago, Ill.

V. E. Taylor, May 1st, Mo. Thomas W. Cressel, Wooner, Ohio.

James Corp. Racine, Wis. R. S. Moore, Lafayette Ind.

Stauffer Construction Co., Peabody, Kans.

Callahan-Mendel Co., 30 S. La Salle street, Chicago, Ill.

Northern Construction Co., 421 Milwaukee street, Milwaukee, Wis.

T. C. Frake, Leary Construction Co., Wagoner Bldg., Philadelphia, Pa.

Black Hawk Construction Co., Freeport, Ill.

Woerman Construction Co., 513 Century Building, St. Louis, Mo.

Grand Junction, Colo., Construction, January 6.

J. H. Wiese, City National Bank Building, Omaha, Neb.

King Lumber Co., Charlottesville, Va. **Hilo, Hawaii, Construction, January 15.**

Sound Construction and Engineering Co., 1007 Lowman Building, Seattle Wash.

J. E. & L. A. Pennock, Land Title Building, Philadelphia, Pa.

Henry D. Whitfield, 160 Fifth avenue, New York City.

W. N. Concannon, Monadnock Building, San Francisco, Cal.

Southwestern Construction Co., Central Building, Los Angeles, Cal.

Grant Fee, 2419 16th street, San Francisco, Cal.

Spaulding Construction Co., Grant avenue and Bush street, San Francisco, Cal.

Campbell Building Co., Salt Lake City, Utah.

A. L. Young Machinery Co., San Francisco, Cal.

George Marshall, Hotel Sutter, San Francisco, Cal.

Lord-Young Engineering Co., Ltd., Honolulu, H. T.

American Building Co., 1510 Penn Building, Philadelphia, Pa.

Honolulu, H. T., Alterations.

The following bids were received recently by the custodian, U. S. post office, Honolulu, for making miscellaneous alterations at the U. S. post office, Honolulu, H. T.:

Honolulu Planing Mill, Ltd., Honolulu, H. T., \$1,140.

Lord-Young Engineering Co., Ltd., Honolulu, \$700.

Needle Regulating Valves.

The secretary of the interior has authorized the reclamation service to execute contract with the Pittsburgh Valve Foundry and Construction Company, of Pittsburgh, Pa., for furnishing needle regulating valves for the Minutaire dam, North Platte irrigation project, Nebraska. The contract price is \$1,528.

The irrigation plan of the North Platte project provides for the storage of the flood waters of North Platte river by the Pathfinder dam, about three miles below the junction of the North Platte and Sweetwater rivers, in Wyoming, and in smaller reservoirs along the canal lines. Minutaire dam, which impounds the waters in one of these small reservoirs, is a structure 65 feet high, 3,370 feet long along its crest, and will have a volume of 570,000 cubic yards.

The North Platte project includes 129,270 acres of irrigable land, the greater part of which is in Nebraska.

San Francisco, Cal., Subtreasury.

The American District Telegraph Co. has been approved as manufacturer of vault-protection system to be installed in the San Francisco subtreasury, for which Grant Fee, San Francisco, Cal., has the contract.

Reducing Elbow.

Byron Jackson Iron Works, Los Angeles, Cal., \$120; 14 days; at West Berkeley, Cal.; 1,320 lbs.

Baker Iron Works, Los Angeles, Cal., \$125; at Los Angeles; no time; 800 lbs.

Gasoline-Motor Outfit.

The following bids were opened at the U. S. reclamation service, Los Angeles, Cal., under advertisement No. 252, for furnishing gasoline-motor automobile-type outfit for gate operation:

Wisconsin Motor Mfg. Co., Milwaukee, Wis., \$269; 15 days; at Milwaukee.

Light Inspection Car Co., Hagers-town, Ind., \$300; 15 days.

Beaver Mfg. Co., Milwaukee, Wis., \$417, at Milwaukee; no time.

Standardizing Public Buildings.

Congress shortly will have an opportunity to digest some suggestions, made in accordance with its own command, for a reduction in government expenses by the adoption of a standard system for public buildings. Treasury officials have been at work for several months on a preliminary report to the public building commission, authorized by Congress and composed of the secretary of the treasury, the postmaster general and the attorney general and two members of the Senate and House committees in charge of public buildings.

The commission was created to work out and approve some system by which a standard could be formed for public buildings, so that cities of a certain size should get a prescribed size of buildings. By its adoption, it was argued, the necessity for drawing plans for every new building would be eliminated, the expense of the upkeep and the supervising architect's office would be lessened, and the actual time consumed between the authorization of a building and its completion would be greatly diminished.

At present the supervising architect's office is six years behind in its work. This is due, it is claimed, largely to the fact that Congress lopped off about 50 positions in that office several years ago.

A suggestion which may ultimately be made to Congress, which probably will meet with less favor than standardization, would put public building bills on somewhat the same plane as bills for the improvement of rivers and harbors. It would mean that while Congress would authorize a public building at a certain place a report on the amount that should be expended there would be forthcoming from the public buildings commission.

Congress is now appropriating between \$25,000,000 and \$40,000,000 each year for public buildings.

Pearl Harbor, H. T., Structural Steel.

The contract for furnishing structural steel for the coaling plant at the U. S. naval station, Pearl Harbor, H. T. bids for which were opened November 1, has been awarded to the U. S. Steel Products Co., New York City, at \$156,785.

Pearl Harbor, Tank and Tower.

Salt Lake City, Utah, Files, Etc.

The contract for furnishing filing and book cases, U. S. post office, Salt Lake City, Utah, has been awarded to Globe-Vernice Co., at \$881.35.

North Yakima, Wash., Painting.

The contract for painting plastering in the U. S. post office building, North Yakima, Wash., has been awarded to J. V. Whitehair, North Yakima, Wash., at \$2,670; time 120 days.

HALLS & SOCIETY BLDGS.

SAN FRANCISCO.—Club House addition, 3 story and base, Class B construction, \$75,000. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. The new portion of the building will be erected on property at the southeast corner of Post and Van Ness avenue adjoining the present building. Design and construction will be similar to the old building. The new portion will be arranged for social rooms, dining room and living apartments. There will be a steel frame with exterior walls faced with Colusa sandstone, interior partitions of metal lath and plaster and metal window sash and frames. Interior finish will be of pine and hardwoods. The present steam heating system will be extended to the new portion of the building and a vacuum cleaning system will be installed. Plans are being prepared.

SAN FRANCISCO.—City Hall work, brick and terra cotta facing. Cost not stated. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for brick and terra cotta facing for two large courts in the new City Hall show Boyd, Keer & McLean low on both propositions as follows: Prop. A, \$29,965, and Prop. B, \$12,100. A complete list of the bids received will be found under the heading of San Francisco in this issue.

SAN FRANCISCO. Lodge rooms, 3 story and base, brick and steel, \$75,000. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, San Francisco Labor Council Hall Association. This building has been mentioned here a number of times before when the architects were preparing plans. Working drawings are now complete and figures are being taken. The building will be erected on property at the northeast corner of Cape and 16th streets, covering an area of 84 by 100 feet. The entire building will be devoted to the use of the council. Plans show metal window sash and frames. There will be steam heat, a vacuum cleaning system and at each convenience. Entrance will be finished in cut stone. Exterior of the building will be faced with pressed brick and terra cotta.

OAKLAND, CAL. Electric clock system. Cost not stated. Architects, Palmer and Hornbush, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owner's City of Oakland. Bids are now being called

for the installation of an electric clock system in the new City Hall. Plans can be secured from the City Clerk. Bids will be opened on January 5th. An official proposal appears under another heading in this issue.

Contracts Awarded.

PORTERVILLE, TULARE CO., CAL.—Lodge hall, 3 story and base, brick. Cost not stated. Architect, Joseph L. Roberts, Monache Bldg., Porterville. Owners, Porterville Odd Fellows' Hall Association, Contractor, A. L. Laddlow, Porterville. Contract price not stated.

BAKERSFIELD, KERN CO., CAL.—City hall alterations, 2 story and base brick, \$26,050. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, City of Bakersfield. Contractors, Yancey & Rodgers, 1933 Chester avenue, Bakersfield. Contract price, \$26,050.

HOSPITALS

NAPA, NAPA CO., CAL.—Hospital cottage, 1 story and base, frame. Cost not stated. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans for female cottages, Dozier, are complete and figures are now being called. Bids will be opened on January 11th. Plans and specifications can be secured from the office of the State Engineer at Sacramento. An official proposal appears under another heading in this issue.

HOTELS.

SAN FRANCISCO.—Hotel, 8 or 10 story and base, Class A construction. Cost not stated. Architect, Washington J. Miller, 45 Kearny street, S. F. Owner's name withheld. A report is current in real estate circles that large eastern hotel capital is interested in the northeast corner of Ellis and Mason streets, the old Y. M. C. A. site. Architect Washington J. Miller is preparing preliminary plans for a large Class A hotel building. A representative of the eastern capital is now in the city and these plans will be submitted to him for approval.

SAN FRANCISCO.—Hotel, 3 story and base, reinforced concrete, \$25,000. Architect, August Nordin, Mills Bldg., S. F. Owner's name withheld. This building will be erected on Mission street near 18th and has been designed with stores on the first floor and a number of guest rooms above. Interior finish will be of pine and redwood. A number of the rooms will have private baths. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. The stores will be provided with patent fronts and plate glass windows. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

SAN FRANCISCO. Hotel completion, 6 story and base, brick and steel construction. Cost not stated. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Downtown Realty Co. The upper floors which are to be completed will contain over 150 guest rooms. The work will include plastering, plumbing, electric work, interior finish, marble and tile work. Money has been secured and mechanics hired, amounting to nearly \$15,000, was paid. Plans are now being prepared.

SAN FRANCISCO. Hotel, 3 or 4

story and base, fireproof construction. Cost not stated. Architect, Edward T. Foulkes, Crucker Bldg., S. F. Owners, Inside Inn Co., Holbrook Bldg., S. F. It is reported that the designs of Architect Edward T. Foulkes have been selected by the Inside Inn. The building will contain a total of 2500 guest rooms. The building surmounts a terrace beneath which is to be a bandstand. The building will be in the Panama-Pacific Exposition grounds.

FAIRFIELD, SOLANO CO., CAL.—Hotel, 1 story and base, reinforced concrete, \$75,000. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Fairfield Hotel Co. The building will be arranged for stores on the first floor besides the hotel lobby, dining room and office. Upper floors will be subdivided into about 100 guest rooms and a number of baths. Interfinish will be of pine with some hardwood. Construction will be fireproof with exterior walls of reinforced concrete and metal lath and plaster interior partitions. Plans provide for steam heat, elevator service, a hot water plant and vacuum cleaning. Bath rooms will have tile floors and wainscot. Exterior will be faced with cement plaster. Plans are nearly complete and figures will shortly be taken.

FRESNO, FRESNO CO., CAL.—Hotel, 2 story and base, brick, \$10,000. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Herman Graun. The building will be erected at the corner of Iwo and I streets covering a ground area of 100 by 140 feet. There will be seven stories on the first floor, besides the hotel entrance and lobby. Upper floors will contain about fifty guest rooms and a number of public and private baths. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Stores will have large plate glass windows and patent store fronts. Exterior will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Hotel, 13 story and base, Class A construction. Cost not stated. Architect, Lyman W. Foxwell, Story Bldg., L. A. Owners, Ira W. Burne and Frank L. Spaulding. The building will be erected at the intersection of New High, Spring and Franklin streets covering an area of 120 by 128 feet. Construction will be of the Class A type throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of oak, tile and metal lath and plaster. There will be a total of 700 guest rooms nearly all of which will have private baths. Reception halls and parlors have been provided for on each floor. Main floor will contain the general offices, lobby, parlors, dining rooms and stores. Marble and tile will be used in the corridors. Plans provide for steam heat, vacuum cleaning and water system and six elevators. Metal window sash and frames are included. Exterior of the building will be faced with tile and terra cotta. Plans are being prepared.

SEATTLE, WASH. Hotel, 6 story and base, brick and steel, \$30,000. Architect, Ben Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. The building will be erected at the corner of 4th, Avenue and Jackson street and will cover an area of 60 by 120 feet, seven stories and the main office and

hotel lobby will occupy the first floor. Upper floors will be subdivided into a total of 130 guest rooms and a number of public and private baths. Metal window sash and frames and some marble and tile work will be specified. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction, \$12,000. Architect, E. B. Rust, Title Insurance Bldg., L. A. Owner, C. A. Mathewson. Contractor, John Herington, 650 Hawthorne ave., L. A. Contract price, \$13,000.

LIBRARIES.

SACRAMENTO, CAL.—Library, 2 story and base, Class A construction. Cost not stated. Engineer, Givan, City Engineer, Sacramento. Engineer Givan has prepared preliminary plans for the new building which is to be erected by the Carnegie Association in Sacramento. These plans have been forwarded to New York for the approval of the association. The exact location and further information relative to the building will be published later.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Concession Exhibit, frame construction, \$250,000. Architect, Frederick Thompson, Exposition Grounds, S. F. Owners, Union Pacific Railroad. Plans for one of the largest concessions which will be constructed at the Panama-Pacific International Exposition are nearly complete. This concession will represent the Yellowstone Park in miniature and will cover an area of 150 by 350 feet. The greater part of this work will be of frame and plaster staff construction but some concrete will be used. Bids will be called for about January 1st. Full particulars can be secured from Mr. Thompson.

SAN FRANCISCO—Sewer construction. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Figures are now being called for the installation and construction of sewers in the Court of Palms and the Court of the Four Seasons. Bids will be opened on December 26th. Plans and specifications and full particulars can be secured from the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Automatic sprinkler systems. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on January 2nd for furnishing and installing automatic sprinkler systems in the Education Building, Manufactures Building, Transportation Building, Food Products Building, Liberal Arts Building, Agriculture Building, Mines Building and Vared Arts Building. Plans have been completed and approved and can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Electric Work. Cost not stated. Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the electric work in the Education Building, Liberal Arts, Food Products and Agriculture Buildings have been completed and approved. Bids on the work are now being called for and will be opened on January 2nd. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

SAN FRANCISCO—Sewers, etc. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific Exposition Co. Plans for the installation of sewers in the Ferry Building, Garden and Service Road South of Machinery Hall have been completed and are now out for figures. Bids for this work will be opened on January 2. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

Contracts Awarded.

SAN FRANCISCO—State Exhibit building, frame construction, \$17,000. Architects, Wayland and Fennell, Boise, Idaho. Owners, State of Idaho. Contractors, Story & Salih, Boise, Idaho. Contract price, \$17,000.

POST OFFICES.

CHICO, BUTTE CO., CAL.—Postoffice, 2 story and base, brick and steel, \$75,000. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. Plans are nearly complete for the new Federal Building to be erected in Chico. The structure will be practically fireproof and will cover a ground area of approximately 7,500 square feet. Interior finish will be of pine, hardwood and metal. There will be steam heat. Exterior will be faced with pressed brick and terra cotta. Plans will be forwarded to this coast not later than Feb. 10th. An official proposal will be published in these columns.

POCATELLO, IDAHO.—Post office, 2 story and base, brick and stone. Cost not stated. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. H. E. Doering, 568 Maple street, Portland, submitted the lowest figures for the construction of the Federal Building at Pocatello. His bid for this work was \$93,171 for limestone and \$94,218 for sandstone. A contract has not been awarded.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Car barns, 1 story and base reinforced concrete, \$60,000. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. An addition to the Geary Street car barns has been ordered and the architectural department has started working drawings. The building will be of reinforced concrete type throughout. There will be concrete floor, metal window sash and frames and special tank equipment. No interior finish will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Shop repairs, frame construction, \$5,000. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific R. R. Co. Plans are now out for figures for repairs to the carpenter shop and other buildings of the Southern Pacific Co. recently damaged by fire. These buildings are located at Kentucky and Daggett streets. Bids are being taken by the Engineering Department of the company.

OAKLAND, CAL.—Railroad shed, 1 and 2 story, galvanized iron. Cost not stated. Architect, G. W. Harris, 6th and Main streets, L. A. Owners, Santa Fe Railroad. This building is to be erected on the Oakland Water Front covering an area of 200 by 50 feet. Interior will be left unfinished. Exterior will be covered with galvanized iron. Plans are completed and figures are being taken by the company.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$15,000. Architect, Oscar Haupt, Phelan Bldg., S. F. Owner, John McGaw. The dwelling will be erected on the north side of Green street west of Jones and has been designed to contain eight rooms and two baths. Interior finish will be of pine and hardwood with white enamel in the bed rooms. There will be furnace heat, open fire places and a vacuum cleaning system. Hardwood floors will be used in the living room, dining room and reception hall. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. R. Lapham, 1853 McAllister street, S. F. The dwelling will be erected on 12th avenue near Anza and will contain six rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. Living room will have a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residences, 2 2-story and base, frame, \$2,500. Architect, none. Owner, E. Nelson, 30 Presidio Terrace, S. F. These two houses will be erected on the east line of 16th avenue south of California and each has been designed to contain six rooms and bath. Interior finish will be of pine with some hardwood veneer in the living and dining rooms. Oak floors will be used in the principal rooms. There will be large open fire places and brick or tile mantels. Bath rooms and kitchen will have tile wainscot. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. The work will be done by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, none. Owner, H. Davenport,

Commercial Bldg., Oakland. The dwelling will be erected on Shafter avenue and will contain eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, W. W. Grove. The house will be erected in the Claremont Tract and will contain eight rooms, bath and sleeping porch. Interior finish will be of pine with oak panels in the living and dining rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantel will be of brick and tile. Tile wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans for the work are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: W. H. Thompson, 419 East Market street, 2 story frame, \$3,200; Albert Nelson, 1421 East Channel street, 2 story frame, \$2,200; Hans Axel, 425 South East street, 2 story frame, \$2,500; Ben H. Farrar, Stockton, 2 story frame, \$2,000; C. A. Leibel, 321 East Park street, 1 story cottage, \$800; and C. A. Eldridge, Poplar and Center streets, 2 story frame, \$2,500.

SACRAMENTO, CAL.—Residence, 1 2 story and base, frame, \$2,500 to \$3,000 each. Architect, none. Owner, E. A. Pierce, 2207 1st avenue, Sacramento. These houses will be erected in the Baxter Tract and each has been designed to contain seven rooms and bath. Interiors will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the principal rooms. The more expensive houses will have furnace heat as well as open fire places. Mantels will be of tile and brick. Bath rooms and kitchens will have the wainscot. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath, rustic sloyd and shingles. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Residences, 1 and 2 story and base, frame. Cost not stated. Architect, none. The following Day Labor jobs are about to be started in San Jose: Frank Gramaglia, East Jackson near 7th street, 1 story frame, \$1,500; C. L. Lewis, 447 South 15th street, 2 story frame, \$2,500; and R. E. Carter, East 18th street, 1 story frame cottage, \$1,750. Materials are now being purchased.

Contracts Awarded.

SAN JUAN DE CAPISTRANO, ORANGE CO., CAL.—Residence, 2 story and base, frame, \$25,000. Architect, A. B. Benton, 114 North Spring street, L. A. Owner, John Forster, Contractor, F. B. McCabe, 1306 West 50th street, L. A. Contract price, \$25,000.

SCHOOLS.

EUREKA, HUMBOLDT CO., CAL.—School, 2 story and base, reinforced concrete. Cost not stated. Architect, William H. Weeks, 75 Post street, S. F. Owners, Eureka Union High School District. Architect William H. Weeks has completed working drawings for the new High School building, which is to be erected in Eureka, Humboldt County. The building will cover an area of 214 feet by 180 feet and is designed in the classic style. Construction will be of reinforced concrete, except the upper story, which will be of the slow burning type. Exterior is to be faced with cement plaster in imitation of stone. Eight class rooms, a principal's office, the teachers' rooms, the bookkeeping and typing department and the assembly hall take up the space of the first floor. All class rooms throughout the building are equipped with book-cases and teacher's closets. The assembly hall has a seating capacity of 700 students and will be used for a study hall. The floor is level but the stage is raised and built on a slant. This room is one of the most artistic in the building. As additional equipment, along with several other rooms, it has a complete motion picture outfit, including a fire-proof box for the moving picture machine. There are a total of five exits to the hall, three main and two fire exits being provided. The library opens off the assembly hall. The second floor is given over to five class rooms, two science rooms, the biological, chemical and physical laboratories, a girls' rest room and storage rooms. The drawing rooms are also located on this floor and have both side and ceiling lights, regulated by shades, which will permit of the adjustment of the lights and shadows as desired. The chemical laboratory is absolutely fire-proof. Bids for the work are now being taken.

SCHOOL—2 story and base, brick and terra cotta, \$35,000. Architect, V. W. Voorhees, Ethel Bldg., Seattle. Owners, School District No. 41. This work has been mentioned here before when plans were first out for figures. Revised plans have been completed and new figures will be opened on December 24th. Plans can be secured from the architect. The building will cover an area of 76 x 116 feet. There will be steam heat, a modern system of ventilation and program clocks and vacuum cleaning. Exterior of the building will be faced with pressed brick and terra cotta. Front Street 775 North 89th street, Seattle is Clerk of the School Board.

Contracts Awarded.

LONG BEACH, LOS ANGELES CO., CAL.—Schools, 1 2-story and 2 2-story brick, \$76,718.86. Architect, A. Burns, 545 St. Georges, 805 Bldg., L. A. Owners, City of Long Beach. Contractor, J. W. Davidson, 125 West Street, Long Beach. Contract price, \$76,718.86.

STORES.

SAN FRANCISCO—Stores, 2 story and base, brick. Cost not stated. Architects, Reid Bros., California-Pacific Bldg., S. F. Owner, H. C. Breeden. This building will be erected at the northeast corner of Fillmore and Geary streets, covering an area of 91 by 141 feet. There will be a number of stores on the first floor and billiard hall and dancing hall on the second floor. Interior finish will be of pine and hardwood. A maple floor will be used in the second story. Plans provide for steam heat and metal window sash and frames. Patent store fronts and marble base will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—Stores, 1 2 story and 3 1-story and base, brick. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owners' names withheld. These buildings will all be erected in the wholesale district. There will be scow foundations and brick exterior walls, faced with pressed brick and cement plaster. Patent store fronts and plate glass windows will be installed. Interior finish will be of pine throughout. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Store 1 story and base, brick. Cost not stated. Architect, Alfred Henry Jacobs, French Savings Bank Bldg., S. F. Owner, Bert Schlusseringer. The building will be erected on Howard street between Third and Fourth street and has been designed to contain one large store. Interior will be finished in pine. There will be large plate glass windows and patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PALO ALTO, SANTA CLARA CO., CAL.—Store alteration and addition, 1 and 2 story and base, brick. Cost not stated. Architect, Henry Sherman, Mills Bldg., S. F. Owner, James Frazer. The building at the corner of University and Emerson streets, housing the largest department store in Palo Alto, will undergo repairs and a one-story brick addition covering an area of 60 x 112½ feet will be constructed. Interior finish will be of pine and hardwood. Oak floor will also be used. There will be patent store fronts and metal window sash and frames. Exterior of the building will be faced with pressed brick. Plans will be put out for figures in about two weeks.

SACRAMENTO, CAL.—Stores and office, 2 story and base, brick and stone, \$3,000. Architect, E. C. Himmings, Sacramento. Owners, West Sacramento Co. The building will be erected in West Sacramento and has been designed to contain one store and twenty-two modern offices. Interiors thus will be of pine and hardwood. Some marble and tile will also be used. Metal window sash and frames are specified. Exterior of the building will be faced with cut stone. Plans are complete and figures are being taken.

VANOVVER, B. C.—Department store, 1 story and base, Class A construction. Cost not stated. Architects' name not given. Owners, Hudson Bay Co. Bids for the construction of a large Department Store for the Hudson Bay Co. are being received.

By order of the Buildings and Grounds Committee
WILLIAM H. CROCKER
Chairman. (*)

OFFICE OF THE ARCHBISHOP
 Works of the Holy Spirit
 San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday,

F. J. CHURCHILL,
Secretary.

Sealed proposals will be received at this office between the hours of 2 o'clock

p. m. and 3 o'clock p. m. on Wednesday, the 31st day of December, 1913, for furnishing and delivering the following material:

A quantity of motor equipment for the construction of the extensions of the Municipal Railway System.

Said material must be in accordance with the specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and delivery must be commenced and completed within the time limits set forth in said specifications.

The amount of the bond for faithful performance of the contract has been fixed at \$55,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County for an amount not less than ten per centum of the aggregate of the proposal.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works.

F. J. CHURCHILL,
Secretary.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including twelve o'clock, noon, Monday, January 5, 1914, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the sand blasting of the granite work and steps of the Capitol Building at Sacramento, California, in accordance with specifications therefor, copies of which may be obtained on application to the State Department

of Engineering, Sacramento, California. Such bids will be received for the Entire Work.

Cash, a bidder's bond or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Two (\$2.00) Dollars will be required on the specifications, the deposit to be returned immediately on the return of the specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Sand Blasting, State Capitol Building, Sacramento, California."

[Signed] W. F. McClure,
State Engineer, (s)

NOTICE TO CONTRACTORS.

TREASURY DEPARTMENT, Supervising Architect's Office, Washington, D. C., November 25, 1913.—Sealed proposals will be opened in this office at 3 p. m., January 6, 1914, for the construction complete (including mechanical equipment, interior lighting fixtures and approaches) of the United States post office at Grand Junction, Colo. One story and base building; ground area, 5,700 square feet; fireproof construction; stone and brick facing; tile and terra cotta. Drawings and specifications may be obtained from the custodian of site at Grand Junction, Colo., or at this office, in the discretion of the Supervising Architect, O. Wenderoth, Supervising Architect.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

CONCESSION EXHIBIT—Frame construction, \$250,000. San Francisco, Architect, Frederick Thompson. Exposition Grounds, S. F. Owners, Union Pacific Railroad. Plans for one of the largest concessions which will be constructed at the Panama-Pacific International Exposition are nearly complete. This concession will represent the Yellowstone Park in miniature and will cover an area of 150 by 350 feet. The greater part of this work will be of frame and plaster staff construction but some concrete will be used. Bids will be called for about January 1st. Full particulars can be secured from Mr. Thompson.

SEWER CONSTRUCTION—Cost not stated. San Francisco, Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Figures are now being called for the installation and construction of sewers in the Court of Palms and the Court of the Four Seasons. Bids will be opened on December 26th. Plans and specifications and full particulars can be secured from the Director of Works. An official proposal appears in another column of this issue.

AUTOMATIC SPRINKLER SYSTEMS—Cost not stated. San Francisco, Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Bids will be opened on January 2nd for furnishing and installing automatic sprinkler systems in the Education Building, Manufactures Building, Transportation Building, Food Products Building, Liberal Arts

Building, Agriculture Building, Mines Building and Varied Arts Building. Plans have been completed and approved and can be secured from the office of the Director of Works. An official proposal appears in another column of this issue.

ELECTRIC WORK—Cost not stated. San Francisco, Engineer, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans for the electric work in the Education Building, Liberal Arts, Food Products and Agriculture Buildings have been completed and approved. Bids on the work are now being called for and will be opened on January 2nd. Plans and specifications can be secured from the Director of Works. An official proposal appears in another column of this issue.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco, Architects, Righty & Heidman, Phelan Bldg., S. F. Owner, G. Toledo. The building will be erected on the east side of Polk street near Clay and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine with some elm panels and hardwood floors. There will be steam heat and a hot water system. All bath rooms will have composition floors and tile wainscot. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath and a brick veneer base. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$17,000. San Francisco, Architects, Fabre and Beauvald, Metz-

chants National Bank Bldg., S. F. Owner, A. Arru. The building has been designed to contain a number of two and three room suites and will be erected on Pacific avenue near Jones.

All suites will have connecting baths and wall beds. Interior finish will be of pine with elm panels and oak floors in the living and dining rooms. Plans provide for steam heat, a hot water system and vacuum cleaning. An automatic elevator will be installed. Bath rooms will be finished in tile with composition floors. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath and rustic. Plans are now being figured.

APARTMENT HOUSE—3 story and base, frame, \$35,000. San Francisco, Architects, O'Brien Bros., Clinie Bldg., S. F. Owner's name withheld. The building will be erected in the Fifty Vara District and has been designed to contain a number of large suites ranging from five to seven rooms. Interiors will be handsomely finished in pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for steam heat, hot water system and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. All apartments will be equipped with wall beds. Entrance will be finished in marble and tile. Exterior of the building will have a brick veneer base and will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick and steel, \$35,000. San Francisco, Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, Talbot Investment Co. This building, which has been mentioned here before, will be erected on the north side of Mission street between Seventh and Eighth streets. The lot has a frontage of 37½ feet and a depth of 120 feet. There will be a number of stores on the first floor. Upper two floors will be arranged for apartments of two and three rooms with private baths and wall beds. Interior finish will be largely of pine. Plans provide for steam heat and a hot water system. Stores will have large plate glass windows and patent store front. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$15,000. San Francisco, Architect, Oscar Haupt, Phelan Bldg., S. F. Owner, John McGraw. The dwelling will be erected on the north side of Green street west of Jones and has been designed to contain eight rooms and two baths. Interior finish will be of pine and hardwood with white enamel in the bed rooms. There will be furnace heat, open fire places and a vacuum cleaning system. Hardwood floors will be used in the living room, dining room and reception hall. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco, Architects, none. Owner, A. R. Lott, 1827 McAllister street, S. F. The dwelling will be erected on 121st avenue near Anza and will contain six rooms and

bath. All interior finish will be of pine or redwood. Oak floors will be used in the principal rooms. Living room will have a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCES—2 2-story and base, frame, \$2,500. San Francisco. Architect, none. Owner, E. Nelson. 20 Presidio Terrace, S. F. These two houses will be erected on the east line of 16th avenue south of California and each has been designed to contain six rooms and bath. Interior finish will be of pine with some hardwood veneer in the living and dining rooms. Oak floors will be used in the principal rooms. There will be large open fire places and brick or tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and cement plaster on metal lath. The work will be done by Day Labor. Materials are now being purchased.

CHURCH—2 story and base, frame, \$15,000. San Francisco. Architect W. J. Wythe, Central Bank Bldg., Oakland. Owners, African M. E. Church. This work has been mentioned here before when the architect was first commissioned to prepare the plans. The building has been designed in the Mission style and will contain, besides the main auditorium, a Sunday School room, pastor's study and social rooms. Interior finish will be of pine and redwood. There will be a central heating system. A clay tile roof will be used. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

ICE STORAGE PLANT—4 story and base, brick and steel. Cost not stated. San Francisco. Engineer, Charles Wallace, Postal Telegraph Bldg., S. F. Owners, National Ice and Cold Storage Co. The building will be erected at the southwest corner of Union and Battery streets and will cover an area of 30 by 120 feet. Construction will be of the extra heavy type. No interior finish will be specified. Plans provide for elevator service, special ice and cold storage machinery, metal window sash and frames. Exterior will be faced with stock brick. A contract for the structural steel has been awarded to the Vulcan Iron Works at \$20,600. Figures are now being taken on the various parts of the work.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architect, L. Mastropasqua, San Washington Street, S. F. Owner, G. Russell. The building will be erected at the northwest corner of Pflizer and Bolivar streets covering an area of 20 by 41 feet. The building has been designed to contain four small flats of four and five rooms. Interiors will be finished in pine throughout. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FLAT—3 story and base, frame, \$7,000. San Francisco. Architect, Charles Pantoni, 916 Kearny street, S. F. Owner, Angelina Cesana. The building will be erected on the west side of Mason street north of Pacific covering an area of 23 by 75 feet. There will be three flats of four and five rooms. Interiors will be finished in pine and redwood with some elm panels and oak floors. Each living room will have an open fire place and tile mantel. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Tile will be used in the entrance vestibule. Exterior of the building will be covered with rustic and shiplap. A brick veneer base will be used. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, E. H. Kuhlman, 1108 Steiner street, S. F. The building has been designed to contain two flats of five and six rooms and will be erected on Eureka street south of 22nd. Interiors will be finished in pine throughout. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOTEL—8 or 10 story and base, Class A construction. Cost not stated. San Francisco. Architect, Washington J. Miller, 15 Kearny street, S. F. Owner's name withheld. A report is current in real estate circles that large eastern hotel capital is interested in the northeast corner of Ellis and Mason streets, the old Y. M. C. A. site. Architect Washington J. Miller is preparing preliminary plans for a large Class "A" hotel building. A representative of the eastern capital is now in the city and these plans will be submitted to him for approval.

HOTEL—3 story and base, reinforced concrete, \$25,000. San Francisco. Architect, August Nordin, Mills Bldg., S. F. Owner's name withheld. This building will be erected on Mission street near 18th and has been designed with stores on the first floor and a number of guest rooms above. Interior finish will be of pine and redwood. A number of the rooms will have private baths. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. The stores will be provided with patent store fronts and plate glass windows. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

HOTEL COMPLETION—6 story and base, brick and steel construction, cost not stated. San Francisco. Architect, Earl B. Scott, Humboldt Bank Bldg., S. F. Owners, Downtown Realty Co. The upper floors which are to be completed will contain over 120 guest rooms. The work will include plastering, plumbing, electric work, interior finish, marble and tile work. Money has been secured and mechanics liens amounting to nearly \$15,000 will be paid. Plans are now being prepared.

HOTEL—3 or 4 story and base, fireproof construction. Cost not stated. San Francisco. Architect, Edward T.

Foulkes, Crocker Bldg., S. F. Owners, Inside Inn Co., Holbrook Bldg., S. F. It is reported that the designs of Architect Edward T. Foulkes has been selected by the Inside Inn. The building will contain a total of 2500 guest rooms. The building surmounts a terrace, beneath which is to be a band stand. The building will be in the Panama-Pacific International Exposition grounds.

CLUB HOUSE ADDITION—3 story and base, Class B construction, \$75,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Concordia Club. The new portion of the building will be erected on property at the southeast corner of Post and Van Ness avenue adjoining the present building. Design and construction will be similar to the old building. The new portion will be arranged for social rooms, dining room and living apartments. There will be a steel frame with exterior walls faced with Colusa sand stone, interior partitions of metal lath and plaster and metal window sash and frames. Interior finish will be of pine and hardwoods. The present steam heating system will be extended to the new portion of the building and a vacuum cleaning system will be installed. Plans are being prepared.

CITY HALL WORK—Brick and terra cotta facing. Cost not stated. San Francisco. Architects, Bakewell and Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids opened at the last meeting of the Board of Public Works for brick and terra cotta facing for two large courts in the new City Hall show Boyd, Keer McLean low on both propositions as follows: Prop. A, \$29,365, and Prop. B, \$42,100. A complete list of the bids received will be found under the heading of San Francisco in this issue.

LODGE ROOMS—3 story and base, brick and steel, \$75,000. San Francisco. Architects, O'Brien & Werner, Foxcroft Bldg., S. F. Owners, San Francisco Labor Council Hall Association. This building has been mentioned here a number of times before when the architects were preparing plans. Working drawings are now complete and figures are being taken. The building will be erected on property at the northeast corner of Capp and 16th streets, covering an area of 84 by 100 feet. The entire building will be devoted to the use of the council. Plans show metal window sash and frames. There will be steam heat, a vacuum cleaning system and other modern conveniences. Entrance will be finished in cut stone. Exterior of the building will be faced with pressed brick and terra cotta.

CAR BARN—1 story and base, reinforced concrete, \$60,000. San Francisco. Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. An addition to the Geary Street car barns has been ordered and the architectural department has started working drawings. The building will be of the reinforced concrete type throughout. There will be concrete floor, metal window sash and frames and special tank equipment. No interior finish will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SHOP REPAIRS. Plans for construction, \$5,000. San Francisco Architect, Engineering Department. Southern Pacific Co. Flood Bldg. S. P. owners. Southern Pacific R. R. Co. Plans are now out for figures for repairs to the carpenter shop, and other buildings of the Southern Pacific Co. recently damaged by fire. These buildings are located at Kentucky and Daguerre streets. Bids are being taken by the Engineering Department of the company.

STORES.—2 story and 1 1/2 story. Cost not stated. San Francisco Architect, Reid Bros., California Pacific Bldg., S. F. E. owner. H. C. Brecher. This building will be erected at the northeast corner of Fillmore and Geary streets, covering an area of 10 x 111 feet. There will be a number of stores on the first floor and billiard hall and dancing hall on the second floor. Interior finish will be of pine and hardwood. A maple floor will be used in the second story. Plans provide for steam heat and metal window sash and frames. Patent stone fronts and marble base will be used. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STORES.—1 2-story and 1 1/2-story and base, brick. Cost not stated. San Francisco Architect, O'Brien Bros., Clunie Bldg., S. F. E. owners. Names withheld. These buildings will all be erected in the wholesale district. There will be scow foundations at Patrick exterior walls, faced with pressed brick and cement plaster. Patent stone fronts and plate glass windows will be installed. Interiors will be of pine throughout. Plans are nearly complete and figures will be called for shortly.

STORE.—1 story and 1 1/2 story. Cost not stated. San Francisco Architect, Alfred Henry James, Pioneer Savings Bank Bldg., S. F. E. owner. Fort S. Leisner. The building will be erected on Howard street between Third and Fourth streets and will be designed to contain an 18,000 sq. ft. store. Interior will be finished in pine. There will be large plate glass windows and patent stone fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEWERS. ETC. Cost not stated. San Francisco Architect, A. H. B. Co. of Works, Service Bldg., S. F. E. owners. Panama-Pacific International Exposition Co. Plans for the construction of sewers in the Petty Building, Garden and Service Bldg. south of Montgomery Hall have been completed and are now out for figures. Bids for the work will be opened on Dec. 1. Plans and specifications are on file with the Director of Works. Architectural proposals are also on file with the Director of this Bldg.

Contracts Awarded.

STATE EXHIBIT BUILDING. Frame construction, \$7,000. S. F. E. owner. Architects, Wyckoff & Porter. These Idaho owners, State of Idaho Contractors, State & S. F. E. owner. Contract price, \$1,000.

WAREHOUSES. 2 1/2 story and 1 1/2 story reinforced concrete, \$115,000. S. F. E. owner. Architects, Construction Co. of Works, termite's office, Fort Mason, S. F. E. owners. United States Government. This bid was awarded to a general contract of \$115,000. The following are the bids made from Mr. Fisher's bid as follows: Ge-

met run in, \$1404, S. E. d, \$11,025, and that slab, \$2,700. P. Scott was awarded the plumbing at \$565. The Globe Electric Co. was awarded the wiring at \$1,200 and the Haslett Warehouse Co. the spiral chute at \$1575. All bids received for the elevator work have been rejected and new figures will be called.

City Bids Opened.

Bids were opened at Wednesday's session of the San Francisco Board of Public Works for the brick and terra cotta work on two large courts at the new City Hall. Proposition A called for a combination of brick and terra cotta, while Proposition B called for the entire work to be executed in terra cotta. Boyd, Kerr & McLean submitted the lowest figures on both propositions and will be awarded the work. The following is a list of the bids received:

Brick and Terra Cotta Work, Two Courts.	
Grant Fee (A) \$56,700; (B) \$50,700.	
Brandon & Lawson (A) \$53,450; (B) \$45,900.	
Boyd, Kerr & McLean (A) \$29,905; (B) \$42,100.	

Award Contracts For Warehouses.

Government Work Goes to M. Fisher With Three Deductions. Other Contracts Also Awarded.

Contracts have been awarded through the Constructing Quartermaster's office at Fort Mason for construction of two large reinforced concrete warehouses to be erected at the Transport Dock.

M. Fisher was awarded the general contract on his bid of \$118,156. The department made three deductions from his original bids as follows: Cement gun finish, \$1,004, shed, \$11,025, and flat slab construction, \$2,700.

F. Scott was awarded the plumbing at \$5,565, the Globe Electric Co. the wiring at \$1,200 and the Haslett Warehouse Co. spiral chutes at \$1,575.

All figures received for elevator installation were rejected and will be re-advertised.

WAR ON SHARKS.

Frames in Fire Limits Must Go.

In a report submitted by Jean P. Horgan, Chief Inspector of Buildings, to the Board of Public Works shows that there are now 119 frame structures within the Fire Limits yet to be removed. The structures are used for commercial purposes and action will be taken immediately to cause their removal. Notices will be issued to owners and tenants of these buildings to vacate and tear down within a specified time.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,
frame. Cost not stated. Oakland, Cal.
Architect, none. Owner, H. Daven-

port, Commercial Bldg., Oakland. The dwelling will be erected on Shafter avenue and will contain eight rooms, bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove. 2911 Telegraph avenue, Berkeley. Owner, W. Grove. The house will be erected in the Claremont Tract and will contain eight rooms, bath, and sleeping porch. Interior finish will be of pine with oak panels in the living and dining rooms. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantel will be of brick and tile. The wainscot will be used in the bath rooms and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans for the work are now being prepared.

FIRE HOUSE—2 story and base, reinforced concrete, \$25,000. Berkeley, Alameda Co., Cal. Architect, William H. Ratcliff Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. The building will be erected on the north side of Durant street near Shattuck avenue. Construction will be of reinforced concrete throughout. The first floor will contain apparatus room, office and repair shop. Upper floor has been arranged for the men's sleeping rooms, reading room and card room. Interior finish will be of pine and hardwood. Special electric and plumbing goods will be called for. Plans provide for steam heat. Exterior of the building will be faced with cement plaster on metal lath. Plans are complete and out for figures. Bids will be opened on December 23rd.

ELECTRIC CLOCK SYSTEM—Cost not stated. Oakland, Cal. Architects, Palmer and Hornbostel, New York, associated with J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids are now being called for the installation of an electric clock system in the new City Hall. Plans can be secured from the City Clerk. Bids will be opened on January 2nd. An official proposal appears under another heading in this issue.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

HOTEL—1 story and base, reinforced concrete, \$75,000. Fairfield, Solano Co., Cal. Architect, Henry C. Smith, Humboldt Bank Bldg., S. F. Owners, Humboldt Hotel Co. The building will be arranged for stores on the first floor besides the hotel lobby, dining room and office. Upper floors will be subdivided into about 100 guest rooms and a number of baths. Interior finish will be of pine with some hardwood. Construction will be fireproof with exterior walls of reinforced concrete and metal lath and plaster interior partitions. Plans provide for steam heat, elevator service, a hot water plant and vacuum cleaning. Bath rooms will have tile floors and wainscot. Exterior will be faced with cement plaster. Plans are nearly complete and figures will shortly be taken.

HOSPITAL COTTAGE—1 story and base, frame. Cost not stated. Napa, Napa Co., Cal. Architect, State Architect George B. McDougall, Sacramento. Owners, State of California. Plans for female cottages, Dozier, are complete and figures are now being called. Bids will be opened on January 14th. Plans and specifications can be secured from the office of the State Engineer at Sacramento. An official proposal appears under another heading in this issue.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

CHURCH—1 story and base, frame, \$5,000. Fresno, Fresno Co., Cal. Architects, Swartz, Hothekin & Swartz, Rowell Bldg., Fresno. Owners, Catholic Church of Lanana. The building will contain a main auditorium and Sunday School rooms. Interior will be finished in pine and redwood. Plans provide for furnace heat. Exterior of the building will be faced with resawed rustic. Plans are being prepared and figures will be called for shortly.

HALL OF RECORDS—2 story and base, Class A construction, \$100,000. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owners, Fresno County. The Grand Jury has recommended that the plans of Architect Mathewson be adopted for the new Hall of Records. His design shows a classic building with eight large stone columns across the front. Entrance will be finished in marble and tile. The first floor will contain offices of the County Auditor and Assessor while the entire second floor has been given over to the County Recorder. Construction will be fireproof, with exterior walls and floors of reinforced concrete and interior partitions of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwood and metal. Metal furniture and metal window sash and frames are specified. There will be steam heat, oil burning system and vacuum cleaning plant. An additional \$30,000 is to be spent in furnishings. Plans are being prepared.

FLATS—2 story and base, frame, \$7,000. Fresno, Fresno Co., Cal. Architects Smith, Stewart and Glass, Republican Bldg., Fresno, and 244 Kearny street, S. F. Owner, George Shorling.

The building will be erected at the corner of H and Stanislaus streets and will contain four modern residential flats. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. Each flat will have an open air sleeping porch. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Exterior will be covered with rustic. Plans are complete and figures are being taken.

HOTEL—2 story and base, brick \$40,000, Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Herman Granz. The building will be erected at the corner of Inyo and I streets, covering a ground area of 100 by 110 feet. There will be seven stories on the first floor, besides the hotel entrance and lobby. Upper floor will contain about fifty guest rooms and a number of public and private baths. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Stores will have large plate glass windows and patent store fronts. Exterior will be faced with pressed brick. Plans are being prepared.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCES—1 and 2 story and base, frame, cost not stated, Stockton, San Joaquin Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: W. H. Thompson, 410 East Market street, 2 story frame, \$5,200; Albert Nelson, 1421 East Channel street 2 story frame, \$2,200; Hans Axel, 425 South East street, 2 story, frame, \$2,500; Ben R. Farrar, Stockton, 2 story, frame, \$3,000; C. A. Leipelt, 321 East Park street, 1 story cottage, \$800; and C. A. Eldridge, Poplar and Center streets, 2 story, frame, \$2,250.

RESIDENCES—4 2-story and base, frame, \$2,500 to \$3,000 each, Sacramento, Cal. Architect, none. Owner, E. A. Pierce, 2267 1st avenue, Sacramento. These houses will be erected in the Baxter Tract and each has been designed to contain seven rooms and bath. Interiors will be finished in pine, redwood and some hardwood veneer. Oak doors will be used in the principal rooms. The more expensive houses will have furnace heat as well as open fire places. Mantels will be of tile and brick. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with cement plaster on metal lath, rustic, shiplap and shingles. Plans are complete and the work will be done by Day Labor. Materials are being purchased.

LIBRARY—2 story and base, Class A construction. Cost not stated, Sacramento, Cal. Engineer, Givan, City Engineer, Sacramento. Engineer Givan has prepared preliminary plans for the new building which is to be erected by the Carnegie Association in Sacramento. These plans have been forwarded to New York for the approval of the association. The exact location and further information relative to the building will be published later.

POSTOFFICE—2 story and base, brick and steel \$55,000, Chico, Butte Co., Cal. Architect, Oscar Wenderoth, Westminster, D. C. Owners, United States Government. Plans are nearly complete for the new Federal Building to be erected in Chico. The structure will be practically fireproof and will cover a ground area of approximately 7,500 square feet. Interior finish will be of pine, hardwood and metal. There

E. H. Williams

Chalmer Munday

Munday & Williams Attorneys-at-Law

Special Attention Given to Building
Law and Bankruptcy Cases

Telephone Kearny 2622

615 Phelan Building, San Francisco

will be steam heat. Exterior will be faced with pressed brick and terra cotta. Plans will be forwarded to this coast not later than Feb. 10th. An official proposal will be published in these columns.

SCHOOL—2 story and base, reinforced concrete. Cost not stated, Eureka, Humboldt Co., Cal. Architect, William H. Weeks, 75 Post street, S. E. Owners, Eureka Union High School District. Architect William H. Weeks has completed working drawings for the new High School building, which is to be erected in Eureka, Humboldt County. The building will cover an area of 214 feet by 180 feet and is designed in the classic style. Construction will be of reinforced concrete except the upper story, which will be of the slow burning type. Exterior is to be faced with cement plaster in imitation of stone. Eight class rooms, a principal's office, the teachers' rooms, the bookkeeping and typing department and the assembly hall take up the space of the first floor. All class rooms throughout the building are equipped with book-cases and teacher's closets. The assembly hall has a seating capacity of 700 students and will be used for a study hall. The floor is level, but the stage is raised and built on a slant. This room is one of the most artistic in the building. As additional equipment, along with several other rooms, it has a complete motion picture outfit, including a fire-proof box for the moving picture machine. There are a total of five exits

to the hall, three main and two fire

exits being provided. The library opens off the assembly hall. The second floor is given over to five class rooms, two science rooms, the biological, chemical and physical laboratories, a girls' rest room and storage rooms. The drawing rooms are also located on this floor and have both side and ceiling lights, regulated by shades, which will permit of the adjustment of the lights and shadows as desired. The chemical laboratory is absolutely fire-proof. Bids for the work are now being taken.

STORES AND OFFICE—1 story and base, brick and steel, \$13,000, Sacramento, Cal. Architect, E. C. Hemmings, Sacramento. Owners, West Sacramento Co. The building will be erected in West Sacramento and has been designed to contain one store and twenty-two modern offices. Interior finish will be of pine and hardwood. Some marble and tile will also be used. Metal window sash and frames are specified. Exterior of the building will

be faced with cut stone. Plans are complete and figures are being taken.

Contracts Awarded.

JUDGE HALL—3 story and base, brick. Cost not stated. Porterville, Tulare Co., Cal. Architect, Joseph L. Roberts, Monache Bldg., Porterville, owners, Porterville Odd Fellows' Association. Contractor, A. L. Lindley, Porterville. Contract price not stated.

LOS ANGELES AND SOUTHERN CALIFORNIA.

LOT 11—3 story and base, brick and concrete. Cost not stated. Los Angeles, Cal. Architect, James A. Farwell, Story Bldg., L. A. Owners, J. W. Burns and Frank L. Spedding. The building will be erected at the corner of New High and Second and Park streets covering an area of 100 by 128 feet. Construction will be of concrete. A type of material with reinforced concrete walls, floor and roof. The interior partitions will be of hollow tile and metal lath and plaster. There will be a total of 7

guest rooms, nearly all of which will have private baths. Reception halls and parlors have been provided for on each floor. Main floor will contain the general offices, lobby, parlors, dining rooms and stores. Marble and tile will be used in the corridors. Plans provide for steam heat, vacuum cleaning, hot water system and six elevators. Metal window sash and frames are specified. Exterior of the building will be faced with tile and terra cotta. Plans are being prepared.

Contracts Awarded.

RESIDENCE—2 story and base, frame, \$25,000. San Juan de Capistrano, Orange Co., Cal. Architect, A. B. Benton, 114 North Spring street, L. A. Owner, John Forster, Contractor, F. R. McCabe, 1306 West 50th street, L. A. Contract price, \$25,000.

HOTEL—4 story and base, Class C construction, \$42,000. Los Angeles, Cal. Architect, E. B. Rust, Title Insurance Bldg., L. A. Owner, C. A. Mathewson, Contractor, John Herington, 650 Hawthorne ave., L. A. Contract price, \$42,000.

SCHOOLS—1 2-story and 2 1-story, brick, \$76,718.56. Long Beach, Los Angeles Co., Cal. Architect, A. Burnside Sturges, Story Bldg., L. A. Owners, City of Long Beach, Contractor, J. W. Davison, 325 Walnut street, Long Beach. Contract price, \$76,718.56.

PORTLAND AND OREGON.

APARTMENT HOUSE—2 story and base, frame and concrete, \$32,000. Portland, Ore. Architect, none. Owner, E. M. Rasmussen, 277 Peerless Place, Portland. The building will be erected on 23rd street near Sady and will have a street frontage of 56 feet by a depth of 96 feet. Interior will be arranged for suites of two and three rooms with baths and wall beds. Interior finish will be of pine and redwood. Oak floors will be used in the living rooms. There will be steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and shiplap. Plans are complete and subcontracts are now being let by the owner.

SEATTLE AND WASHINGTON.

TUNNEL AND SHAFT CONSTRUCTION—\$200,000. Seattle, Wash. Engineer, City Engineer, Seattle, Owners, City of Seattle. Bids will soon be called for the construction of a 1200 ft. tunnel 12 ft. in diameter under Lake Union from Northlake to Southlake at a cost of \$200,000, which includes the cost of construction of two 150 ft. shafts 16 ft. in diameter. Bids for the shafts which were opened recently have been rejected and new bids will be figured on a basis of construction to two different levels and price for both shafts and tunnel.

GRAIN ELEVATOR—Reinforced concrete construction. Cost not stated. Seattle, Wash. Engineer, Port of Seattle Commission, Seattle, Owners, City of Seattle. At a special meeting of the Port of Seattle Commission a resolution was passed directing the engineer to prepare plans for a grain elevator to be erected in the East Waterway. The structure is to have a capacity of 5000 bushels and is to be fireproof. No estimate of the cost of structural

details can be given at this time. Further mention will be made of the work as plans progress.

HOTEL—6 story and base, brick and steel, \$60,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. The building will be erected at the corner of 6th avenue and Jackson street and will cover an area of 60 by 120 feet. Several stores and the main office and hotel lobby will occupy the first floor. Upper floors will be subdivided into a total of 120 guest rooms and a number of public and private baths. Metal window sash and frames and some marble and tile work will be specified. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition. Exterior will be faced with pressed brick. Plans are being prepared.

GARAGE, SAUCER TRACK AND GRAND STAND—Concrete and frame construction, \$75,000. Seattle, Wash. Architect, Julian Everett, Walker Bldg., Seattle. Owners, Seattle Motor Speedway Association. These buildings will be erected at the Renton Junction Track and will consist of a large fireproof garage, machine shop and repair department. A saucer track and large grand stands are also contemplated. Preliminary plans have been approved but money is not yet available for construction. Further mention will be made of the work as the plans progress.

SCHOOL—2 story and base, brick and terra cotta, \$35,000. Seattle, Wash. Architect, W. W. Voorhees, Ellet Bldg., Seattle. Owners, School District No. 41. This work has been mentioned here before when plans were first out for figures. Revised plans have been completed and new figures will be opened on December 26th. Plans can be secured from the architect. The building will cover an area of 76 by 116 feet. There will be steam heat, a modern system of ventilation and program clocks and vacuum cleaning. Exterior of the building will be faced with pressed brick and terra cotta. Frank Stell, 552 North 89th street, Seattle, is clerk of the School Board.

DEPARTMENT STORE—1 story and base, Class A construction. Cost not stated. Architect's name not given. Owners, Hudson Bay Co. Bids for the construction of a large department store for the Hudson Bay Co. are being received. Bids to close Dec. 27th. Proposals will be received for the following work: Mason, reinforced and plain concrete, architectural terra cotta, ornamental iron, carpenter and joiner, roofing, sheet metal, plastering, painting, glazing, marble and tile. Plans are in the hands of H. V. Pratt, manager of the company at Victoria, B. C.

THEATRE—1 story and base, reinforced concrete, \$125,000. Seattle, Wash. Architect, Warren H. Althoff, Arcade Bldg., Seattle. Owners, Alaska Theatre Co. The building is to be erected at the corner of Second avenue and Seneca street. The work has been mentioned in these columns before. Plans are now being revised. The structure will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. There will be steam heat, a modern system of ventilation

and vacuum cleaning. Exterior of the building will be faced with cement plaster. Plans will shortly be out for figures.

DAM—Earth and concrete. Cost not stated. Sheldon, Wash. Engineer, City Engineer, Sheldon. Owners, City of Sheldon. Plans have been completed and figures are now being taken for a dam for the municipal water system at Sheldon. Bids will be opened by the City Council on January 15th. Plans and specifications can be secured from the City Clerk, P. D. Fairch, Sheldon.

POSTOFFICE—2 story and base, brick and stone. Cost not stated. Pocatello, Idaho. Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. H. E. Doering, 568 Maple street, Portland, submitted the lowest figures for the construction of the Federal Building at Pocatello. His bid for this work was \$93,174 for limestone and \$94,218 for sandstone. A contract has not been awarded.

Contracts Awarded.

SYNAGOGUE—2 story and base, brick and steel, \$32,000. Seattle, Wash. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owners, Cheva Bekur Cholum, Contractors, Westering Engineering Co., 502 Railroad avenue, Seattle. Contract price, \$32,000.

NOTICE TO BIDDERS ON FEDERAL BUILDING.

The following circular letter has been received at this office from the Treasury Department at Washington:

LOCAL MATERIALS AND LABOR.
Circular Letter No. 11.

TREASURY DEPARTMENT,
Office of the Supervising Architect,
Washington, D. C., Nov. 20, 1913.
To whom it may concern:

The Department is frequently requested to include in its specifications for the construction, etc., of Federal buildings the requirement that the successful bidder for the work shall use a particular material, fixture, appliance, or method, or that certain of the materials and labor to be used in the construction of the buildings must be obtained in the localities in which they are to be erected. The Department is compelled to deny these requests for the following reasons:

The law requires that proposals for the construction of Federal buildings shall be solicited by public advertisement unless the public exigencies require the immediate delivery of the articles or performance of the service sought to be obtained. The obvious purpose of the law is to secure through broad competition the lowest terms obtainable. This object would be defeated if bidders were restricted to the products of any particular State or locality, or if the bidding were similarly restricted to residents of any particular section of the country.

The Department always declines to indicate by name or brand the particular materials, fixtures, appliances, methods, etc., to be used, but specifies the grade of both materials and labor. Bidders are free to procure these anywhere obtainable, provided they meet the specification's requirement.

Nothing in the specifications for the different buildings prevents local contractors from bidding on the work. Nor is there ever anything in the Department's specifications which would prohibit a successful bidder residing elsewhere from obtaining his materials or labor from the manufacturers or dealers and the artisans of the locality in which the proposed building is situated, provided the specification requirements, as to quality, etc., are met.

The Department is always gratified whenever local materials and labor are found to answer its requirements, but it can not undertake to restrict competition by limiting bidders, to local materials and labor. Whenever the Department has information concerning an available local stone or face brick, it endeavors to draw its specifications so that proposals may be submitted on these materials, but can not do so to the exclusion of materials of the same class produced elsewhere.

Those interested in the development of local industries or the employment of local labor are always free to bring the same to the attention of the successful bidder for a particular Federal building. Whenever materials, etc., the use of which it is sought to have the Department specify or require, are submitted for approval by a contractor for a Federal building, they are invariably given due consideration.

(Signed) W. G. McADOO,
Secretary.

UNITED STATES CIVIL-SERVICE EXAMINATION.

CIVIL-ENGINEER STUDENT CATEG.

January 7, 1914.

The United States Civil Service Commission announces an open competitive examination for civil engineer student, for men only, on January 7, 1914. From the register of eligibles resulting from this examination certification will be

made to fill vacancies as they may occur in this position in the office of Public Roads, Department of Agriculture, at salaries of \$720 per annum, and in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

An appointment as a result of this examination, and satisfactory service in the position, will afford young engineers an excellent opportunity to acquire experience in highway engineering. A part of the time will be devoted to laboratory and office work and the remainder to practical road building in different parts of the United States. The appointee is thus enabled to become familiar with these phases of the work. As this work involves considerable travel throughout the United States, all traveling expenses, and subsistence not to exceed 30 days on any one assignment, will be paid by the department.

As insufficient eligibles were secured from the examinations for this position held on April 9, 1913, and August 6, 1913, qualified persons are urged to enter this examination.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

Subjects.	Weights.
1. Mathematics and mechanics, pure and applied	50
2. Surveying, construction, and materials of construction	50

Total

An educational training equivalent to that required for graduation in civil engineering from a recognized school or college is a prerequisite for consideration for this position.

No sample questions of this examination will be furnished.

Age, 20 years or over on the date of the examination.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply for application Form 1312 to the United States Civil Service Commission, Washington, D. C., or the Secretary of the local United States Civil Service Board, Post Office Bldg. No application will be accepted unless properly executed and filed with the Commission at Washington in time to arrange for the examination at the place selected by the applicant. In applying for this examination the exact title as given at the head of this announcement should be used.

Issued December 1, 1913.

CIVIL SERVICE EXAMINATION.

TOPOGRAPHIC DRAFTSMAN, COPYIST TOPOGRAPHIC DRAFTSMAN.

January 7-8, 1914.

The United States Civil Service Commission announces an open competitive examination for topographic draftsman and copyist topographic draftsman for both men and women, on January 7 and 8, 1914. From the register of eligibles resulting from this examination certification will be made to fill vacancies as they may occur in the positions of topographic draftsman and copyist topographic draftsman, unless

it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The salary of the position of topographic draftsman ranges usually from \$1,000 to \$1,500 per annum, and for copyist topographic draftsman from \$900 to \$1,500 per annum.

Competitors will be examined in the following subjects, which will have the relative weights indicated:

TOPOGRAPHIC DRAFTSMAN, Subjects.	Weights.
1. Drawing a specimen of topographic drawing will be given for reproduction (in india ink)...	
2. Lettering (tests of short words in different styles of lettering, and numbers are given).....	35
3. Mathematics (comprising arithmetic, algebra and including problems involving quadratics, plane and solid geometry, plane trigonometry, logarithms, mensuration and projections).....	50

Total

Time allowed, two days of seven hours each.

Competitors who fail to attain an average rating of at least 70 in the subjects of drawing and lettering will not be eligible for appointment. Not more than five hours will be allowed on the second day for the work in lettering. No submitted drawings will be accepted. Competitors who average 70 per cent or over in the subjects of drawing and lettering may also have their names entered on the copyist topographic-draftsman register, provided that they state in answer to question 1 of the application that they desire both examinations.

All topographic-draftsman positions in the Departments at Washington are filled from this register, or, if there are no eligibles thereon, from the copyist topographic-draftsman register.

COPYIST TOPOGRAPHIC DRAFTSMAN.

Subjects.	Weights.
1. Drawing (a specimen of topographic drawing will be given for reproduction in india ink)...	50
2. Lettering (tests of short words in different styles of lettering, and numbers are given).....	50

Total

The tests in drawing and lettering are identical with those given in the topographic-draftsman examination. Competitors who take both examinations will take these tests but once. No submitted drawings will be accepted.

Time allowed, two days of seven and five hours, respectively.

ACCIDENT BOARD ISSUES ADDRESS.

Mode of Operation of State Insurance Fund Outlined.

The State Industrial Accident Board has issued the following address to employers relative to the workmen's compensation act and the insurance and safety act, which go into effect on the first of the year:

Commencing January 1, 1914, employers will be held liable under the workmen's compensation, insurance and safety act for any accidental injuries sustained by employees while at work. The State, through its compensation insurance fund provided for un-

der the act, has prepared to insure employers against such loss at the lowest standard rates. These rates will average from 20 to 40 per cent lower than compensation rates that have hitherto prevailed in California.

"Except in the case where the workers themselves are guilty of intoxication or willful misconduct, the employer, under the law, will be held liable for any injury sustained by his employees by accident arising out of and in the course of the employment, and also for the death of any such employee if the injury shall proximately cause death. The only exceptions relate to those employees engaged in household domestic service or in the various forms of agriculture.

SURPLUS TO BE CREATED.

"After paying losses, operating expenses, setting aside required reserves and a moderate percentage to build up a surplus to meet possible catastrophe losses, the balance, if any, will be in the nature of a profit, that, in the case of stock companies, would be paid to the stockholders in dividends; but in the case of the State insurance fund it is the intention of the Industrial Accident Commission to have the policy holders reap the benefit thereof.

"This makes the State insurance fund practically a mutual company. It therefore makes to the interest of employers to give the State fund every preference and support. The fund has been organized with the same care exercised in organizing private undertakings. Insurance experts have been chosen purely on merit regardless of political faith. Employers will, therefore, have every right to expect that the fund will be conducted in accordance with the highest business principles, giving its policy holders the most perfect protection at the lowest cost.

"The fact of an employer holding an unlimited policy in the State compensation insurance fund, whatever may be its reverse will, in the event of an accident to any of his workmen, no matter what may be the cost, at once relieve the employer of any expense in the way of medical aid or compensation. The entire burden will be assumed by the fund, and the injured workmen will receive the best medical services and every penny of compensation to which, under the law, they may be entitled.

RELIEVED OF LIABILITY.

"In the event of a catastrophe loss wiping out the reserve of the State fund, however, large or small such reserve may be, the employer is, in any event, relieved of any liability, and it is not conceivable that the great State of California would permit the injured coming under its policies to suffer the loss of compensation. This feeling should afford employers insuring with the State as policy holders, as well as their workmen, a peace of mind in itself worthy of every consideration.

"The new law goes into effect on January 1, 1914. This means that many thousands of California employers will want immediate insurance protection; it also means a great rush of applications for insurance on the part of employers on or about that date. In order, therefore, to be fully protected when the law goes into effect, it is important that employers should make

prompt application to the State compensation insurance fund at its headquarters, 525 Market street, San Francisco.

"In making such application the employer takes no risk in the matter of rates, since the State Board will issue policies at the lowest possible rates established by standard companies for the State of California."

DYNAMITE IN PILE SINKING.

The use of dynamite or other high explosives in sinking concrete piles has attracted a great deal of attention. A Swiss concern "utilizes the mushroom type of certain patented piles, but its novelty rests in the fact that the enlarged base is made by the use of dynamite or some other high explosive. An iron tube, containing a wooden pile with an iron point and a device at the upper end for deadening the blows of the pile driver, is driven into the ground. The wooden pile is then removed and a cartridge with an electric detonator is fixed in position at the bottom of the hole. The tube is then filled with wet concrete a little above the level of the surface of the ground. The iron tube is then drawn up some so as to prevent its end from becoming battered when the cartridge is exploded.

In the detonation the concrete sinks down, filling the space hollowed out by the explosion. Finally the tube is filled with concrete and drawn up gradually as the concrete is put into it. After the completion of the process and time has been allowed for the settling of the concrete, there is in position in the ground a pile with a base of greater lateral diameter than it is possible to produce by any other means and the explosion compressed the adjacent earth. In fact, one pile on this system serves the purpose of several piles of many other types, insuring great economy. By using cartridges of greater or less strength the size of the excavation made by the gas can be controlled, a cartridge 600 or 700 grams in weight makes a spherical hollow of three to four feet in diameter, according to the quality of the soil."—Record and Globe.

CONSERVATION OF FORESTS IN SWITZERLAND.

(Consul General R. E. Mansfield, Zurich.)

Because of the limited area of Switzerland and the fact that it is so mountainous, leaving only a small portion of the territory available for cultivation, the conservation of the natural resources of the country is extremely important. To this end both the Federal and the cantonal government give aid and encouragement in the way of subsidies, especially for the protection and conservation of the forests, which cover about one-fourth of the total area of the territory comprising the Confederation.

In addition to the importance of the protection and maintenance of the forests as a commercial and economic question is in the protection of life and property in the villages and communities in the mountainous districts from avalanches. The pines, firs, larches, and other trees that grow and thrive in the high altitude, and the steep slopes of the mountains offer the only

protection against avalanches and landslides, which not infrequently destroy whole villages and do great damage to communities in their devastating courses. In Switzerland only small tracts of the forests are denuded at one time. The portions from which the timber is cut are immediately replanted, and by the process of removal and replacing the forest area is always covered with growing trees.

Article 24 of the Federal Constitution, adopted by popular vote in 1887, says: "The Confederation has the right of surveillance over the police in the control of the forests. It also has the right of correction of causes of the overflow of streams and of the replanting of forests along their sources." The result of the application of the system of conservation and protection of forests in Switzerland furnishes some data that the of general interest. In 1891 the total forest area of Switzerland was 2,691,000 acres, representing 26.2 per cent of the total surface area of the country. In 1911 the forest acreage was 2,258,000, equal to 21.86 per cent of the total area of the country, an increase of 167,000.

Instead of being an expense, the forests of Switzerland are a source of profit to the Government. The method of cutting the timber is usually by contract with individuals or corporations at a fixed price per acre, for the timber, which includes the land and replanting the trees.

Berne has 392,000 acres of forest, a larger area than any other Canton in the Confederation. The Canton Grisons has 348,285 acres, Vaud 206,475, Valais 145,000, Tessin, 183,000, Zurich 98,000, Aargau 92,000, and St. Gall 89,000 acres. The Cantons with the smallest forest area are Geneva and Basel. Of the total 2,258,000 acres of forest, covering nearly one-fourth of the territory comprising the Confederation, 1,679,000 are under Government control and protection. The increase in the acreage of forests in Switzerland in recent years is due to the protective policy of the Federal and cantonal governments in the conservation of the existing forests and the forestation of additional territory.

MUNICIPAL BONDS SALES LARGER.

Municipal bond issues throughout the United States during the month of November, including state and county issues, reached a total of \$38,401,600, against \$35,061,100 the previous month, and \$9,102,519 in November, 1912. This brings the total for the eleven months of 1913 up to \$382,710,150, as compared with \$352,805,040 for the corresponding period last year.

Among the more important bond issues of states and municipalities last month were the following: Connecticut, \$1,000,000; California, \$1,675,000; San Francisco, \$2,000,000; Minneapolis, \$1,315,000; Houston, Tex., \$1,200,000; Allegheny County, Pa., \$1,100,000; North Carolina \$620,000; Rhode Island, \$250,000.

Positions Wanted

A YOUNG MAN of 26 with three years' office experience and two years' of special training at Cornell University desires a position in an architect's office. Location, California. Salary, \$20 a week. Address T. P. J., Care of Building and Industrial News, 550 Mission St., San Francisco.

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London

The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

Frank Neidick

Carpenter and Builder
Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

The Christmas observance has a subjective phase which gives it a value to all humanity. The essential element of the teaching of Christ is peace on earth, good will to men. And this is the essence of moral progress in the history of the world. In the light of recent geological investigations which places the antiquity of the human race on this earth back at least five hundred thousand years in the abyss of time, the progress of the last 1913 years is far beyond all the untold years that preceded them. The old poets were wont to place the golden age behind us. But compared to the long, long night of barbarism that preceded the Christian era the last two thousand years with all their wars and religious persecutions and bigoted intolerance are wonderful strides toward the light of day.

So with all our imperfections and seemingly turning around in the same circle we have in reality been ascending in a spiral toward a higher civilization. And as each succeeding Christmas comes we are working out by slow degrees a broader humanity, a more universal brotherhood. Each year sees legislation looking to better sanitation and better health, lightening the load of labor and giving a better chance to the under dog in the struggle for existence. The tendency is for the employer and employee to get together. The time has passed when one man can exploit the labor of his fellow men and become rich by the advantage of the law over his brother. So that the great teachings of Christ have borne and are bearing fruit in the history of the world. And the years go by and the discoveries of science strip religion of its foolish dogmas and leave its moral teachings bare in their simplicity the world will get together in a common effort for the betterment of man. To the future we must look for the Saturnian age, to the time when demerit of want and greed will be exorcised, when the Christmas spirit will at last be realized and there will in truth be a brotherhood of man.

Among the many uses for oil not the least is its use at sea in time of storm or rough weather. It is said that at the time of the destruction of the ship Volturno, a fire that a big sea was running and not until an oil burning rescue ship, that was standing by, poured oil on the waters was there much chance of rescuing the people from the burning vessel.

Such large ships as the Titanic, for instance, had out of the way almost as high as a skyscraper. To 1913 a life boat in a rough sea from the deck of such a vessel means certain

death to the occupants. So that without the use of oil it is almost impossible to escape from a wreck in a storm.

Many contrivances have been invented for placing oil on rough seas, such as rockets to be shot on the windward side of a vessel that would distribute the oil. These could even be used by life saving crews from shore. It is thus seen what a great advantage even in this direction an oil burning vessel has over a coal burning ship. Aside from economy of space the factor of safety is increased not only in safe navigation but in rescue work in time of disaster as well.

The crowd of unemployed that has been parading the streets for the past two days seems to be led by a band of robbers who are irresponsible and not inclined to work if they had the chance. Where there is a large number of unemployed the labor question is always a serious one. And an irresponsible element that creates excitement among people who are out of work are factors that have to be dealt with in a serious manner.

The more irresponsible the leaders of labor are the more serious is the question. It is invariably the case that where all kinds of labor is imported and the less assimilable are the elements the more trouble there is in the end. Thus in South Africa just now there is a great deal of trouble with the Hindu element. Great numbers of Hindus have been imported into Natal under contract for cheap labor and now the Hindu population is as great as the whites. They do not assimilate and become a part of the people so that there is a question of handling them or deporting them and the government has a contract on its hands that it can not fulfill. It has sown the wind and is reaping the whirlwind.

Hindus have taken advantage of this experience and has excluded all immigration until next March when the parliament will act in relation to the Hindu problem. The Hindus in this south are small in number and as yet a serious menace. But the time has come in this country when no race that

is not assimilable should be admitted to have a negro problem in the South as a result of the slave institution. There are enough foreign born people in the unemployed crowd of our streets of today. The time has come when our immigration should be restricted to assimilable races and to that class of those races that will make good citizens.

San Francisco and many of our cities seem to be having a carnival of crime. This is not to be wondered at when we consider the way criminals are being treated in the press and on the

stage. When criminals are Olderized and notoriety given to every phase of crime it is not a subject of wonder that the irresponsible element of humanity should resort to crime when they find themselves hard up for money or out of a job during hard times.

Now that the currency measure has been passed we may hope for some immediate action to relieve the money situation. The program of the President thus far is good. There is to be a reduction in the tariff which will mean cheaper necessities. There is an income tax which will tend to place the burden of taxation upon those best able to bear it. So that where there is a decrease in the governmental revenue in one department it will be made up in another. And when the bankers grip on the money situation is loosened and every man has a free chance on the financial market as he ought to have business will take on a healthy tone and be under the control of natural laws that should of right guide the situation.

Heretofore the Wall street bankers and the great trust magnates have absolutely controlled the situation. They have been the engineers on the steam roller and unless an individual came to them on suppliant knee and paid to them their levy he was promptly flattened out. With the government control of the banking reserve and a means of supporting independent institutions, a different situation will be developed. Instead of all being vassals of these arrogant overlords there will be individual freedom with something of an equal chance.

The public has long been bunkoed into the idea that all the financial wisdom of the world was lodged in the domes of a few overfed financiers who were mainly ignorant of any moral law. When their bluff is called people will be surprised to see how empty was their claim and upon what a bubble they had built their castle of strength and power.

Take the Parcel Post for example. The Chronicle has for years declared against. Every organ of the special privileges have shown how utterly impossible it was for the government to make a success of it. Look at the result. Even the stores of San Francisco send their parcels to be delivered in the city by the post. And the government is making money even in its present trade state. The express rates have been cut in two and they are still doing business. The howl that employees wages would be reduced has proved to be but a hollow pretense for when the facts have become known there was nothing else to it than that the public was being robbed through public franchises and had been robbed for years. Let the good work go on for when the money question is solved the most important thing of all will be settled.

Electrical Protection of Ships' Hulls.

The corrosion of the exterior of ships' hulls is very largely due to electrolytic action is pretty extensively recognized. The joined plates, immersed in sea water, form so many batteries owing to the chemical dissimilarity of the plates, and in each case the positive plate becomes pitted. It is well known that boilers,

condensers and the like may be protected against electrolysis tending to destroy them by attaching plates of zinc in their interiors, since by the electro-negative relation of the iron of the boiler or condenser to the zinc the latter is corroded and the iron rendered immune from corrosion. The new method of protection of the hull is to make the latter electro-negative to a specially disposed iron anode set in the hull in contact with the sea water. The special anode or anodes, insulated from the hull, are connected to an electric generator the other pole of which is grounded on the hull. In this way the destructive action of the sea water is directed to the anodes alone; and the merit of the idea lies in fact that these anodes are easily and cheaply renewed when necessary.

IN AN ARGUMENT.

Benjamin Franklin confides to the readers of his "Autobiography" the method which experience has taught him is the most effective for convincing people in an argument. The person who really desires to convince another, he says, should not be dogmatic. He should preface his argument with the remark, "I am inclined to believe," or, "Perhaps I am mistaken, but I think." In this way, according to Franklin, antagonism is disarmed, and the person is put in a receptive attitude.

It is rather difficult to lay down general rules of this sort, for method that may fit one personality may not be at all adapted to another. One man may be naturally diplomatic, and another may never get results from going around in his stocking feet. Franklin was highly successful with his diplomatic methods. But the prophets of Israel would have scorned anything so wobbly. "Thus saith the Lord," backed their messages, and they depended on a tremendous positiveness of statement to help bring conviction.

A man who has had unusual success in winning over hostile men to the support of measures he advocates, says he has found nothing like concrete cases for the basis of his appeal. The average man, he finds, is indifferent to general principles. But if an actual episode from life is put up to him, he instinctively takes the right side unless hopelessly blinded by self-interest.

You may find a man, for instance, who proclaims himself a stickler for individual liberty—or what he calls, individual liberty—and who announces that he is against "paternalism" in government. If you should try to argue with him on general principles you would get nowhere. But if you tell him about various cases of illness from bad milk, he would agree that there should be rigorous inspection by the city.

The famous philosopher, Kant, is said to have used just one illustration in expounding his great system of philosophy. That was to show the badness of illustrations. To use them, he said, was like trying to milk a he-goat into a sieve. You got no milk and if you did you couldn't keep it.

But that one illustration is about all that an average person can remember about Kant.

IRRELESON TO THE FRONT.

The Postoffice Department is an enormously important business organi-

zation. It spends considerably more than 200 million dollars a year. It is the one department of the government in which the United States affects the lives of every family.

In Postmaster General Burleson the department has a head who measures up to the responsibility of the position. He has shown his ideals and his efficiency in his policy of extending the merit system, and in his conduct of the postal business. Now he advocates an extension of the usefulness of the service by recommending to Congress that it include the telegraph and telephone systems of the country. As he points out, these are really parts of the postal service; they are monopolistic in character, and their ownership by the government is the only practicable solution of the problems involved.

Congress will find that a strong public sentiment exists in support of the Burleson plan, which undoubtedly is approved by President Wilson. The Panama Canal has removed the doubt that once existed as to the ability of the federal government to conduct such enterprises as the telegraph and telephone systems.—Kansas City Star.

The Examiner editorially points a moral in the case of the burglar Bastian. That artist in his particular line of work seems to have had a criminal record in the East before he ever came here and the tale he told the officers of the law seems to have been principally moonshine.

As this was a skinning mark for sympathy and a good subject for the brand of pathological psychology which Fremont Older is handing out to his readers the result is not unexpected. Bastian seems to be a cunning criminal, a man in good health, in his right mind and having an advantage of knowing a trade whereby he could make a living. What excuse then has he to offer for burglary or wherein is he any more wronged by society than many thousand of others who are daily battling for their bread and at the same time leading honest lives.

While the Examiner's criticisms are just its own methods are usually about as open to criticism. It is anything to get circulation in the same manner as the theatres get business for the box office.

MAN'S POSSIBILITIES.

Man is the crowning work of God on earth; but though so nobly endowed, we must not forget that we are the "lucky children of a race whose lowest forms lie prostrate within the water, having no higher aspiration than the desire for food; and we cannot understand the possible degradation and moral wretchedness of man, without knowing that his physical nature is rooted in all the material characteristics that belong to his type and link him even with the fish. The moral and intellectual gifts that distinguish him from them are his to use or abuse; he may, if he will, abjure his better nature and be veritable more than man. He may sink as low as the lowest of his type, or he may rise to a spiritual height that will make that which distinguishes him from the rest far more the controlling element of his being than that which unites him with them. —Agassiz.

or administrative bodies sometimes may be authorized to act judicially, the court says: "It is unnecessary for the determination of this point to advert to the familiar distinction between courts of limited and general jurisdiction."

In the case of *in re Jarwin*, 174 Mass. 151, the Supreme Court of Massachusetts, one of the ablest courts of any State, held that in conferring the power to fix water rates on two Supreme Court Justices the legislature was not compelling the Supreme Court to perform legislative functions, but was compelling it to perform judicial functions. At first that court felt inclined to think it was asked to act in a legislative capacity, but on more mature consideration it admitted the function was judicial in character.

Thus our Board of Supervisors sits as a special tribunal and adjusts a proper rate to be observed by the gas company in compliance with its contractual obligation fixed by our State constitution. While so sitting, the board must hand down its decree like any other tribunal and may not do anything further in excess of its judicial power in the premises. Hence, as the board in the gas rate fixing ordinance makes the non-observance of the rates fixed therein a misdemeanor punishable by a certain penalty, it clearly violates its judicial power in the premises. On its face therefore the ordinance violates the constitution of the State. This ought to be so plain that in the future no Board of Supervisors in this city will have the hardihood to repeat the performance.

To bring the point home, read the decision of the U. S. Supreme Court in the case of *Gompers v. Buck Stove Co.*, 221 U. S., where it drew distinction between a civil and a criminal contempt, and said, suppose a man should be sued in a civil action for damages for assault and the court should render a decision ordering him to be committed to jail for committing the assault—such a decision would be beyond the jurisdiction of the court. Hence the criminal ordinance passed by the supervisors cannot on any pretext stand as a judicial decree determining the rates to be charged by the gas company for rendering services to the consumers of gas. And further, this ordinance does not apply only to those persons using the public streets, but is applicable to all persons selling the commodity, and makes no reference whatever to the persons and corporations proposing to derive their power under section 19 as aforesaid.

It may be admitted, though not necessarily, that the company is right when it states that in attempting to enforce a void criminal ordinance, the Board of Supervisors is violating the provisions of the fourteenth amendment, and on that ground the federal court has a valid claim to take jurisdiction of the case.

But in arriving at that result all parties concerned are worked hard and, for had our supervisors and the legal representatives of the city acted as provided in the State constitution and general law of the State, the federal court could not successfully establish a right to overturn the rate fixed by the supervisors in conformity therewith.

If, an act of Congress, adopted

March 4, 1913, a State law can be enjoined only by a U. S. court in which a justice of the supreme bench, or a justice of the Circuit Court of Appeals is sitting with two other judges of the district court, after notice to the Attorney General and Governor of the State, whereupon such court will determine the question whether such law is violative of the federal constitution, and an appeal is granted immediately to the Supreme Court of the United States. The action must have the right of way over other pending actions and must be given an immediate hearing on an application for a preliminary injunction, and an appeal from the granting or denying of the preliminary injunction without waiting for final determination lies to the Supreme Court which will determine whether or not such law is or is not in violation of the federal constitution. And this act contains a further provision, more difficult to construe, which says that if at any time before the final determination action is brought in a State court to enforce the law, upon an order of the State court staying proceedings, all proceedings must be stayed in the federal court, until the State court may itself determine upon the constitutionality of the law.

In the foregoing act of Congress the city's legal representatives may perhaps find some remedies not hitherto considered in connection with this gas litigation. At any event, the State must be made a party to the action; if not and if the point is pressed, it is obvious that the case may not proceed further in the court where it is now pending.

The essence of the pleading of the company is that it has a franchise to the use of the streets. This does not appear to be denied by the city; whereas it only has a conditional franchise, and the object of their suit is to evade the condition upon which the franchise depends.

The point herein urged by Mr. Lister that the Board of Supervisors act as a judicial body has been lately sustained by our Supreme Court in deciding the Telephone cases where his contention is upheld that the Railroad Commission is a judicial body in fixing rates.

That these questions should drag out week after week and month after month while the people have to pay meanwhile is a thing that ought to be remedied. And in the opinion of most people the fault lies with the City Attorney's office. Thus Judge Van Fleet in his opinion concludes with the following comment:

"I deem it not inappropriate to add that, in my judgment, the difficulties growing out of the question here presented could be largely avoided or reduced to a minimum by a greater diligence in pushing these rate-fixing cases to a conclusion. Indeed the question of maintaining the status quo only becomes a serious one because of the long delay usually experienced in having such cases prepared for final hearing something for which, so far as my observation goes, there exists no adequate reason inhering necessarily in their nature. As counsel are well aware, this delay does not rest with the Court. By reason of the fact that these cases usually involve numerous and complicated questions of fact, the Su-

preme Court has indicated that they are proper cases to be sent to the Master for the taking of the evidence and finding the facts. (*Chicago, etc. R. Co. vs. Thompkins*, 176 U. S. 167.) This can be done immediately the pleadings are in, and the Master will be found ready and willing to give them early hearing; and when in a state for final hearing the Court is always ready to lend its aid to facilitate a prompt determination. But beyond this the Court is powerless, since it does not lie with it to prepare a case for presentation, nor can it decide it until ready for submission. I make these suggestions in no censorious spirit, but with the hope that in the future in disposing of this class of litigation, involving, as it always does, questions of public interest, it may be found compatible with the other obligations of counsel and the court to give it a readier disposition.

"An order will be entered granting a modification of the restraining order in accordance with the suggestions herein indicated. Such an order counsel may prepare.

CONCRETE TILE BLOCKS AT PANAMA CANAL.

Some of the permanent buildings, primarily the administration building, along the Panama Canal, are to be constructed of a patented hollow concrete tile block. Operations at the factory near Corozal, where these blocks are to be made, was started last month. The process of manufacture is the invention of A. A. Panley, and is known at the "Wet," or "Steam" method in contradistinction to what is ordinarily called the "dry" process. The exclusive right of manufacture on the Isthmus was acquired by the Canal Commission, and the inventor personally supervised the installation of the moulding machinery.

Concrete for the blocks is mixed in the following proportions: Four and a half parts of punta Chaume sand; six parts of screenings from Ancon quarry, and three parts of cement. The materials are hoisted by an elevator to a platform at the top of the building and dumped into a 45-cubic yard concrete mixer. This mixer discharges by means of a 2-way chute into two wooden troughs, each served by an agitator, consisting of an iron rod to which are attached a series of blades. The agitators move forward and backward horizontally, the passing of the blades through the mixture serving to keep it constantly stirred up. The object of the agitators is to prevent the concrete from stiffening and to give it the proper age. The agitator troughs are provided with valves, one to each of the twelve moulding machines. These machines are arranged in two rows, six machines on each side of the agitator troughs, and are capable of producing blocks of the following sizes: 12 by 12 by 18 inches, for foundations, or walls; 8 by 12 by 16 inches, for corners; 6 by 12 by 12 inches and 4 by 12 by 12 inches, for partitions; and 3 by 12 by 12 inches, for interior columns.

Each moulding machine is of cast steel construction they are raised a short distance, thus placing the top of all machines on a level line 65 inches above the floor, and are capable of turning out four blocks at a single operation, except the 12 by 12 by 18-

inch machines, which turn out three blocks per operation. The forms are enclosed within a double cast steel lining with a space between for the admission of steam. In moulding a block, the first step is to place a cast iron frame, called a palatte, having the shape of the solid portion of the required block, at the bottom of the mould; this acts as a base and support for the block. The valve in the agitator trough is then opened, and the concrete is allowed to flow down a short chute to the top of the mould. The workman in charge of the machine, using a trowel, then diverts the thin or wet concrete into the crevices around the forms until all are filled level with the top. Steam which may be graduated to the desired pressure by a series of valves located beneath the machine, is then turned on for a period of four minutes. The steam causes the mixture to heat until a sufficient amount of moisture is evaporated and the thin concrete stiffened so that it will stand alone, when it is turned out of the mould by means of a crank, which pushes the palatte, and the block which rests upon it, upward until they are in the clear above the top of the machine. Careful handling at this stage is necessary, the blocks being lifted from the mould and transferred to short lengths of wooden planking placed on receiving racks, or elevators, by means of a wooden device which clamps the sides of the block closely and also fits beneath the palatte. There are six of these receiving racks or elevators, so constructed that when the first plank or shelf is loaded with tile, the turning of a crank lowers the shelf about 20 inches and another plank is placed for loading, on the angle iron brackets which automatically appear at the top of the rack; this result is obtained by spacing brackets, at equal distances of 19 1/2 inches, along four endless chains which pass over sprockets actuated by the crank. Each elevator has a capacity of four loaded shelves. The elevators are set with the top shelf on a level with the top of the tile-making machinery, and each elevator serves two machines. The blocks are removed from the elevator to the curing rooms, or alleys, by a special truck provided with arms, which when extended under the elevator shelves, and raised by means of a lever on the truck, remove the planks and their loads. From the elevator, the same resting securely on the arms of the truck.

The curing room consists of 24 galvanized iron compartments, each about 15 feet long, four feet wide and eight feet high, entirely enclosed, and equipped with racks in tiers. Twelve of these compartments are situated on one side of the plant, and 12 on the other. In these rooms, the blocks are given their perfecting treatment, which consists of a combined steam and water-dripping process, calculated to facilitate the setting up and hardening of the blocks, so that within a period of 48 hours they are ready to be removed to the storage yard.

Each mould is attended by one man, with a helper for each two machines. The men now employed are all new to the work, and have not yet attained proficiency. It is proposed to place a double shift in effect shortly, one shift working from 7 a. m. to 3 p. m., with a half hour for lunch, and the other shift working from 3.30 p. m. until

midnight, with a half hour for supper. Under this arrangement, with the plant operated at its maximum capacity, it is estimated that about 5000 blocks can be produced during the 16 hours of labor. The loss in defective output is expected not to exceed .02 per cent. The storage yard consists of a large space adjacent to the plant on the west, which has been leveled off, with trucking ways concreted through it. A railroad track for loading the blocks on cars extends along the outer side of the yard.

Each unit of the machinery is operated by individual electric motors, the power being furnished from the Miraflores station. Steam is generated by two boilers located in a shed outside the plant.

FEATURES OF THE NEW EQUITABLE BUILDING.

Some interesting statistics regarding the new Equitable building, now under way on the site of the old structure in lower Broadway, New York City, will convey in a measure at least the magnitude of the undertaking.

Among other things there will be required 33,000 barrels of cement in the foundations, 120,000 cu. ft. of cement in the building itself, 1,215,000 cu. ft. of broken stone, 168,000 cu. ft. of terra cotta, 1,000,000 hollow tiles, 350,000 sq. ft. of marble trim and material for flooring, 1,350,000 cu. ft. of sand and 17,500,000 common brick. This estimate is about 5,500,000 more brick than was required for the Pennsylvania railroad terminal and about 10,000,000 more than was used in the construction of the twin Hudson Terminal buildings. There will be 152 steel supporting columns, the weight of the heaviest of which will be 32 tons. The structural steel work will require 18,000 gallons of paint to coat it.

There will be 50 elevators in the building so arranged that if a firm occupies several floors it will have its own private elevator. All the elevator shafts will be enclosed in brick and will have fireproof doors. The stairways, enclosed completely in tile or brick, also have fireproof doors. The building will contain 3,000 windows and all offices will have wash-basins with hot and cold water connections.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$28,000. Architect, M. Mattanovich, David Hewes Bldg. S. F. Owners, Lachman Bros. This building has been mentioned here before when plans were first started. The building will be erected on the east line of Mission street south of 16th, and has been designed for stores on the first floor and a number of apartments on the upper floors. The structure will have a frontage of 75 feet and a depth of 35 feet. There will be a total of 42 apartments of two and three rooms. All suites will have private bath rooms and wardrobes. Plans provide for steam heat and a vacuum cleaning system and hot water supply. Interior finish will be of pine with some elm panels. Bath rooms will have composition floors and the wainscot. There will be pattern stone fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be carried on by Beach and Heffernan, David Hewes Bldg. Material bids are now being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architect, A. Reinhardt Benke, Hunsolt Bldg. S. F. Owner, Mrs. Hattie Becker. The building will be erected on Presidio avenue and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and oak wood. Oak floors will be used in the living rooms. Plans provide for steam heat and hot water supply. Bath rooms will have composition floors and the wainscot. Entrance will be finished in the red marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN FRANCISCO—Apartment house alterations, 3 story and base, frame, \$6,500. Architect, C. O. Clausen, Phoenix Bldg. S. F. Owner, Mrs. Willis. The present three story flat building located on Green street near Larkin will be altered into a modern apartment house containing six two and three room suites. Interior finish will be of pine throughout. There will be a new steam heating system, wall beds and hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now out for figures.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$12,000. Architect, Chester H. Miller, Dufzel Bldg. Oakland Owners, Midway Co. The building will be erected in Adams Point and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine with elm panels and oak floors in the living rooms. Plans provide for steam heat and a hot water supply. Vacuum cleaning will also be installed. Entrance will be finished in marble. Exterior of the building will be faced with cement plaster on metal lath. A garbage incinerator will also be installed. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 2 story and base, frame, \$17,000. Architects, B. D. King and J. C. Taylor, Consolidated Realty Bldg. L. A. Owner, E. A. Sheehy. The building will be erected on a site covering an area of 50 by 120 feet. First floor will contain three stores, besides the entrance to the apartments. There will be 10 rooms divided into 14 suites on the second floor. Plans will provide for steam heat and a hot water supply. All suites will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath

rooms. Interior finish will be of pine. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared. The work will be done by Day Labor.

BRIDGES AND DAMS.

PASADENA, LOS ANGELES CO., CAL.—Bridge, reinforced concrete, \$50,000. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Plans are now being prepared for a reinforced concrete bridge over the Arroyo Seco at California street. The structure will be 379 feet long with a 28 foot driveway and two five foot sidewalks. There will be five spans. An ornamental system of electric lighting will be installed. Plans and specifications and full particulars can be secured from the City Engineer at Pasadena. Further mention of the work will be made in these columns when figures are called.

LOS ANGELES CAL.—Harbor work, \$1,147,400. Engineer Jubb, Los Angeles. Owners, City of Los Angeles. Estimates of cost submitted to the Harbor Commission by Harbor Engineer Jubb show that the cost of completing harbor improvements on the Mormon Island Channel in the inner harbor, the Water street wharf and harbor improvements on municipal dock No. 1 in the outer harbor including transit sheds, etc., and the construction of an approach from Fourteenth street to municipal dock No. 1, will aggregate \$1,147,400. The estimated cost of completing pier A or the improvements on the Mormon Island Channel in the inner harbor is summarized as follows: Street improvements including Fries to Front, \$28,000; water main from Fries street, \$8,000; Alta Planing Mill, extra for shed and wharf changes, \$12,000; water side doors, \$7,800; 450-foot wharf extension, \$20,000; 405-foot shed, including water and lighting, \$51,000; railroad tracks, \$11,000; 450-foot street extension, \$5,000; additional dredging, Slip No. 1, \$25,000; total, \$178,400. Water street wharf estimate follows: Shed, 100x150 feet, \$51,000; sprinkler system, \$10,000; electrical system, \$2,000; water mains, \$3,000; paving, \$25,000; railroad tracks and trestle, \$9,000; total, \$100,000. Municipal dock No. 1 estimates: Steel shed, 100x1800 feet, \$225,000; sprinkler system, \$20,000; tank and street mains, \$15,000; electrical layout, \$7,000; equipment \$15,000; paving shed and wharf deck, \$50,000; track improvement, \$60,000; streets, \$15,000; administration and engineering, \$17,000; total, \$414,000. Harbor Boulevard estimates: Timm's Point excavation, \$78,000; Fourth street to Fourteenth street excavation, \$25,000; Palos Verdes to Fourth, 145,000 yards at 20 cents, \$12,500; Harbor Boulevard paving, 600,000 square yards at 20 cents, 120,000; Timm's Point wharf, 2000 feet, at \$75, \$150,000 moving blocks, grading, etc., \$2,000.

PORTLAND, ORE.—Dock and bulkhead construction. Cost not stated. Engineers Harbor Commission, Portland. Owners, City of Portland. Plans and specifications for a bulkhead to be built in connection with Public Dock No. 1 at the foot of 15th and 17th streets are now being prepared in the office of the Public Dock Commission and will be completed within a few days, when bids will be called for.

Plans are also completed for the proposed East Side Dock to be erected between E. Oak and Washington Streets. This will be similar in design to the dock now under construction on the West side by the Lewis A. Hicks Co. It will be 525 feet long and will be of concrete and mill construction. This will be called for about January 10.

Contracts Awarded.

TACOMA, WASH.—Bridges, 2 steel construction. Cost not stated. Engineer, A. R. Cook, Chief Engineer Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific R. R. Co. Contractor, Widell Co., Mankato, Minn. Contract price, 15th street bridge, \$150,000; 21st street bridge, \$100,000.

CHURCHES.

HOLLYWOOD, LOS ANGELES CO., CAL.—Church, 1 story and base, brick. Cost not stated. Architect, Frank T. Kegley, Consolidated Realty Bldg., L. A. Owners, Hollywood Presbyterian Church. The design is in the classic style. Main auditorium will have a seating capacity of 400 people and the lecture hall 250. Besides these rooms plans show a pastor's study and social rooms. There will be a central heating system, art glass windows and pine trim. Exterior of the building will be faced with cement plaster. Plans are being prepared.

Contracts Awarded.

LOS ANGELES, CAL.—Church, 1 story and base, frame and artificial stone, \$20,000. Architect W. H. Slack, 617 South Evergreen street, L. A. Owners, Euclid Heights Methodist Church. Contractor, W. H. Slack, 617 South Evergreen street, L. A. Contract price, \$20,000.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Stables, etc., 2 story and base, frame and corrugated iron, \$11,000. Architect, none. Owners, California Fruit Cannery Association, 120 Market street, S. F. The building will be erected on the north side of Bay street west of Taylor covering an area of 85 by 173½ feet. Stalls will be equipped with metal feed boxes, water distributing system and other modern equipment. Phoenix barn doors are specified. Plumbing and electric work will be let separately. Exterior of the building will be covered with corrugated iron. Roof will be of fireproof asbestos. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Winery addition, 2 story and base, reinforced concrete, \$20,000. Architect, L. Mastropasqua, 550 Washington street, S. F. Owner, M. Sattal. An extensive addition will be made to the plant at the corner of 27th and Bryant streets. New portion of the building will be fireproof throughout with reinforced concrete walls and floors. There will be a number of large wooden tanks. Metal window sash and frames will be specified. Exterior of the building will be faced with cement plaster. Plans for this work are now being prepared.

WINEHAVEN, CONTRA COSTA CO., sewerage system, etc., reinforced concrete construction, \$50,000. Architect, none. Owners, California Wine Association, 150 Townsend street, S. F. The California Wine Association have had plans prepared for a large sewer sys-

tem to be installed at their \$2,000,000 plant at Winehaven. The company will construct about 100 cottages for their employees and install additional fire protection. Buildings will be of reinforced concrete. A total of \$50,000 will be spent for these improvements.

LOS ANGELES, CAL.—Box Factory, 4 story and base, brick and steel. Cost not stated. Architect, J. Martyn Hansen, Story Bldg., L. A. Owners, Renshaw, Jones & Sutton. The building will be erected at the corner of 9th and Alameda streets covering an area of 120 by 165 feet. Besides the factory the building will house the general offices. Interior finish will be of pine. There will be steam heat and power, metal window sash and frames and fireproof doors. An automatic sprinkler system will also be installed. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LOS ANGELES, CAL.—Factory, 6 story and base, reinforced concrete. Cost not stated. Architect, none. Owners, F. O. Hoffman and William F. Schiffl. These men have purchased a site covering a large area at the corner of Pico Boulevard and Featherston avenue and will start construction of the first unit of a food products plant within three months. The first building will be but one story high and will cost about \$50,000. A large amount of special equipment will be required. Details of the project are being handled by The Merchants' Realty Co., Van Nuys Bldg., L. A. Further mention will be made of this work.

FIRE HOUSES.

Contracts Awarded.

BERKELEY, ALAMEDA CO., CAL.—Fire house, 2 story and base, reinforced concrete, \$23,375. Architect, William H. Ratchiff Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. Contractors, Clinton Fireproofing Co., S. F. Contract price, \$23,375. Note—A complete list of the figures opened for this work appears under the heading of Oakland and Alameda County in this issue.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, brick, \$5,000. Architect, none. Owners, Egan Bros., 1150 Folsom street. The building will be erected on the north side of Folsom street east of 8th covering an area of 25 by 97 feet. The first floor will contain a store and upper floor two modern flats of four and five rooms. Interior finish will be of pine and redwood. There will be automatic water heaters and tile wainscot. Exterior of the building will be faced with stock brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, Theo W. Lanzen, Humboldt Bank Bldg., S. F. Owner, R. C. Hingley Jr. The building will be erected on the east side of 9th avenue between I and J streets and has been arranged for store and living apartments on the first floor and one large residential flat on the second. Interiors will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will be one

large open fire place with brick mantel. Bath room will have composition floor and tile wainscot. Tile will be used in the kitchen. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Naval Supplies.

On dates indicated below bids will be opened by the paymaster general of the navy for furnishing the following supplies:

Schedule 6065—Yards and Docks

To be opened January 13.

Class 1, Pearl Harbor, Honolulu, Seattle, and San Francisco—10,000 bbls Portland cement.

Class 2, Seattle and San Francisco—10,000 bbls Portland cement.

Fort Mason, Cal., Storehouse.

The following awards have been made for the construction of two reinforced concrete storehouses for the Army supply depot, Fort Mason, Cal.: M. Fisher, San Francisco, Cal., construction proper, using concrete pile construction as per alternate 10, \$118,454.

Wm. P. Scott, San Francisco, Cal., plumbing \$5,565.

Globe Electric Works, San Francisco, Cal., \$4,200 for wiring and fixtures.

H. Haslett Warehouse Co., San Francisco, Cal., spiral chutes, \$1,575.

Plumbing fixtures manufactured by the Crane Co. specified.

Bids for elevator rejected and new bids will be asked for the installation of one elevator in each storehouse instead of two elevators.

Selig Extension Canal.

The secretary of the interior has authorized the Reclamation Service to execute contract with the Orman Construction Co., of Pueblo, Colo., for excavating a portion of the Selig extension canal. Uncompahgre irrigation project, Colo. The work involves the excavation of 26,200 cubic yards of material and 4,000 cubic yards of overhaul. The contract price is \$7,199.

Portland, Oreg., Mezzanine Floors.

The following bids were received by the custodian, U. S. post office and court house, Portland, Oreg., recently for the construction of mezzanine floors in main post office workroom, Portland, Oreg.:

N. M. Hall, Portland, Oreg., \$619; 21 days.

J. H. Tillman, Portland, Oreg., \$945; Findley & Jacobson, Portland, Oreg., \$1,271; 20 days.

PROSPECTIVE BIDDERS.

Supervising Architect.

Specifications for work under the office of the supervising architect have been furnished to the following firms in addition to those previously noted in these columns:

Brigham City, Utah, Construction, January 2.

Campbell Building Co., Salt Lake City, Utah.

The George Himbliff Co. Security Building, Chicago, Ill.

King Lumber Co., Charlottesville, Va.

W. C. Boyer, P. O. Box 30, Grand Junction, Colo.

J. H. Wiese, City National Bank Building, Omaha, Neb.

Parrott Bros. Co., 305 Newhouse Building, Salt Lake City, Utah.

Grand Junction, Colo., Construction, January 6.

J. H. Wiese, City National Bank Building, Omaha, Neb.

King Lumber Co., Charlottesville, Va.

J. E. Jenkins, Ocala, Fla.

Parrott Bros. Co., Newhouse Building, Salt Lake City, Utah.

Hilo, Hawaii, Construction, January 15.

Sound Construction and Engineering Co., 1007 Lowman Building, Seattle, Wash.

J. E. & A. L. Pennock, Land Title Building, Philadelphia, Pa.

Henry D. Whitfield, 160 Fifth avenue, New York City.

W. N. Concanon, Monadnock Building, San Francisco, Cal.

Southwestern Construction Co., Central Building, Los Angeles, Cal.

Grant Fee, 2440 16th street, San Francisco, Cal.

Spalding Construction Co., Grant avenue and Bush street, San Francisco, Cal.

Campbell Building Co., Salt Lake City, Utah.

A. L. Young Machinery Co., San Francisco, Cal.

George Marshall, Hotel Sutter, San Francisco, Cal.

Reclamation Service, Transformers.

The following bids were received at the office of the Reclamation Service, Los Angeles, Cal., for furnishing two 5-K. V. A. transformers for the Truckee-Carson project:

Pittsburgh Transformer Co., Pittsburgh, Pa., \$100; delivery Pittsburgh, 15 working days.

Allis-Chalmers Mfg. Co., Los Angeles, Cal., \$107.80; delivery Los Angeles, Cal., 1 day.

Westinghouse Electric & Mfg. Co., Los Angeles, Cal., \$113.56; delivery Salt Lake City, Utah, 5 days.

Wagner Electric Co., Los Angeles, Cal., \$115; delivery San Francisco, 2 days.

B. F. Kierulff, Jr. & Co., Los Angeles, Cal., for Ft. Wayne transformers, \$194.80; delivery San Francisco, 1 day.

San Francisco, Cal., Cilles.

The contract for furnishing and installing four special mahogany file cases for the U. S. court officers, San Francisco, Cal., has been awarded to Wollaefer Mfg. Co., at \$1,630.

Honolulu, H. T., Repairs.

The contract for refeshing roofs of all cabin quarters, etc., U. S. quarantine station, Honolulu, H. T., has been awarded to W. N. Concanon Co. at \$1,985.

Honolulu, H. T., Alterations.

The contract for miscellaneous alterations at the U. S. post office, old Honolulu, H. T., has been awarded to Lord-Young Engineering Co. at \$685.

Pocatello, Idaho, Construction.

The following bids were received at the supervising architect, Treasury Department, Washington, D. C., for the construction, including plumbing, piping, heating apparatus, electric conduits and wiring, and interior lighting fixtures, and the approaches

of the U. S. post office at Pocatello, Idaho:

Bid 1, H. E. Dorring, 568 Maple street, Portland, Oreg.

2, Palmberg & Mattson, Astoria, Oreg.

3, Parrott Bros. Co., Salt Lake City, Utah.

4, Campbell Building Co., Salt Lake City, Utah.

5, Northern Construction Co., Milwaukee, Wis.

6, North Pacific Construction Co., Twin Falls, Idaho.

For using limestone for all stonework, except where granite is required—Bid 1, \$93,174; 2, \$93,575; 3, \$95,617; 4, \$98,338; 5, \$99,860; 6, \$106,500.

For using sandstone for all stonework, except where granite is required—Bid 1, \$94,218; 2, \$94,675; 3, \$96,000; 4, \$98,338; 5, \$100,900; 6, \$106,500.

For alternate A (substituting brick for macadam in connection with the driveway, as specified), add—Bid 1, \$260; 2, \$900; 3, \$800; 4, \$1,750; 5, \$570; 6, \$1,326.

For alternate B (substituting stone for exterior terra cotta, as specified), add to limestone bid—Bid 1, \$4,750; 2, \$4,950; 3, \$4,250; 4, \$4,610; 5, \$4,700; 6, \$5,545. Add to sandstone bid—Bid 1, \$5,100; 2, \$4,950; 3, \$2,250; 4, \$4,610; 5, \$6,700; 6, \$4,665.

For alternate C (substituting granite for concrete in connection with terrace steps at Arthur avenue entrance, as specified), add—Bid 1, \$420; 2, \$500; 3, \$1,500; 4, \$282; 5, \$350; 6, \$267.

For alternate D (substituting terrazzo floor with marble borders, marble cross strips, marble base, marble thresholds, etc., for wood floor, base, etc., in second story corridor, as specified), add—Bid 1, \$480; 2, \$690; 3, \$600; 4, \$447; 5, \$400; 6, \$1,100.

For alternate E (substituting Keene's cement for hard plaster, as specified), add—Bid 1, \$1,286; 2, \$900; 3, \$500; 4, \$575; 5, \$750; 6, \$375.

Amount included in the proposal for all work in connection with approaches—Bid 1, \$1,592; 2, \$2,100; 3, \$3,000; 4, \$2,275; 5, \$2,600; 6, \$2,245.

Amount included in the proposal for subdrainage system, complete, including catch basin—Bid 1, \$225; 2, \$350; 3, \$600; 4, \$375; 5, \$230; 6, \$250.

Amount included in the proposal for all work in connection with waterproofing of basement walls, including the brick or terra cotta lining—Bid 1, \$425; 2, \$500; 3, \$200; 4, \$115; 5, \$480; 6, \$752.

Amount included in lump-sum proposal for window and door screens—Bid 1, \$500; 2, \$440; 3, \$700; 4, \$75; 5, \$100; 6, \$700.

Amount included in the proposal for all work specified under head of "Plumbing," based on the number of fixtures as given in the schedule exclusive of plumbing marble—Bid 1, \$2,800; 2, \$6,450; 3, \$6,600; 4, \$4,750; 5, \$2,200; 6, \$9,750.

Amount included in the proposal for all marblework and terrazzo floors, complete, in place in all toilet rooms and in janitor's sink closet—Bid 1, \$14; 2, \$2,200; 3, \$2,000; 4, \$1,750; 5, \$2,000; 6, \$2,600.

Amount included in the proposal for all work specified under head of "Gas piping"—Bid 1, \$475; 2, \$400; 3, \$275; 4, \$300; 5, \$490; 6, \$740.

Amount included in the proposal for all work specified under "Heating ap-

paratus"—Bid 1, \$4,131; 2, \$5,875; 3, \$5,500; 4, \$1,650; 5, \$1,100; 6, \$7,255. Amount included in the proposal for all work specified under head of "Conduit and wiring system"—Bid 1, \$2,464; 2, \$3,400; 3, \$3,000; 4, \$2,935; 5, \$1,800; 6, \$3,000.

Amount included in the proposal for all work specified under "Lighting fixtures"—Bid 1, \$1,650; 2, \$1,800; 3, \$1,400; 4, \$1,400; 5, \$1,500; 6, \$1,100.

Amount to be deducted from the proposal if nonconducting coverings are omitted from the hot water tank, all cold water, hot water, and circulating piping of plumbing system, except the ice water piping and piping concealed in chases—Bid 1, \$250; 2, \$175; 3, \$320; 4, \$250; 5, \$350; 6, \$404.

Amount to be deducted from the proposal if all nonconducting coverings are omitted from the breeching, and pipes and fittings of heating apparatus except risers in chases—Bid 1, \$200; 2, \$190; 3, \$400; 4, \$220; 5, \$200; 6, \$245.

Canal Requirements.

Requirements for the following materials have been received at the office of the Isthmian Canal Commission and an advertisement will shortly be issued calling for bids: 1 switchboard, 3 switchboard panels, 4 dipper lips, 4 forward spud timbers, 45,000 machine bolts, 2,500 lbs. hard sheet brass, 1,700 lbs. bronze, 200 ft. cable, 200 lbs. flexible do, 20,000 lbs. calcium carbide, 3,500 ft. straight-link chain, 4,500 lbs. sheet copper, 192 bastard files, 276 second-cut mill files, 144 smooth flat files, 420 panes glass, 20 mounted grindstones, 156 prs. hinges or butts, 400 lbs. carpenter's chalkline, 5,000 lbs. yellow metal, 35,000 lbs. common wire nails, 4,600 lbs. wire nails, 13,520 square nuts, 5,000 lbs. hexagon nuts, 500 lbs. oakum, 200 lbs. canvas packing, 1,400 railroad picks, 1,900 do, 144 boxwood pins, 20,000 boat spikes, 130 bars cold-rolled steel, 650 ft. brass tubing, 1,500 lbs. washers, 5,000 lbs. boiler-plate zinc, 19,000 ft. B. M. white oak, 500 memo books, 50,000 white index cards, 2,400 rolls pins, 25,000 hacksaw blades, 2,000 do, 3,300 lbs. special bronze, 360 stable brooms, 400 flat paint brushes, 600 galvanized canvases, 9,500 yds. white cotton canvas, 500 rolls bronze wire cloth, 44 reams emery cloth, 175 water coolers, 300 grease cups, 300 do, 1,368 bastard flat files, 288 second-cut files, 4,332 double-cut slim taper files, 156 second-cut mill files, 636 smooth flat files, 216 bastard files, round 168 bastard files, square; 960 railroad signal flags, 1,000 hand-hole gaskets, 5,000 round asbestos gaskets, 6,000 ft. 1-in rubber air hose, 5,000 ft. 1 1/2-in rubber air hose, 3,000 ft. rubber water hose, 2,500 ft. 3/4-in steam hose, 2,200 lbs. sheet rubber packing, brass wire insertion; 2,800 lbs. rubber packing, 1,950 lbs. square flax packing, 1,950 lbs. square spiral packing, 84 808 water gauges, 1,050 tubular globes, 3,000 machinists' hammer handles, 1,000 slide handles, 6,000 ft. leather belt lining, 300,000 ft. longleaf yellow pine or Douglas fir, 120 cork door mats, 2,500 mop heads, 220 pairs white canvas, 60 cases toilet paper, 700 ft. rope lengths, 72 towel bats, 1,000 frames of the bond paper, 1,126 lbs. copper back 10-steel tapes.

SAN FRANCISCO—Government work concrete and brick construction. Cost not stated. Engineer, Constructing Quartermaster's Department, Fort Mason. Owners, United States Govern-

ment. New work contemplated by the United States Government at the military posts about the bay include the following: Rock bunker at the Torpedo Wharf, Fort Winfield Scott, capacity 300 cubic yards, foundations of creosoted piles. A three ton, stiff leg derrick will also be erected. Plans for the grading of the site for the new Quartermaster Stables have been forwarded to Washington. The site is 16 acres in area and the following buildings will be erected: All the post stable sheds, store houses, forage and granary buildings for both the Presidio and Fort Scott. There will be about 23 buildings in all including a stable building with a capacity of 700 head. Plans for moving and enlarging the present brick guard house at the Presidio are under way. It is proposed to clear the entire site north of the main road to the brick barracks and west of the main road to the docks. This site is to be used by the government for the building in connection with the Exposition. The bill now before Congress calls for an appropriation for a three story fireproof building, probably with a basement. While no dimensions have been given it is understood that the building will not be less than 300x300 feet. After the Exposition this building will be remodeled for Division Headquarters. Among the projects now under way in the Constructing Quartermaster's Office at Fort Mason are the following: A drainage system for the stable site at Fort Scott, additional drainage system for roads at Fort Scott, construction of a fire house at Fort Scott, a garbage crematory for the Letterman General Hospital and a large cattery for the entire Presidio Reservation. Plans are also being prepared for enlarging the wharf at Fort Berry and constructing breakwater to protect it from the undertow. Plans for these projects have been forwarded to Washington and bids will not be called for until the department reports them back to the Constructing Quartermaster.

SAN FRANCISCO—Government work, electric wiring, etc. Cost not stated. Engineer, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Bids were opened by the Constructing Quartermaster's office at Fort Mason on Tuesday for electric and plumbing installation at the Letterman General Hospital, Presidio of San Francisco, and for the electric installations at the Army Transport docks. The Burnham Plumbing Co. were low on the work at the Letterman General Hospital at \$2,556. Three figures were submitted for the work at the Army Transport Docks with a difference of but five dollars between the highest and lowest figures. Newberry-Bendum Electric Co. bid \$1,995, the Globe Electric Co. \$1,998, and H. S. Title \$2,000.

HOSPITALS

SAN FRANCISCO—Hospital, 5 story and base, Class A construction, \$100,000. Architects, Bakewell & Brown, 254 Kearny street, S. F. Owners, Stanford University. Architects, Bakewell & Brown have been commissioned to prepare plans for the new buildings which are to be erected at the Lane Hospital at the corner of Clay and Webster streets. The present building will be

enlarged and extended along Webster street and a new wing constructed adjoining the medical building. Construction will be fireproof throughout with a steel frame and brick and concrete filler walls. The two new portions will give an added capacity to the hospital of 150 patients. A smaller building, designed to house the laundry, will be erected in the court between the two larger structures. Included in the equipment of the new buildings will be special hydrotherapeutic rooms, X ray rooms, and special operating rooms. Tile and hardwood will be used extensively. There will be a modern system of steam heat and vacuum cleaning. Exterior of the building will be faced with pressed brick. The work has been estimated to cost \$100,000.

HOTELS.

SAN FRANCISCO—Hotel alterations, 3 story and base, frame. Cost not stated. Architect, none. Owner, Charles Katz, 1200 Dolores street, S. F. This work will consist of extensive alterations to the building located on the west side of Mission street south of 17th street. Included in the work will be new interior finish and partitions, plumbing and electric work. The exterior of the building and first floor will not be altered. Plans are complete and work will be done by Day Labor.

SEATTLE, WASH.—Hotel, 4 story or more, Class A construction, \$150,000. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yesler Estate. The building will be erected at the corner of Yesler Way and Post street covering an area of 68 by 178 feet. Only preliminary plans have been prepared and details of the construction can not be given at this time. The first floor will contain stores, besides the hotel lobby and office. The preliminary plans show a total of 150 guest rooms, the largest proportion of which will have private baths. There will be steam heat, elevator service and modern equipment throughout. Exterior of the building will be faced with pressed brick. Construction will be fireproof. Further mention of this work will be made as the plans progress.

LOS ANGELES, CAL.—Hotel, 12 story and base, Class A construction, \$300,000. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. The building will be erected on the east side of Spring street between 2nd and 3rd avenues covering an area of 60 by 158 feet. There will be two stores and the lobby on the first floor and a total of 245 guest rooms on the upper floors. Nearly all rooms will have private baths. Construction will be of the reinforced concrete type with exterior walls faced with pressed brick and terra cotta. Floors and roof slab will also be of reinforced concrete. Interior partitions will be of hollow tile. There will be steam heat, two elevators and a vacuum cleaning system. Plans are nearly complete and figures will be called for shortly.

LIBRARIES.

OLYMPIA, WASH.—Library, 2 story and base, reinforced concrete, \$25,000. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle, associated

with J. H. Wohleb, Talcott Bldg., Olympia. Owners, City of Olympia. A selection of the competitive plans presented has just been made. The building will be designed in the classic style and will contain two large reading rooms, children's room, office and stack room. Construction will be fireproof. Interior will be finished in pine and hardwood. There will be steam heat, metal window sash and frames and a vacuum cleaning system. Exterior of the building will be faced with cement plaster and pressed brick. Working drawings are being prepared.

PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—Sewer work, etc. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and can be secured from the Director of Works for constructing sewers in the Court of Honor. Bids will be opened on January 8th for this work. An official proposal appears in another column of this issue.

SAN DIEGO, CAL.—Oriental buildings, frame construction, \$125,000. Architect, Frederick Weinlein, Lissner Bldg., L. A. Owner, Oriental City Exhibit Co. The Oriental City exhibit at the San Diego Exposition will house exhibits from practically every country of the Orient. The project has been financed by Prince Hadji Tahar, and work will begin early in the new year on the construction. The principal features of the group will be an Oriental and European cafe, an Algerian theater, and a large Hindu temple, two stories high, with massive dome. All the larger buildings of the group will be two stories high, with plaster and metal lath walls, cement foundation, and tile roofs. There will be a main entrance finished in marble and tile, and a large amount of hardwood finish.

Contracts Awarded.

SAN FRANCISCO.—New York State Building, concrete and frame construction, \$128,600. Architect, Director of Works, Service Bldg., S. F. Owners, State of New York. Contractor, Neil A. McLean, Chronicle Bldg., S. F. General construction, \$118,000. Charles Wright, 21 Stockton street, plumbing, electric work and heating, \$18,000. A complete list of all figures submitted appears under the heading of San Francisco in this issue.

RESIDENCES.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$1600. Architect, W. S. Rhodes, 2372 14th street, S. F. Owner, M. J. Terranova. The house will be erected on Paris street near Persia and has been designed for a seven room house with bath. Interior finish will be of pine with some elm panels and oak floors. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and frame drawings being taken.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$5,500. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owner, George L. Savage. The house will be erected in the Ingleside Terraces and has been designed in the Spanish style. The house will contain eight rooms, baths and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be equipped with shower and will have tile floors and wainscot. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials will be purchased through Mr. Leonard's office.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman and Bro., 712 Market street, S. F. The house will be erected on the west side of Huron street south of Siskies and has been designed for a seven room dwelling with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place with tile or brick surround. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, F. Nelson, 26 Presidio Terrace, S. F. The dwelling has been designed for a six room house and will be erected on the east side of 14th avenue near Fulton street. Interior finish will be largely of pine with some elm panels in the living and dining rooms. Hardwood floors will also be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO.—Bungalows, 2 1/2 story and base, frame, \$2,000 each. Architect, none. Owner, Charles G. Anderson, 2912 24th street, S. F. These two houses will be erected on the west side of Whitney street south of 30th street. Each dwelling has been arranged to contain six rooms and bath. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. The wainscot will be used in the bath rooms and kitchens. Exterior will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, J. S. Purcell, 856 Ingleside Terrace, S. F. This house has

been designed for a seven room dwelling and will be erected on the south side of Lincoln street east of 14th avenue. Interior will be finished in pine with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floor will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

SAN FRANCISCO.—Residence, 2 story and base, frame, \$3,000. Architect, Ernest Coxhead, Hearst Bldg., S. F. Owner, Dr. Henry Gibbons. The dwelling has been designed to contain eight rooms, bath and sleeping porch. A splendid site on Presidio Terrace has been secured. Interior of the dwelling will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for a central heating system, probably hot water, and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Tile wainscot will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called shortly.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architect, none. Owners, Oakland Building Co., Security Bank Bldg., Oakland. The dwelling will be erected on the west side of Perkins street north of Van Buren and has been designed to contain seven rooms and bath. Interior finish will be largely of pine. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot will be used in the bath rooms and kitchen. Exterior of the house will be covered with cement plaster on metal lath. An automatic water heater will be installed. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

PLEASANTON, ALAMEDA CO., CAL.—Bungalow 1 1/2 story and base, frame, \$1,000. Architect, Smith O'Brien, Humboldt Bank Bldg., S. F. Owner's name withheld. The house has been designed for a country home and will contain in the neighborhood of seven rooms, bath and sleeping porch. Interior will be finished entirely in pine and redwood. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and two open fire places. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shingles. Plans are complete and figures will be called shortly.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$8,000. Architect, Charles H. Miller, 2222 Bldg., Oakland. Owner, Frank Spring. The house will be erected in the Townsend Oaks Tract and will contain seven rooms, bath and sleeping

porch. Interior finish will be of pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. The wainscot will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,000. Architect, none. Owners, B. F. Butler and George Aiyworth, 333 49th street, Oakland. This house has been designed for an eight room dwelling with bath and sleeping porch and will be erected at the northwest corner of San Pablo avenue and Laurel street. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick. An automatic water heater will be installed. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, Claude B. Barton. Security Bank Bldg., Oakland. Owners, Newman and Wilkinson. The house will be erected in the Claremont Tract and has been designed for a seven room dwelling with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire place. Mantel will be of brick. An automatic water heater will be installed. Bath and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame \$4,000. Architect, none. Owner, H. N. Turrell, 841 Walker avenue, Oakland. The dwelling will be erected on the west side of Walker avenue north of Cottage and has been designed for a seven room house with bath and sleeping porch. Interior finish will be largely of pine with some elm panels in the living and dining rooms. Oak floors will be used throughout. Plans provide for furnace heat and open fire places. An automatic water heater will be included. Mantels will be of brick. Tile wainscot will be used in the bath room and kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN JOSE, SANTA CLARA CO., CAL.—Cottage, 1 story and base, frame, \$2,000. Architect, none. Owner, G. D. Mera, 1255 Locust San Jose. The dwelling has been designed for a five room house with bath. Interior finish will be of pine throughout. Oak

floors will be used in the living and dining room. There will be large open fire place and tile or brick mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

Contracts Awarded.

BEVERLY HILLS, LOS ANGELES CO., CAL.—Residence, 2 story, attic and base, hollow tile construction, \$75,000. Architect, W. J. Dodd, 945 South Los Angeles street, L. A. Owner, J. M. Danziger, Contractor, Frank Hudson, Higgins Bldg., L. A. Contract price, \$75,000. Note—Subfigures are now being taken on electric work, plumbing fixtures and finish hardware.

SCHOOLS.

SANTA PAULA, VENTURA CO., CAL.—School, 2 story and base, reinforced concrete, \$60,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, City of Santa Paula. The building will cover an area of 55 by 173 feet and will contain sixteen class rooms besides a large auditorium, principal's office and teachers' rooms. The auditorium will seat 600 people. The design is in the Mission style, exterior of the building being face with cement plaster and roof of clay tile. Construction will be practically fireproof. Plans provide for a central heating system, maple floors and slate blackboards. There will be a vacuum cleaning system and program clocks. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Orphans' Home, 1 2-story and 1 3-story and base, brick. Cost not stated. Architect, E. H. Seehorn, 328 1/2 Clay street, L. A. Owners, Missionary Sisters of the Sacred Heart. These buildings will be erected on Sunset Boulevard near North Hill street and each will cover an area of 60 by 100 feet. They will contain the administrative offices, dining room, kitchens, playrooms, chapel, classrooms, 22 bathrooms, dormitories, etc. The buildings will be of fireproof construction with brick exterior and bearing walls, blue brick facing, reinforced concrete floors and roof slab, floors, hollow tile partitions, metal frames and sash, fire escapes, 100 plumbing fixtures, steam heat, electric wiring, water heaters. Exteriors will be faced with pressed brick. Plans are being prepared.

CORVALLIS, ORE.—School, 2 story and base, brick, \$75,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Corvallis School District. Only preliminary plans have been prepared and it has not been decided how many class rooms will be included in the building. Plans are being prepared so that the structure may be erected on the unit system, only one unit being completed this year. The entire project will include sixteen class rooms, auditorium and laboratories. Construction will be fireproof. Exterior of the building will be faced with pressed brick. Plans will include steam heat, program clocks and a vacuum cleaning system. Further mention will be made of the work as the plans progress.

STORES.

SAN FRANCISCO—Market, 1 story and base, frame, \$2,000. Architect, Charles Fantoni, 916 Kearny street, S. F. Owner, Angelo Belli. The building at the corner of Fillmore and Jackson streets will be moved to the rear of the lot and altered into a modern flat building. A new structure of one story designed to contain a market will be erected on the site of the old building. There will be potent store fronts and interior finish of pine. Exterior will be covered with a veneer pressed brick. Plans are being prepared.

SAN FRANCISCO—Offices, 14 story and base, Class A construction, \$1,500,000. Architect, J. Martyn Henke, Story Bldg., L. A. Owners, Sweeney Estate. The Building and Industrial News can state on first hand information that the Sweeney Estate will secure a loan of \$850,000 shortly after January 1st and will proceed at once with the construction of the 14 story Class A office building at the southeast corner of Montgomery and Bush streets. The building will occupy the entire Montgomery street frontage except that portion at the corner of Sutter and Montgomery owned by the Donohue-Kelley people.

FAIRFAX, MARIN CO., CAL.—Stores and dance hall, 2 story and base, frame, \$5,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owners, Rocca Bros. The building will be erected at the corner of Fairfax Road and Fairfax avenue covering an area of 50 by 95 feet. There will be two stores on the first floor and a large dance hall and billiard room on the second floor. Interior of the building will be covered with rustic and cement plaster on metal lath. Plans are being prepared.

LOS ANGELES, CAL.—Lofts, 8 story and base, Class A construction. Cost not stated. Architect, J. Martyn Henke, Story Bldg., L. A. Owner, E. C. Collins. The property at the corner of 12th and Broadway will be improved with an eight story structure. The first floor will contain stores and upper floors will be arranged for lofts. The building will cover an area of 122 by 112 feet. There will be a complete steel frame with exterior walls of brick, faced with pressed brick and terra cotta. Interior partitions will be of hollow tile and metal lath and plaster. There will be steam heat, elevator service and vacuum cleaning. Potent store fronts, sidewalk doors and light are specified. Plans are now being prepared. Further mention will be made of the work as plans progress.

SEATTLE—Offices, 4 story and base, Class A construction, \$500,000. Architect, William Kingsley, Empire Bldg., Seattle. Owners, Times Publishing Co. This work was reported in these columns over a year ago when it was first announced that the Seattle newspaper would build. The site at the intersection of Westlake, 4th and Stewart streets is now being cleared and the architect states that specifications are nearly complete for the new building. There will be a complete steel frame, reinforced concrete walls and floors. Interior partitions will be of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwood, marble and metal trim. Plans provide for steam heat, elevator

service, mail chutes and a vacuum cleaning system. Metal window sash and frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick and terra cotta. Bids will be called for shortly.

C., until 11 o'clock a. m., January 17, 1901, and then opened in public. The proposed quay wall at the United States naval magazine, Puget Sound, Wash. Amount available, \$14,750. Plans and specifications can be obtained on application to the commanding officer of the navy yard at Puget Sound, Wash. W. H. JAM. M. SMITH, acting chief of bureau.

PROPOSALS FOR CLOCK SYSTEM.

Pursuant to Resolution No. 7122, N. S., passed December 12, 1911, the Council of the City of Oakland will receive

proposals or bids on **January 8th, 1911**, for furnishing of all the materials, labor and workmanship required for the Clock System for the City Hall Building in the City of Oakland, California.

All proposals shall be made upon and conform to the requirements of the forms of proposals prepared and furnished by the city clerk. All proposals, with the required cash deposit, must be sealed, and shall be enclosed in sealed envelopes, endorsed "Bids for furnishing of all the materials, labor and work required for the construction of the new clock tower required for the new Hall Building," addressed to the Council and deposited by the bidder, or his agent, at the city clerk's office, on or before eleven o'clock a. m. and twelve o'clock noon, Pacific time, on the 8th day of January, 1914, in the room of the city clerk, at the corner of the fourteenth and Washington streets in Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session by the council.

No bid shall be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than ten per cent (10%) of the aggregate amount of the proposal submitted. The check or certified check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of Oakland, within the time (15) days after receiving notice of award.

ice at all times. The forms of proposal and of the required affidavits, agreement, bonds, acknowledgement and specifications will be furnished contractors on demand at the office of the Architects. The plans and drawings may be had at the said office of the Architects after December 15th, 1913, within a reasonable time after application, and upon a deposit of \$100.00 will be returned to the applicant when the said plans and drawings are returned to the Architects in good condition, one copy of each of the plans and drawings required for the work will be furnished each applicant. Additional copies will, however, be furnished provided the applicant pays the cost of reproduction, such additional copies may be turned to the Architects, together with the first set.

The right is reserved to the Council, in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter.

FRANK M. SMITH, City clerk.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE - 2 story and base, frame, \$1,000, San Francisco. Architect, W. S. Rhodes, 2372 16th street, S. F. Owner, M. J. Terranova. The house will be erected on Paris street near Persia and has been designed for a seven room house with bath. Interior finish will be of pine with some elm panels and oak floors. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE - 2 story and base, frame, \$8,500, San Francisco. Architect, Joseph A. Leonard, Phelan Bldg., S. F. Owner, George L. Savage. The house will be erected in the Ingleside Terraces and has been designed in the Spanish style. The house will contain eight rooms, baths and sleeping porch. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Bath rooms will be equipped with shower and will have tile floors and wainscot. Automatic water heaters will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials will be purchased through Mr. Leonard's office.

RESIDENCE - 2 story and base, frame, \$2,500, San Francisco. Architect, none. Owners, Oscar Heyman and Bro., 712 Market street, S. F. The house will be erected on the west side of Huron street south of Sikes and has been designed for a seven room dwelling with bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place with tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and work will be done by Day Labor. All materials are now being purchased.

RESIDENCE - 2 story and base,

frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling has been designed for a six room house and will be erected on the east side of 11th avenue near Fulton street. Interior finish will be largely of pine with some elm panels in the living and dining rooms. Hardwood floors will also be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by day labor. Materials are now being purchased.

BUNGALOWS—2 1/2 story and base, frame, \$2,000 each. San Francisco. Architect, none. Owner, Charles G. Anderson, 3912 24th street, S. F. These two houses will be erected on the west side of Whitney street south of 30th street. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, J. S. Purcell, 856 Presidio Terrace, S. F. This house has been designed for a seven room dwelling and will be erected on the south side of Lincoln street east of 4th avenue. Interior will be finished in pine with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath rooms. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. The owner is now purchasing all materials.

RESIDENCE — 2 story and base, frame, \$9,000. San Francisco. Architect, Ernest Coxhead, Clearest Bldg., S. F. Owner, Dr. Henry Gibbons. The dwelling has been designed to contain eight rooms, bath and sleeping porch. A splendid site on Presidio Terrace has been secured. Interior of the dwelling will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for a central heating system, probably hot water, and open fire places. Mantels will be of brick and tile. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Tile wainscot will also be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called shortly.

SEWER WORK. ETC.—Cost not stated. San Francisco. Architect, Director of Works Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. Plans are complete and can be secured from the Director of works for constructing sewers in the

Court of Honor. Bids will be opened on January 8th for this work. An official proposal appears in another column of this issue.

APARTMENT HOUSE—3 story and base, reinforced concrete, \$28,000. San Francisco. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owners, Lachman Bros. This building has been mentioned here before when plans were first started. The building will be erected on the east line of Mission street south of 16th and has been designed for stores on the first floor and a number of apartments on the upper floors. The structure will have a frontage of 55 feet and a depth of 95 feet. There will be a total of 12 apartments of two and three rooms. All suites will have private bath rooms and wall beds. Plans provide for steam heat, a vacuum cleaning system and hot water supply. Interior finish will be of pine with some elm panels. Bath rooms will have composition floors and tile wainscot. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with cement plaster. Plans are complete and the work will be carried on by Beach and Heffernan, David Hewes Bldg. Material bids are now being taken.

APARTMENT HOUSE—5 story and base, frame, \$12,000. San Francisco. Architect, A. Reinholdt Denke, Humboldt Bank Bldg., S. F. Owner, Mrs. Hattie Becker. The building will be erected on Presidio avenue and has been designed to contain a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood. Oak floors will be used in the living room. Plans provide for steam heat and a hot water system. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

APARTMENT HOUSE ALTERATIONS—3 story and base, frame, \$6,500. San Francisco. Architect, C. O. Clausen, Phelps Bldg., S. F. Owner, Mrs. Willis. The present three story flat building located on Green street near Larkin will be altered into a modern apartment house containing six two and three room suites. Interior finish will be of pine throughout. There will be a new steam heating system, wall beds and hot water supply. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are now out for figures.

STABLES, ETC.—2 story and base, frame and corrugated iron, \$11,000. San Francisco. Architect, none. Owners, California Fruit Cannery Association, 120 Market street, S. F. The building will be erected on the north side of Bay street west of Taylor covering an area of 85 by 172 1/2 feet. Stalls will be equipped with metal feed boxes, water distributing system and other modern equipment. Plumbing and electric work will be let separately. Exterior of the building will be covered with corrugated iron. Roof will be of fireproof asbestos. Plans are complete and the work will be done by Day Labor.

WINERY ADDITION—2 story and base, reinforced concrete, \$20,000. San Francisco. Architect, L. Mastropasqua, 500 Washington street, S. F. Owner, M. Sattai. An extensive addition will be made to the plant at the corner of 25th and Bryant streets. New portion of the building will be fireproof throughout with reinforced concrete walls and floors. There will be a number of large wooden tanks. Metal window sash and frames will be specified. Exterior of the building will be faced with cement plaster. Plans for this work are now being prepared.

FLATS—2 story and base, brick, \$5,000. San Francisco. Architect, none. Owners, Egan Bros., 1150 Polson streets. The building will be erected on the north side of Polson street east of 8th covering an area of 25 by 97 feet. The first floor will contain a store and upper floor two modern flats of four and five rooms. Interior finish will be of pine and redwood. There will be automatic water heaters and tile wainscot. Exterior of the building will be faced with stock brick. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, Theo W. Lenzen, Humboldt Bank Bldg., S. F. Owner, R. C. Bingley Jr. The building will be erected on the east side of 9th avenue between I and J streets and has been arranged for store and living apartments on the first floor and one large residential flat on the second floor. Interiors will be finished in pine and hardwood. Oak floors will be used in the principal rooms. There will be one large open fire place with brick mantel. Bath room will have composition floor and tile wainscot. Tile will be used in the kitchen. Exterior of the building will be covered with rustic. Plans are complete and figures are being taken.

GOVERNMENT WORK — Concrete and brick construction. Cost not stated. San Francisco. Engineer, Constructing Quartermaster's Department, Fort Mason. Owners, United States Government. New work contemplated by the United States Government at the military posts about the bay include the following: Rock bunker at the Torpedo Wharf, Fort Winfield Scott, capacity 300 cubic yards, foundations of crescent piles. A three-ton, stiff leg derrick will also be erected. Plans for the grading of the site for the new Quartermaster Stables have been forwarded to Washington. The site is 16 acres in area and the following buildings will be erected: all the post stable stalls, store houses, forage and granary buildings for both the Presidio and Fort Scott. There will be about 23 buildings in all including a stable building with a capacity of 700 head. Plans for moving and enlarging the present brick guard house at the Presidio are under way. It is proposed to clear the entire site for the main road to the brick barracks and west of the main road to the docks. This site is to be used by the government for the building in connection with the Exposition. The bill now before Congress calls for an appropriation for a three story fireproof building, probably with a basement. While no dimensions have been given it is understood that the building will not

be less than 300 by 300 feet. After the exposition this building will be remodeled for Division Headquarters. Among the projects now under way in the Constructing Quartermaster's Office at Fort Mason are the following: A drainage system for the stable site at Fort Scott, construction of a fire house at Fort Scott, a garbage crematorium for the Letterman General Hospital and a large crematory for the entire Presidio Reservation. Plans are also being prepared for enlarging the wharf at Fort Berry and constructing breakwater to protect it from the undertow. Plans for these projects have been forwarded to Washington and bids will not be called for until the department reports them back to the Constructing Quartermaster.

HOSPITAL—5 story and base, Class A construction, \$100,000. San Francisco, Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Stanford University. Architects Bakewell & Brown have been commissioned to prepare plans for the new buildings which are to be erected at the Lane Hospital at the corner of Clay and Webster streets. The present building will be enlarged and extended along Webster street adjoining the medical building. Construction will be fireproof throughout with a steel frame and brick and concrete filler walls. The two new portions will give an added capacity to the hospital of 150 patients. A smaller building, designed to house the laundry, will be erected in the court between the two larger structures. Included in the equipment of the new buildings will be special hydrotherapeutic rooms, X ray rooms, and special operating rooms. Tile and hardwood will be used extensively. There will be a modern system of steam heat and vacuum cleaning. Exterior of the building will be faced with pressed brick. The work has been estimated to cost \$100,000.

GOVERNMENT WORK—Electric wiring, etc. Cost not stated. San Francisco, Engineer, Constructing Quartermaster's Office, Fort Mason. Bids were opened by the Constructing Quartermaster's Office at Fort Mason on Tuesday for electric and plumbing installation at the Letterman General Hospital, Presidio of San Francisco, and for the electric installations at the Army Transport Docks. The Burnham Plumbing Co. were low on the work at the Letterman General Hospital at \$2,556. Three figures were submitted for the work at the Army Transport Docks with a difference of but five dollars between the highest and lowest figures. Newberry-Benholm Electric Co. bid \$1,997 and Globe Electric Co. \$1,998 and H. S. Title \$2,000.

HOTEL ALTERATIONS—2 story and base, frame. Cost not stated. San Francisco, A. J. S. E. owner, Charles Katz, 24 Broadway street, S. F. This work will consist of extensive alterations to the building located on the west side of Mission street south of 17th street. It had in the work will be new interior and partitions, plumbing, and electric work. The exterior of the building at first floor will not be altered. Plans are complete and the work will be done by D. J. Lator.

MARKET—Cory, 1 base frame, \$2,000. San Francisco, Architect, Charles Pantoli, 215 Kearny street, S.

F. Owner, Angelo Belli. The building at the corner of Fillmore and Jackson streets will be moved to the rear of the lot and altered into a modern flat building. A new structure of one story designed to contain a market will be erected on the site of the old building. There will be patent store fronts and interior finish of pine. Exterior will be covered with a veneer pressed brick. Plans are being prepared.

OFFICES—14 story and base, Class A construction, \$1,200,000. San Francisco, Architect, J. Martyn Haenke, Story Bldg., L. A. Owners, Sweeney Estate. The Building and Industrial News can state on first hand information that the Sweeney Estate will secure a loan of \$850,000 shortly after January 1st and will proceed at once with the construction of the 14 story Class "A" office building at the southeast corner of Montgomery and Bush streets. The building will occupy the entire Montgomery street frontage except that portion at the corner of Sutter and Montgomery owned by the Donohue-Kelly people.

Contracts Awarded.

NEW YORK STATE BUILDING—Concrete and frame construction, \$126,600. San Francisco, Architect, Director of Works, Service Bldg., S. F. Owners, State of New York. Contractor, Neil A. McLean, Chronicle Bldg., S. F. general construction, \$18,000. Charles Wright, 24 Stockton street, plumbing, electric work and heating, \$18,000. A complete list of all figures submitted appears under the heading of San Francisco in this issue.

Bids Opened For Government Work.

Electrical Installation and Plumbing at Letterman Hospital and Army Transport Docks.

Bids were opened by the Constructing Quartermaster's office at Fort Mason on Tuesday for electric and plumbing installation at the Letterman General Hospital, Presidio of San Francisco, and for electric installation at the Army Transport Docks. The Burnham Plumbing Co. were low on the work at the Letterman General Hospital at \$2,556.

Three figures were submitted for the work at the Army Transport Docks, with a difference of but five dollars between the highest and lowest figures. Newberry-Benholm Electric Co. bid \$1,995, the Globe Electric Co. \$1,998 and H. S. Title, \$2,000.

Berkeley Fire House Contract Awarded.

Fifteen Sets of Figures Were Opened At Tuesday's Meeting Clinton Fireproofing Co. Are Awarded Work.

Bids were received at the Tuesday afternoon session of the Berkeley Council for the construction of the two-story and basement reinforced concrete fire house, designed by Archi-

tect William H. Kitchell Jr. The contract was awarded to the Clinton Fireproofing Co., of this city, at \$23,375. The following is a list of all bids received:

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base,
frame, \$5,000. Oakland, Cal. Archi-
tect, none. Owners, Oakland Building
Co, Security Bank Bldg., Oakland. The
dwelling will be erected on the west
side of Perkins street north of Van
Buren and has been designed to con-
tain seven rooms and bath. Interior
finish will be largely of pine. Oak
floors will be used in the principal
rooms. There will be furnace heat
and open fire places. Mantels will be
of tile and brick. Tile wainscot will
be used in the bath rooms and kitchen.
Exterior of the house will be covered
with cement plaster on metal lath. An
automatic water heater will be in-
stalled. Plans are complete and in
the hands of the owners who will do
the work by Day Labor. All materi-
als are now being purchased.

BUNGALOW — 1½ story and base,
frame, \$1,000. Pleasanton, Alameda
Co., Cal. Architect, Smith O'Brien,
Humboldt Bank Bldg., S. F. Owner's
name withheld. The house has been
designed for a country home and will
contain in the neighborhood of seven
rooms, bath and sleeping porch. In-
terior will be finished entirely in pine
and redwood. Oak floors will be used
in the living room, dining room and
reception hall. Plans provide for fur-
nace heat and two open fire places.
Mantels will be of brick. Tile wains-
cot will be used in the bath room and
kitchen. An automatic water heater
will be installed. Exterior of the
house will be covered with rustic and
slates. Plans are complete and fig-
ures will be taken at once.

RESIDENCE — 2 story and base,
frame, \$5,000. Berkeley, Alameda Co.,
Cal. Architect, Chester H. Miller, Dalziel
Bldg., Oakland. Owner, Frank
Spring. The house will be erected in
the Thousand Oaks Tract and will con-
tain seven rooms, bath and sleeping
porch. Interior finish will be of pine,
redwood and hardwood veneer. Oak
floors will be used in the principal
rooms. There will be furnace heat
and open fire places. Mantels will be
of tile and brick. Bath room will have
composition floor and tile wainscot.
An automatic water heater will be in-
stalled. Tile wainscot will also be in-
stalled in the kitchen. Exterior of the
dwelling will be covered with cement plas-
ter on metal lath. Plans are now be-
ing prepared.

RESIDENCE — 2 story and base,
frame, \$1,000. Berkeley, Alameda Co.,
Cal. Architect, none. Owners, R F.
Butler and George Alworth, 323 49th
street, Oakland. This house has been

designed for an eight room dwelling
with bath and sleeping porch and will
be erected at the northwest corner of
San Pablo avenue and Laurel street.
Interior finish will be of pine and red-
wood. Oak floors will be used in the
principal rooms. There will be furnace
heat and open fire places. Mantels will
be of brick. An automatic water
heater will be installed. Tile wainscot
will be used in the bath room and
kitchen. Exterior of the house will be
covered with rustic and cement plaster
on metal lath. Plans are complete
and in the hands of the owners who
will do the work by Day Labor. All
materials are now being purchased.

RESIDENCE — 2 story and base,
frame, \$2,500. Berkeley, Alameda Co.,
Cal. Architect, Claude B Barton, Se-
curity Bank Bldg., Oakland. Owners,
Newman and Wilkinson. The house
will be erected in the Claremont Tract
and has been designed for a seven room
dwelling with bath and sleeping
porch. All interior finish will be of
pine or redwood. Hardwood floors will
be used in the living room, dining
room and reception hall. There will
be furnace heat and open fire place.
Mantel will be of brick. An automatic
water heater will be installed. Bath
and kitchen will have tile wainscot.
Exterior of the house will be covered
with cement plaster on metal lath.
Plans are complete and figures are be-
ing taken.

RESIDENCE — 2 story and base,
frame, \$4,500. Oakland, Cal. Owner,
H. N. Turrell, 841 Walker avenue, Oak-
land. The dwelling will be erected on
the west side of Walker avenue north
of Cottage and has been designed for
a seven room house with bath and
sleeping porch. Interior finish will be
largely of pine with some elm panels
in the living and dining rooms. Oak
floors will be used throughout. Plans
provide for furnace heat and open fire
places. An automatic water heater
will be installed. Mantels will be of
brick. Tile wainscot will be used in
the bath room and kitchen. Exterior
of the dwelling will be covered with
cement plaster on metal lath. Plans
are complete and in the hands of the
owner who will do the work by Day
Labor. Materials are now being pur-
chased.

APARTMENT HOUSE—3 story and
base, frame, \$12,000. Oakland, Cal.
Architect, Chester H. Miller, Dalziel
Bldg., Oakland. Owners, Midtley Co.
The building will be erected in Adams
Point and has been designed to con-
tain a number of two and three room
suites all with private baths and wall
beds. Interior finish will be of pine
with elm panels and oak floors in the
living rooms. Plans provide for steam
heat and a hot water supply. Vacuum
cleaning will also be installed. En-
trance will be finished in marble. Ex-
terior of the building will be faced
with cement plaster on metal lath. A
garbage incinerator will also be in-
stalled. Plans are now being prepared.

Contracts Awarded.

FIRE HOUSE—2-story and base, re-
inforced concrete, \$23,375. Berkeley,
Alameda Co., Cal. Architect, William
H Ratcliff Jr., First National Bank
Bldg., Berkeley. Owners, City of
Berkeley, Contractors, Clinton Fire-
proofing Co., S. F. Contract price,
\$23,375. Note—A complete list of the

figures opened for this work appear under the heading of Oakland and Alameda County in this issue.

STORES AND DANCE HALL—2 story
and base, frame, \$5,000. Fairfax, Marin
Co., Cal. Architect, C. O. Hansen, Phelan
Bldg., S. F. Owners, Rocca Bros.
The building will be erected at the cor-
ner of Fairfax road and Fairfax avenue
covering an area of 50 by 95 feet. There
will be two stores on the first floor and
a large dance hall and billiard room
on second floor. Interior finish will
be of pine. A maple floor will be used
in the dance hall. Exterior of the
building will be covered with rustle
and cement plaster on metal lath. Plans
are being prepared.

WINERY IMPROVEMENTS, COT-
TAGES, SEWERAGE SYSTEM, ETC.
Reinforced concrete construction, \$30,
000. Winehaven, Contra Costa Co., Cal.
Architect, none. Owners, California
Wine Association, 180 Townsend St., S.
F. The California Wine Association
have had plans prepared for a large
sewer system to be installed at their
\$100,000 plant at Winehaven. The
company will construct a complete cot-
tage for their employees and a full
additional fire protection. Buildings
will be of reinforced concrete. A total
of \$50,000 will be spent for these im-
provements.

LOS ANGELES AND SOUTH-
ERN CALIFORNIA.

BRIDGE—Reinforced concrete, \$50,000. Pasadena, Los Angeles Co., Cal. Engineer, City Engineer, Pasadena. Owners, City of Pasadena. Plans are now being prepared for a reinforced concrete bridge over the Arroyo Seco at California street. The structure will be 379 feet long with a 28 foot driveway and two five foot sidewalks. There will be five spans. An ornamental system of electric lighting will be installed. Plans and specifications and full particulars can be secured from the City Engineer at Pasadena. Further mention of the work will be made in these columns when figures are called.

BOX FACTORY—1 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Story Bldg., L. A. Owners, Renshaw-Jones and Sutton. The building will be erected at the corner of 9th and Alameda streets covering an area of 120 by 165 feet. Besides the factory the building will house the general offices. Interior finish will be of pine. There will be steam heat and power, metal window sash and frames and fireproof doors. An automatic sprinkler system will also be installed. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SCHOOL—2 story and base, reinforced concrete, \$60,000. Santa Paula, Ventura Co., Cal. Architects, Allison & Allison, Huberman Bldg., L. A. Owners, City of Santa Paula. The building will cover an area of 55 by 173 feet and will contain sixteen class rooms besides a large auditorium, principal's offices and teachers' rooms. The auditorium will seat 600 people. The design is in the Mission style, exterior of the building being faced with cement plaster and roof of clay tile. Construction will be practically fireproof. Plans provide for a central heating system, maple floors and slate blackboards. There will be a vacuum cleaning system and program clocks. Plans are complete and figures are being taken.

ORPHANS' HOME—1 2-story and 1 3-story and base, brick. Cost not stated. Los Angeles, Cal. Architect, I H Seaman, 328 ½ Clay street, L. A. Owners, Missionary Sisters of the Sacred

Heart. These buildings will be erected on Sunset Boulevard near North Hill street and each will cover an area of 60 by 100 feet. They will contain the administrative offices, dining room, kitchens, playrooms, chapel, classrooms, 22 bath rooms, dormitories, etc. The buildings will be of fireproof construction with brick exterior and bearing walls, blue brick facing, reinforced concrete floors and roof slab, floors, hollow tile partitions, metal frames and sash, fire escapes, 100 plumbing fixtures, steam heat, electric wiring, water heaters. Exterior will be faced with pressed brick. Plans are being prepared.

LOFTS—8 story and base, Class A construction. Cost not stated. Los Angeles, Cal. Architect, J. Martyn Haenke, Story Bldg., L. A. Owner, E. C. Collins. The property at the corner of 12th street and Broadway will be improved with an eight story structure. The first floor will contain stores and upper floors will be arranged for lofts. The building will cover an area of 122 by 113 feet. There will be a complete steel frame with exterior walls of brick faced with pressed brick and terra cotta. Interior partitions will be of hollow tile and metal lath and plaster. There will be steam heat, elevator service and vacuum cleaning. Patent store fronts, sidewalk doors and light are specified. Plans are now being prepared. Further mention will be made of the work as plans progress.

HARBOR WORK—\$1,147,400. Engineer Jubb, Los Angeles. Owners, City of Los Angeles. Estimates of cost submitted to the Harbor Commission by Harbor Engineer Jubb show that the cost of completing harbor improvements on Mormon Island Channel in the inner harbor, the Water street wharf and harbor improvements on municipal dock No. 1 in the outer harbor including transit sheds, etc., and the construction of an approach from Fourteenth street to municipal dock No. 1, will aggregate \$1,147,400. The estimated cost of completing pier A, or the improvements on the Mormon Island Channel in the inner harbor is summarized as follows: Street improvements, including Fries to Front, \$28,000; water main from Fries street, \$8,000; Alta Planing Mill, extra for shed and wharf changes, \$12,000; water side doors, \$7,800; 450-foot wharf extension, \$20,000; 405-foot shed, including water and lighting, \$51,600; railroad tracks, \$11,000; 450-foot street extension, \$5,000; additional dredging, Slip No. 1, \$25,000; total, \$178,000. Water street wharf estimate follows: Shed, 100x150 feet, \$51,000; sprinkler system, \$10,000; electrical system, \$2,000; water mains, \$3,000; paving, \$25,400; railroad tracks and trestle, \$9,000; total, \$100,000. Municipal Dock No. 1 estimates: Steel shed, 100x180 feet, \$225,000; sprinkler system, \$30,000; tank and street mains, \$15,000; electrical layout, \$7,000; equipment, \$15,000; paving shed and wharf deck, \$30,000; street improvement, \$60,000; tracks, \$15,000; administration and engineering, \$17,000; total, \$114,000. Harbor Boulevard estimates: Thinn's Point excavation, \$98,000; Fourth street to Fourteenth street, excavation, \$25,000; Palos Verdes to Fourth, 145,000 yards at 30 cents, \$43,500; Harbor Boulevard paving, 600,000 square yards, at 20 cents, \$120,000; Thinn's Point viaduct, 2000 feet, at \$75

\$150,000 moving library, grading, etc., \$13,000.

APARTMENT HOUSE—2 story and base, brick, \$17,000. Los Angeles, Cal. Architects, R. D. King and E. C. Taylor, Consolidated Realty Bldg., L. A. Owner, E. A. Sheddoy. The building will be erected on a site covering an area of 50 by 130 feet. First floor will contain three stores besides the entrance to the apartments. There will be 40 rooms divided into 14 suites on the second floor. Plans provide for steam heat and a hot water system. All suites will have well beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Interior finish will be of pine. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are being prepared. The work will be done by Day Labor.

CHURCH—1 story and base, brick. Cost not stated. Hollywood, Los Angeles Co., Cal. Architect, Frank T. Kogley, Consolidated Realty Bldg., L. A. Owners, Hollywood Presbyterian Church. The design is in the classic style. Main auditorium will have a seating capacity of 400 people and the lecture hall 250. Besides these rooms plans show a pastor's study and social rooms. There will be a central heating system, art glass windows and pine trim. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HOTEL—12 story and base, Class A construction, \$300,000. Los Angeles, Cal. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne H. Carter. The building will be erected on the east side of Spring street between 2nd and 3 avenues covering an area of 60 by 158 feet. There will be two stores and the lobby on the first floor and a total of 245 guest rooms on the upper floors. Nearly all rooms will have private baths. Construction will be of the reinforced concrete type with exterior walls faced with pressed brick and terra cotta. Floors and roof slab will also be of reinforced concrete. Interior partitions will be of hollow tile. There will be steam heat, two elevators and a vacuum cleaning system. Plans are nearly complete and figures will be called for shortly.

ORIENTAL BUILDINGS Frame construction, \$125,000. San Diego, Cal. Architect, Frederick Heinlein, Lissner Bldg., L. A. Owner, Oriental City Exhibit Co. The Oriental City exhibit at the San Diego Exposition will house exhibits from practically every country of the Orient. The project has been financed by Prince Hadji Tahar, and work will begin early in the new year on the construction. The principal features of the group will be an Oriental and European cafe, an Algerian theater, and a large Hindoo temple, two stories high, with plaster and metal lath walls, cement foundation, and tile roofs. There will be a main entrance finished in marble and tile, and a large amount of hardwood finish.

FACTORY—6 story and base, reinforced concrete. Cost not stated. Los Angeles, Cal. Architect, none. Owners, F. O. Pfaffman and William F. Schiffel. These men have purchased a site covering a large area at the corner of Pico Boulevard and Featherston

avenue and will start construction of the first unit of a food products plant within three months. The first building will be but one story high and will cost about \$50,000. A large amount of special equipment will be required. Details of the project are being handled by The Merchants' Realty Co., Van Noy Bldg., L. A. Further mention will be made of this work.

Contracts Awarded.

RESIDENCE—2 story, attic and base, hollow tile construction, \$75,000. Beverly Hills, Los Angeles Co., Cal. Architect, W. J. Dodd, 945 South Los Angeles street, L. A. Owner, J. M. Danziger. Contractor, Frank Hudson, Higgins Bldg., L. A. Contract price, \$75,000. Note—Subfigures are now being taken on electric work, plumbing fixtures and finish hardware.

CHURCH—1 story and base, frame and artificial stone, \$20,000. Los Angeles, Cal. Architect, W. H. Slack, 617 South Evergreen street, L. A. Owners, Lucile Heights Methodist Church. Contractor, W. H. Slack, 617 South Evergreen street, L. A. Contract price, \$20,000.

PORTLAND AND OREGON.

SCHOOL—2 story and base, brick, \$55,000. Corvallis, Oregon. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Corvallis School District. Only preliminary plans have been prepared and it has not been decided how many class rooms will be included in the building. Plans are being prepared so that the structure may be erected on the unit system, only one unit being completed this year. The entire project will include sixteen class rooms, auditorium and laboratories. Construction will be fireproof. Exterior of the building will be faced with pressed brick. Plans will include steam heat, program clocks and a vacuum cleaning system. Further mention will be made of the work as the plans progress.

DOCK AND BULKHEAD CONSTRUCTION—Cost not stated. Portland, Ore. Engineers, Harbor Commission, Portland. Owners, City of Portland. Plans and specifications for a bulkhead to be built in connection with Public Dock No. 1 at the foot of 15th and 17th Sts. are now being prepared in the office of the Public Dock Commission and will be completed within a few days, when bids will be called for. Plans are also completed for the proposed East Side Dock to be erected between E. Oak and Washington Sts. This will be similar in design to the dock now under construction on the West Side by the Lewis & Clark Co. It will be 525 feet long and will be of concrete and mill construction. Bids will be called for about January 10.

SEATTLE AND WASHINGTON.

HOTEL—4 story or more, Class A construction, \$750,000. Seattle, Wash. Architect, A. Wickersham, Lyon Bldg., Seattle. Owners, Yoster Estate. The building will be erected at the corner of Yoster Way and Post street covering an area of 65 by 178 feet. Only preliminary plans have been prepared and details of the construction can not be given at this time. The first floor will contain stores besides the hotel lobby

and offices. The preliminary plans show a total of 100 guest rooms, the largest proportion of which will have private baths. There will be steam heat, elevator service and modern equipment throughout. Exterior of the building will be faced with pressed brick. Construction will be fireproof. Further mention of this work will be made as the plans progress.

LIBRARY—2 story and base, reinforced concrete, \$25,000. Olympia, Wash. Architects, Blackwell & Baker, Northern Bank Bldg., Seattle, associated with J. H. Wohleb, Talcott Bldg., Olympia. Owners, City of Olympia. A selection of the competitive plans presented has just been made. The building will be designed in the classic style and will contain two large reading rooms, children's room office and stack room. Construction will be fireproof. Interior will be finished in pine and hardwood. There will be steam heat, metal window sash and frames and a vacuum cleaning system. Exterior of the building will be faced with cement plaster and pressed brick. Working drawings are being prepared.

OFFICES—4 story and base, Class A construction, \$500,000. Seattle, Wash. Architect, William Kingsley, Empire Bldg., Seattle. Owners, Times Publishing Co. This work was reported in these columns over a year ago when it was first announced that the Seattle newspaper would build. The site at the intersection of Westlake, 1th and Stewart streets is now being cleared and the architect states that specifications are nearly complete for the new building. There will be a complete steel frame, reinforced concrete walls and floors. Interior partitions will be of hollow tile and metal lath and plaster. Interior finish will be of pine, hardwood, marble and metal trim. Plans provide for steam heat, elevator service, mail chutes and a vacuum cleaning system. Metal window sash and frames and patent store fronts are also specified. Exterior of the building will be faced with pressed brick and terra cotta. Bids will be called for shortly.

Contracts Awarded.

BRIDGES—2 steel construction. Cost not stated. Tacoma, Wash. Engineer, A. R. Cook, Chief Engineer Northern Pacific R. R. Co., Tacoma. Owners, Northern Pacific R. R. Co. Contractor, Widell Co., Mankato, Minn. Contract price 15th street bridge, \$150,000, 21st street bridge, \$100,000.

LAW IS THE FOUNDATION OF SUCCESS IN ANY BUSINESS OR PROFESSION.

Striped of its technicalities, law is the theory and practice of human relations and human conduct. It is evident, therefore, that law concerns you because it governs and controls your business, your social, and your political life.

All the acts and undertakings of your life, whether in the conduct of your business, the regulation of your domestic affairs, the performance of your public duties, or your personal conduct as a member of your community, involve questions of law.

It is one of the peculiar anomalies of life in America, where the citizen assumes the responsibilities of government, that our educated classes devote

When you want a particular Job finished use the WYBRO Panels. Don't experiment with inferior makes which cost fully as much and may be of doubtful quality.

WYBRO Panels are always the same---they are everlastingly good.

valuable years to the study of Latin, Greek, and other classical subjects which have only an indirect value and remain in astounding ignorance of the simplest principles of American law, which directly and vitally affects them at every turn of their careers. This situation is due to the old idea of education, now rapidly being discarded, that it was an accomplishment, a matter of scholarly attainment, a mark of personal distinction, something for the gifted few, and had little to do with the practical, daily requirements of the many. While not depreciating the value of the classical studies, there is a general disposition today to recognize the immediate importance and practical value of an education comprising subjects found closer to the lives of the people.

Recent economic developments have emphasized the necessity and importance of a knowledge of law, and there never was a time in the history of the world when so many people were studying law for its business, social, political, and general advantages and benefits, without any intention of practicing law, as there are today.

It is a notable fact that the number of law students is greatly increasing each year, and statistics show that a larger percentage of the students attending the resident universities have no intention of practicing, but are taking law as one of the chief essentials of a liberal business education.

This is attributable to the fact that most of the students attending resident universities are sons of successful business men-men who have been handicapped in their struggles for success by an insufficient knowledge of law and who are determined to give their sons the advantage of the legal training which they lacked. They realize that whereas they managed to pick up a working knowledge of law through costly experience, conditions have changed, and if their sons are to continue their successes, it is absolutely essential that they begin their business careers with a knowledge of law.

Why the Business Man Needs to Know Law.

The development of the modern corporation, accompanied by endless legislation for restriction and regulation, enacted by both federal and state governments, has brought about a condition epitomized in a phrase by J. P. Pierpont Morgan, who says: "The greatest risk in business is legal risk."

The pathways of commerce are strewn with wrecks of business enterprises which ran counter to the law.

Business sharps and crooked promoters have fattened on the legal ignorance of honest, successful business men. Many a partner has been ruined financially through not understanding the law of partnership. Millions of dollars are charged to Profit and Loss annually on account of ignorance of the law of credits and collections. Business expectations are shattered and fortunes dissipated everywhere because of invalid contracts. Trade advantages are sacrificed and heavy advertising investments lost, due to inact and inadequate knowledge of the law pertaining to patents, trademarks, copyrights and unfair competition.

Every live business man today realizes, as never before, the urgent necessity of having exact and reliable legal knowledge covering every phase of modern business, easily and instantly accessible without incurring heavy, constant expense for legal services. The great complexities of state and federal laws make this an imperative need in every business, large or small.

Every man is presumed to intend the legal consequences of whatever he voluntarily does. All his business transactions, therefore, comes within this rule and, since every business transaction is governed or controlled by some principle of law, it follows that no business can safely proceed unless guided by a thorough understanding of the principles of law.

Current business problems are so interwoven with legal problems that the study of law is today, as never, regarded as the best possible training for business. The hiring of labor, making of contracts, selling of goods, signing of notes, and all the common commercial transactions require a practical working knowledge of law. A smattering of legal knowledge, gained through experience and therefore promiscuous and unorganized, no longer suaves in an epoch when the ranks of business are so rapidly being filled with men of trained legal minds.

The business man, by reason of his mature mind, his experience, his knowledge of affairs is particularly adapted to understand law with facility when properly presented to profit in mental discipline and development, and to increase in general business efficiency by a study of law.

General Managers, Department Managers, Treasurers, Secretaries, Credit Men, Auditors, Sales Managers, Advertising Managers, Foremen, Superintendents, Chief Engineers, Architects-all men occupying important executive positions

615 Phelan Building, San Francisco

and all men wishing to increase their business ability - will find that the special course offered by the Business Men's Law College of San Francisco is well adapted to their needs and worthy of their most serious and immediate consideration.

Run over in your mind the big men in public life today - Wilson, Bryan, Roosevelt, Lodge, Hughes, Beveridge, LaFollette, Root, Taft, Gompers, Mitchell, Larrow, and host of others-all of these have studied law. Go back a little in our history and call over the names of those who have left their stamp upon the age in which they lived and have moulded the destiny of our nation-Alexander Hamilton, John Marshall, John C. Calhoun, Andrew Jackson, Daniel Webster, Henry Clay, Abraham Lincoln, James Garfield, William McKinley-these again all studied law.

Few, indeed, of these famous men ever had the good fortune to study in a resident university. Some of them picked up their knowledge of law by reading a few borrowed books after a hard day's work; some, while sweeping out a lawyer's office; some studied a short time in school and then had to finish their education as best they could while making a living; some graduated from the university of hard knocks; yet they all made good; they had ambition, the divine discontent, the determination to succeed. Have you?

LABORATORY ASSISTANT (MALE).

January 21-22, 1914.

The United States Civil Service Commission announces an open competitive examination for laboratory assistant, for men only, on January 21 and 22, 1914. From the register of eligibles resulting from this examination certification will be made to fill vacancies in this position in the Bureau of Standards, Department of Commerce, Washington, D. C., at salaries ranging from \$900 to \$1,200 a year, and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The Bureau of Standards is engaged in research and testing of weights and measures, standards, measuring instruments, and materials. The work is similar to that in the better class of industrial and scientific research laboratories. Experience has shown that the probability of appointment of qualified eligibles is excellent. Advancement is through a series of graded

drawers somewhere in an attic. There, inches deep in dust, Professor Bolton found the annual reports for a hundred years of missions scattered far and wide over the Southwest, for it was from the College of the Holy Cross that the young apostles had been sent out to explore and Christianize the northern provinces of New Spain, from Texas to California.

This book of Professor Bolton's is not for popular consumption. It is not something to sit down and read for an account of Mexican-American history, but a vast mass of information as to the whereabouts and nature of the scores of thousands of documents recording the history of the Southwest which Professor Bolton has discovered in scores of different national, state, municipal, and ecclesiastical repositories in Mexico.

He is a pioneer blazing a trail into a vast forest. Generations of historians to come will follow his footsteps, and through long years of toil will make available for the world's knowledge the treasures whose existence he has revealed.

REPRODUCTION OF YELLOWSTONE AMONG THE WONDERS OF THE EXPOSITION.

SAN FRANCISCO, CAL., Dec. 26th.—"A million dollar impression of Nature's millionaire wonders of the Yellowstone," is Frederic Thompson's delineation of the great Yellowstone Park concession just granted the Union Pacific System by the Committee on Concessions and Admissions of the Panama-Pacific International Exposition.

That the reproduction of the famous Government Park on a scale commensurate with the Exposition requires the skill of a genius, is evidenced by the preparations for this stupendous attraction.

Mr. Thompson, the originator of Luna Park on Coney Island, The New York Hippodrome, "Toyland" at the Exposition, and a score or more wonderful attractions, wrote the scenario and designed the new Yellowstone Park spectacle.

The Union Pacific System has secured a space 150x610 feet and the artificial production of one of Nature's wonders will be worthy of that railroad. The Yellowstone Park concession is to be located at the Van Ness Avenue entrance to the amusement district. In conjunction with the Geyserland Spectacular and Great Falls, old Faithful Inn will be reproduced on an eminence three hundred feet high and overlooking the famous Valley. This will not be a hotel, but an immense restaurant, private dining rooms and quarters for a club house for the Union Pacific System.

A preliminary study for the plans of the Inside Inn, the greatest bustery that will be maintained within the walls of the Panama-Pacific International Exposition, has been made by Architect Edward T. Foulkes of San Francisco who has designed a stately structure ample for the accommodation of about twenty-five hundred persons. It will surmount a terrace beneath which is to be a band stand. The terrace and its approaches are the design of E. P. Company of the Exposition's Department of Architecture. The curbs have been installed

throughout the big district of the Exposition grounds assigned to the pavilions of the foreign nations and States of the American Union. The roadways are nearly completed and are being smoothed and pressed by big steamrollers. The road beds are of crushed rock, a part of the general scheme of color of the Exposition.

Eight, out of the eleven main exhibit palaces are roofed and walled to a greater or less degree. The Palace of Machinery is completely roofed, and walled and is now receiving the finishing touches of its stucco covering and other details. The Palaces of Mines and Metallurgy, Varied Industries, Manufactures, Liberal Arts, Education, Food Products, and Agriculture, are in various stages of roofing and walling, and are receiving their stucco covering.

The steel frames of the Palace of Fine Arts are now being fabricated in the East and will begin to arrive in this city by January 15th next. The foundation and flooring of the Palace are being laid at the present time. The Palace of Fine Arts will be a fireproof Class "A" structure, its body built of steel and concrete. It will be temporary with a wooden foundation, as it must be removed at the close of the Exposition as its site is upon the United States Military Reservation.

The first frame of the Palace of Transportation has been erected and the flooring for this building has been completed. The total cost of the Palace of Transportation will be \$481,677 making the most costly of the eleven exhibit palaces except the fireproof Palace of Fine Arts (\$580,000) and the great Palace of Machinery (\$659,665). Its floor area is 314,000 square feet.

The dictaphone has been installed as the official dictating machine of the Panama-Pacific International Exposition. A contract has just been entered between the Exposition Company and the Columbia Graphophone Company whereby the latter are to completely furnish the different divisions of the Exposition with dictaphones.

Many of them have arrived and the stenographers are rapidly learning to operate them. The dictaphone in use in the Exposition offices is the latest model, and it is being used to advantage.

It is planned to secure for permanent record, speeches delivered by Commissioners and distinguished visitors to the Exposition. This will be done by having them dictate their speeches or messages on a cylinder, which will be kept, and later made a part of the Columbia Graphophone Company's exhibit at the Exposition.

W. S. Gray, Pacific Coast Manager of the Columbia Graphophone Company, declares that the exhibit of the graphophones and dictaphones in the Palace of Liberal Arts will be a remarkable one. It is their plan to have an exhibit that will show the whole process of making the machines and records.

PATENT ALLOWED ON BRICK CLEANING INVENTION.

McRae Bros., Empire Bldg., Seattle, have received notice from the patent office at Washington, D. C., that their claim for patent on a brick cleaning machine invented by them, has been examined and allowed.

The machine is simple in mechanism and can be used by from 1 to 6 men, according to the size of the job. Each carborundum wheel which operates on a shaft, which can be lengthened or shortened, according to the number of men working, will clean about 7,000 brick per day in comparison to about 2,500 brick, the capacity of a good hand brick cleaner.

The cement and mortar which is removed by the grinding wheels, leaving a perfectly clean brick, is taken up by a suction fan which draws it into a reservoir where a fine spray reduces it to a thin slush and is carried off through the bottom of the apparatus. A 10-h. p. motor will operate a 3 man machine.

OIL PROSPECTS ON QUENILT RESERVATION.

United States Geological Survey Makes Investigation of Petroleum and Natural Gas Possibilities on Indian Lands.

Consistently watching over the interests of its wards, the Quenilt Indians of Washington, the Government has just completed a field examination of the oil and gas prospects on the Pacific Slope of the Olympic Peninsula. The investigation, which was a reconnaissance, was made by the United States Geological Survey in behalf of the Office of Indian Affairs, and in view of the necessary delay incident to the preparation and printing of even a brief report and maps, the Geological Survey has immediately issued a short advance statement regarding the surface indications of oil and gas noted by the geologist who examined the region. The report itself, which will be published within a few months, is being prepared by the Survey for the Indian Office and will contain all the information obtained during the examination of the Quenilt Indian Reservation and the adjacent lands having reference to the presence of oil or gas.

The Survey geologist who made the examination, C. T. Lupton, collected samples of oil at only two prospects, and analyses of these samples by the Survey show a paraffin oil of very high grade. Mr. Lupton found some drilling in progress, but no oil has yet been struck in commercial quantities. Gas vents were also noted and several anticlines which may serve as reservoirs for oil and gas. These will be described in Mr. Lupton's printed report, to be issued later. The indications are stated to justify a reasonable expectation that petroleum and natural gas may be present in paying quantities, but their existence in this locality can be proved only by drilling.

SACRAMENTO'S WATER SUPPLY.

Shows Large Profit and Lowest Rates.

By Edward P. E. Troy.

Sacramento has always owned its water system, commencing in 1851. In the beginning, the water was pure and clear; but farming, mines and towns situated on the stream have polluted the water. Today it is disagreeable in appearance, and dangerous to drink. This water can be purified at a low cost, and thus give Sacramento the

softest and best water in California for domestic and manufacturing purposes.

The United States Census has shown more deaths from typhoid in Sacramento and Fresno than elsewhere in California. Pure water would remove this cause from Sacramento's vital statistics; it would save the lives of hundreds of children, as resulted in Portland from the use of the pure Bull Run water. Sacramento has grown in spite of its bad water and poor street-car service.

A committee of patriotic citizens, thirteen years ago, after a careful investigation, recommended the purifying of the present supply. Three years ago, Engineer Hyde made the same recommendation, after studying all other sources. For more than twenty years corrupt banking interests have succeeded in preventing the improvement of this water, and used every endeavor to get control of it.

Sacramento has reached the limit of its pumping plant. Fire and Water Engineering of last September publishes the valuable report of Chief Engineer Elhert. It shows that August 16 last 18,885,850 gallons were pumped, and says that during that month it was impossible to keep the fire pressure of sixty pounds on the mains during irrigation hours.

The mains are now to be extended to annexed districts, adding 30,000 consumers to the system. This will cause an average demand for 23,100,000 gallons daily or 22 per cent more than the capacity of the works. The day of highest demand will call for 28,900,000 gallons, or 53 per cent more than the pumping capacity. There is grave danger of a shortage of water in Sacramento this summer.

The plant is economically conducted, and its charge for water are the lowest in the State. The unpublished report of the City Auditor shows receipts for 1912 of \$175,851.53. Chief Engineer Elhert's report shows total expenses of \$59,030.37, leaving a profit of \$116,821, or 66.1 per cent of the receipts. The profit for the past fifteen years exceeds \$1,000,000. Evidence of the ability and efficiency of Engineer Elhert's management may be found in the plant pumping nearly one billion more gallons of water last year than in 1909, and yet the cost of operation was \$9,000 less than four years ago. Even the consumption of fuel oil was twenty per cent less than in 1909.

The pumping of 308 gallons per capita per day shows excessive waste of water. The mud and grit it cuts the valves of faucets, causing them to leak continually. In other valley towns the consumption averages 150 gallons. In San Francisco it is but 80 gallons. A purification plant can be provided at a cost of less than \$700,000. Its maintenance, operation, interest and other charges can easily be paid out of the present profit of the plant, so the rates need not be increased.

If Sacramento does not solve its water question in the near future a new city, using filtered purified river water, may grow up on the west bank of the Sacramento River that will soon equal it in population. New, progressive towns have eclipsed old-world cities frequently in our country as well as in the old world.

PRESIDENT TO PRESENT CUP FOR 1915 YACHT RACE.

SAN FRANCISCO, Calif., Dec. 12th.—President Woodrow Wilson has notified the Exposition that he will give a cup for the twelve meter International Yacht Race to be held on San Francisco Bay in April 1915. Two entries have been received thus far for the event. Sir Lipton having declared his intention to compete and a syndicate of local yachtsmen headed by Thomas L. Miller, President of the West Coast Life Insurance Company. Other entries are looked for, from not only European countries, but from all over the United States. The twelve meter boat is to be built under the International rules.

Visitors attending the Panama-Pacific International Exposition in 1915 will not be charged excessive prices for their meals, if the San Francisco Restaurants Men's Association can prevent it. This Association has gone on record as being opposed to exorbitant charges at any time, and particularly during the Exposition period.

In the preamble to its constitution, recently adopted, the Association announces, among other beneficent purposes of its organization, that it is formed "to promote the civic and commercial welfare of the City and County of San Francisco by making adequate provisions for the reception for the many visitors incident to the Panama-Pacific International Exposition, and to use every means to prevent the charging of exorbitant prices by restaurants and cafes during the holding of the Panama-Pacific International Exposition in 1915, and to prevent as far as possible unjust and unreasonable charges for services and food."

The Association declares that it will "do all things within its power to aid in the movement looking toward the lowering of the cost of living. The leading restaurants and cafes of San Francisco are included in the Association, and they do not wish to be included among those who may anticipate killing the goose that lays the golden egg in 1915.

One of the most interesting of the numerous engineering novelties that will be included in the equipment of the Panama-Pacific International Exposition in 1915 will be the new nitrogen-filled electric lamp, developed by Dr. Irving Langmuir of the research laboratory of the General Electric Company at Schenectady, New York. This lamp will be used for the first time in general useful practice in the standard lighting in all the small courts of the Exposition, and throughout the Court of the Sun and Stars including the fountains in that great Central Court. The lamps will vary in candle power between 125 and 2500 and there may be as few as five as 5000 candle power.

The tubes of the lamps are filled with nitrogen to increase their efficiency. For this reason, they have been made extremely thin, producing lamps of greater efficiency than the ordinary tungsten lamps. For a long time it was found impracticable to improve the lamps more than ten to twenty per cent by various means, corresponding to a possible improvement in efficiency of only a few per cent per watt per candle. The tungsten filament of the tungsten lamps, however, invented by a Swiss chemist, has

been 2 of a watt per candle, for beyond that figure the bulb blackened.

Work is progressing rapidly upon the Palace of Fine Arts at the Panama-Pacific International Exposition. This will be the only one of the main exhibit palaces that will be wholly fire-proof, its material being steel and concrete, to prevent the destruction of the priceless art treasures it will contain. The foundation, however, will be of wood, and large quantities of this lumber are now arriving at the Palace's site by train over the Exposition's own standard gauge railway tracks, which lead from the ferry slips and docks directly into the exhibit palaces.

The convenience of this railway is appreciated everywhere on the Exposition grounds, but nowhere more, at present than about the Palace of Fine Arts, which is the westernmost of the main exhibit palaces, being located at the Presidio military reservation, the land of which was loaned by the Government to the Exposition. Its steel frames are being fabricated in the East.

CALIFORNIA'S RANK AS A MINERAL PRODUCER.

California, first among the states west of the Mississippi and fifth among all the states in the total value of its mineral production, rests its principal claim to distinction as a mineral producer on its output of petroleum. In this it leads all the other states, as does Pennsylvania in the production of coal. The total value of the mineral production in 1912, according to Edward A. Becker of the United States Geological Survey, was \$92,837,371, an increase of \$2,016,726 over 1911.

In the quantity of petroleum produced California is credited with nearly 10 per cent of the total output of the United States. The gold produced in California holds second place in the mineral production of the State, and first place among the states. Petroleum and gold represent about 42 and 23 per cent respectively of California's mineral output.

Next to gold, the principal metal product of California is copper, the production of which decreased from 26,260,706 pounds in 1911 to 23,451,672 pounds in 1912, but the value increased from \$1,529,517 to \$5,519,526.

In addition to being first in the production of petroleum and gold, California is also the premier producing State in asphalt and quicksilver and enjoys a monopoly in the production of bauxite and magnesite, the combined value of these substances being over \$4,000,000. The other mineral products of commercial importance in California are boron, bismuth, coal, feldspar, fuller's earth, gem materials, gypsum, infusorial earth, iron ore, lime, manganese, mica, mineral paints, mineral waters, sodium borate, pyrite, quartz, celestine, rock salt, sand and gravel, sandstone, soap, sulphuric acid, soda and sodium concentrates.

FIVE GREATEST MINERAL STATES.

Penn., in gold, Illinois and West Virginia are credited with over one-fourth of the total mineral production of the United States. Pennsylvania ranks first among the states in nearly every one of the West Virginia comes second, Illinois

nois third, and Ohio fourth. California, with no standing as a producer of pig iron, iron ore, or coal, stands fifth in rank among the States, owing to its heavy production of gold and petroleum.

SEARCH FOR POTASH DEPOSITS.

Field work undertaken by the United States Geological Survey in the search of potash has heretofore been largely of an exploratory character, according to the annual report of the Director recently made to Secretary Lane, but during the last year important principles have been established which will be of material assistance in future work. During the year a number of shallow drill holes were sunk in some of the prehistoric lake basins in Nevada and California, and a careful study was made of some of these lakes. Some of these experiments are yielding significant and perhaps important results. When areas that may prove to be of value as sources of potash are discovered, the public land included in such areas is withdrawn from entry until its value for potash can be demonstrated or disproved. As a result of the Survey's reconnaissance examinations in California and Nevada, 133,829 acres have been included in potash withdrawals.

HASTE URGED ON BUILDING.

The Portland Chamber of Commerce is sending to civic organizations in all parts of the United States copies of a resolution passed by it urging that pressure be brought to bear on Congress to hasten work on 734 Federal building projects held up by the rush of work in the office of the supervising architect of the Treasury Department, the appropriations for which were passed by Congress years ago. The resolution mentions the fact that the Treasury Department is trying to hasten action in a bill before Congress providing for more help in the architect's department. Astoria, Roseburg, The Dalles and other cities of Oregon are among the number waiting for postoffices. The Portland postoffice bill carries a special clause allowing employment of outside architects.

FOREIGN TRADE OPPORTUNITIES.

[Where addresses are omitted they may be obtained from the Bureau of Foreign and Domestic Commerce, Washington, D. C. In applying for addresses refer to file number.]

CORRESPONDENCE WITH CONSULS.

The suggestion is made that all communications to consular officers be addressed

The American Consul,

At _____,

the name of the office not being given. Any communication so addressed will be opened and attended to by the person who happens to be in charge of the office. If addressed to the consul by name, it might be forwarded to him unopened, should he be absent, and delay would thus result.

Consuls are requested to contribute to this department, and in doing so should in each instance state in what

language correspondence should be conducted.

No. 12066. Machinery and allied lines.

—A firm of agents and merchants in the United Kingdom informs an American consulate that it is desirous of obtaining agencies for American manufacturers of machinery and allied lines, who are not at present represented in the region in which the firm does business.

No. 12067. Bee keepers' supplies.—A report from an American consul in Ireland states that a local business firm desires to be put in touch with American manufacturers of bee keepers' supplies. Bee sections are specially mentioned, and the firm wishes quotations submitted for delivery and also f. o. b. New York or Boston.

No. 12068. Leather.—An import agent in a European country, dealing in leather, informs an American consular officer that he would like to hear from American manufacturers of leather, especially glazed kid, who are not at present represented in the country in question. Correspondence may be in English, and quotations, which should be for goods f. o. b. New York, Newport News, or Galveston, may be in American money. The inquirer furnishes bank references.

No. 12072. Lead and iron pipes.—An American consul in Italy reports that a local firm is desirous of receiving catalogues and price lists from American manufacturers of lead and iron pipes; for the smaller sizes samples would be welcomed. The buyer at present is importing from England, France and Continental Italy, paying cash on delivery of goods, for which a discount of 2 to 3 per cent is allowed. Correspondence may be in English, and prices should be quoted if possible, f. o. b. an Italian port.

No. 12073. Railway construction and supplies.—An American consul reports that the construction of a railway is shortly to be undertaken by a foreign Government. It is estimated that about \$10,000,000 United States currency will be needed for the completion of the road. It may be possible for American firms to secure orders for a share of the materials needed in the construction of this line. Copy of the complete report may be obtained from the Bureau of Foreign and Domestic Commerce.

No. 12055. Cranes.—The Swansea Harbor Trustees, Swansea, Wales, invite tenders for the supply, delivery, and erection in situ complete of three portable hydraulic or alternatively electric cranes, with fixed jibs, and also three portable hydraulic or alternatively electric cranes, with jibs fitted with compensating luffing gear. Instructions to bidders, contract, specifications, and conditions may be obtained upon application to the harbor board.

No. 12063. Locomotives.—The American consul at Lourenco Marques, South-east Africa, reports that the Direccao do Porto e dos Caminhos de Ferro de Lourenco Marques desires tenders for the supply of three heavy-goods locomotives. Copies of the conditions under which these locomotives must be supplied accompanied the report and may be obtained from the Bureau of Foreign and Domestic Commerce. All proposals must be submitted by January 23, 1914.

No. 12061. Automobiles.—An Ameri-

can consular officer in a European country reports that the proprietor of an automobile agency in his district would like to secure the agency of a good American automobile firm not now represented in the country in question. The inquirer has been established in business since 1905 and is said to possess a very important establishment.

No. 12065. Lamps, bolts and nuts, cake mixers, and wringers.—An American consul in England writes that a local trade paper in a recent issue contained inquiries for the names of American manufacturers of angle cake mixers, and wringers. Communications should be addressed to the publishers of this journal.

lamps, bright galvanized bolts and nuts.

No. 12236. Refrigerating plants.—An engineering and supply company in Canada, which furnishes references, informs an American consular officer that it desires to be put in touch with American manufacturers of refrigerating plants suitable for dairies, butcher shops, hotels, apartments, and domestic purposes. This company states that it has received numerous inquiries for plants of this kind.

SANITARY PLUMBING DEVICE.

A New Invention and a Modern Improvement.

So great has grown the demand for the most modern Sanitary device, known as the "Forster" Sanitary Water Closet Waste Connections, that the Forster Bros. Mfg. Co. are now increasing their supply of fittings as the large number of orders already received points to an overwhelming demand for 1914.

The above invention is one of the best improvements in Modern Plumbing. Architects, Builders and Owners are now demanding these connections, because they know that every feature of each product has proven thoroughly practical and efficient in the up-to-date U. S. Government buildings, Municipal buildings, Public School buildings, Apartment houses and residences.

CALIFORNIA'S HIGH MOUNTAINS.

The State of California has 70 named mountain peaks and 60 or more unnamed mountains, a total of at least 130, whose altitudes are greater than 12,000 feet above sea level. Twelve of these are 14,000 feet or more high. The highest is Mount Whitney, which is also the highest peak in the United States, with an elevation of 14,501 feet. Mount Williamson is the next highest, 14,384 feet. The elevation of Mount Shasta, probably the third highest peak in the State, has not been determined exactly, but it is generally credited with being about 14,350 feet high. Other mountains attaining more than 14,000 feet are South Peak of White Mountain, North Palisade Mountain, Mount Russell, Split Mountain, Middle Palisade Mountain, Mount Langley, Mount Muir, Mount Tyndall, and Mount Barnard.

REMOVAL NOTICE.

THE FIRESTONE & ROOFING CO. have moved their offices from the Mutual Bank Bldg. to 971 Howard street, between 5th and 6th streets. Their factory is also located at this address.

A Perfect Ironing Board

"Disappears in the Wall"

The price of the regular sized Ironing Board, including cabinet, large and small ironing boards and doors with hardware is
\$7.50

PEERLESS IRONING BOARD
 SHOWING CABINET
 SET IN PARTITION
 CASED UP

THE PEERLESS IRONING BOARD is a marvel of compact convenience for apartments, flats and residences. It is out of sight and out of the way when not in use. The cabinet is built in the wall and the ironing board is rigid and firm. It cannot be knocked over or upset.

The Peerless Combination Ironing Board and Kitchenette Table combines the ironing board with a disappearing table in the most compact and convenient form. They are so inexpensive and unusually convenient that no new apartment, flat or residence can afford to omit them. Write for circulars giving full description.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.
